Fire Weather Forecast -Branch I,II,IV

Forecast No. 42

Name of Fire: Eclipse Complex

Unit: Klamath NF - Happy Camp RD

Time and Date

Forecast Issued: 1930 PDT 09/15/17

Prediction for: 0600-0600 PDT

Shift Date: 09/16/17 Saturday & Saturday Night

Signed:

Scott Carpenter
Scott Carpenter, Incident Meteorologist

Summary: The weak ridge that brought dry conditions and northeast winds to the fire area Friday will shift to the east and allow west and southwest winds to return across the area as temperatures continue to be slightly above normal today. Afternoon minimum humidity values will be just slightly higher than was observed on Friday as moisture begins to increase with the switch to southwest winds. Mainly high level clouds will move across the area ahead of the cold front that will move through in the evening and cool temperatures a few degrees to near normal for Sunday.

Today (Saturday)...

Sky Weather..Partly cloudy skies. Areas of smoke.

Temperatures: 64-69° F Ridges 79-87° F Valleys (Trend: Few Degrees Warmer)

Humidity: Ridges 45-55% early, then 30-40% by 1200, increasing to 50-60% by 1800.

Valleys 55-70% early, then 24-33% by 1200, increasing to 35-45% by 1800.

20 Ft Winds:

Ridgetop: WSW 5-8 mph, increasing to 6-10 gust to 14 mph after 1400

Slope/Valley: Downslope/downvalley 3-7 mph early. Becoming upslope/upvalley 2-5 mph gust 7 mph...then SW 5-8 gust 15 mph after 1400.

Haines Index: 4 (Low) LAL: 1 Stability/Inversion: Around 2500' Breaking after 1100

Tonight (Saturday Night)...

Sky Weather: Partly cloudy early. Becoming mostly clear overnight. Areas of smoke.

Temperatures: 44-52° F Ridges 40-45 ° F Valleys

Humidity: Ridges: 60-70%

Valleys: 90-100%

20 Ft Winds:

Ridgetop: W 10-15 mph

Slope/Valley: Downslope/downvalley 3-7 mph

Haines Index: 4 LAL:1 Stability/Inversion: Around 2500' after 2000

Outlook For Sunday through Tuesday...Temperatures will be just slightly cooler Sunday across the area, with minimum humidity generally 30-40%. Gusty southwest winds will move through Sunday ahead of the stronger cold front that will shepherd in increased chances for wetting rains and temperatures colder than normal for mid-September. At this time the best chances for widespread wetting rains appears to be Monday night into Tuesday.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 44	TYPE OF FIRE: Wildfire
FIRE NAME: CA-KNF-006098	OPERATIONAL PERIOD: Day/Night, 09/16/2017
DATE ISSUED: 09/15/2017	TIME ISSUED: 2000
UNIT: CA-KNF	SIGNED: <i>Is Chris Brenzel</i> 
Typed/printed: Chris Brenzel FBAN (t)	

INPUTS

WEATHER SUMMARY:

Sky: Mostly sunny with more smoke in the air, becoming partly cloudy in the afternoon.

Maximum Temperatures: Highs 64-69 on the ridgelines, 78-85 in valleys

Minimum Humidity: 34-55% morning, 22-30% by afternoon

Winds (20'): Ridgelines – W/SW wind 3-5 mph g-9 mph then W 6-9 mph gusts 11 mph in afternoon

Slope/valley – Downslope/downvalley 3-7 mph early, west 4-6

Down canyon /downslope winds 4-6mph gusts to 12

LAL: 1

Haines Index: 4

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fires are burning in timber fuels with some brush and grass intermixed. Fires within the complex continue to exhibit moderate to active fire behavior with single and small group tree torching. Fire will continue to spread actively on exposed ridges and when aligned with slope and wind. Surface fire with observed fire behavior of 2-7ch hr and FL of 1-3'. Expect short to moderate range spotting with slope runs and rates of spread 9-12ch hr.

Crown Fire Potential: Minimal primarily isolated single tree to small group torching.

Spotting Distance: 0-0.25 mi (under developed smoke columns, spotting up to ¾ of a mile is possible)

Probability of Ignition: Day 60-75%, Night 30-40%

Rollouts: Watch for locations where rollout is set up for an uphill run or a slope reversal.

SPECIFIC:

Branch I: Areas of smoldering and creeping on the north perimeter of Cedar Fire is expected. Active backing flanking fire possible in the afternoon. Expect moderate activity if fire crosses Thompson Creek.

Branch II: No activity is expected near the containment lines in this branch, the exception would be DIV K which will continue to burn into the wilderness to the south and sw. Expect an increase in overall fire activity. Little Buck Fire can expect surface spread with chance for single tree torching and group torching, fire is burning in steep rocky terrain but is working to find new fuels and spread to east and north watch for roll out to become established below and run back up to the ridge.

Branch III: Surface fire activity likely where heat remains on the slopes of the South Fork of the Smith River in the afternoon. Areas of heat below Blue Ridge will become more active. Any run at Blue ridge could cause short range spotting with moderate potential for growth. Watch for isolated heat along Smith river at the Prescott Fork and areas of active fire in the Harrington Creek drainage which could cross into the Smith River Recreation area to the south, overall could be most active branch for next 24hrs.

