INCIDENT ACTION PLAN

MODOC JULY COMPLEX

CA-MDF-000671 P5K7YC (0569)

Friday

FRIDAY DAY SHIFT OPERATIONAL PERIOD

FRIDAY
AUGUST 11, 2017
0600-1800 HOURS

MAPS

INCIDENT OBJECTIVES (ICS 202)

MODOC JULY COMPLEX	Date/Time From: 08/11/2017 0800 FRI	Date/Time To: 08/11/2017 1800 FRI																		
3. Objective(s): <u>Management Objectives:</u> <ul style="list-style-type: none"> • Provide for the safety of all responders by utilizing national Risk Management Standards and the implementation of appropriate mitigations. • Share critical information affecting public safety so timely decisions and actions can be implemented. • Reduce firefighter exposure by only engaging fire assignments with the highest probability of success. • Provide initial attack response within the area identified by the Delegation of Authority. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests. • Utilize local resource specialists to identify and protect sensitive sites and cultural resource values by minimizing impacts from suppression operations. • Maintain and enhance Community, County, State, National Forest and Stakeholder relationships through accurate and timely dissemination of information. • Identify, assess and implement suppression repair needs, where appropriate, in coordination with the Resource Advisor following agency policy. • Manage incident costs effectively for the values at risk through regular and ongoing cost analysis. <u>Control Objectives:</u> <ul style="list-style-type: none"> • Keep Cove and Steele fires within current containment lines. 																				
4. Operational Period Command Emphases: <u>Primary:</u> Using a full suppression strategy, minimize the size of the fires through the use of direct attack where safe to do so. <u>Alternate:</u> When not feasible or safe to go direct use indirect attack to minimize fire size. <u>Contingency:</u> Use indirect attack tactics at major roads and natural barriers to suppress fire & minimize firefighter exposure to extreme fire behavior. <u>Emergency:</u> Withdraw fire personnel to safety zones or ICP, ensure accountability for all personnel & reevaluate how to safely advance to suppress the fire.																				
General Situational Awareness: <ul style="list-style-type: none"> • Fuels are responding to a drying trend reflected by mid-single digit 10 hour fuel stick readings • Isolated thunderstorms still pose a threat of adverse fire behavior from outflow winds • Recognize complacency, keep situational awareness current 																				
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:																				
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;"><input checked="" type="checkbox"/> ICS 202</td> <td style="width: 33%;"><input type="checkbox"/> ICS 207</td> <td style="width: 34%;">Other Attachments:</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 203</td> <td><input type="checkbox"/> ICS 208</td> <td><input checked="" type="checkbox"/> DEMOB LIST</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 204</td> <td><input type="checkbox"/> ICS 220</td> <td><input checked="" type="checkbox"/> SUPPRESSION REPAIR GUIDE</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 205</td> <td><input checked="" type="checkbox"/> Map/Chart</td> <td><input checked="" type="checkbox"/> SAFETY MESSAGE</td> </tr> <tr> <td><input type="checkbox"/> ICS 205A</td> <td><input checked="" type="checkbox"/> Weather Forecast/Tides/Currents</td> <td><input checked="" type="checkbox"/> TRAINING SPECIALIST MESSAGE</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 206</td> <td></td> <td></td> </tr> </table>			<input checked="" type="checkbox"/> ICS 202	<input type="checkbox"/> ICS 207	Other Attachments:	<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> DEMOB LIST	<input checked="" type="checkbox"/> ICS 204	<input type="checkbox"/> ICS 220	<input checked="" type="checkbox"/> SUPPRESSION REPAIR GUIDE	<input checked="" type="checkbox"/> ICS 205	<input checked="" type="checkbox"/> Map/Chart	<input checked="" type="checkbox"/> SAFETY MESSAGE	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast/Tides/Currents	<input checked="" type="checkbox"/> TRAINING SPECIALIST MESSAGE	<input checked="" type="checkbox"/> ICS 206

Modoc July Complex Fire Weather Forecast

FORECAST NO: 28

NAME OF FIRE: Modoc July Complex

PREDICTION FOR: 0600-1800 Day shift

UNIT: CA-MDF

SHIFT DATE: 8/11/17

SIGNED: *J. Taeger*

TIME AND DATE

FORECAST ISSUED: 2200 hours on 8/10

Incident Meteorologist Trainee: Jimmy Taeger

WEATHER DISCUSSION: Drier conditions are expected on Friday; however, an isolated afternoon/evening thunderstorm is possible across the area. Where a storm develops, cloud-to-ground lightning, gusty outflow winds and small hail are possible. Highs Friday will be in the 80s, with relative humidity around 20%. Gusty West to Southwest winds near 20 mph are expected over the weekend.

