

Orleans Complex

Incident Action Plan

Tuesday, Aug 8th to Wednesday, Aug 9th, 2017
Day Shift 0600 – 2000 Night Shift 1800 – 0800

WORKING ALONG THE HWY 96 CORRIDOR

- Have your red lights on when parked
- Use caution when walking around vehicles on the traffic side.
- When patrolling at slow speeds have your hazard lights on.

PERSONAL PROTECTIVE EQUIPMENT

- All personnel are reminded to wear PPE when in route to and from the fire and within the fire perimeter.
- Insure PPE is compatible with hazards and risks.

MOUNTAIN DRIVING

- Headlights and seatbelts on before the wheels turn!
- Drive slow enough to deal with anything that may be around the next corner.

**KEEP A HIGH LEVEL OF
SITUATIONAL AWARENESS**
Orleans Complex: CA-SRF-000741 (0510)
P5K73417

INCIDENT OBJECTIVES	1. Incident Name Orleans Complex	2. Date 08/07/2017	3. Time 2100
4. Operational Period August 08-09, 2017 DAY / NIGHT SHIFT			
<u>CONTROL OBJECTIVES</u> 1) Keep the Ukonom Fire: <ul style="list-style-type: none"> • North of Division A dozer line to protect private property and cultural resources. • East of the Klamath River to protect private property, infrastructure (Hwy 96), and cultural resources. • South of Ukonom Creek to minimize impacts to aquatic species, spotted owl habitat and bald eagle habitat. • East of Division Z to protect private property and cultural resources. 2) Keep the Frank, Burney, Forks, Chimney and Little Fires: <ul style="list-style-type: none"> • Within remote National Forest areas to protect heritage, cultural and natural resources. <u>MANAGEMENT OBJECTIVES</u> 1) Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principals are in place to provide for firefighter and public safety. 2) All fire operations will be conducted in close coordination with Designated Tribal Representatives and READs. 3) Establish and strengthen cooperator, partner, and stakeholder relationships. 4) Minimize impacts to cultural resources, infrastructure, and private property inholdings.			
6. Weather Forecast for Period <ul style="list-style-type: none"> • See attached weather forecast. 			
7. General Safety Message <ul style="list-style-type: none"> • See attached safety messages.

ORGANIZATION ASSIGNMENT LIST	
1. Incident Name Orleans Complex	
2. Date August 07, 2017	3. Time 2100
4. Operational Period Day & Night Shift, August 08-09, 2017	
Position	Name
5. Incident Commander and Staff	
Incident Commander	Curtis Coots
Deputy	Paul Bannister
Safety Officer	Michele Tanzi, Jeff Barnhart
Information Officer	Barbara Rebiskie, Kathy Hardy, Phyllis Swanson
Liaison Officer	Kent Swartzlander
6. Agency Representative	
Agency Administrator	Dave Palmer, Nolan Colegrove, Duane Nelson
Karuk Tribal Rep	Bill Tripp
Karuk Coordinator	David Medford
BIA Agency Rep	Greg Perry
Hoopa Tribe Agency Rep	Rod Mendes
Yurok Tribal Rep	Richard Myers
CCC Agency Rep	Peter Luvaas
West Zone READ	Andrew Spain
Ukonom Fire READ	Corrine Black
7. Planning Section	
Chief	Walter Herzog
Deputy	Alan Taylor
Resources Unit	Rita Mustafia
Situation Unit	Eric Kronner, Jill Beckman (t)
Demobilization Unit	Gary Deboi
Training	Greg Kurtz
CTSP	George Steel
GISS	Heidi Ogle, Daniel Osterkamp
FBAN	Chris Naccarato, Kevin Maier (t)
IMET	Dan Harty
SCKN	Jennifer Martin (t)
Strategic Planning Group	
Air Resources Advisor	Ariane Sarzotti
SOPL / SOPL (t)	Mike Beasley, Eamon Enaber
FOBS	Ross Garlapow
SOF2	Jim Mackensen

