September 6<sup>th</sup> - September 7<sup>TH</sup>, 2017

Day Shift 0700 - 2000 Night shift 1800 - 0700

0700 Day Operations Briefing 1800 Night Ops Briefing 1830 Planning Meeting

9			

	Incident Name	2. Date Prepared	3. Time Prepared
ICS 202	Eclipse Complex	09/05/2017	1700
4. Operational Period			
September 6 <sup>th</sup> - 7 <sup>th</sup> , 2017	Day / Night Operational Period 07	00-2000 / 1800-07	00
5. Leaders Intent & General C	ontrol Objectives for the Incident (inclu	ude alternatives)	

LEADERS INTENT: Suppress the Fires in the Eclipse Complex utilizing strategies such as: confine, contain, point protection and monitoring in wilderness while mitigating exposure and protecting values at risk.

### **Management Objectives:**

- Ensure safety of emergency responders and the public by utilizing risk management processes, & implementing strategies & tactics that have a high probability of success, stop, think, talk, then act.
- Protect and minimize undesirable fire & suppression effects to natural and cultural resources by using Resource Advisors, using MIST in wilderness, and using the right resources in the right places.
- Provide structure protection for threatened structures, residences, ranches, cabins, & lookouts utilizing structure protection guidelines in the IRPG & established plans.
- Establish and maintain good relationships with local cooperators, stakeholders and public while providing accurate and timely incident information.

### **Suppression Objectives:**

- Keep the Oak Fire
  - Confined to the Siskiyou Wilderness & East of the 16N03 Rd.
  - o North & West of Hwy 96 to protect heritage, cultural & natural resources.
- Keep the Cedar within remote national forest, Red Butte Wilderness and east of Thompson Creek to protect heritage, cultural & natural resources.
- Branch IV Miller Complex (Abney Fire)
  - Mitigate structure threat & limit fire spread in the Seiad and Horse Creek area and minimize impacts to private timber lands.

### **CA-KNF-006098 Complex Fire Weather Forecast**

FORECAST NO: 32 NAME OF FIRE: KNF-006098-Complex

PREDICTION FOR: 0600-0600 UNIT: Klamath NF- Happy Camp RD

SHIFT DATE: 9/6-9/7 Wednesday and Wed Night SIGNED: /s/

TIME AND DATE Incident Meteorologist - John Franks IMET

FORECAST ISSUED: 2000 9/5/2017 Ryan Fliehman IMET (t)

### \*\*\*Red Flag Warning through 11pm Tonight for Lightning and Erratic Thunderstorm Winds\*\*\*

**WEATHER DISCUSSION:** Cooler and moister conditions will persist as remnants of tropical storm Lidia move closer to the region. Thunderstorms will be the main focus with the potential for lighting, gusty outflow winds and hit-and-miss showers. Thunderstorm potential continues into the overnight as waves of energy pivot around the remnants of Lidia and onto the complex.

### **WEATHER FORECAST FOR TODAY:**

**WEATHER:** Chance of showers and thunderstorms. Partly cloudy with areas of smoke.

**TEMPERATURES:** Highs 74-80 for ridges, low 80s in valleys. Cooler under thick smoke.

**HUMIDITY:** 30-45% morning, 28-38% by afternoon. Higher in smoke filled valleys 50-60%.

20 FT WINDS: \*\*\*Erratic Winds possible if thunderstorms occur\*\*\*

RIDGETOP – Light and variable early. Northwest 5-8 mph, gusting to 10-12 mph in the afternoon for western portion of complex. South 5-8 gust to 12 mph for eastern portion of complex.

**SLOPE/VALLEY** – Calm winds, Light downslope/downcanyon wind 1-3 mph in the evening.

HAINES INDEX: 3 LAL: 3 STABILITY/INVERSION: Weakening. Around 4000 feet.

### **WEATHER FORECAST FOR TONIGHT:**

**WEATHER:** Partly cloudy with a chance of thunderstorms. Cooler.

**TEMPERATURES:** Lows 63-68 on ridges, 51-57 in valleys.

**HUMIDITY:** Mid-slope and ridges: gradual recoveries through the night to 35-50% by morning. If

thunderstorms occur, brief 60% recoveries are possible.

Valleys: Good recoveries 65-75%. Along Klamath River 75-90%.

20 FT WINDS: \*\*\*Erratic Winds possible if thunderstorms occur\*\*\*

**RIDGETOP** – Light downslope 1-3 mph becoming southerly by daybreak.

**SLOPE/VALLEY** – Downslope/downvalley 1-2 mph.

HAINES INDEX: 3 LAL: 3 STABILITY/INVERSION: Weaker inversion ~3500 feet, developing after 21:00.

