ECLIPSE COMPLEX

CA-KNF-006098 P5K9QB (0505)

Thursday August 31st – September 1st, 2017

Day Shift 0600 - 2000 Night Shift 1800 - 0800

0600 Day Operations Briefing 1800 Night Ops Briefing 1830 Planning Meeting

ICS 202	Incident Name Eclipse Complex	2. Date Prepared 08/30/2017	3. Time Prepared 1700
Operational Period			
August 31 st – September 1 st , 2017	Day / Night Operational I	Period 0600-2000	
5. Leaders Intent & General Contro	Objectives for the Incident (incl	lude alternatives)	

LEADERS INTENT: Suppress the Fires in the Eclipse Complex utilizing strategies such as: confine, contain, point protection and monitoring in wilderness while mitigating exposure and protecting values at risk.

Management Objectives:

- Ensure safety of emergency responders and the public by utilizing risk management processes, & implementing strategies & tactics that have a high probability of success, stop, think, talk, then act.
- Protect and minimize undesirable fire & suppression effects to natural and cultural resources by using Resource Advisors, using MIST in wilderness, and using the right resources in the right places.
- Provide structure protection for threatened structures, residences, ranches, cabins, & lookouts
 utilizing structure protection guidelines in the IRPG & established plans.
- Establish and maintain good relationships with local cooperators, stakeholders and public while providing accurate and timely incident information.

Suppression Objectives:

- Keep the Oak & Young Fires
 - o Confined to the Siskiyou Wilderness & East of the South Fork of Smith River
 - North & West of Hwy 96 to protect heritage, cultural & natural resources.
- Keep the Cedar & Four Mile Fires within remote national forest, Red Butte Wilderness and east of the 18N01 Road to protect heritage, cultural & natural resources.

CA-KNF-006098 Complex Fire Weather Forecast

FORECAST NO: 26

NAME OF FIRE: KNF-006098-Complex

PREDICTION FOR: 0600-0600

UNIT: Klamath NF- Happy Camp RD

SHIFT DATE: 8/31-9/1

SIGNED: /s/

TIME AND DATE

Incident Meteorologist - John Franks

FORECAST ISSUED: 2000 8/30/2017

IMET (t) - Ryan Fliehman

...RED FLAG WARNING FROM 5PM TODAY TO 9AM FRIDAY...

<u>WEATHER DISCUSSION:</u> Red Flag conditions are expected in the late afternoon and overnight for midslopes and ridges. Low relative humidity and gusty winds will be the main concern. Winds will shift from west to northeast after 12:00 and become gusty by late afternoon. Warmer temperatures are expected with highs in the upper 80s to low 90s. Humidity recoveries will be poor Thursday night supporting these critical fire weather conditions. Haines 5.

WEATHER FORECAST FOR TODAY:

WEATHER: Thick smoke under the inversion through midday, then slowly lifting. Winds shift from west to northeast in the afternoon, with an associated increase in strength and gustiness.

TEMPERATURES: High near 85 on smoke covered ridges to around 92 along Hwy 96 in Div F and Z.

HUMIDITY: 45-55% morning, bottoming out 15-20% late afternoon.

20 FT WINDS:

RIDGETOP – West 4-8 mph in the morning. Turning northeast after 12:00. Increasing 6-11 mph with gusts to 19 mph after 16:00.

SLOPE/VALLEY - Afternoon upslope/upvalley 3-7 mph. A few late day gusts 10-12 mph.

HAINES INDEX: 5 LAL: 1 STABILITY/INVERSION: Strong morning inversion weakening after 14:00.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Gusty on the mid-slopes and ridges overnight. Poor humidity recoveries.

TEMPERATURES: Lows 54-63, coolest along Highway 96 and the Klamath River.

HUMIDITY: Mid-slope and ridges: Recovering 17-22% through 23:00 then 24-30% by morning.

Valleys: Good recoveries 60-80%

20 FT WINDS:

RIDGETOP - Northeast becoming East after 23:00 10-15 mph gusting to 20 mph

SLOPE/VALLEY – Downslope/downvalley 2-5 mph.

HAINES INDEX: 5 LAL: 1 STABILITY/INVERSION: Strong inversion setting up after 21:00 hours.

