OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fires are burning in timber fuels with some brush and grass intermixed. Fires within the complex continue to exhibit suppressed spread due to cloud cover and shower activity. The fire will continue to creep in understory fuels due to the heavy fuel loading.

Crown Fire Potential: None to minimal. Primarily isolated single tree torching due to understory surface fire preheating canopy. This will be hard to achieve today with forecasted weather.

Spotting Distance: Zero with wind and convection. However rolling material will be the source of establishing a heat source away from the fire's edge.

Probability of Ignition: <10%

SPECIFIC:

Branch I: Areas of smoldering and creeping on the north perimeter of Cedar Fire is expected. Passive backing flanking fire still anticipated. Expect minimal activity if fire crosses Thompson Creek.

Branch II: None to minimal fire activity is anticipated near the containment lines.
The Buck Fire and DIV K will continue to passively burn.

Branch III: Plenty of open line on the slopes along of the South Fork of the Smith River the fire will continue to spread with minimal growth today. Areas of heat below Blue Ridge will passively burn.

Branch IV: Abney fire will continue to slowly back down into the Horse Creek Drainage on the SE portion of the fire. Areas in DIV X of the Abney will continue to burn out. More creeping, smoldering and smoke production but minimal growth is expected.

AIR OPERATIONS

Clouds increasing with rain may hinder aircraft use.

SAFETY

- Fire stressed weak trees are a significant threat
- No anticipated fire behavior challenges
- Take the time to review and implement the risk management process on your task today.

Message

**Incident: Eclipse Complex
CA-KNF-006098**

**Date/Op Period 9/18/17
0700-0700 Day/Night Shift**

CUMULATIVE FIREFIGHTER FATIGUE:

Crews have been working long hours under strenuous conditions. Be aware of firefighter fatigue. Pace yourselves and take rest breaks as often as needed. Keep yourself well hydrated. Carry plenty of water, drink often, and preplan for water re-supplies as needed. Don't let fatigue make you complacent about your job.

At the end of an incident, at times we tend to let our guard down.

Quiet parts of a fire at times could be the most dangerous!

IRPG pg.4

Common Denominators of Fire Behavior on Tragedy Fires

1. On relatively small fires or deceptively quiet area of large fires.
2. In relatively light fuels, such as grass, herbs, and light brush.
3. With unexpected shifts in wind direction or wind speed.
4. When fire responds to topographic conditions and runs up hill.

Vehicle Operations:

As we travel to and from the incident, and through the community, we need to be cognizant of pedestrian traffic, kids on their way to school, and pets on the roadways.

Follow the identified traffic Plans, and obey the speed limits, and know that stop signs are placed on the streets for a reason, to prevent collision.

Human Resource Message
September 18, 2017**

What is **motivation**? **Motivation** is the drive that encourages action or feeling. To **motivate** means to encourage and inspire. **Motivation** can also mean igniting the spark for action. **Motivation** is a powerful force. It can persuade, convince and propel you into action. It can be defined as **motive** for action. It is a driving force in our lives and comes from the desire to **succeed**. The greatest enemy of motivation is complacency. Complacency leads to lack of effort and thus a lack of **success**.

Now is the time to keep your eyes wide open for symptoms of complacency. Now is the time to stay **motivated**. Now is the time to recognize the **success** that has been achieved and strive for more.

"The purpose of life is to live it, to taste experience to the utmost, to reach out eagerly and without fear for newer and richer experience."