Thursday through Sunday: Moisture continues to stream into the region keeping the chance for thunderstorms in the forecast through Friday. The biggest concern will remain with the potential for gusty outflow winds and lightning strikes. Moving into the weekend, a warming and drying trend will be found as the system currently affecting the fire dives south and parks off the southern California coast.

### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 34	TYPE OF FIRE: Wildfire
FIRE NAME: Eclipse	OPERATIONAL PERIOD: Day/Night, 09/06/2017
DATE ISSUED: 09/05/2017	TIME ISSUED: 2000
UNIT: CA-KNF	SIGNED: ISI Kevin Hillard
	Typed/printed: Kevin Hillard

### **INPUTS**

### WEATHER SUMMARY: \*REFER TO IMET WEATHER FORECAST\*

Sky: Chance of showers and Thunderstorms, partly cloudy, areas of smoke

**Maximum Temperatures:** Highs 74-80 on ridges, low 80's in valleys, cooler under thick smoke **Minimum Humidity:** 30-45% morning, 28-38% by afternoon, 50-60% in smoke filled valleys **Winds (20'):** Ridgetops – Light and variable early, northwest 5-8 mph with gusts 10-12 mph

afternoon west portion of complex, south 5-8 mph gusts to 12mph eastern portion

Slope/valley - Calm, light downslope/downvalley 1-3 mph in the evening

LAL: 3 Haines Index: 3

### OUTPUTS

### **FIRE BEHAVIOR**

### GENERAL:

**Thunderstorm outflow winds** can result in fire spread in any direction. Areas of fire activity near ridgetops will be influenced by ridgetop winds. Otherwise fire activity sheltered from winds will be influenced by terrain and fuels. Due to dry fuels fire behavior should still be primarily surface spread enhanced by spotting from torching even with lower temps and higher RHs. Short crown runs still a possibility.

Rate of Spread: Timber/Brush/Heavy Down/Dead: 5-14 Chains per hour (head fire)

0.5-1 Chains per hour (backing fire)

Flame Length: Timber/Brush Heavy Down/Dead: 5-10 Feet (head fire)

1-3 Feet (backing fire)

Crown Fire Potential: Isolated to group torching. Crown runs possible where the fires are unshaded by

smoke or winds align with slope. Crown fire spread rates approximately 0.4 mile per hour.

Spotting Distance: 0-0.4 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

**Probability of Ignition:** Day 30-70%, Night 30-60% (model)

Rollouts: Watch for locations where rollout is set up for and uphill run

### SPECIFIC:

**Branch I:** Areas of heat on the north perimeter of Cedar expected to continue to spread into the unnamed drainage of Thompson Creek and have potential to cross both drainages and spread upslope. Expect fire to spread into the Middle Fork and Butte Fork of the Applegate River in the Red Buttes Wilderness.

**Branch II:** The low elevations of the branch are expected to remain smoked out under the persistent inversion and any spread will be influenced by terrain and fuels. Fire activity in the Boulder Peak area expected to continue with limited spread into the headwaters of the West Fork of the Little South Fork of Indian Creek. Growth to the south/southwest in the western section of the Branch is expected to moderate. Interior islands and fingers will continue to burn together.

**Branch III:** The branch could see less smoke today. Spread through rollout with upslope runs expected to continue in the South Fork of the Smith River on both sides of the drainage. Any new spots across the South Fork of the Smith River will spread upslope towards Blue Ridge. Northwest ridgetop winds should provide somewhat favorable conditions for burnout operations on Blue Ridge.

**Branch IV:** On the eastern perimeter, fire located on the higher ridgetops expected to spread to the southeast. Continued backing spread with rollout and upslope runs expected along the southern and eastern perimeters. Expect upslope surface runs where fire gets established low on slopes. South ridgetop winds should provide favorable conditions for burnout operations but RH recoveries low in the drainages may make it difficult for fire to carry.

### AIR OPERATIONS

There may be some clear air in Branch III. Otherwise expect heavy smoke and poor visibility as well as turbulent air near thunderstorms.

### **SAFETY**

Watch for thunderstorms and pay attention to winds they may be difficult to predict. Maintain good lookouts.

Task: Construct and prep line from the 16N02 Rd. to the GO rd.

Purpose: Create containment features on the western perimeter of the fire.

End State: Fire spread to the west into Big Flat is minimized.

### 7. Special Instructions:

Identify any suppression repair needs.

Backhaul all excess supplies, equipment, and trash.

Sensitive plant sites are identified with yellow/black striped flagging.

Avoid any ground disturbing activities in areas with orange/white candy stripe flagging.