<u>Friday through Labor Day:</u> High confidence for high pressure bringing northeast winds 5-10 mph to the ridges and terrain driven winds for the lowlands. Daytime highs 90-100 with overnight lows 60-70. Humidity 13-23% afternoon...35-50% nights.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 28 TYPE OF FIRE: Wildfire

FIRE NAME: Eclipse OPERATIONAL PERIOD: Day/Night, 08/31/2017

DATE ISSUED: 08/30/2017 TIME ISSUED: 2000

UNIT: CA-KNF SIGNED: Isl Keein Hillard

Typed/printed: Kevin Hillard

INPUTS

WEATHER SUMMARY: *PLEASE REFER TO IMET WEATHER FORECAST*

Sky: Heavy smoke lifting around 1400

Maximum Temperatures: High near 85 smoke shaded ridges to around 92 along Highway 96

Minimum Humidity: 45-55% morning dropping to 15-20% late recovering to 24-30%

Winds (20'): Ridgetops – West 4-8 mph turning northeast 6-11 mph after 1200 gusts to 19 mph

Slope/valley – upslope/upvalley 3-7 mph gusts to 12 mph

CWR: 0% LAL: 1 Haines Index: 5

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Ridgetop winds out of the northeast today will cause fire growth to the southwest. If the air clears expect fire behavior to increase quickly due to warmer temperatures and lower RH values Expect continued active surface fire with crown fire activity supported by the surface fire. Surface rates of spread will generally govern the fire spread, with some enhancement from spotting. Surface fires will be fairly intense with high resistance to control.

Rate of Spread: Timber/Brush/Heavy Down/Dead: 5-20 Chains per hour (head fire with 19 mph gusts)

0.5-1 Chains per hour (backing fire)

Flame Length: Timber/Brush Heavy Down/Dead: 5-12 Feet (head fire)

1-3 Feet (backing fire)

Crown Fire Potential: Isolated to group torching with crown runs possible where the fires are unshaded by smoke or winds align with slope. Crown fire spread rates approximately 1.0 mile per hour.

Spotting Distance: 0-0.6 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

Probability of Ignition: Day 80-90%, Night 70-80% (model)

Rollouts: Watch out for burning material on steeper slopes that may roll across firelines

SPECIFIC:

Branch I: With winds out of the northeast today there is a good chance that the Cedar and Fourmile Fires will see some cleaner air and have less smoke. This will increase fire activity. Fire activity will be greatest in heavy fuels and in areas near ridgetops exposed to the **north east ridgetop winds**. The Fourmile and Cedar are expected to continue to burn together. Weather conditions exist for fire in Division G to cross Thompson Creek where there is heat along the creek. Limited spread expected to the east into the Red Buttes wilderness.

Branch II: The eastern section of the branch is expected to remain smoked out under the persistent inversion and see minimal influence from the **northeast winds.** Expect fire to continue to back into the Highway 96 corridor and watch for spots across the highway due to rollout. The western section of the Branch could see the inversion lift and due to this more influence from the **northeast winds**. Interior islands will continue to burn together.

Branch III: If the **northeast winds** mix down there is a better chance for the fire to cross the South Fork of the Smith River today. Fire spread expected to continue towards the South Fork of the Smith River with increased spread rates if the inversion lifts and the **northeast winds** mix down. Growth to the northeast into the Siskiyou Wilderness expected to slow. Fire spread on Young will continue into the Clear Creek drainage and into Doe Creek on the southeast corner.

AIR OPERATIONS

Smokey conditions expected all day. There may be some clear air on the Cedar and Fourmile fires.

SAFETY

Northeast winds will influence fire behavior where the inversion mixes out. Maintain LCES.

6. Work Assignments:							

Task: Prep constructed dozer line from DP 90 to South Fork Indian Creek. Scout opportunities for contingency line.

Purpose: To hold fire perimeter.

End State: To keep fire out of Indian Creek subdivision.

7. Special Instructions:

Identify any suppression repair needs.

Backhaul all excess supplies, equipment, and trash.

Sensitive plant sites are identified with yellow/black striped flagging.

Avoid any ground disturbing activties in areas with orange/white candy stripe flagging.

6. Work Assignments:

Task: Continue to prep the 16N02 rd. south from the N/P break south to the South Fork of the Smith River.

Purpose: Create containment features on the western perimeter of the fire.

End State: Fire spread to the west into Big Flat is minimized.

7. Special Instructions:

Identify any suppression repair needs.

Backhaul all excess supplies, equipment, and trash.

Sensitive plant sites are identified with yellow/black striped flagging.

Avoid any ground disturbing activities in areas with orange/white candy stripe flagging.

8. Communications	(radio	and/or phone conta	ct numbers n	eeded for this	assignment):

Task: Patrol and mop up to maintain containment.

Purpose: Patrol the fire perimeter.

End State: Secondary containment line to protect Indian Creek subdivision.

7. Special Instructions:

Identify any suppression repair needs.

Backhaul all excess supplies, equipment, and trash.

Sensitive plant sites are identified with yellow/black striped flagging.

Avoid any ground disturbing activties in areas with orange/white candy stripe flagging.