Thunderstorms imply the possibility of gusty and erratic winds

WEATHER FORECAST FOR TODAY:

WEATHER: Partly cloudy. Isolated thunderstorms in the afternoon and evening, with storms first developing around 1500 and ending around 2000.

HIGH TEMPERATURES: 80-88. Little change.

HUMIDITY: Around 20%. Little change.

20 FT WINDS:

RIDGE: COVE - South 4-6 mph 0600-1400, then West 5-8 mph with gusts to 12 mph from 1400-2000.

RIDGE: STEELE - Northeast 3-5 mph 0600-1400, then West-Southwest 5-8 mph with gusts to 15 mph from 1400-2000.

SLOPE/VALLEY - Upslope 2-5 mph. Gusts to 8 mph from 1200-1900.

HAINES INDEX: 4

LAL: 2

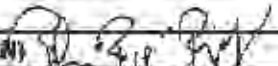

STABILITY/INVERSION: Moderate morning inversion becoming unstable after 1300.

FRIDAY NIGHT: Any thunderstorms will dissipate by 2200, and then skies become partly cloudy overnight. RH recovery will be 40-60%, with lows 53-62. Light and downslope winds after midnight.

SATURDAY THROUGH MONDAY: Dry this weekend into early next week, with gusty West to Southwest winds of 20 mph Saturday and Sunday afternoons and evenings. High lowering into the 70s by Monday, and minimum relative humidity of 20-25% in the afternoons. Haines of 5 on Saturday.

SAFETY INFORMATION: Keep an ear to the radio for weather updates, and seek shelter from lightning if a storm approaches Friday. The fire weather threats switch this weekend from thunderstorms to gusty Westerly winds and a higher Haines index.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 030	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Modoc July Complex	OPERATIONAL PERIOD: Day Shift Friday day 8/11/2017
DATE ISSUED: 08/10/2017	TIME ISSUED: 2100
UNIT: CA-MDF-000671 PSKTYC	SIGNED: Brenden "Rip" Ripley (FBAW) 

INPUTS

WEATHER SUMMARY:

***** WIND SCHEDULE *****

Steele Fire: 0600 - 1400 NE 3-5mph...1400-2000 WSW 5-8mph G15
Cove Fire: 0600 - 1400 S 4-6mph...1400-2000 W 5-8mph G15
Slope/Valley: 0600 Light Winds...1200-1900 Upslope/valley 2-5mph G8

Note: Outflow winds (30 mph possible) from isolated thunderstorms could come from any direction at any time storms are present.

(See attached weather forecast for specific weather information)

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fuels have significantly dried due to the weather patterns over the initial Attack Response Area (IARA) over the past two days. Both Wednesday and Thursday were mostly dry with clear skies during the day, however a late afternoon thunderstorm brought wetting rains and at least 50 cloud to ground lightning strikes along the county line and "Gasoline Alley". A similar scenario happened on Monday when 60 lightning strikes occurred over the area followed by 12 IA responses on Tuesday. Due to the dry receptive fuel bed associated with the "Gasoline Alley", hold over fires should be expected today.

LOCAL THRESHOLDS - WATCH OUT

Combinations of any of these factors can greatly increase fire behavior.

Thresholds: 20' winds over 5 mph RH less than 20% Temp over 90° ERC over 54 BI over 51

Forecasted: 20' winds 15mph RH 20% Temp 80-88° ERC 60 BI 37-50

Probability of Ignition: 50% Shaded.....80% Unshaded

SPECIFIC:

North Zone & Steele Fire: 10hr moisture trend - Max 10hr fuel moisture started at 14% and dried to 3%. Critical value of 7% was attained by 1100hrs.

