OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fires are burning in timber fuels with some brush and grass intermixed. Fires within the complex continue to exhibit suppressed spread due to cloud cover and shower activity. The fire will continue to creep in understory fuels due to the heavy fuel loading.

Crown Fire Potential: None. Primarily isolated single tree torching due to understory surface fire preheating canopy, this will be hard to achieve today with forecasted weather.

Spotting Distance: Zero, however rolling material could be the source of Spot of heat source away from the fire's edge.

Probability of Ignition: <10%

SPECIFIC:

Branch I: Expect minimal fire activity on the Cedar Fire.

Branch II: None to minimal fire activity is anticipated near the containment lines. The Little Buck Fire and DIV K will continue to passively burn dependent on overnight rain fall.

Branch III: Pockets of heat remain along the South Fork of the Smith River but only minimal spread, primarily creeping is expected.

Branch IV: Abney fire will continue to slowly back down into the Horse Creek Drainage on the SE portion of the fire. Areas in DIV Z of the Miller Complex / Abney Fire will continue to burn out. Moderate fire activity will continue until this area receives wetting rain. There is a 3 acre spot fire well east of the main fire below Black Mountain.

AIR OPERATIONS

Low clouds with scattered rain may hinder aircraft use.

SAFETY

- Fire stressed weak trees are a significant threat
- No anticipated fire behavior challenges
- Take the time to review and implement the risk management process on your task today.

Eclipse Complex Inclement Weather Plan

September 18, 2017

The Inclement Weather Plan is a system developed in the event that there will be a large amount of rain entering effected divisions. On the days of September 18, 19, 20 and 21, 2017 the chance of a large amount of wetting rain is possible, and could be dangerous to divisions in its path. The Inclement Weather Plan has been developed and implemented with input from Southern California Team 1 Safety Officers, Tom Sherman and John Bates, Operations Section Chief Sal Reyes, Medical Unit Leader Erik Nelson and Trainee Nick Colonelli, Incident Meteorologist (IMET) Scott Carpenter. The following will be the plan to evacuate fire personnel and others to a safe location.

Weather Trigger Points

IMET Scott Carpenter, Safety Officers Tom Sherman and John Bates have identified trigger points for the evacuation of personnel off their respective divisions.

- If the Radar shows $\frac{1}{4}$ " of precipitation per hour or more
- If the Radar shows continuous wetting rain arriving within 3 hours over divisions having poor dirt roads.
- When the IMET makes notification through incident communications of imminent severe wetting rain

Areas of Refuge for Divisions

- Branch II, all divisions' safe refuge is Highway 96.
- Branch III, Division N and P, safe refuge area is Drop Point 300.
- Branch III, Division L, safe refuge area is Drop Point 350.
- Branch IV, Division V, safe refuge area is Drop Point 410.
- Branch IV, Division X, safe refuge area is Drop Point 401.

Returning to Your Divisions

1. IMET makes notification through incident communications to all branches and divisions that it's clear to return to your respective assignments.
2. Division/Group/Supervisor advises that resources can return to their assignments.

Medical Aids or Extractions

All medical incidents or extractions on the divisions, follow the 206 medical plan via 9 line radio report. The Medical Unit Leader will work with Operations Section and Air Operations Section to implement an extraction plan. If necessary, the divisions may implement Incident within an Incident (IWI) protocols.

Summary

It is the intent of Southern California Team 1 to provide the most professional service for the forest, also for personnel working in the branches and divisions as well as all team members. The *Eclipse Complex Inclement Weather Plan* was developed by team members to ensure all personnel are in their safe refuge areas in the event of a large wetting rain. Lastly, if a medical emergency occurs during this event, the Eclipse Medical Unit Leader and Safety Officers will ensure safe transport.

The Ten Commandments of Human Relations

1. SPEAK TO PEOPLE. There is nothing so nice as a cheerful word of greeting.
2. SMILE AT PEOPLE. It takes 72 muscles to frown and only 14 to smile.
3. CALL PEOPLE BY NAME. The sweetest music to anyone's ears is the sound of his/her own name.
4. BE FRIENDLY AND HELPFUL. If you have friends, be a friend.
5. BE CORDIAL. Speak and act as though everything you do is a genuine pleasure.
6. BE GENUINELY INTERESTED IN PEOPLE. You can like almost everybody if you try.
7. BE GENEROUS WITH PRAISE. Cautious with criticism.
8. BE CONSIDERATE WITH THE FEELINGS OF OTHERS. There are usually three sides to every controversy; yours, the other fellow's and the correct side.
9. BE ALERT TO GIVE SERVICE. What counts most in life is what we do for others.
10. ADD TO THIS A GOOD SENSE OF HUMOR...a big dose of patience, a dash of humility and you will be rewarded many fold.

Apologizing
doesn't always
mean you're
wrong and the
other person is
right. It means
you *value your*
relationship more
than your ego.

Courage is what it takes to stand up and speak; courage is also what it takes to sit down and listen. Winston Churchill