Air to Ground Tactical 1 & 2 to be assigned to working aircraft and ground contact as needed where needed by aerial supervision.

Water drops as requested, may use aircraft from Scott Valley if smoked in at Happy Camp Helibase, Recons as requested

SAFETY MESSAGE

August 31, 2017 Eclipse Complex

"Safety Starts With You"

Changing Weather:

- > It's getting hot as the high pressure builds in. Note the subtle changes in wind direction and humidity values. Pay attention to the fire behavior
- > Hydration and rest will become even more important as it gets warmer.

Cumulative Fatigue

- > Monitor your drivers and make sure they are attentive and not driving tired.
- > Working night shift takes a toll on your mind and body, take appropriate rest periods.

Medical

- Make sure you are taking care of small medical issues so they don't become BIG medical issues.
- Remote areas of the incident, including Branch III require preplanning a medical evacuation. Please take the time to complete the division specific info on your "9" line.

Tree Hazards

- > Look up and around when near any trees. Always wear your PPE including helmet when on the fireline.
- Fire weakened trees in Div F and W, and along the HWY 96 corridor are extremely dangerous. Ensure areas are snagged prior to firefighters working in the area.

INCIDENT SAFETY ANALYSIS 215a

Eclipse Complex/ CA-KNF-6098 - Thursday, August 31, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Fireline Hazards	~ Hazard trees are present over the entire fire Watch for falling and rolling debris on steep slopes Alert crew personnel of rolling debris by yelling to affected individuals Position debris that could roll vertically on slope Avoid stepping over debris that could roll by walking around object Avoid radiant heat by wearing appropriate PPE correctly Use correct tool for task assigned Follow power line safety protocol as outlined on page 24 in IRPG Flag and isolate all HAZMAT and alert all personnel working in Division Follow WUI recommendations on pages 12-16 in IRPG
All	Driving & Traffic	~Drive with lights on. ~Do not use cell phone while driving. Slow down in smoke and congested areas. ~Check bridge load rating before using for heavy equipment; if in doubt, find another route. ~Slow down at night - expect animals in the road. ~Use spotter for backing. ~Wash windshield. ~Utilize spike camps to reduce driving ~Follow piloted traffic control process
All	Line Constructions	~Conduct thorough briefing for all personnel (inside rear cover IRPG). ~Ensure LCES in place prior to engagement (IRPG p. 7). ~Establish adequate safety zones (IRPG p.8). ~Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). ~Utilize Risk Management Process (IRPG p.1). ~Utilize Downhill Checklist (IRPG p.9)
All	Steep Terrain & Rolling Debris	~Determine if the mission is necessary. ~Limit exposure by avoiding whenever possible. ~Use the proper resource. ~Post lookouts. Resources should not work directly above or below each other. ~Utilize fallers to clear hazard trees/snags
All	Communications	~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all your resources know frequency and protocol for contacting resources ~ Utilize the ICS 205. Brief others as needed, Communicate hazards to others, acknowledge messages, ask if you dont know
All	Extreme Fire Behavior	~Share weather observations with all personnel assigned to division• Review "Severe Fire Behavior Potential" (IRPG p.68). ~Watch for inversion lifting ~Monitor current weather conditions and forecasts ~Make sure all personnel receive thorough briefings every shift. ~Maintain adequate escape routes and safety zones. ~Advise all personnel if these are compromised or changed. ~Set trigger points when appropriate. ~Adhere to 10 Std Orders, mitigate 18 situations. ~Maintain Situational Awareness
All	Helicopter Operations	~ Stay clear of all bucket drops when suppression actions are in place and allow 5 minutes prior to re-entry ~ Follow aviation safety guidelines in IRPG pg 43-60

