Modoc July Complex Fire Weather Forecast

FORECAST NO: 10

PREDICTION FOR: 0600-1800 Day shift

UNIT: CA-MDF

SHIFT DATE: 8/1/17

SIGNED:

TIME AND DATE

Incident Meteorologist: Ryan Walbrun-IMET

NAME OF FIRE: Modoc July Complex

FORECAST ISSUED: 2200 hours on 7/31

... Near record heat, dry with continued Haines 5...

WEATHER DISCUSSION: We are in the peak of a significant heat wave across the region with another day of highs well into the 90s. In fire weather we look for significant daily changes and right now we are not seeing anything too significant in terms of daily change. We have seen the fire become active for five consecutive days and with no big changes in the weather crews should prepare for another day of active conditions after 1 pm. Humidity will remain critically low below 15% with Haines 5 conditions forecast aloft implying continued plume dominated fire potential. Cumulus clouds will develop shortly after lunch once again but vertical development is not expected to be too high due to the strong high pressure. Winds will be light from the east for most of today with fire and terrain driven winds likely influencing the fire more than general winds today. Transport winds are forecast to push the main smoke plumes to the northwest towards Mt Shasta and the Oregon border.

WEATHER FORECAST for Today:

WEATHER: Widespread smoke. Otherwise mostly sunny, hot and dry.

HIGH TEMPERATURES: 89 smoke/shaded areas to 98 full sunshine. 1-2 degrees warmer.

HUMIDITY: Afternoon minimum 9-15%. Little change.

20 FT WINDS:

RIDGETOP - Northeast 3-6 mph early becoming East through the day but continued light.

Some late afternoon gusts 10-12 mph.

SLOPE/VALLEY - Light then afternoon upslope 2-5 mph gusts 7-9 mph.

HAINES INDEX: 5 STABILITY/INVERSION: Strong morning inversion becoming unstable after 2 pm.

Tuesday Night: Fire plumes and cumulus will dissipate by 8 pm. RH recovery will be poor through 11 pm then moderate recovery around 35% during the late night hours. Thermal belts in the timber around Adin Pass and Blue Mountain may see locally poorer RH recovery. Otherwise mostly clear with overnight lows 65-70. Ridge winds will become Northeast 5-10 mph with light downslope winds in the lower slopes.

Wednesday thru Friday: Wednesday may be the hottest day of the current heat "wave" with highs well into the 90s to around 100 degrees. Humidity readings continue to be near the upper single digits with poor night time humidity recovery. Haines 5 conditions continue at least through Thursday. Thunderstorm chances increase slightly by Thursday afternoon and then become more likely by Friday. Any storms will have a strong likelihood to produce new starts after a week of hot weather. The convective forecast will continue to be fine-tuned over the coming days but start to talk with your crews about lightning safety plans and outflow boundaries.

SAFETY INFORMATION: The weather conditions and associated fire behavior has been exceptional for at least the last 6 days. It is reaching the point where these "unusual" conditions are being treated as normal. You ARE working in extreme heat, dryness, instability and exceptional fire behavior. Please continue to follow your 10s and 18s.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 012	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Modoc July Complex	OPERATIONAL PERIOD: Aug 1, 2017 0600 – 1800 Day Shift
DATE ISSUED: July 31, 2017	TIME ISSUED: 2130
UNIT: Modoc National Forest	SIGNED; Teresa Riesenhuber, FBAN

INPUTS

WEATHER SUMMARY:

--See Fire Weather Forecast for more details --

Hot, dry and unstable with Haines 5 in afternoon. Widespread smoke, otherwise mostly sunny.

High Temperatures 89°F shaded to 98°F unshaded. Minimum humidity 9-15%. Winds: E-SE 3-6 mph. Haines Index: 5

FUELS: Mixed Conifer Timber with light to heavy understory of brush, logs, and smaller conifers; and various combinations of Sage/Grass/Juniper. All live fuel moistures are at average for this time of year and new growth is complete. Fuel Moistures: **Sage** 100% **1hr fuels** 3-5% **10hr fuels** 4-8% **1000hr fuels** 8%

OUTPUTS

FIRE BEHAVIOR

GENERAL: Persistent Unstable, Hot, Dry Conditions Similar To Yesterday.