South Zone & Cove Fire: 10hr moisture trend - Max 10hr fuel moisture started at 10% and dried to 5%. Critical value of 7% was attained by 1230hrs.

IA "Gasoline Alley": 10hr moisture trend - Late afternoon wetting rains ranged from $\frac{1}{2}$ " - $\frac{3}{4}$ " over the area. 10hr fuels at 2100hrs ranged from 18-25%. This morning they range from 13 - 28.

THREATS

#1 - Holdovers: ... Monday we had 60 lightning strikes, Wednesday we had 30-40 strikes. Last night we had 50 strikes. Junipers can harbor holdover heat for days following a strike. The potential remains for additional fires due to holdovers.

#2 - Additional Starts from isolated thunderstorms.

#3 - NE area of the Steele Fire... WSW winds return to the Steele fire in the afternoon. Fuels just outside the line are extremely receptive to ignition.

AIR OPERATIONS:

VFR conditions are expected throughout the operational period

SAFETY

Pay attention to transition boundaries where fires burn out of the areas exposed to wetting rains into dryer fuels. Fire behavior along those boundaries has the potential to increase in intensity as the dryer fuels are encountered. Remember "Gasoline Alley" is known for having extremely dry unique burning conditions.

NORTH ZONE

Division/Group Assignment List (ICS 204 WF)

Modoc July Complex – Safety Message

INCIDENT #CA-MDF-000671

DATE: 08-11-17 TIME: 0600 – 1800 Day

COMPLACENCY

- Defined= A feeling of being satisfied and not wanting to make it better.
- Your goal is to **NEVER** be satisfied with your safety.
- Keep your edge by asking these 3 questions;
 - What could go wrong?
 - What more can I do to ensure our safety?
 - What may I be unaware of that could compromise our safety?
- Look up, Look down, and Look all around to maintain your awareness.

Working with Heavy Equipment

- When working around heavy equipment stay at least 100 feet in front and 50 feet behind the equipment. In timber, distances should be increased to 2 ½ times the canopy height.
- Never ride on the equipment.
- Do not approach equipment without eye contact with the operator, implements grounded, and in idle.
- Avoid working below equipment where rolling material is present.
- Establish visual and radio contact before engaging.
- Communicate all hazards to the operator.
- Equipment operators have difficulty seeing ground personnel; take responsibility for your safety and all those around you.

FATIGUE EFFECTS AND MANAGEMENT

- Cumulative fatigue is a contributing factor in many accidents.
- Fatigue effects your mental processing, your ability to access your short and long term memory, as well as your physical performance.
- The effect of 24 hours without sleep is equivalent to being legally drunk.
- The only remedy to fatigue is quality sleep. Manage your off shift time to ensure you and your personnel get the rest needed.

"Hindsight is a wonderful thing but foresight is better, especially when it comes to saving life, or some pain."

William Blake

"How much of a man... the more the better...
... that the more the better... should the more...
... the more the better..."

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE WEATHER	<ul style="list-style-type: none"> Winds increasing or changing direction. Weather becoming hotter and drier. Unstable atmosphere can promote rapid fire growth.
ALL	TRAFFIC AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Use spotters when backing, always use headlights. Use warning lights when working on roads or traveling in smoke. Reduce speed when dusty, maintain adequate spacing with other vehicles. Some roads are dead end with poor turn around, scout roads first. Watch for livestock and wildlife.
ALL	DANGER TREES	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. *Establish trigger points for disengagement during high wind events*.
ALL	FIREFIGHTER FATIGUE	<ul style="list-style-type: none"> Follow work rest guidelines. Take breaks as needed. Stay hydrated and well nourished. Supervisors assess the fatigue levels of your crew members.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a minimum of 2 1/2 times the tree height exclusion area around equipment. Use a spotter when backing.
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air when practical. Evaluate unburned islands/increase situational awareness.
ALL	THUNDERSTORMS	<ul style="list-style-type: none"> Refer to IRPG page 21, Thunderstorm guidelines. Heads up for erratic winds and possible downdrafts. Follow the 30/30 rule.
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	<ul style="list-style-type: none"> Drink 2 to 1 ratio of water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include: Lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating.
ALL	SPOT FIRES	<ul style="list-style-type: none"> Size up prior to engagement. Watch for multiple spots. Ensure LCES is in place. Maintain Situational Awareness at all times.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> Follow Aviation "Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communications with all air resources.