### SAFETY MESSAGE

### September 6, 2017 Eclipse Complex

# Fire Weather Watch Wednesday for lightning and erratic thunderstorm winds!!!

### Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm. Situation Awareness Observe the 30/30 rule: If you see lightning and hear the thunderclaps follow in less than 30 seconds, take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

### Hazard Control:

- · Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- $\cdot$  If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- · Don't stay on ridge tops, in wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

### **INCIDENT SAFETY ANALYSIS 215a**

Eclipse Complex/ CA-KNF-6098 - Wednesday, September 06, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE Avoidance, Education, etc)
All	Driving & Traffic	~Drive with lights on. ~Do not use cell phone while driving. ~Slow down in smoke and congested areas. ~Check bridge load rating before using for heavy equipment; if in doubt, find another route. ~Slow down at night - expect animals in the road. ~Use spotter for backing. ~Wash windshield.
C,D,P,N,X,V	Line Constructions	~Conduct thorough briefing for all personnel (inside rear cover IRPG). ~Ensure LCES in place prior to engagement (IRPG p. 7). ~Establish adequate safety zones (IRPG p.8). ~Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). ~Utilize Risk Management Process (IRPG p.1). ~Utilize Downhill Checklist (IRPG p 9)
P,N,X,V	Extreme Fire Behavior	~Share weather observations with all personnel assigned to division• Review "Severe Fire Behavior Potential" (IRPG p.68).  ~Watch for inversion lifting  ~Monitor current weather conditions and forecasts  ~Make sure all personnel receive thorough briefings every shift.  ~Maintain adequate escape routes and safety zones advise all personnel if these are compromised or changed.  ~Set trigger points when appropriate.  ~Adhere to 10 Std Orders, mitigate 18 situations.  ~Maintain Situational Awareness
All	Heat Related Illness (HRI)& Dehydration	~Drink Fluids throughout operational period, up to 1.5 gallons per shift.
All	Steep Terrain & Rolling Debris	~Determine if the mission is necessary. ~Limit exposure by avoiding whenever possible. ~Use the proper resource. ~Post lookouts. Resources should not work directly above or below each other. ~Utilize fallers to clear hazard trees/snags
C,D,N,P,X,V	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG pages22-23 ~ Look up, down around for hazard tree indicators ~ Only fell and buck trees within your expertise, and training ~ Follow "Procedural Felling Operations" on page 79 in IRPG ~ Do not fall trees during high wind events
All	Air Operations	~Ensure that the mission is necessary. ~Observe weather minimums. ~Assign appropriate aircraft for the mission. ~Maintain good communications. Use ground contacts. ~Proper flight following. ~Use aerial supervision (air attack, Helco) ~Use discrete frequencies while utilizing aerial ignition.

### **INCIDENT SAFETY ANALYSIS 215a**

All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23     Post lookouts, or use a spotter in mop-up areas with personnel     Don't park vehicles or take breaks in high concentrations of hazard trees     Establish trigger points for disengagement during high wind events
C,D,N,P,XV	Heavy Equipment Operations	~Ensure communications are established with operators ~Make positive contact with operator before approaching. ~Use hand signals if other communications are unavailable ~Maintain a 50'-100' exclusion area around equipment ~Use a spotter when backing ~Close roads or trails if necessary for public safety. ~PPE including hearing protection. ~Maintain safe working distance from equipment
X,V,P,N Structure	Firing Operations & Devices	<ul> <li>Only personnel trained in the use of each device will be authorized to use firing equipment.</li> <li>Ensure all personnel are aware of firing operation that may affect them.</li> <li>Wear appropriate PPE.</li> <li>Ensure aerial/ground ignition plans have been adequetly developed and personnel are briefed.</li> </ul>
Structure	Structure Protection & HAZMAT	~ Review "Wildland Urban Interface Firefighting" pg 12-16 IRPG ~ Follow "HAZMAT Incident Operations" pg 32-35 in IRPG ~Monitor fire behavior adjust tactics as necessary ~Base all action on current and expected fire behavior ~Build contengincy plans to compensate for the unexpected
All	Communications	~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all your resources know frequency and protocol for contacting resources ~ Utilize the ICS 205. Brief others as needed, Communicate hazards to others, acknowledge messages, ask if you dont know
All	Smoke	~Drink pleanty of fluids to flush added toxins from you body. ~Rotate crews out of high concentrations of smoke when possible ~Utilize vehicle air conditioners selected to re-cycle with windows rolled up.
N,P,X, V, Structure	Night Operations	<ul> <li>Maitain high visibility in work area and wear vest while in roadway.</li> <li>Use glow sticks to mark hazards.</li> <li>Stay out of areas with bug killed hazard trees</li> <li>Watch for signs of fatigue</li> <li>Take breaks away from areas of known hazard</li> </ul>
X,V	ATV/UTV use	~Ensure equipment is inspected and safe to use.  ~Only qualified and State Certified operators may operate UTV's on the incident.  ~DOT helmets and full PPE are required. No exception for use of fire hard hats in lieu of DOT helmet requirement  ~Limit number of pasengers to the amount of seatbelts installed by the manuafacturer
All	Bees, Ticks, Spiders, Mosquitoes	~Be aware of crew members with sting alergies. ~Perform daily self inspection ~Use repellent as necessary ~Inspect tent and sleeping bags for spiders. ~Always look before placing hands in or on anything. ~Carry EPI kits if known to be allergic to bee stings.