INCIDENT SAFETY ANALYSIS 215a

All	Heat Related Illness (HRI)& Dehydration	~Drink Fluids throughout operational period, up to 1.5 gallons per shift,
All	Chain Saw Operations	 Follow "Hazard Tree Safety" guidelines, IRPG pages22-23 Look up, down around for hazard tree indicators Only fell and buck trees within your expertise, and training Follow "Procedural Felling Operations" on page 79 in IRPG Do not fall trees during high wind events
All	Injury & Medical Emergency	~ Assist injured employee appropriate medical care ~ Use EMT's on Division for initial care ~ Follow medical protocol as outlined in ICS-206
All	Air Operations	~Ensure that the mission is necessary. ~Observe weather minimums. ~Assign appropriate aircraft for the mission. ~Maintain good communications. Use ground contacts. ~Proper flight following. ~Use aerial supervision (air attack, Helco) ~Use discrete frequencies while utilizing aerial ignition.
All	Bees, Ticks, Spiders, Mosquitoes	~Be aware of crew members with sting alergies. ~Perform daily self inspection ~Use repellent as necessary ~Inspect tent and sleeping bags for spiders. ~Always look before placing hands in or on anything. ~Carry EPI kits if known to be allergic to bee stings.
All	Hazard Trees	- Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23 - Post lookouts, or use a spotter in mop-up areas with personnel - Don't park vehicles or take breaks in high concentrations of hazard trees - Establish trigger points for disengagement during high wind events
All	Heavy Equipment Operations	~Ensure communications are established with operators ~Make positive contact with operator before approaching. ~Use hand signals if other communications are unavailable ~Maintain a 50'-100' exclusion area around equipment ~Use a spotter when backing ~Close roads or trails if necessary for public safety. ~PPE including hearing protection. ~Maintain safe working distance from equipment
All	Power Utilities	~Notify all personnel of down electrical lines, use check back. ~Refer to the IRPG pages 24-25 for Power Line Safety ~Always treat downed wires as energized ~Identify and avoid high tension transmission lines. ~Identify and avoid high pressure natural gas lines ~ Identify and avoid damaged gas service near structures ~Be aware of utility restoration in your work area ~All excavators working under power lines you must keep at least 20 ft between your boom and the power lines ~ Flag all hazards," Three Stripes Your OUT" or use Exclusion Zone.
All	Smoke	~Symptoms: Cough, Headache,Shortness of Breath, Hoarseness, Acute mental status changes, Confusion Mitigation: Drink pleanty of fluids to flush added toxins from you body. Try to rotate crews out of high concentrations of smoke. You can utilize vehicle air conditioners selected to re-cycle with windows rolled up.

CIIMT 1 MEDICAL PLAN (ICS 206 WF)

Medical Incident Ro	
Use items one through nine to communicate s	•
1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMER Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life three)	
2. INCIDENT STATUS: Provide incident summary and command structure.	
- Nature of Injury/Illness Describe the injury (Ex: Broken leg with bleeding	
- Incident Name Geographic Name + "Medical" (Ex: Trout Meadow Medical)	
- Incident Commander (Division Sup. or designee) Name	e of IC
- Patient Care Name of Care Provider (Ex: EMT Smith)	
3. INITIAL PATIENT ASSESSMENT: Complete this section for each pt. This - Number of Patients: - Male / Female:	
- Conscious? ☐ YES ☐ NO = MEDEVAC! - Breatl	ning? 🗆 YES 🗆 NO = MEDEVAC!
- Mechanism of Injury What caused the injury?	
mai caucca ino mjuny.	
- Location, Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'	
4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY	
SEVERITY	TRANSPORT PRIORITY
☐ URGENT-RED Life threatening injury or illness. Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter, Evacuation need is IMMEDIATE.

No.	dinate with air ambulance on CALCORD tone 6
8. EVACUATION LOCATION:	
- Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24'	
- Patient's ETA to Evacuation Location:	
- Helispot/Extraction Size and Hazards:	
CONTINGENCY: If primary options fail, what actions can be implemented in co	onjunction with primary evacuation method? Be thinking ahead
-Confirm ETA's of resources ordered -Act accord - If air or ground ambulance is DELAYED: Package and transport p Re-route EMS helicopter to rendezvous point as appropriate.	ing to your level of training patient to rendezvous with incoming Ambulance.

TRAINING MESSAGE

Trainees: if you are working on a position taskbook and have not checked in with the training section, please do so as soon as possible, working with a training specialist can help to ensure your position taskbook and other related documentation are correct and the training assignment is captured as part of your historical training record.

When closing out with training, please bring your completed performance evaluation (225/226) and position taskbook with completed evaluators page.

Traffic Control "Piloted Traffic" Process "Oak Fire"

Located on the section of Div Z that run concurrent with State Highway 96 All traffic (Fire & Public) will wait to be Piloted when "Piloted Traffic" is in place.

- "Piloted Traffic" is utilizing the East bound (River side) lane.
- * <u>"Emergency Incident Traffic"</u> approved by Division Group Supervisor (or above), or Safety will utilize the West bound (Fire Side) lane.
 - CALTRANS could be in the West bound (Fire side) lane going either direction bumping rocks from roadway.
- ★ Expect oncoming traffic at ALL times
- \star Utilize Vehicle Hazard lights at a minimum, Overhead REDs if equipped
- ★ Piloted Traffic will be held (stopped) for One hour: **0700 to 0800**, to allow Day Fire Resources safe and effective transition between Day/Night Resources, and again at **1900 to 2000** to allow Night Fire Resources safe and effective transition between Night/Day.
- * Please keep your speeds down at all times.

No more than 25 MPH on HWY 96 within the Road Control's Footprint