LINE MEDICAL EMERGENCY:

Grow Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.
 Division Supervisor/Operations contacts Communication:
 - Division Supervisor/Operations to use "Injury or Incident communication protocol" on next page
 - Division Supervisor/Operations will run medical emergency on command channel
 - Communications will contact the Medical Unit Leader on Command channel.
 - Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan
 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net
 - Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
 - Medical Unit Leader will:
 1. Contact Communications to dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Dir. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
(alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	<i>Ground or Air Ambulance to Hosp.</i>	<i>Transport to Med Unit</i>
<i>Mechanism</i>	<i>Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn injury greater than 1% body area</i>	<i>Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns</i>
<i>Area injured</i>	<i>Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the joint</i>	<i>Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee</i>
<i>Symptoms</i>	<i>Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating</i>	<i>Alert and oriented No shortness of breath Good pulses</i>

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

FIRE SUPPRESSION REPAIR PLAN

Guidelines for dozer lines, hand lines, helispots, spike camps, drop points, water sources and safety zones:

Note: Where there is more rock than soil on control lines with slopes 5% or greater, waterbars are not needed as long as the non burnable debris on the line will dissipate the water enough to prevent channeling.

Stage 1) Soil and rocks will be put back on control lines and spread. Waterbarring will be completed where appropriate. No burnable material will be placed on the direct control lines.

Stage 2) In addition to stage 1 burnable material/debris will be placed on the lines and spread. Pull slash and downed trees over dozer line to reduce erosion and prevent unauthorized vehicular use.

Contingency line will be repaired as stage 2.

Obliterate any berms from the outside edge of existing fireline. Work material back onto the line. Do not sidecast berm material into or near stream channels.

Restore Forest roads to pre-fire suppression activities. Blade and grade travelway, remove berms, clean ditches and culvert inlets, chip roadside slash.

Repair fences damaged resulting from fire suppression activities.

Remove all improvised dams from drainages created for pumps and drafting. Area should be returned to pre fire suppression activities.

Water bars should be constructed at least 30 degrees perpendicular to the fireline. Make sure waterbars outlets are open.

Dozer/Hand line (% slope)	Maximum Distance Apart (feet)	Waterbars should be no further apart than this. When in doubt, put in more. Use only excavators for this work. Make sure waterbars outlets are open (often requires a little shovel work).
1-5	200	
6-20	125	
21-40	60	
41-60	40	
>60	25	

Watercourses:

All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized.

Concentrations of Green Timber

Areas that have concentrations of fallen or pushed over trees (not juniper) will need to be addressed. Trees over 10" DBH should have the root wad removed at the base and the tree placed with others in an organized fashion. All of the butts of the trees even, stacked on top of each other so that there 4-6 trees in a bundle. If possible the bundles will be parallel to the road and not overlapping.

Trees less than 10" DBH and root wads should be handled as slash/debris and used for covering dozer line to prevent vehicular travel and reduce erosion.

STANDARD OPERATING PROCEDURES—FINANCE SECTION 16 HOURS IS NOT A GUARANTEE – IT IS HOURS WORKED!!

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed at least 8 hours of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (ie. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Kitchen closes at 2200 so show dinner break unless you went off clock by 2130.

**A job well done is not quickly forgotten.
Take pride in all your accomplishments.**

SPECIAL NOTES				

FIRE REPLACEMENT PROCEDURES

Submit requests for all Incident replacements on a 213, General Message:

- Separate cache from non-cache items on separate 213's!
- Include explanation for lost or damaged items.
- Include DIVS signature on the 213 to verify the item(s) has/have been lost or damaged and support the circumstances surrounding it.
- For stolen items, contact your supervisor and Security Manager as soon as practical.

FOR CACHE ITEMS

Requesting Resource is NOT Being Demobed and Requested Items ARE Available in Supply:

- R&D shall fill request and note on the 213.

Requesting Resource is NOT Being Demobed and Requested Items are NOT Available in Supply.