The primary carrier of fire is the brush and abundant dead fuels in all size classes. The fuelbeds are highly receptive to spotting. Although there is fire history in the area the grass and shrub fuel types regrow quickly, therefore old fire scars cannot be relied upon to hold or slow fires or provide safety zones. Pyro-Cumulus development could occur again today. Expect active to extreme fire behavior even without advanced column development.

Probability of Ignition = 90% **Spotting Distance**= up to 1/2 mi. **Rate of Spread** Head fire 4 - 150 ch/h with flame lengths 2 -12 ft **BI** 63 **ERC** 81

Backing fire <7 ch/h with flame lengths < 3 ft

SPECIFIC

<u>North Zone:</u> Watch for sleepers. The lava rock grass fuel type can hold heat and with a little sunshine, will get up and run again. Remember to lengthen your escape time due to the difficult lava rock terrain.

<u>Cove Fire:</u> On the east flank the fire is moving into extremely heavy fuel loading not yet seen on this incident. Adjust your line production rates and escape route times if working in this fuel type.

Mixed Conifer Timber (pockets occur throughout the response area; more widespread in South Zone and Cove Fire):

During the heat of the day, expect moderate to high rates of spread (3-40 ch/h) and flame lengths 2-11 ft. Single tree and group tree torching are likely even with low wind speeds, and especially where ladder fuels are abundant. In areas with heavy dead and down, expect complete consumption and weakening of trees and root structures.

<u>Brush/Grass/Pinyon (pockets occurs throughout the response area; more widespread in the North Zone):</u> Early in the day, expect fire behavior in the sage brush and grass to have low flame lengths and low rates of spread. During the heat of the day, expect high rates of spread (20-120 ch/h) and high flames lengths. High mortality in brush, needle draped brush, and grass growing right up under the brush will contribute to increased fire behavior.

AIR OPERATIONS:

Under the morning inversion, smoke is expected to be poor for air operations. During the afternoon burn period, as some mixing may occur expect smoke to hinder actions.

SAFETY

Haines Index measures the stability and dryness of the lower atmosphere. The index is a simple way to measure the atmosphere's contribution to the fire's potential to grow. A high Haines Index is correlated with large fire growth where winds do not dominate the fire behavior.

Modoc July Complex - Safety Message

INCIDENT #CA-MDF-000671

DATE: 08-01-17 TIME: 0600 - 1800 Day

Incident Management Team Transition, Day 2

- Sometimes called the 19th Watch Out Situation.
- A lot of changes have occurred with maps and the Communication Plan. New branches and divisions now exist.
- Ensure all resources completely understand the assignment, the Communications Plan, and the Medical Plan.
- Briefings: Required every shift, for all personnel, for new assignments, and for changing conditions.

Heat Related Illness

- Temperatures are predicted to raise to near record levels.
- Drink a 2 to 1 ratio of water to sports drinks.
- Take frequent breaks, minimum of 10 minutes each hour.
- Recognize symptoms of HEAT RELATED ILLNESS which include; Lack of energy, headaches, dizziness, hot skin and a lack of sweating. Take immediate action when these symptoms arise.

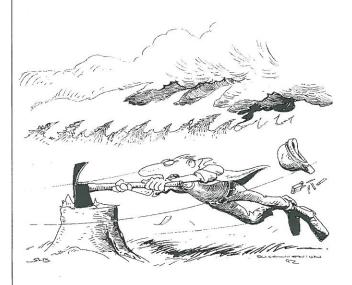

Common Denominators of Fire Behavior on Tragedy Fires

- On relatively small fires or deceptively quiet areas of a large fire.
- In relatively light fuels, such as grass, herbs, and light brush,
- When there is an unexpected shift in wind direction, or in wind speed.
- When fire responds to topographic conditions and runs uphill.

Alignment of topography and wind during the burning period should be considered a trigger point to re-evaluate tactics.

CIIMT 4 Safety Group

Don't keep information like this to yourself !!!