Branch IV: Abney fire will continue to slowly back down into the Horse Creek Drainage on the SE portion of the fire. Areas in DIV X of the Abney will continue to burn out an area of unburned. Look for more fuels along Horse Creek to become available to support fire spread. More creeping, smoldering and smoke production but minimal growth is expected.

AIR OPERATIONS

Hazy in the am then should be clear air with increasing clouds in the afternoon.

SAFETY

Post lookouts to monitor weather and fire behavior. Assess your route into and out of the fire area to reach your safety zone. Develop a back-up plan and a back-up plan for that plan.

5

AIR OPERATIONS SUMMARY

PREPARED BY: Doug Ross

PREPARED DATE/TIME: 09/15/17 18:00

1. INCIDENT NAME: Eclipse Complex	2. OPERATIONAL PERIOD DATE: 09/16/17	START TIME: 0700	END TIME: 2000	SUNRISE: 0655	SUNSET: 1923
NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES					

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc) Possible unidentified low wires & cables in the river corridor. Rafters on the Klamath River. Limited visibility due to smoke, do not continue mission if visibility is marginal. Ensure all pilots are briefed on appropriate frequencies for that specific fire before launching. No dipping within 500 feet of the confluence of all major tributaries of the Klamath River. Use established procedures for bucket and tank sanitation where necessary. 128.1750 linked to Scott Valley and Happy Camp helibases. All flight time on Abney Fire Div. V, X should be charged to OR-RSF-000647 P6K9PL (0601)	4. MEDEVAC A/C: H-407 out of Dunsmuir for 24 hour NVG hoist. 8PA Grand Canyon T3 short haul.	5. TFR: 7/2262 A-95 Ceiling :To and including 11000 MSL Polygon: See NOTAM TFR Frequency: 128.175

SAFETY MESSAGE

INCIDENT: Eclipse Complex

DATE 9/16/17 Day/Night Time : 0700-0700

Hazards and Risks: Inattentive Blindness, Chronic Fatigue, Illness

Situational Awareness: On the preface pages of the IRPG, (page x and xi), there is a topic entitled “Human Factor Barriers to Situation Awareness.” Review this page with all personnel. Basically, we are all individually responsible for knowing what is going on around us at all times, but the factors listed here can diminish this ability.

Chronic Fatigue: Accumulated fatigue is often caused by extended periods of stress and inadequate recovery periods, which can result in decreased productivity, compromised immune functions, and reduced alertness. Fatigued workers can perform poorly, behave carelessly, tolerate greater errors, and become inattentive. Monitor yourself and others for symptoms of fatigue. Pace yourself.

Illness: With the nights getting cooler, warm days, smoke, dry dusty roads and vegetation, the potential for respiratory problems is on the increase. If you feel like you are getting sick, let someone know, get the medical help you need and avoid contact with other people. All personnel should use hand sanitizer often, wash your hands for at least 15 sec. Eat a balanced diet and drink plenty of water.

Remember: There is still lots of work to get accomplished and lots of hazards to be heads up for. Remain focused on the task at hand and alert at all times for changes in weather, fire behavior, fuel conditions, the fire location and where you would go if you had to quickly.

SAFETY OFFICERS : Tom Sherman – John Bates - Chuck Frank

8. Location DIVS	9. Hazard	10. Hazard Probability	11. Severity Code	12. RAC		13. Hazard Probability	14. Severity Code	15. RAC	16. Acceptable (Yes/No)	Export (Yes/No)	
ALL	Fire Behavior	Likely B	Critical II	Serious	#N/A	Likely B	Critical II	Serious	Yes	Yes	
ALL	Hazard Trees	Likely B	Catastrophic I	Critical	Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.	Occasional C	Catastrophic I	Serious	Yes	Yes	
ALL	Air Operations	Likely B	Catastrophic I	Critical	Follow "Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.	Likely B	Critical II	Serious		Yes	
ALL	Downhill Line Construction	Likely B	Critical II	Serious	Post lookouts when building downhill line. (IRPG page 6) Follow downhill line construction checklist (IRPG page 9) Overhead individual stays with downhill line construction until completed (TFLD or ICT4 or better)	Likely B	Critical II	Serious	Yes	Yes	
N/P	Chipper Operations	Likely B	Catastrophic I	Serious	~ Ensure JHA is provided and signed by operators. ~ Only qualified personnel will feed the chipper. ~ Ensure appropriate PPE is used including eye and hearing protection.	Likely B	Critical II	Serious	Yes	Yes	
ALL	Driving	Likely B	Significant III	Serious	~ Drive with lights on. ~ Do not use cell phone while driving. Slow down in smoke and congested areas. ~ Check bridge load rating before using for heavy equipment; if in doubt, find another route. ~ Slow down at night - expect animals in the road. ~ Use spotter for backing. ~ Wash windshield. ~ Utilize spike camps to reduce driving ~ Follow piloted traffic control process	Likely B	Critical II	Serious	Yes	Yes	
ALL	Indirect Fireline	Likely B	Critical II	Serious	Post lookouts, identify escape routes and safety zones IRPG page 9. Review "Strategy/Indirect Attack" IRPG page 77.	Likely B	Significant III	Moderate	Yes	Yes	
ALL	Steep Terrain & Rolling Debris	Likely B	Critical II	Serious	Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts maintain LCES (IRPG page 7).	Occasional C	Critical II	Moderate	Yes	Yes	
ALL	Communication	Likely B	Critical II	Serious	~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources. ~ Utilize the ICS 205. ~ Utilize human repeaters when working in dead spots,	Occasional C	Critical II	Moderate	Yes	Yes	
ALL	Heavy Equipment Operations	Frequently A	Significant III	Moderate	~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.	Likely B	Critical II	Moderate	Yes	Yes	
ALL	Fatigue & Over Exertion	Likely B	Significant III	Serious	Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.	Occasional C	Critical II	Moderate	Yes	Yes	
ALL	Heat Related Illness (HRI) & Dehydration	Likely B	Significant III	Serious	Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take Frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include: o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating	Occasional C	Critical II	Moderate	Yes	Yes