8. Logistics Section	
Chief	Mike Jellison
Deputy	Ken Kumpe
Supply Unit	David Alicea, Josh Ramey (t)
Ordering	Aaron Woods, Ron Pierce
Facilities Unit	Jeff Huhtala, Frank DelCarlo
Ground Support Unit	Kristen Lark, Harry Zabel
Communications Unit	John Chapman
Medical Unit	Clayton Thomas, Charles McGary (t)
Receiving & Distribution	Fred Johnson
Security Manager	Michael Turner
Food Unit	Jay Westlake
9. Operations Section	
Operations – Day	Curt Lindstrand
Operations - Night	Dan McDonald
Planning Ops	Mike Klimek (t), Donovan Lee (t)
a. Division/Groups	
East Zone-Ukonom Fire	Day Shift
Division/Group A	Richard Inghram, Pete English (t)
Division/Group F	Matthew Prentiss
Division/Group M	Tim Ritchey, John Morgan(t)
Division/Group Z	Jack Sevelson, Leland Ratcliff (t)
East Zone-Ukonom Fire	Night Shift
Division/Group A / F / Z	Matt Jones, Josh Wheeler (t)
Division/Group	
b. Division/Groups	
West Zone	Duane Franklin, Josh Eichamer (t)

INCIDENT Weather Forecast

FORECAST NO: 20
 PREDICTION FOR: Tuesday
 SHIFT DATE: 8/8/17
 FORECAST ISSUED: 2000, Aug 7, 2017

NAME OF FIRE: Orleans Complex
 UNIT: SRF
 Incident Meteorologist: Dan Harty *Dan Harty*

...Red Flag Warning in effect for Lightning...

WEATHER DISCUSSION: A very moist and unstable air mass will provide a good chance of showers and thunderstorms today. Though storms will likely be wet, dry lightning is possible outside of the rain cores. Thus, a Red Flag Warning has been issued. However, a strong storm would be capable of producing brief moderate to heavy rainfall and possibly even hail. Gusty and erratic outflow winds near any storm, otherwise winds will continue to be terrain driven with afternoon and evening gusts diminishing to generally light overnight. Relative humidity will remain moderate today with little change in temperatures.

WEATHER FORECAST for TUESDAY:

WEATHER: Partly cloudy with a 40% chance showers and thunderstorms. Gusty and erratic outflow winds possible near any storm. Moderate to brief heavy rain and even hail is possible with any strong storms. Areas of smoke.
Lightning Activity Level (LAL): 3 Chance of Wetting Rain (CWR): 10%

MAX TEMPERATURES: 84-94° - East Zone 83-89 - West Zone

MIN HUMIDITY: 25 to 33%

20 FOOT WINDS:

SLOPE/VALLEY - Calm to light winds in the morning. Becoming upslope/upvalley 4-7 mph with afternoon gusts around 15 mph, strongest around the river valley.

RIDGETOP - East 3-6 mph in the morning, becoming southwest to west 4-8 mph with gusts to around 18 mph in the afternoon.

WEATHER FORECAST for TUESDAY NIGHT:

WEATHER: Partly cloudy with a 20% chance of showers and thunderstorms, mainly in the evening. Gusty and erratic outflow winds possible. Moderate to brief heavy rain and even hail is possible with any strong storms. Areas of smoke overnight.
LAL (Lightning Activity Level): 2 CWR (Chance of Wetting Rain): 5%

MIN TEMPERATURES: 62-69°

MAX HUMIDITY: 50-65% mid slopes and ridges. >75% valleys.

20-FOOT WINDS:

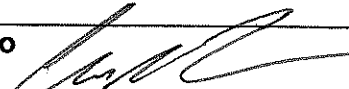

SLOPE/VALLEY - Upslope/upvalley 4-7 mph with gusts to around 15 mph in the early evening, becoming downslope/downvalley 2-5 mph.

RIDGETOP - Northeast 5-10 mph with gusts up to 20 mph in the evening, becoming east 3-7 mph after midnight.

OUTLOOK: Thunderstorm chances will continue on Wednesday then diminishing chances through the end of the week. Winds will generally be terrain driven with afternoon breezes. Conditions will trend slightly cooler and drier.

Portable RAWs: 163.350 Tone 0003 for Ukonom Lookout, Tone 0004 for Carter Creek

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 19	TYPE OF FIRE: Wildland Fire
FIRE NAME: Orleans Complex	OPERATIONAL PERIOD: Day shift August 8, 2017
DATE ISSUED: August 7, 2017	TIME ISSUED: 2000
UNIT: Six Rivers NF	SIGNED: Chris Naccarato FBAN 

WEATHER SUMMARY: ****Please See attached Fire Weather Forecast****

A very moist and unstable air mass will bring a better chance of showers, thunderstorms and lightning today. Gusty and erratic outflow winds will be possible with cell passage. Temperatures will be slightly lower with higher humidity. Winds will be terrain influenced and southwesterly over the ridges.

