INCIDENT Weather Forecast

FORECAST NO:

14

NAME OF FIRE:

Helena-Fork Fires

PREDICTION FOR:

SAT Day/Night SHIFT

UNIT:

SHIFT DATE:

Sept. 17/18

SIGNED:

Incident Meteorologist

Davi I Bom

TIME AND DATE FORECAST ISSUED:

Sept 16. 2200

WEATHER DISCUSSION:

The weather pattern is starting to shift but one more dry and mild day can be expected today. Westerly flow aloft will bring in cloud cover which will keep minimum humidity above 20%. Winds will be similar to previous days mainly slope and valley driven. A bigger change comes tonight as a cold front moves through the area bringing higher humidity and cooler temperatures. Monday this will cause ridgetop winds to gust to 20 mph with isolated showers moving through the area with little moisture. The weather pattern will maintain a push of cooler weather and higher humidity into the region for much of the week but significant precipitation is not expected.

TODAY: Patchy smoke through late morning...otherwise partly cloudy.

TEMPERATURES: High temperatures from 78 highest elevations to 86 Trinity river canyon.

HUMIDITY: Starting off today with a poor recovery around 50%. **Minimum RH** 19% Trinity river canyon to 29% highest elevations.

20 FT WINDS:

RIDGETOP - Light in the morning becoming West 5-10 mph around noon. Occasional gusts to 15 mph in the afternoon.

SLOPE/VALLEY - Downslope/down canyon 1-3 mph morning becoming upslope to upcanyon 2-5 mph after about 1100. Gusts up to 12 mph in the afternoon.

STABILITY/INVERSION: Weak inversions clearing around 1100 then remaining generally stable through the afternoon.

FORECAST FOR SUNDAY NIGHT SHIFT: Weak inversions forming overnight with limited smoke in the valley with increasing clouds. Minimum temperatures in the 40s. Better humidity recovery at 50-60%. Ridge winds northwest 10-15 mph. Slope winds becoming downcanyon 1-4 mph after sunset.

FORECAST FOR MONDAY:

Patchy smoke and mostly cloudy. Isolated afternoon showers producing little rain. High temperatures 73-81. Minimum RH 26-35% canyon bottoms to ridgetops. Ridge winds west 10-15 mph with gusts to 20 mph. Slope and canyon winds becoming upslope to upcanyon 5-10 mph with gusts to 12 mph in the afternoon.

EXTENDED OUTLOOK FOR TUESDAY:

Partly cloudy with a slight chance of showers. High temperatures in the 70s. Good morning RH recovery with moderate humidity minimums 30 to 40%. Westerly winds a bit lighter.

1100. Gusts up to 12 mph in the afternoon.

Ridgetop – Light in the morning becoming W 5-10 mph around noon, occasional gusts to 15 mph in the afternoon.

Tonight: Inversions in the morning. Min Temp 40's; Max RH 50-60%. Ridge winds NW 10-15 mph.

FIRE BEHAVIOR

GENERAL

The Helena fire continues to spread through pockets of surface fuels. Heavy fuels, rollout, and short range spotting are driving fire spread. Single and group tree torching is occurring in timber stands not burned in previous recent fires. Uneven fire spread has created green fingers increasing the probability of upslope runs. Topographic features create unpredictable winds that may drive short to moderate runs in light fuels. At relative humidity levels below 25%, fire begins to transition from surface fire to torching with slope runs in steeper terrain.

Fire spread and intensity mid-slope and above will increase late morning/early afternoon after the inversion lifts.

SPECIFIC FIRE BEHAVIOR

Div A/C (Canyon Creek Rd.)

The Helena Fire crossed Rarick Gulch yesterday and spread a considerable distance to the northeast-east. Anticipate continued spread upslope today at slow to moderate rates and backing toward Canyon Creek. There is a potential for the Helena Fire to join with the Fork Fire. The Fork Fire may cross Gwin Gulch to the south.

Div O/R (Conner Creek, Eagle Creek drainages)

Containment lines in Conner Creek are nearly complete and expected to hold. If fire does cross the creek, discontinuous fuels should slow fire spread upslope to the south. Aviation has been effective at slowing fire spread is the drainage.

Fire in Eagle Creek drainage has continued to back and flank and has reached the creek in several areas. The greatest threat for crossing the drainage would be a tree falling across or torching/spotting near the drainage bottom. Water drops have aided in keeping the fire in check. Fire may spread rapidly upslope depending on where fire crossed the drainage bottom.

Nighttime

Expect the fire behavior to moderate after dark and relative humidity climbs above 35%. Sheltered locations could see continued spread through late evening.

AIR OPERATIONS

Air operations will be limited in the morning with inversions breaking around 1100.

9/17 Sunrise: 06:55 Sunset: 19:17

9/18 Sunrise: 06:56

SAFETY

The Helena Fire made a significant run Saturday after showing minimal fire behavior for the past several days. Keep up your situational awareness as weather conditions change over the next several days. Understand/discuss what affect topographical factors can have on fire behavior.

TRAINING SPECIALIST MESSAGE

TRAINEES:

In order to receive documented incident credit for your training assignment - you must both register and close out with the Training Specialist. Don't Delay registration. It's to your advantage!

TRAINERS:

If you leave the incident before your trainee, or if your trainee is no longer assigned to you, you will need to complete a Performance Evaluation for the time period your trainee was assigned to you. Please be sure the work

you perform in their Position Task Book is complete.