**Human Resource Message
Eclipse Complex
September 16, 2017**

"Without belittling the courage with which men have died, we should not forget those acts of courage with which men have lived.

The courage of life is often a less dramatic spectacle than the courage of a final moment;

But it is no less a magnificent mixture of triumph and tragedy.

A man does what he must – in spite of personal consequences, in spite of obstacles and dangers and pressures –

And that is the basis of all human morality ...

-John Kennedy-

Our lives are not determined by what happens to us but by how we react to what happens, not by what life brings to us, but by the attitude we bring to life. A positive attitude causes a chain reaction of positive thoughts, events, and outcomes. It is a catalyst; a spark that creates extraordinary results.

-Wade Boggs-

"To every person there comes a time in life, that special moment, when they are figuratively tapped on the shoulder and offered the chance to do a very special thing, unique to them and fitted to his or her talent. What a tragedy if that moment finds them unprepared or unqualified for the work which would be their finest hour."

(In honor of the Palomar Hotshots)

-Winston Churchill-

We are what we repeatedly do. Excellence, then, is not an act, but a habit.

-Aristotle

"I have learned that success is to be measured not so much by the position that one reached in life as by the obstacles which one has overcome while trying to succeed."

-Booker T. Washington

When you know who you are; when your mission is clear and you burn with the inner fire of unbreakable will; no cold can touch your heart; no deluge can dampen your purpose. You know that you are alive.

-Chief Seattle-

I shall pass through this world but once. Any good therefore that I can do or any kindness that I can show to any human being, let me do it now. Let me not defer or neglect it, for I shall not pass this way again.

-Stephen Grellet

Janine Summy, Human Resource Specialist, 509-429-1206

TRAINING SPECIALIST MESSAGE

A Training Specialist is now on the incident.

working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The Training Specialist is available immediately following the morning Operations Briefing.

**Mark Rakestraw
Cell-(530)510-6339**

DEMOB Message

Remote demob from Gasquet Camp is only available for single resource federal employees and contractors.

Everyone else needs to demob at the Happy Camp ICP.

If you need a flight home, turn in your request 48-hours before you want to leave.

INCIDENT TRAINEE REGISTRATION FORM

Complete ALL fields and return to Training Specialist or DROP BOX for entry into database.

Remember to close out training packets with the Training Specialist before DEMOB.

TRAINEE's DATA

Name (PRINT): _____ ICS Trainee Position: _____

Request # (A,C,E,or O): _____ Agency Designator (Ex. CA-MNF): _____

MEDICAL PLAN (ICS 206 WF)

Medical Incident / Comm Radio Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"

Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Contact Radio Designator** *Geographic Name + "Medical" (Ex: Division Charlie Medical)* _____
- **Point of Contact (Division Sup. or designee)** *Name of POC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.*

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____ - **Crew ID:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** *What caused the injury?* _____
- **Location, Lat/Long** (Datum WGS84) *Ex: 40° 42.457' N x 123° 03.243' W* _____

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT / ACUTE / RED: Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ground ALS Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY / MODERATE / YELLOW: Serious Injury or illness. Non-life threatening. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palms sizes.</i>	Ground ALS ambulance or consider MEDEVAC if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE / MILD / GREEN: Minor injury / illness able to be treated in camp. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered, transport is ROUTE OF CONVENIENCE.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

- Helispot Short-haul/Hoist Air Ambulance Other

Ground Transport:

- Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

- Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen
 Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED
 Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command - Coordinate with medical aircraft on CALCORD 156.0750 - tone 6

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) *Ex: 40° 42.457' N x 123° 03.243' W* _____
- **Patient's ETA to Evacuation Location:** _____
- **Helispot/Extraction Size and Hazards:** _____

9. CONTINGENCY: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training
 - If air or ground ambulance is **DELAYED:** Package and transport patient to rendezvous with incoming Ambulance.
 Re-route EMS helicopter to rendezvous point as appropriate.
