# CA-KNF-006098 Complex Fire Weather Forecast

**FORECAST NO:** 35

**NAME OF FIRE:** KNF-006098-Complex

**PREDICTION FOR:** 0600-0600

**UNIT:** Klamath NF- Happy Camp RD

**SHIFT DATE:** 9/9-9/10 Saturday and Saturday Night **SIGNED:** /s/

**TIME AND DATE**

**Incident Meteorologist -** John Franks IMET

**FORECAST ISSUED:** 2000 9/8/2017

Ryan Fliehman IMET (t)

**WEATHER DISCUSSION:** Another day of significantly less smoke in the region will allow for the sun to dry out the airmass over the fire. Warmer temperatures and drier air will permit terrain driven winds to become established this afternoon, becoming drainage winds overnight.

**WEATHER FORECAST FOR TODAY:**

**WEATHER:** Partly cloudy with morning valley fog.

**TEMPERATURES:** Highs 77-82 for ridges, 88 to 93 in valleys.

**HUMIDITY:** 55-65% in the morning, decreasing to 25-30% by afternoon. Drainages and valleys will see 90% morning humidity drop to 30-35% in the afternoon

**20 FT WINDS:**

**RIDGETOP** – Northwest wind 5-8 mph. Gusts to 15 mph in afternoon.

**SLOPE/VALLEY** – Calm in the morning, upslope/upvalley 4-6 mph with gusts to 9 mph by afternoon.

**HAINES INDEX:** 3 **LAL:** 1 **STABILITY/INVERSION:** Around 4500 feet. Breaking after 1400.

**WEATHER FORECAST FOR TONIGHT:**

**WEATHER:** Becoming clear.

**TEMPERATURES:** Lows 50-60 on ridges and in valleys.

**HUMIDITY:** Mid-slope and ridges: gradual recoveries through the night to 35-45% by morning.  
Valleys: Continued good recoveries 85% or higher.

**20 FT WINDS:**

**RIDGETOP** – Northwest 3-6 mph. An early evening gust to 10 mph.

**SLOPE/VALLEY** – Downslope/downvalley 2-3 mph.

**HAINES INDEX:** 3 **LAL:** 1 **STABILITY/INVERSION:** Strengthening around 4000'

**Sunday through Wednesday:** The warming and drying trend will continue through at least Monday, with breezy northeast winds expected Sunday night into Monday, and Chinook style winds possible in the Gasquet area. The pesky low pressure system off the California coast will move inland and come onshore Tuesday. This will bring a southerly flow to the region, increasing monsoonal moisture and the threat for thunderstorms on Tuesday and Wednesday. A brief cool-down and increase in humidity should occur with these storms.

### INPUTS

**WEATHER SUMMARY: \*REFER TO IMET WEATHER FORECAST\***

**Sky:** Partly cloudy with morning valley fog

**Maximum Temperatures:** Highs 77-82 on ridges, 88-93 in valleys

**Minimum Humidity:** 55-65% morning, 25-30% by afternoon, in valleys 90% morning, 30-35% afternoon

**Winds (20'):** Ridgetops – Northwest wind 5-8 mph gusting to 15 mph in afternoon

Slope/valley – Calm winds morning, upslope/upvalley 4-6 gusts to 9 mph in afternoon

**LAL:** 1      **Haines Index:** 3

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

With a return of slope/valley winds and continued drying expect an increase in surface fire intensity and spread by afternoon. Areas of fire activity near ridgetops will be influenced by ridgetop winds. Torching with short range spotting possible.

**Rate of Spread:** Timber/Brush/Heavy Down/Dead: 5-14 Chains per hour (head fire)  
0.5-1 Chains per hour (backing fire)

**Flame Length:** Timber/Brush Heavy Down/Dead: 5-10 Feet (head fire)  
1-3 Feet (backing fire)

**Crown Fire Potential:** Isolated to group torching. Crown runs possible where winds align with slope or on steep slopes. Crown fire spread rates approximately 0.5 mile per hour.