Today: Partly Cloudy. 30% chance of thunderstorms after noon.

Max Temp: **East Zone 84-94°** **West Zone 83-89°**

Min RH: **East Zone 25-33%** **West Zone 25-33%**

20 FT Winds:

Slope/Valley- calm in the morning then **upslope/upvalley 4-7mph** after noon with **15mph** gusts.

Ridge Top- Easterly 3-6mph in the morning, becoming **southwest to west 4-8mph** with gusts to **18mph** possible after noon.

Ukonom Fire:

When the inversion begins to lift and the air begins to move, terrain influenced winds have the ability to increase fire behavior. Down logs and pockets of heavy surface fuels continue to be the primary carrier for surface fire spread. When slope, aspect, and wind align surface fire runs may be possible. Occasional torching in smaller trees and pockets of dense brush are likely. Spotting has mainly occurred in the form of rollout, lofted fire brands are possible when torching occurs.

Fork Fire: Fire behavior has been generally low with minimal activity in the form of backing, creeping and flanking. East winds early in the shift may help push fire back up slope on the east flank until **SW** ridge top winds develop after noon, fire spread back to the **N-NE** will then be possible. Occasional single tree torching could be possible in smaller trees. Spotting has mainly occurred from rollout, but lofted fire brands are possible if heavy pockets of fuel actively burn. Fire activity is likely to increase if outflow or erratic winds from thunder cell passage materialize over the fire.

Flame lengths of 2-8' and rates of spread of **4-12ch/hr** are possible for head and flanking fire. Backing fire **flame lengths** between **6"-2'** with rates of spread of **3ch/hr or less** are likely. **Spotting up to .2 mi** is possible. **Probability of ignition** will be between **60% and 70%** during the heat of the day.

Division A-M: Fire will continue backing down slope and consume unburned pockets of fuel.

Division F: Active fire behavior and swirly canyon winds have the potential to carry fire brands across the river.

Division Z: Outflow winds and **.07 of an inch** of rain surfaced late in the shift yesterday, be vigilant and look for possible areas where spotting may have occurred and held over through the effects of the moisture.

Forks: Southwest to west ridge top winds may push fire upslope to the north-northeast in areas that have been relatively quiet.

Little: Backing and creeping fire will continue.

AIR OPERATIONS

Poor visibility will cause issues and delays for air operations again today.

SAFETY

Lightning with gusty and erratic winds are likely with thunder cell passage. Plan ahead and think about contingency plans, doing so will give you a head start on possible situations you may find yourself in.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"

Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Incident Name** *Geographic Name + "Medical" (Ex: Trout Meadow Medical)* _____
- **Incident Commander (Division Sup. or designee)** *Name of IC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.*

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** *What caused the injury?* _____
- **Location, Lat/Long** (Datum WGS84) *Ex: N 40° 42.45' x W 123° 03.24'* _____

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED <i>Life threatening injury or illness.</i> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW <i>Serious Injury or illness.</i> <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN <i>Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Route of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

- Helispot Short-haul/Hoist Life Flight Other

Ground Transport:

- Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

- Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen
- Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED
- Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command
- Coordinate with air ambulance on CALCORD tone 6

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) *EX: N 40 42.45' x W 123 03.24'* _____
- **Patient's ETA to Evacuation Location:** _____
- **Helispot/Extraction Size and Hazards:** _____

9. CONTINGENCY: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER:

- Confirm ETA's of resources ordered
- Act according to your level of training
- **If air or ground ambulance is DELAYED:** Package and transport patient to rendezvous with incoming Ambulance.
- Re-route EMS helicopter to rendezvous point as appropriate.

