Northeast winds at ridgetops will develop by Saturday causing stronger drying across the region.

**TODAY:** Mostly sunny with a few afternoon clouds.

# **FIRE BEHAVIOR**

#### **GENERAL**

Due to recent precipitation and high relative humidity expect minimal fire behavior over the entire fire area. Isolated pockets will continue to spread slowly underneath dense timber canopies. Large fuels will continue to smolder and smoke in many locations.

# SPECIFIC FIRE BEHAVIOR

# Div A/C (Canyon Creek Rd.)

The Helena and Fork Fires will continue to have stump holes and isolated pockets of heavier fuels smolder and produce smoke. Expect minimal fire spread for several days.

#### Div O/R (Conner Creek, Eagle Creek drainages)

Anticipate minimal burning in Connor Creek to continue in the heavy fuels and/or under dense canopies with creeping and smoldering fire.

In Eagle Creek drainage some roll-out on steep slopes on the east side of the drainage bottom may occur but no spread is expected. No visible activity was observed in the drainage yesterday.

#### Nighttime

Expect the fire behavior to be minimal due to excellent relative humidity recovery and extremely moist conditions.

# **AIR OPERATIONS**

Air operations should have no limitations today.

9/22 Sunrise: 07:00 Sunset: 19:09 9/23 Sunrise: 07:01

#### SAFETY

The weather pattern has changed with warming and drying to continue over the next several days. Don't anticipate any sudden change in fire behavior but pay attention to your surrounds as isolated areas may become available to burn (for example, light flashy fuels) before others.

IINCIDENT H ICS 215a	NAME: ELENA & FORK FIRE	DATE PREPARED: September 21, 2017	OPERATIONAL PERIOD Day Shift 9/22-9/23 0700-0700 Prepared by: Steve Davis, T. O'Connell, M Bradley

# Lookouts Communications Escape Routes Safety Zones

# Helena & Fork Fire

Operation Period: 09/22/2017 Day/Night shift

# **Emphasis on Attention to Detail**

# The Small Things Make a Difference

- Stay focused on the small things that can compromise your safety
- Small issues may seem inconsequential when viewed alone
- Sometimes multiple small issues can develop into a major problem
- Mitigate small issues so they do not snowball into a major issue
- Communicate minor problems so everyone is aware

#### MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
CHIPPING OPS	DRIVING	HAZARD TREES
FATIGUE	ASH PITS	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

# **Communication Responsibilities**

# All Firefighters have five communication responsibilities

- \*Briefings All resources require briefings. Use briefing checklist in pocket guide.
- \*Debrief Actions as necessary. Use pocket guide After Action Review to stimulate discussion and provide guidance.
- \*Communicate Hazards to Others -
- \*Acknowledge messages -
- \*Ask if you do not know -Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.

# The greatest problem with communication is the illusion that it has been achieved

# Steps To Protect Yourself From Illnesses

- Wash your hands often
- Avoid touching your eyes, nose, or mouth, germs spread this way
- Try to avoid close contact with sick people
- Practice good health habits. Get plenty of sleep drink plenty of fluids, and eat healthy food
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
- If you are sick with flu-like illness, separate that person from the rest of your crew and others, seek treatment at the medical unit.
