Ryan Fliehman IMET (t)

WEATHER DISCUSSION: One last chance for notable precipitation comes during the day and then diminishes overnight. Showers and thunderstorms remain a possibility, bringing the potential for gusty winds, lightning and brief periods of moderate to heavy rain. Temperatures and humidity will be heavily dependent on the amount of clearing that is present during the day.

WEATHER FORECAST FOR TODAY:

WEATHER: 30% Chance of showers and thunderstorms. Partly cloudy with areas of smoke.

TEMPERATURES: Highs 74-80 for ridges, low 80s in valleys.

HUMIDITY: 65-80% morning, 45-55% by afternoon.

20 FT WINDS: ***Erratic Winds possible if thunderstorms occur***

RIDGETOP – Northeast wind early 3-6 mph gusting to 9 mph. Becoming northwest 5-8 mph, gusting to 12 mph in afternoon.

SLOPE/VALLEY – Calm winds early, Light and variable winds in the afternoon.

HAINES INDEX: 3 **LAL:** 3 **STABILITY/INVERSION:** Around 3000 feet. Partially breaking after 1300.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Partly cloudy with a 20% chance of thunderstorms early.

TEMPERATURES: Lows 57-63 on ridges, 60-65 in valleys.

HUMIDITY: Mid-slope and ridges: gradual recoveries through the night to 65-80% by morning.
Valleys: Good recoveries 75-85%.

20 FT WINDS: ***Erratic Winds possible if thunderstorms occur***

RIDGETOP – Northwest 4-7 mph gusting to 10 mph, decreasing to 3-6 mph by 0500.

SLOPE/VALLEY – Downslope/downvalley 1-2 mph.

HAINES INDEX: 2 **LAL:** 2 **STABILITY/INVERSION:** Weaker inversion ~3000 feet.

Saturday through Tuesday: A warming and drying trend will start this weekend. A return to more seasonal temperatures and drier air is expected as we move into next week. Breezy northeast winds are a possibility Sunday into Monday, with Chinook style winds also possible in the Gasquet area.

Haines Index: 3

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Thunderstorm outflow winds can result in fire spread in any direction. Areas of fire activity near ridgetops will be influenced by ridgetop winds. Otherwise fire activity sheltered from winds will be influenced by terrain and fuels. Due to precipitation, expect smoldering and creeping fire behavior early in the day. Expect surface fire spread to pick up in the afternoon where no further precipitation occurs. May see spotting from torching even with lower temps and higher RHs.

Rate of Spread: Timber/Brush/Heavy Down/Dead: 5-12 Chains per hour (head fire)
0.5-1 Chains per hour (backing fire)

Flame Length: Timber/Brush Heavy Down/Dead: 5-10 Feet (head fire)
1-3 Feet (backing fire)

Crown Fire Potential: Isolated to group torching. Crown runs possible where winds align with slope or on steep slopes. Crown fire spread rates approximately 0.4 mile per hour.

Spotting Distance: 0-0.4 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

Probability of Ignition: Day 20-40%, Night 20-40% (model)

Rollouts: Watch for locations where rollout is set up for and uphill run

SPECIFIC:

Branch I: Areas of heat on the north perimeter of Cedar expected to continue to smolder and creep into the unnamed drainage of Thompson Creek with minimal potential to cross. Expect fire to moderate in the Middle Fork and Butte Fork of the Applegate River in the Red Buttes Wilderness. Minimal backing fire possible late in the day.

Branch II: The low elevations of the branch are expected to remain smoked out under the persistent inversion with minimal spread. Expect smoldering and creeping activity in the Boulder Peak area with minimal spread into the headwaters of the West Fork of the Little South Fork of Indian Creek. Growth to the south/southwest in the western section of the Branch is expected to moderate. Minimal growth expected on Interior islands and fingers.

Branch III: The Branch will likely see less smoke today. If no further precipitation is received, areas of heat with unburned fuel above them on the slopes of the South Fork of the Smith River expected to spread upslope towards Blue Ridge in the afternoon.

Branch IV: On the eastern perimeter, fire located on the higher ridgetops expected to spread to the east/southeast by afternoon if no further precipitation is received. Upslope surface spread is possible by afternoon where fire gets established on slopes with unburned fuel above.

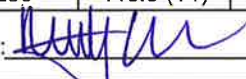

AIR OPERATIONS

There may be some clear air in Branch III. Otherwise expect heavy smoke and poor visibility as well as turbulent air near thunderstorms.

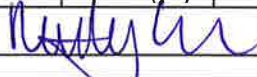

SAFETY

Watch for thunderstorms and don't be lulled into a false sense of security due to moderated fire behavior. Maintain good lookouts.

SAFETY MESSAGE

September 8, 2017
Eclipse Complex, Klamath National Forest

Risk Management

Fire operations risk management is outlined in the NWCG Incident Response Pocket Guide (IRPG). The five step process provides firefighters and fire managers a simple, universal, and consistent way to practice risk management by:

- Establishing situation awareness by identifying hazards
- Assessing hazard potential.
- Developing hazard controls and making risk management decisions.
- Implementing hazard controls.
- Supervising implementation and evaluating effectiveness. If situation has changed significantly, restart Risk Management Process.

Communication Responsibilities

All firefighters have five communication responsibilities:

- Brief others as needed
- Debrief your actions
- Communicate hazards to others
- Acknowledge messages
- Ask if you don't know

Leader's Intent

In addition, all leaders of firefighters have the responsibility to provide complete briefings and ensure that their subordinates have a clear understanding of their intent for the assignment:

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look when done

Human Resource Message

Communication Patterns

Working in an emergency incident situation is no simple task. We can easily offend someone by a careless slip of the tongue, pen, or through inappropriate behavior. With increased diversity there comes a need for increased sensitivity about how we interact with each other. Becoming more sensitive in our dealings with one another results in increased rapport with those we work with and contributes to a positive and productive work environment.

If you feel or see something-say something.

It is beneficial and more productive for all to resolve conduct issues before they become conflicts.

HRSP is located in the trailer at the far end of main street-shared with IC and Logistics.