Orleans Complex - Ukonom Fire & West Zone - Incident Risk Analysis (215a)

Div.	LCES Analysis of Tactical Applications (Hazardous Actions or Conditions)	LCES Mitigations/Warnings/Remedies
F	Working along 96 corridor	Be aware of rocks/trees on Highway 96. Have your Red Lights on when parked. If working along the roadway, use caution when walking around vehicle on the traffic side. When patrolling at slow speeds, have your Hazard Flashers on.
All	Mountain Driving	Forest Road 15 (aka G-O Road) has buckling and undulations. Be aware of areas of concern (flagged and painted) Drive with caution! A vehicle going downhill must yield the right of way to the vehicle going uphill by either safely pulling over or safely backing up. You MUST drive with caution always, and expect the unexpected. Maintain good sight/reaction distance. Seatbelts ON before the wheels turn! Headlights on to be seen.
All	Thunderstorms	Thunderstorms hazards include both downbursts and lightning. For downbursts monitor fire for increased fire behavior. For lightning, wide open spaces are better than trees or clumps of trees in the vicinity. Ridge tops should be avoided. Handheld radios with short rubber antennas are safe to use. Avoid using land line radios or radios with elevated antennas. If you feel the hair on your arms or head "stand up", there is a high probability of a strike in the vicinity. Crouch or sit on a pack. Review page 21 in IRPG for more info
All	Steep Terrain / Cliffs	Rocks/trees have potential to fall onto 96 on Div-F. Do Not place yourself in harm's way. Stay clear. Post lookouts if there is a NEED to work in this area. Focus! Concentrate on foot placement to limit slips, trips and falls on steep slopes. Flag areas & communicate to personnel, known " Do Not Enter " zones
All	Fire Behavior	Possible spot fire sleepers. Keep your eyes to the green & head on a swivel. Review risk associated with suppressing these in snag patches. Mitigate hazards before committing resources. Take your time. Preplan! Identify Trigger Points! How long will it take you to get back to your vehicles and exit the area safely? Know your escape routes as the situations change.
All Personnel Includes ICP	Heat Related Illness/Injuries	STAY HYDRATED before, during and after shift. "Energy Drinks" such as Monster, Red Bull or Rockstar contribute to heat injuries and should not be consumed. Pre-Plan the needs of your crews. Stage more water and Electrolyte drinks along your work area.
M & West Zone	Working with Heavy Equipment	Stay at least 100' in front and 50' behind the equipment. In Timber, distances should be increased to 2½ times the tallest tree height. Avoid working below equipment. Make eye contact with operator: blade down, idle down, before approaching.
All	Difficult terrain and conditions for providing for emergency medical needs.	Review Med Plan before the need arises. Limit high risk activities. Have a backup plan AND don't depend solely on air resources. Practice the "What if" scenarios.
All	Danger/Hazard Trees within Fire Area & Routes to work areas. Danger Trees at Night	Use caution when traveling/working during windy conditions. Scan work area for Danger Trees in or near work site before committing resources. Limit exposure. Mitigate if safe. Use qualified fallers. Absolutely no Felling of Danger trees at night.
All	Personal Protective Equipment	ALL Personnel are reminded to wear PPE when in route to and from the fire and within the fires perimeter. Insure PPE is compatible with hazards and risks.

Date & Time Prepared: Aug 7, 2017 @ 2100

Operational Period: Aug 8, 2017 from 0600 - 2000

Prepared By: Michele Tanzi - SOF1, Jeff Barnhart - SOF2

Operational Period: Aug 8/9, 2017 from 1800 - 0800

Northern California Incident Management Team 1

Today's discussion is from the Miscellaneous Category

Bees and Wasps

In general bees sting to protect their hive and seldom sting when they are our foraging unless they feel threatened (like being swatted at or stepped on). On the other hand, a large number of bees or wasps foraging in one area may indicate a colony is nearby. If you intend to work or camp in the area, scout the area for bee/wasp habitat first.

Colonies vary in behavior over time, especially with changes in season, becoming more aggressive and easily agitated in the late summer and fall. You may pass the same colony for weeks and then one day provoke them unexpectedly.

● **Look out for colonies:**

Bees and wasps nest in a wide variety of locations, such as pipes, holes, behind shutters, under shingles, cracks and crevices within trees and rocks, and hanging from branches. Be alert for groups of flying bees entering or leaving an opening and listen for buzzing sounds. Be especially alert when climbing, digging fire line and moving logs. **DO NOT** put your hands where you can't see them.

