CA-KNF-006098 Complex Fire Weather Forecast

FORECAST NO: 38

NAME OF FIRE: KNF-006098-Complex

PREDICTION FOR: 0600-0600

UNIT: Klamath NF- Happy Camp RD

SHIFT DATE: 9/12-9/13 Tuesday and Tues Night

SIGNED: /s/

TIME AND DATE

FORECAST ISSUED: 2000 9/11/2017

Incident Meteorologist - John Franks IMET

Ryan Fliehman IMET (t)

WEATHER DISCUSSION: *RED FLAG WARNING FROM 1PM-8PM FOR ABUNDANT LIGHTNING*****

Showers and thunderstorms will be possible as increasing monsoonal moisture pushes in from the south. A slight chance of storms will be present in the morning before increased coverage occurs in the afternoon and evening. The potential for lightning, gusty outflow winds and localized moderate to heavy rainfall is possible. Coverage of storms will decrease overnight as temperatures and instability decreases.

WEATHER FORECAST FOR TODAY:

WEATHER: Increasing clouds through the day. Scattered thunderstorms will be present, with 30% chance of areal coverage. Outflow from these storms could affect a larger area of the fire.

TEMPERATURES: Highs 74-80 for ridges, 87 to 93 in valleys.

HUMIDITY: 45-60% in the morning, decreasing to 33-40% by afternoon on ridges. Drainages and valleys will see 80% or higher in the morning, dropping to 28-35% by afternoon. Rain will increase humidity to over 65% where it falls.

20 FT WINDS: Erratic outflow winds will be possible if thunderstorms are nearby.

RIDGETOP – South winds in the morning 3-5 mph gusting to 9 mph. Becoming north northwest 6-11 gusting to 17 mph by late afternoon.

SLOPE/VALLEY – Downslope/downvalley 3-7 mph early. Upslope/upvalley 2-5 mph gusting to 7 mph in the afternoon.

HAINES INDEX: 3 **LAL:** 3 **STABILITY/INVERSION:** Around 2500'. Breaking after 1000.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Partly to Mostly Cloudy. Isolated showers and thunderstorms early. Partly cloudy after 0300.

TEMPERATURES: Lows 53-60 on ridges and in valleys.

HUMIDITY: Mid-slope and ridges: Gradual recoveries through the night to 55-70% by morning.
Valleys: Continued good recoveries 70% or higher.

20 FT WINDS: Erratic outflow winds will be possible if thunderstorms are nearby.

RIDGETOP – North northeast 6-11 mph gusting to 17 mph early. Decreasing to 5-7 mph gust 10 mph from the northeast by morning.

SLOPE/VALLEY – Downslope/downvalley 3-7 mph.

HAINES INDEX: 3 **LAL:** 2 **STABILITY/INVERSION:** Strengthening around 2500'.

Wednesday through Friday: A cooling trend is expected for the latter half of the week as northwesterly flow becomes the dominant pattern. Temperatures fall to more seasonal values with modest humidity recoveries and cooler overnight lows.

LAL: 3 **Haines Index:** 3

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Gusty south winds until around midday then shift to N/NW in afternoon. Fire will primarily be low to moderate intensity surface fire but look at areas where the fire can reposition to the bottom of slopes, this will cause fire activity to increase in intensity.

Rate of Spread: Timber/Brush/Heavy Down/Dead: 5-18 Chains per hour (head fire)
0.5-1 Chains per hour (backing fire)

Flame Length: Timber/Brush Heavy Down/Dead: 5-12 Feet (head fire)
1-3 Feet (backing fire)

Crown Fire Potential: Isolated to group torching. Crown runs possible where winds align with slope or on steep slopes with continuous fuels. Crown fire spread rates up to 1.0 mile per hour.

Spotting Distance: 0-0.5 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

Probability of Ignition: Day 40-70%, Night 30-60% (model)

Rollouts: Watch for locations where rollout is set up for an uphill run.

SPECIFIC:

Branch I: Areas of smoldering and creeping fire on the north perimeter of Cedar expected to continue to smolder and creep in the unnamed drainage of Thompson Creek with minimal potential to cross. Backing fire possible in the afternoon. Expect active movement if fire crosses Thompson Creek.

Branch II: Fire activity expected to continue in the Boulder Peak area and on the lightning strike fire north of Boulder Peak. Expect surface spread to develop in these areas and the western section of the Branch.

Branch III: Surface fire activity likely where heat remains on the slopes of the South Fork of the Smith River in the afternoon. Rollout is expected to continue. Expect areas of heat near the ridgetop on Blue Ridge to be more active earlier in the day. Watch for fire growth east of H-35 out to bear Mountain.

Branch IV: Heat on the western perimeter beyond completed line expected to be influenced by ridgetop winds and be active with spread to the west. On the south and east perimeter expect backing fire where the fire hasn't reached completed line. May still see a few smokes in areas of the branch that are in the mop-up stage.

AIR OPERATIONS

Inversion early then breaking up to mostly clear around 1100hrs. Scatted cumulus clouds and t-storms in afternoon.

SAFETY

Post lookouts to monitor weather and fire behavior. Any new start has the potential to grow rapidly in the dry fuels and will have a high resistance to control efforts. Watch for strong winds associated with thunderstorm development and collapse.

Hazards & Risks

Team Transition & Situational Awareness:

*As Southern California Incident Management Team 1 transitions with CIIMT-1 we need to maintain a heightened situational awareness. **If an assignment is not clear, ask for clarification.***

Existing hazards on the divisions: Steep terrain, roll out, poor footing, heavy equipment, and **Extreme Fire Behavior**, continue to be a big concern. If a hazardous condition is identified, notify your Division and follow your protocol mitigation procedures.

Driving: The camp is becoming very crowded, with that comes a lot of traffic in the ICP area as well as around town. When driving in camp and around town, give right away to residents, watch for pedestrian traffic and follow the designated traffic plan.

Drive the posted speed limits!

Environmental Hazards

Falling trees, branches, snags, trip hazards, bears and snakes are becoming a concern. Remember, **LOOK UP-LOOK DOWN-LOOK ALL AROUND.**

Hydration:

As we continue to work on the divisions we sometimes lose track of the amounts of liquids we intake, dehydration is a big concern. Let's remind each other that we need to consume 24 ounces of water every hour to prevent dehydration.