15.WIND INCREASES AND/OR CHANGES DIRECTION

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE WEATHER	 Winds increasing or changing direction. Weather becoming hotter and drier. Unstable atmosphere can promote rapid fire growth.
ALL	DANGER TREES	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events".
ALL	TRAFFIC & DRIVING	 Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke Reduce speed when dusty, maintain adequate spacing with other vehicles. Some roads are dead end with poor turn around, scout roads first. Watch for livestock
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	 Drink 2 to 1 ratio of water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include; Lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating
ALL	SPOT FIRES	 Size up prior to engagement. Watch for multiple spots. Ensure LCES is in place. Maintain Situational Awareness at all times.
ALL	MOP UP	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air when practical. Evaluate unburned islands/Increase situational awareness.
ALL	AIR OPERATIONS	 Follow " Aviation" Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing.
ALL	ENVIRONMENTAL HAZARDS	 Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.
COVE	MARIJUANA PLANTATIONS	 Maintain situational awareness. Watch for open areas and signs of improvements or irrigation systems. Be aware of evidence that cultivation has occurred in the area. If you stumble upon an area with probable cultivation, be extremely cautious, exit on the same route you arrived and notify your supervisor immediately
INCIDENT M ICS 215a	ODOC JULY Complex	DATE PREPARED: July 31, 2017 OPERATIONAL PERIOD Day Shift 08/01/17 0600-1800 Prepared by: John Kraushaar
		TIME PREPARED: 1700 HOURS

USDA Forest Service Pacific Southwest Region Safety Bulletin

Exertional Heat Illness

√ Risk Factors:

- **Dehydration** Overall we do a good job at keeping hydrated, don't stop reinforcing hydration.
- Electrolyte imbalance Sustained consumption of >1-2 quarts/hour of water may cause this, so include Gatorade in the liquid replacement.
- Acclimation Putting a crew used to 60-80's for temps in an environment of 100's
 for temps puts them at increased risk unless they have been in the area not doing
 physically stressing work for a week first. How about Crews used to the 90's and
 now experiencing 105-110+ degrees?
- Prior heat exhaustion/stroke, sickle cell trait, certain muscle disorders These
 medical conditions predispose you to heat illness and possibly death from the heat
 illness.
- Poor conditioning Fitness and training are important, as we all know.
- Heat retaining clothes Can't really change this.
- Hot weather, sun, low wind, and high humidity Can't really change this either.
- Sleep deprived Yes, sleep is important. (P.S. So are showers!)
- Heroic effort, 'never give up', 'warrior' mentality Yes, this is a desired trait in our firefighters, but knowing when to cut back is also important.
- High altitude Can't do much about this as well.
- Medications, herbs, supplements, energy drinks Know what you are taking
 medication-wise and ask your doctor if there is an issue with heat. Energy drinks,
 yes, your Monster, 5 Hour Energy, etc., can cause a problem with your response to
 heat. It can raise your heart rate before starting work, as well as change your
 physiologic response to the heat blood vessels don't respond appropriately, may
 not sweat as much as normal, and it may raise your base body temperature.
- ✓ Be cognizant about the people around you, know your crew. Watch for subtle signs; a
 little wobbly and no one else is, not responding as fast as normal, having to say/yell
 something twice, glass-eyed or distant look, just doesn't look right.
- On these hot days, try to find a way somewhere in the middle of the shift to take some time, 20-30 minutes, to do another task that isn't as intense, that you can find a little shade, cool off a bit, let your bodies rest and recoup a little. Hopefully this might deter a few heat illness problems.
 - -Jennifer Symonds, D.O., USFS and Risk Management

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communication:

- · Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
 - 1. Have communications dispatch ground/air transport resources
 - 2. Notify receiving hospital of injury status.
 - 3. Develop primary and contingency transport plan
 - 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 - 1. Contact Communications to dispatch ground/air transport resources
 - 2. Notify receiving hospital of injury status
 - 3. Develop primary and contingency transport plan

Air Transportation Triage

•	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch	Minor dehydration
	Fall of 10' or more	Cut or laceration with bleeding controlled
	Insect bite with shortness of breath	Minor bites and Stings
	Signs of heat stroke (hot, dry, disoriented)	Minor burns
	Burn Injury greater than 1% body area	
Area Injured	Significant Blunt or Penetrating Trauma to	Minor blunt trauma
	Head, Neck, Chest, Abdomen or pelvis	Minor penetrating trauma
	Any Arm or Leg fracture above the Joint	Extremity sprains and strains
		Simple fracture below elbow or knee
Symptoms	Disoriented	Alert and oriented
- J. I. p comic	Chest Pain <u>or</u> Shortness of Breath	No shortness of breath
	Weak or absent radial pulse	Good pulses
	Pale, cold and sweating	

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

FINAL

STANDARD OPERATING PROCEDURES—FINANCE SECTION 16 HOURS IS NOT A GUARANTEE – IT IS HOURS WORKED!!