- The Supply Unit will place an order for the requested items through the regular cache order process on the incident. The order will be shipped to the incident and replacement will take place at the Supply Unit and noted on the 213.

Requesting Resource IS Being Demobed and Requested CACHE Items are NOT In Stock in Supply:

- Along with the 213, complete an *DF-315, Incident Replacement Requisition for cache items only* and take to SPUL for review and approval. Include the requesting resources' email on the form so the Resource Order can be emailed to the Requesting Resource.
- The SPUL will issue S#s pending receipt and verification of proper documentation for cache items.

NDM-CACHE Items – This is the Important Part!!!

Non-Cache Items include any item not available through the National Cache System.

Lost, damage, or destroyed government non-cache property shall be reported to the appropriate DIVS or higher-level overhead within 24 hours of occurrence. Stolen property shall be reported to the Security Manager. The requesting resource shall complete a 213 and *DF-289, Property Loss and Damage Report – Fire Suppression*, and include the following:

- All witnesses shall document the facts and circumstances of the loss or damage on the DF-289. Use additional paper if needed. Explanations shall be detailed and thorough.
- The requesting resource will take the 213 and DF-289 to the Comp/Claims Unit Leader (COMP) for review. The COMP will make a determination based up on the documentation presented and other information provided by the requesting resource.
- Approval for replacement is the responsibility of the incident agency and may be delegated to the Incident Management Team.
- If the replacement request is approved, the replacement cost will be limited to cache equivalent value. This value will be reflected on the Resource Order.
- Items that do not have a like-item in the cache will be reviewed and approved at the discretion of the FSC or Incident Business Advisor, as delegated by the Agency Administrator.

USDA Forest Service Pacific Southwest Region

Outreach Notice Modoc National Forest

2017 Fall Centralized Fire Hire Numerous Fire Positions

The Modoc National Forest will soon be filling numerous Fire Positions (listed in the table below), with duty locations of Alturas, Adin, Canby, Cedarville and Tulelake, California. This notification is being circulated to inform prospective and interested applicants of this upcoming opportunity. Please see the following information on the positions and the Modoc National Forest.

Announcements for these positions will open on August 11, 2017

To apply for any of these positions:

- 1) Go to USAJOBS (must set up and have a USAJOBS profile) <https://www.usajobs.gov/>
 - a. Search/locate the announcement number;
 - b. Select position(s) and location(s) you are interested in and begin the application process.
- 2) Complete and submit your application prior to 8:59 Pacific Time or 11:59 p.m. Eastern Time August 25, 2017 at 20:59 Pacific Standard Time
- 3) All announcements flown under Merit authority will also be advertised using the Land Management Workforce Flexibility Act (LMWFA) for eligible applicants. So along with Forest Service-wide applicants already in career or career-conditional appointments, temporary employees who meet the LMWFA eligibility requirements may also apply to the merit announcement. Additional information and requirements on LMWFA can be found by going to the HRM LMWFA website at <http://fsweb.asc.fs.fed.us/HRM/employment/LMWFA.php>

Candidates are encouraged to read the announcement thoroughly to ensure you are applying to the correct announcement, as some position titles appear similar. Applicants will need to attach any required supporting documents (IQCS Master Record, DD-214, etc.)

The following positions are the known vacancies:

Position	REGIONAL GROUP ANNOUNCEMENT NUMBERS G will be for Merit & DP will be for Demo positions.	Duty Location
Engineering Equipment Operator / Fire Doter	17-FIREFALL-EQOPTR-10G & DP	Adin
Forestry Technician Fire Engine Operator (FEO) GS-0462-07	17-FIREFALL-FEO(H)-7G	Alturas
Lead Forestry Technician Assistant Fire Engine Operator (AFEO)	17-FIREFALL-AFEO-6G & DP	Alturas
Supervisory Forestry Technician / Asst Superintendent	17-FIREFALL-THCASST-78G	Canby
First Aid GS-03, Forestry Technician GS-4/5	17-FIREFALL-WFAP-5G & 17-FIREFALL-WFAP-345DP	Adin, Alturas, Canby, Cedarville, Tulelake

Candidates are encouraged to apply to any position/location on the Forest, whether a vacancy exists or not. Positions that become vacant during this process may also be filled immediately through a "back filling" process.