Be particularly careful when using any heavy equipment that produces sound vibrations, such as chainsaws, weed eaters and pumps. **Keep escape routes in mind.**

!!! If you disturb a nest and are being attacked, run away. Use your shroud or shirt to protect your head neck and face. Swatting and waving your arms aggravates bees/wasps more!

● **About Africanized and European honey bees:**

Honey bees are about 5/8-inch long, brown, hairy insects with black encircling their abdomen, giving them a subtle striped appearance. All honey bees look alike. Only an expert can tell them apart.

The sting from a single Africanized honey bee is no more harmful than one from the common garden or European honey bee. Africanized honey bees are known as "killer bees" because they defend their nests more aggressively, with less provocation, and in larger numbers than the other honey bees, so there is a greater chance of receiving many stings.

Africanized honey bees are found in the southwest and are spreading across the south. You are more likely to be struck by lightning than being killed by Africanized bees.

● **Considerations with all bees and wasps:**

- 1) If a bee gets in the vehicle while you are driving. Stay calm, pull over and stop, let the bee out.
- 2) Keep trash away from your camp and keep it covered.
- 3) Look at what you are drinking and eating before you eat or drink. Bees and wasps are attracted to accessible food and water.

● **If you get Stung:**

The first thing you should do is remove the stinger. The end of a sting is barbed and will remain stuck in the skin even if the bee is removed. Muscles in the stinger allow it to continue pumping venom into the victim, even if it is no longer connected to the bee. Do not pull the stinger out with your fingers or tweezers because this will squeeze out more venom. Instead, scrape the stinger out with your fingernail, the edge of a credit card, a dull knife blade, or other straight edged object.

● **Two kinds of reactions are usually associated with bee stings and those of other stinging insects as well: (1) local or (2) systemic, allergic, or life-threatening.**

(1) Local Reactions:

A local reaction is usually characterized by pain, swelling, redness, itching, and a wheal surrounding the wound made by the stinger. Swelling can sometimes be locally severe. For instance, if stung on the finger, the arm may be swollen even up to the elbow. Swelling such as this is fairly common, even though it may be alarming. Swelling may be reduced by cooling the wound and/or taking an

antihistamine such as Benadryl. Topical solutions such as calamine may also help alleviate pain.

(2) Systemic, Allergic, or Life-Threatening Reactions:

Allergic reactions can develop anywhere on the body and may include rash or hives, dizziness or headache, cramps, nausea, vomiting, swelling **not** in the general area of the sting, shortness of breath or difficulty swallowing, shock and unconsciousness. If you experience any of these symptoms, seek emergency medical assistance immediately. Symptoms can begin immediately following the sting or up to 30 minutes later and might last for hours.

● **If you know you are allergic:**

Anaphylaxis, if treated in time, usually can be reversed by epinephrine (adrenaline) injected into the body. Individuals who are aware that they are allergic to stings should carry epinephrine in either a normal syringe (sting kit) or an auto-injector (Epi-Pen) at all times when working outside and communicate their allergy to supervisor/coworkers in case they become incapacitated. Epinephrine is obtainable only by prescription from a physician.

Discussion Topics:

- **Have you and your crew identified who is allergic to bee/wasp stings? Are they carrying their prescription Epi? Identify the Epi and its location to the rest of the crew.**
- **If you have an EMT on your crew/team, what are their protocols for treating stings and related allergic reactions?**
- **Discuss how you and your crew will safely flag or mark any identified nests/hives.**

TRAINING SPECIALIST MESSAGE

AVOID THE RUSH!

IF YOU ARE PLANNING ON LEAVING THE INCIDENT SOON, AND HAVE NO MORE ENTRIES PENDING FOR YOUR TASK BOOK, PLEASE STOP BY THE TNSP OFFICE AND CLOSE OUT YOUR TRAINING DOCUMENTS.

PLEASE BRING THE FOLLOWING ITEMS FOR A SUCCESSFUL CHECK OUT PROCESS WITH THE TRAINING SPECIALIST:

- **YOUR TASK BOOK WITH SIGNATURES**
- **AN INCIDENT PERSONNEL PERFORMANCE RATING (ICS 225)**

PLEASE CONTACT THE TNSP OFFICE IF YOU NEED ANY ASSISTANCE.

**THANK YOU
GREG KURTZ TNSP**
