FIRE BEHAVIOR

GENERAL

Due to recent precipitation and high relative humidity expect minimal fire behavior over the entire fire area. Isolated pockets will continue to spread slowly underneath dense timber canopies. Large fuels will continue to smolder and smoke in many locations.

SPECIFIC FIRE BEHAVIOR

Div A/C (Canyon Creek Rd.)

The Helena and Fork Fires will continue to have isolated pockets smoldering and producing smoke. Expect minimal fire behavior for several days.

Div O/R (Conner Creek, Eagle Creek drainages)

Containment lines in Conner Creek are complete and expected to hold. Anticipate minimal burning to continue in the heavy fuels and/or under dense canopies with creeping and smoldering fire.

In Eagle Creek drainage some roll-out on steep slopes on the east side of the drainage bottom may occur but no spread is expected.

Nighttime

Expect the fire behavior to be minimal due to extremely moist conditions.

AIR OPERATIONS

Air operations may be limited all day due to inclement weather conditions.

9/20 Sunrise: 06:58 Sunset: 19:12

9/21 Sunrise: 06:59

SAFETY

The Helena and Fork Fires are exhibiting little fire behavior due to precipitation and very high relative humidity. This pattern is expected to last for several days. The biggest safety concerns include: slippery surfaces for both vehicle and foot travel; rocks being dislodged and rolling down slope; fire-weakened trees being blown over during windy conditions.

- Minimize exposure; determine if benefit is worth the risk.
- Use extra caution when down hill of hazard trees.
- Post lookouts in areas of known or potential snag hazards.
- When escaping the path of a falling tree, do not turn your back- Watch the tree as you move out of its way to ensure you can see any change in its fall or roll caused by contact, breakage, etc.

--	--	--

Be sure all elements of your safety plan are in place prior to engagement

MOUNTAIN DRIVING

Driving presents one of the greatest risks faced by personnel on this incident. Drive defensively at appropriate speeds which allow you to react to meeting the unexpected. Be able to stop your vehicle within one half of the visible distance on blind curves. Driving demands your full attention. Pull off the road in a safe location when placing or receiving a cell phone call. Chock vehicles parked on slopes.

Use backers whenever available

Maintain Situational Awareness at all times behind the wheel!

FUELING

Fuel is dangerously flammable, commonly used often our guard is down while we are handling this liquid. Major hazard is ignition. Vapors are ignited by a heat source such as wildfire or static electricity.

- Avoid heat sources when fueling such as fire/smoking
- Bond fuel vessel to nozzle before fueling if possible
- Allow for equipment to cool-muffler exhaust could ignite fuel
- Geyser prevention-allow to cool-open away from heat-use rag over tank cap to dissipate vapors while opening
- Never use gas to ignite a camp fire
