OUTPUTS

FIRE BEHAVIOR**GENERAL:**

The fires are burning in timber fuels with some brush and grass intermixed. Fires within the complex continue to exhibit suppressed spread due to cloud cover and recent shower activity. Rainfall was heaviest on Branch three with eastern branches receiving ½" or less. The fire will continue to creep in understory fuels due to the heavy fuel loading and general warming and drying trend.

Crown Fire Potential: None. But could see isolated single tree torching due to understory surface fire preheating canopy, but this will be difficult to achieve today with forecasted weather.

Spotting Distance: Zero, however rolling material could be the source of a heat source away from the fire's edge.

Probability of Ignition: 30-40%

SPECIFIC:

Branch I: Expect minimal fire activity on the Cedar Fire.

Branch II: Minimal fire activity is anticipated near the containment lines. The Little Buck Fire and DIV K will continue to passively burn, with creeping and backing fire activity.

Branch III: Few pockets of heat remain along the South Fork of the Smith River and only minimal spread, primarily creeping is expected.

Branch IV: Abney fire will continue to slowly back down into the Horse Creek Drainage on the SE portion of the fire. Areas in DIV Z of the Miller Complex / Abney Fire will continue to burn out. Surface fire activity will continue and there is a 5 acre spot fire well east of the main fire below Black Mountain. This branch received limited rainfall (less than 1/3").

AIR OPERATIONS

Partly cloudy in the morning with fog on the ridges, becoming mostly sunny in the afternoon.

SAFETY

- Take the time to review and implement the risk management process on your task today.
- Fire stressed weak trees are a significant threat

Hazards & Risks

Safe Driving

While traveling to your division/branch, obey the posted speed limits and incident signage. When traveling to your division/branch, always drive with seatbelts and head lights on. On the windy curves, be aware of wildlife, livestock and logging trucks on the roadways, making contact with one of these, can be fatal.

Weather

With day time temperatures on the upswing, expect an increase in fire behavior.

Notice the winds and their behaviors:

- What time did the winds calm?
- Note the time that winds are battling and or changing direction.

10's and 18's

#14, Weather becomes hotter and dryer.

#15, Wind increases and/or changes direction

Environmental Hazards

Falling trees, snags, roll-out, Bears and Mountain Lions create a situation that shouts watch out.

Always have a look out in place to watch your backs.

HEQB

Heavy equipment including chippers, excavators and dozers are on the line doing repair work daily, keep your heads on a swivel and communicate with them. A collision with this equipment can and will be devastating

Eclipse Complex Inclement Weather Plan

September 22, 2017

The Inclement Weather Plan is a system developed in the event that there will be a large amount of rain entering effected divisions. On the days of September 18, 19, 20 and 21, 2017 the chance of a large amount of wetting rain is possible, and could be dangerous to divisions in its path. The Inclement Weather Plan has been developed and implemented with input from Southern California Team 1 Safety Officers, Tom Sherman and John Bates, Operations Section Chief Sal Reyes, Medical Unit Leader Erik Nelson and Trainee Nick Colonelli, Incident Meteorologist (IMET) Scott Carpenter. The following will be the plan to evacuate fire personnel and others to a safe location.

Weather Trigger Points

IMET Scott Carpenter, Safety Officers Tom Sherman and John Bates have identified trigger points for the evacuation of personnel off their respective divisions.

- If the Radar shows $\frac{1}{4}$ " of precipitation per hour or more
- If the Radar shows continuous wetting rain arriving within 3 hours over divisions having poor dirt roads.
- When the IMET makes notification through incident communications of imminent severe wetting rain

Areas of Refuge for Divisions

- Branch II, all divisions' safe refuge is Highway 96.
- Branch III, Division N and P, safe refuge area is Drop Point 300.
- Branch III, Division L, safe refuge area is Drop Point 350.
- Branch IV, Division V, safe refuge area is Drop Point 410.
- Branch IV, Division X, safe refuge area is Drop Point 401.

Returning to Your Divisions

1. IMET makes notification through incident communications to all branches and divisions that it's clear to return to your respective assignments.
2. Division/Group/Supervisor advises that resources can return to their assignments.

Medical Aids or Extractions

All medical incidents or extractions on the divisions, follow the 206 medical plan via 9 line radio report. The Medical Unit Leader will work with Operations Section and Air Operations Section to implement an extraction plan. If necessary, the divisions may implement Incident within an Incident (IWI) protocols.

Summary

It is the intent of Southern California Team 1 to provide the most professional service for the forest, also for personnel working in the branches and divisions as well as all team members. The *Eclipse Complex Inclement Weather Plan* was developed by team members to ensure all personnel are in their safe refuge areas in the event of a large wetting rain. Lastly, if a medical emergency occurs during this event, the Eclipse Medical Unit Leader and Safety Officers will ensure safe transport.

Human Resource Message

The Fire Community has many varied cultures that work together to bring closure to an incident. These cultures have unique and subtle differences.

We ask all firefighter's to understand and respect these cultures and remember that all of us have a common goal of bringing the fire to closure in a safe and efficient manner.

Just for today

- Do not have expectations about how you should be treated
- Be as friendly as you can to the people around you
- Do not insist that everything you do is perfect
- Be grateful for your health, your work, your family, your country

Janine Summy, Human Resource Specialist

“Character cannot be developed in ease and quiet. Only through experience of trial and suffering can the soul be strengthened, ambition inspired and success achieved.”- Helen Keller

Training Message

Saturday-Sept 24, at 1200 is the deadline for closing an active training assignment with the Training Specialist on this incident.

Trainees who have not previously checked in with the TNSP should do so immediately.