**Spotting Distance:** 0-0.5 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

**Probability of Ignition:** Day 30-70%, Night 20-50% (model)

**Rollouts:** Watch for locations where rollout is set up for and uphill run

##### SPECIFIC:

**Branch I:** Areas of heat on the north perimeter of Cedar expected to continue to smolder and creep into the unnamed drainage of Thompson Creek with minimal potential to cross. Backing fire possible late in the day. Expect minimal fire activity in the Middle Fork and Butte Fork of the Applegate River in the Red Buttes Wilderness.

**Branch II:** To start the day expect smoldering and creeping activity with rollout in the Boulder Peak area and on the spot fire in the West Fork of the Little South Fork of Indian Creek. Due to rollout surface spread possible in these areas. The western section of the Branch and interior islands and fingers may see surface spread by afternoon.

**Branch III:** Possible spread on areas of heat with unburned fuel above them on the slopes of the South Fork of the Smith River. Rollout that has occurred the past few days expected to become visible with spread into unburned fuels. Upslope winds may cause increased fire activity earlier in the afternoon.

**Branch IV:** More smokes are likely to show themselves in areas of the branch that are in the mop-up stage. On the eastern perimeter, any areas of heat located on the ridgetops are expected to be influenced by ridgetop winds. Surface spread is possible by afternoon especially in heavier fuels.

### AIR OPERATIONS

Visibilities should be good around midday but could become smokier in the afternoon.

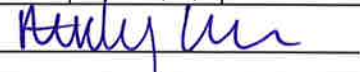

### SAFETY

Fire activity is expected to pick up today. Maintain LCES.

# Safety Message

September 9, 2017  
Eclipse Complex, Klamath National Forest

**SAFETY** is our first and most important priority on this incident, and all the time! A job that cannot be done safely does not need to be done. Every employee has the right of a safe work environment, and every supervisor has the obligation to provide a safe work environment. Don't become complacent to the things or routines around you. Maintain your situational awareness to all the surroundings, and don't get tunnel vision by just focusing on the immediate present single event in front of us.

**BRIEFINGS:** Start the shift or new work assignment with a briefing. Review the Safety Plan and the appropriate Risk Analysis. Ensure that everyone completely understands their assignment. Be guided by the Basics: Don't violate the 10 Standard Fire Fighting Orders, Mitigate the 18 Situations, Have LCES in place, Use the Look Up, Look Down, Look All Around process, and use your Incident response Pocket Guide as needed to address as situation as they arise.

**Snags and Hazard Trees:** There are many hazard trees and snags. Follow the Hazard Tree Safety guidelines in the Incident Response Pocket Guide. Evaluate the potential hazards before starting work. Use the "Look Up, Look Down, Look All Around" process. Minimize exposure by limiting the number of personnel around and under the hazard tree and the time under the hazardous conditions. Pay particular attention during windy periods.

# Human Resource Message

**Work and Fatigue in Wildland Firefighting effects your physical and emotional state!**

Wildland Firefighting is arduous work, performed for long shifts in difficult environmental conditions. The work can be dangerous due to the fire and working conditions. Heat, smoke, rolling rocks, falling snags, and other hazards threaten the worker. Fatigue can impair performance and decision making, increasing the risk of injury. Prolonged exposure to fatigue, stress, smoke, and poor nutrition has the potential to increase the incidence of upper respiratory illness, but also mental lapses.

The stress response is necessary to prepare an athlete, firefighter or soldier for a maximal effort in a physical challenge, but it can be unhealthy if it occurs too often in the wrong setting.

Correct Nutrition, Hydration and Rest are good coping mechanisms for stress and fatigue. Make use of your down time and rest per the work/rest guidelines.

## Your Mental Health Matters!

HRSP is located in the trailer at the far end of main street-shared with IC and Logistics.

### RESOURCE ADVISORS

- Avoid areas flagged with orange/white flagging.
