FIRE BEHAVIOR

GENERAL

Due to recent precipitation and high relative humidity expect minimal fire behavior over the entire fire area. Rates of spread will be slow with minimal intensity. The only spotting expected will occur through roll-out.

SPECIFIC FIRE BEHAVIOR

Div A/C (Canyon Creek Rd.)

The Helena Fire will continue spreading upslope today at slow rates and continue backing toward Canyon Creek. The Fork Fire is still backing and flanking in a few locations above Canyon Creek. Expect minimal fire behavior.

Div O/R (Conner Creek, Eagle Creek drainages)

Containment lines in Conner Creek are nearly complete and expected to hold. Anticipate burning to continue in the heavy fuels and/or under dense canopies with very low spread rates and low intensity.

Fire in Eagle Creek drainage has been checked with direct line in most areas. Some roll-out on steep slopes to the east of the drainage bottom may occur but no spread is expected.

Nighttime

Expect the fire behavior to be minimal after dark with excellent humidity recovery overnight and precipitation expected.

AIR OPERATIONS

Air operations may be limited in the morning due to reduced visibility by low clouds.

9/19 Sunrise: 06:57 Sunset: 19:14 9/20 Sunrise: 06:58

SAFETY

The Helena and Fork Fires are exhibiting little fire behavior due to precipitation and very high relative humidity. This pattern is expected to last for several days. The biggest safety concern will be slippery surfaces for both vehicle and foot travel.

Planning for Medical Emergencies

Ask and be able to answer these 3 questions

1. What are we going to do if someone gets hurt?
2. How will we get them out of here?
3. How long will it take to get them to a hospital?

All operational activities should be based on answers to these questions. See page 2 of the IRPG for more information.

Leader's Intent

Leaders have the responsibility to provide complete briefings to ensure that subordinates have a clear understanding of their intent for the assignment:

1. Task = What is to be done
2. Purpose = Why it is to be done
3. End State = How it should look when done