### CIIMT 1 MEDICAL PLAN (ICS 206 WF)

Medical Incident Rep	
Use items one through nine to communicate si	
1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERG Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threa	ENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT" attening request designated frequency be cleared for emergency traffic.)
2. INCIDENT STATUS: Provide incident summary and command structure.	
- Nature of Injury/Illness Describe the injury (Ex: Broken leg with bleeding)_	
- Incident Name Geographic Name + "Medical" (Ex: Trout Meadow Medical)	
- Incident Commander (Division Sup. or designee) Name	
- Patient Care Name of Care Provider (Ex: EMT Smith)	
3. INITIAL PATIENT ASSESSMENT: Complete this section for each pt. This is	is only a brief, initial assessment. Provide additional pt. info after completing this repor
- Number of Patients: Male / Female:	
- Conscious?	
- Conscious: - FES - MC - MEDETAC: - Dicatil	ing? □ YES □ NO = MEDEVAC!
- Mechanism of Injury What caused the injury?	
- Location, Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'	
4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY	
4. SEVERITE OF EMERGENCE, INANSFORT FRIGRITE	
SEVERITY	TRANSPORT PRIORITY
□ URGENT-RED Life threatening injury or illness.  Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
□ PRIORITY-YELLOW Serious Injury or illness.  Ex: Significant trauma, not able to walk, 2° − 3° burns not more than 1-2 palm sizes.	Ambulance or consider air transport if at remote location. Evacuation may be <b>DELAYED.</b>
□ ROUTINE-GREEN  Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.	Non-Emergency. Evacuation considered  Route of Convenience.
5. TRANSPORT PLAN:	
Air Transport: (Agency Aircraft Preferred)  □ Helispot □ Short-haul/Hoist □ L	if- Fii-b4 — O4b
☐ Helispot ☐ Short-haul/Hoist ☐ L  Ground Transport:	ife Flight □ Other
□ Self-Extract □ Carry-Out □ Amb	bulance   Other
6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:	
□ Paramedic/EMT(s) □ SKED/Backboard/C-Collar □ Crew(s)	□ Burn Supplies □ Oxygen
☐ Trauma Bag ☐ Medication(s) ☐ IV/Fluid(s	
☐ Other (i.e. splints, rope rescue, wheeled litter)	
7. COMMUNICATIONS:	
- Run Medical Emergency on Command - <u>Coordi</u>	inate with air ambulance on CALCORD tone 6
8. EVACUATION LOCATION:	
- <b>Lat/Long</b> (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
- Helispot/Extraction Size and Hazards:	
9. CONTINGENCY: If primary options fail, what actions can be implemented in con	njunction with primary evacuation method? Be thinking ahead
EMEMBER: -Confirm ETA's of resources ordered -Act according	ng to your level of training
<ul> <li>If air or ground ambulance is DELAYED: Package and transport pa Re-route EMS helicopter to rendezvous point as appropriate.</li> </ul>	itient to rendezvous with incoming Ambulance.
to read ame nemerator to reflect tods point as appropriate.

EMEMBER: -Confirm ETA's of resources ordered -Act accordin - If air or ground ambulance is DELAYED: Package and transport pa Re-route EMS helicopter to rendezvous point as appropriate.	g to your level of training tient to rendezvous with incoming Ambulance.								

### Human Resource Message

# Thought for the Day FIRE

Fatigue...... Be aware of fatigue having a negative impact on

your conduct and speech

Integrity...... Integrity and Honesty are vital on a fire. If you

mess up, fess up, whatever you did can most likely be fixed if you

report it as soon as you are aware of it.

Respect...... Treat others as you would like to be treated

Example...... Set an example. Realize that you influence

others around you, therefore, always conduct

yourself in a professional and competent manner.

HRSP is located in the trailer at the far end of main street-shared with IC and Logistics.

John Campbell-HRSP 951-203-4367 Cell

### RESOURCE ADVISORS

- Avoid areas flagged with orange/white flagging.
- Use screens for drafting out of main creeks and Klamath River.
- Minimize bucking when falling hazard trees

Please email all collected field observations and data to the GIS email.

GIS email - eclipsefiregis@gmail.com