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, <u>and/or</u> be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

<u>Personnel time</u> will be reported to the Time Unit and daily once they are signed by the next level supervisor. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (ie. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

<u>Private Contracted Equipment time</u> must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Kitchen closes at 2200 so show dinner break unless you went off clock by 2130.

In leadership, there are no words more important than trust. In any organization, trust must be developed among every member of the team if success is going to be achieved. Mike Kryzews

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

TRAINING EXPECTATIONS

- Upon arrival at the incident and after check-in, the trainee will bring the following documents to the initial meeting with the training specialist:
- A properly initiated Position Task Book.
- Your Request Number and your Agency (3) letter identifier.
- Your agencies Fire Chief or Training Officers name, address, and phone number to insure that a copy of the training documents will be mailed back to your home unit.
- d. Your current Incident Qualification Card (red card) that identifies you as a Traince in the position you are seeking to be trained.
- Have you identified or has a Trainer been assigned to you and if so, have the Trainer present when you meet with the training specialist.
- At closeout and prior to entering the demobilization process, you should complete, sign, and review with
 the trainer the Final exit interview form. Once the form is complete, bring the following documents to
 the Training Specialist for closeout;
- Position Taskbook (Evaluation Record dated and signed by the Trainer)
- Completed ICS 225 (Personal Evaluation Record) dated and signed by both the trainec and trainer.
- Completed Final Exit Interview Form -- dated and signed by both the trainee and the trainer.

Trainer Expectations

- 1. Arrive with the Traince at the initial meeting with the Training Specialist.
- Be ready to provide your Contact information and your Incident Request number.
- Have a Current Incident Qualifications Card (Red Card) in a position of equal or greater qualifications that the Traince is trying to achieve.
- Be willing to educate, support, and provide professional and consistent feed back to the trainee during
 the assignment.
 Throughout the incident the trainer shall continue to monitor and review with the trainee their tasks and
- goals within the taskbook.

 6. The trainer, where appropriate is expected to sign off task's that are achieved by the trainee and to
- The trainer, where appropriate is expected to sign off task's that are achieved by the trainee and to complete and sign the following documents.
- . ICS 225 (Personal Evaluation Form)
- b. Evaluation Record at the back of the taskbook
- The trainer shall portray a positive and professional attitude that lets the trainee know that it is desirable to ask for direction and feedback.
- When accepting the role as a trainer, you are expected to act in a professional manner that represents the California Interagency Incident Management Team 4 and your home agency.

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

EXPECTATIONS

Welcome to this Incident.

Thank You for your Cooperation & Support!

2017

CONDUCT AND BEHAVIOR

This team is committed to "ZERO TOLERANCE" of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are NOT allowed within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

Sexual Harassment

Inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC. What we PERMIT we PROMOTE!!!!

AFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

EMPHASIS AREAS

Training

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 Training Expectations – See back page.

Evaluations

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

juries/Claims

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

Work Rest Cycles

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

Position Qualifications

Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any fire line position. Non-fireline positions may be filled based on the word of the employee pending home unit confirmation, which must be requested immediately. Contract dozer operators, tactical water tender operators and contract fallers must provide proof that they have received the annual fire refresher training.

Engagement/Disengagement

The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. This includes Geographic Area and incident briefings. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

Debriefing

All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or special incidents that occurred during the operational period.

Crew Time Reports/Shift Tickets

It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be <u>reviewed and signed</u> by the next level supervisor. A finance "Rules of Engagement" document will be provided in the IAP explaining further requirements.

Social Media

It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident's professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.

We look forward to working with you as a valuable member of this effort. If you have any questions or feedback, please feel free to contact any Command and General Staff Member.
