WEATHER DISCUSSION

Red Flag Warning in Effect Through 5 PM PDT Sunday for Gusty Northeast winds and Poor Humidity Recovery at Night

The mid-level ridge will continue to strengthen today as the thermal trough remains in the area. The trough will shift offshore tonight. The gradient will be weak which will keep winds from the east to northeast light.

WEATHER FORECAST for SUNDAY:

WEATHER: Sunny with areas of smoke. Smoke will diminish some mid to late afternoon.

MAX TEMPERATURES: 87-100°

9-19% - Ukonom, Burney, Frank 13-23% Haypress, Forks, Zulus MIN HUMIDITY:

20 FOOT WINDS:

SLOPE/VALLEY - Calm to light downslope/downvalley becoming upslope/upvalley 3-5 mph in the

afternoon.

East 4-6 mph with a few gusts to 9 mph becoming southwest-northwest 4-7. RIDGETOP -

WEATHER FORECAST for SUNDAY NIGHT:

WEATHER: Clear with smoke lingering in the area.

MIN TEMPERATURES: 62-68°

MAX HUMIDITY: 25-35% mid slopes and ridges. 45-55% valleys.

20-FOOT WINDS:

SLOPE/VALLEY - Upslope/upvalley 2-4 mph, becoming calm to light downslope in the evening.

Southwest 3-5 mph in the evening becoming southeast overnight. RIDGETOP -

EXTENDED OUTLOOK:

The surface thermal trough will move inland of the area on Monday and weaken ahead of a mid-level trough approaching from the west. The trough will not have much impact on the ridge Monday, but will weaken it slightly for Tuesday and Wednesday. This will lead to slightly cooler temperatures, increasing humidity, and scattered afternoon clouds. The trough will pass north of the area early Thursday and will be followed by more ridging for the end of the week.

Portable RAWS: 163.350 Tone 0003 for Ukonom Lookout. Tone 0004 for Carter Creek

FIRE BEHAVIOR

GENERAL

The Haypress Fire is currently the most active within the Complex. Expect it to continue backing toward Wooley Creek, spread westerly toward indirect containment lines, and spread northeast into the wilderness.

The Ukonom Fire is also active at the easterly edge near Ukonom Creek and Lick Creek and continues to burn with a slow ROS. It will continue to back toward Lick Creek and Ukonom Creek and burn up drainage to the west toward Ukonom Lookout and southerly toward indirect containment lines. There is a potential to cross Ukonom and Lick Creek drainages.

SPECIFIC FIRE BEHAVIOR

Daytime

Expect the fire behavior to be low to moderate until early afternoon. Fire spread will be primarily backing and flanking with some upslope movement during the early portion of the operational period.

Timber fuel types (generally no recent fire history): potential worst-case surface fire spread will be 8-12 chains/hour with flame length 4 to 6 feet. Occasional torching trees should be expected, with the possibility of short-duration crown runs. Spotting distance will be up to 2/10 - 3/10 of a mile. Probability of ignition will be 70-80%.

Recent Fire Scar areas (Haypress, Panther footprints): potential worst-case surface fire spread will be 4-8 chains/hour with flame length 3-5 feet. Most fire spread will be through heavy dead down fuels and may involve brush. Anticipate spotting distances up to 2/10 – 3/10 of a mile. Probability of ignition at the peak of the burning period will be 70-80%.

Niahttime

Expect the fire behavior to moderate after midnight with head fire spread rates significantly reduced with primary spread through backing and flanking. Spotting will less than 1/10 mile, Probability of ignition 30-40%.

AIR OPERATIONS

Air operations may be limited during the day due to poor visibility caused by smoke.

8/27 Sunrise: 06:35

Sunset: 19:54

8/28 Sunrise: 06:36

SAFETY

Continued hot and dry conditions will contribute to increased rates of spread, spotting potential, torching, and where continuous timber on steep slopes exist there is a possibility of short-duration crown runs. Maintain situational awareness and ensure you have adequate escape routes and safety zones.

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DANGER TREES	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during "high wind events".
ALL	TRAFFIC & DRIVING	 Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid slope, use caution. Some roads are dead end with poor turn around, scout roads first. Keep speeds down on Hwy 96, road is rough in spots.
ALL	FIRE WEATHER	 Winds increasing or changing direction. Weather becoming hotter and drier. Unstable atmosphere can promote rapid fire growth.
DIV W, U, Night, Creek Group	FIRING OPERATIONS	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Qualified personnel for all assignments. Trainees to have qualified trainers. Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan. Required PPE to be worn by all personnel involved. Establish LCES prior to implementing burning operations (IRPG p. 7). Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.
DIV W, U, Night, Creek Group	SPOT FIRES	 Size up prior to engagement. Watch for multiple spots. Ensure LCES is in place. Maintain Situational Awareness at all times.
DIV A,F,M W	MOP UP	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air when practice.
DIV W	CHIPPER OPERATIONS	 Ensure JHA is provided and signed by operators. Only qualified personnel will feed the chipper. Ensure appropriate PPE is used including eye and hearing protection.
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	ENVIRONMENTAL HAZARDS	 Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and ha placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	 Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include; Lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating.
DIV W NIGHT REPAIR	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing.

TRAINING SPECIALIST MESSAGE

TRAINEES:

In order to receive documented incident credit for your training assignment - you must both register and close out with the Training Specialist. Don't delay registration. It's to your advantage!

TRAINERS:

If you leave the incident before your trainee, or if your trainee is no longer assigned to you, you will need to complete a

Performance Evaluation for the time period your trainee <u>was</u> assigned to you. Please be sure the work you perform in their Position Task Book is complete.

Human Resource Message

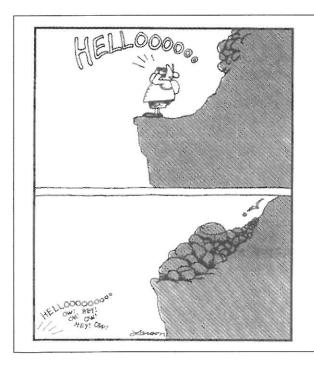

In the work place you have three options when confronted with a problem:

- 1. Suffer: do nothing except wish that things would change and hope that somehow things will get better.
- 2. Get Out: quit, leave, transfer, or hope the person causing your problems dies, retires, or moves to a different continent.
- 3. Discuss: discuss the problem with someone and seek a solution.

A surprising number of people choose option #1.

Not many people choose option #2

I am here to support you if you choose option #3.

Don't let your problems overwhelm you.
