### INCIDENT Weather Forecast

FORECAST NO: 41

PREDICTION FOR: 0600 Monday – 0600 Tuesday

**SHIFT DATE:** 8/28/17

FORECAST ISSUED: 2000 PDT, Aug 27, 2017

NAME OF FIRE:

UNIT:

**Orleans Complex** 

SRF

Incident Meteorologist:// /Terry Lebo

### **WEATHER DISCUSSION**

Warm and dry conditions continue today with high pressure aloft remaining in control. The thermal trough will move inland and weaken this afternoon. This tends to lead to a decrease in surface stability.

### **WEATHER FORECAST for MONDAY:**

WEATHER: Mostly sunny with areas of smoke. Smoke will diminish in the afternoon.

MAX TEMPERATURES: 86-99°

MIN HUMIDITY: 12-22% - Ukonom, Burney, Frank

20-35% Haypress, Forks, Zulus

20 FOOT WINDS:

SLOPE/VALLEY - Calm to light downslope/downvalley becoming upslope/upvalley 3-5 mph in the

afternoon.

**RIDGETOP** - East-southeast 2-5 mph becoming southwest 5-7 mph in the afternoon.

### **WEATHER FORECAST for MONDAY NIGHT:**

WEATHER: Clear with smoke lingering in the area.

MIN TEMPERATURES: 59-68°

MAX HUMIDITY: 23-35% mid slopes and ridges. 45-55% valleys.

20-FOOT WINDS:

SLOPE/VALLEY - Upslope/upvalley 2-4 mph, becoming calm to light downslope in the evening.

**RIDGETOP** - Southwest 3-5 mph in the evening becoming south-southeast overnight.

### **EXTENDED OUTLOOK:**

The ridging aloft responsible for the recent hot and dry conditions will weaken slightly Tuesday and Wednesday in response to a mid-level trough moving into the area from the west. Temperatures will briefly trend down and humidity will gradually increase. The wave may lead to an increase in cloud cover later Tuesday and Wednesday as well as an increase in wind speeds. However, no rainfall is expected. Another mid-level ridge will build over the region from the south for the end of the week with temperatures well above normal continuing.

Portable RAWS: 163.350 Tone 0003 for Ukonom Lookout, Tone 0004 for Carter Creek

### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 40	TYPE OF FIRE: Wildland Fire
FIRE NAME: Orleans Complex	OPERATIONAL PERIOD: 0600 8/28 - 0600 8/29/2017
DATE ISSUED: August 27, 2017	TIME ISSUED: 2000
UNIT: Six Rivers NF	SIGNED: Isl Ken Larson, FBAN

### **INPUTS**

### WEATHER SUMMARY:

\*\*\*See attached Fire Weather Forecast\*\*\*

Discussion: Warm and dry conditions continue today with high pressure aloft remaining in control.

**Weather:** Mostly sunny with areas of smoke. Smoke will diminish in the afternoon. **Max Temp:** 86 - 99° **Min RH:** 12 - 22% Ukonom Fire, 20 - 35% Haypress Fire

20 Foot Winds:

Slope/Valley - Calm to light downslope/downvalley becoming upslope/upvalley 3-5 mph in the afternoon.

Ridgetop -E-SE 2-5 mph becoming SW 5-7 mph in the afternoon.

Tonight: Clear with lingering smoke. Min Temp 59-68°; Max RH 23-35% mid slopes and ridges, 45-55% valleys.

### FIRE BEHAVIOR

### GENERAL

The Haypress Fire is currently the most active within the Complex. Expect it to continue backing toward Wooley Creek, spread westerly toward indirect containment lines, and spread north-northeasterly into the Marble Mountain Wilderness.

The Ukonom Fire is also active at the easterly edge near Ukonom Creek and Lick Creek and continues to burn with a slow rate of spread. It will continue to back toward Lick Creek and Ukonom Creek and burn up drainage to the west toward Ukonom Lookout and southerly toward indirect containment lines. There is a potential to cross Ukonom and Lick Creek drainages.

### SPECIFIC FIRE BEHAVIOR

### **Daytime**

Expect the fire behavior to be low to moderate until early afternoon. Fire spread will be primarily backing and flanking with some upslope movement during the early portion of the operational period.

Timber fuel types (generally no recent fire history or stringers in burn areas): potential worst-case surface fire spread will be 8-12 chains/hour with flame length 4 to 6 feet. Occasional torching trees should be expected, with the possibility of short-duration crown runs. Spotting distance will be up to 2/10 - 3/10 of a mile. Probability of ignition will be 60-80%.

Recent Fire Scar areas (Haypress, Panther footprints): potential worst-case surface fire spread will be 4-8 chains/hour with flame length 3-5 feet. Most fire spread will be through heavy dead down fuels but may involve brush which will increase intensities. Anticipate spotting distances up to 2/10 - 3/10 of a mile. Probability of ignition at the peak of the burning period will be 60-80%.

### Nighttime

Expect the fire behavior to moderate after midnight with head fire spread rates significantly reduced with primary spread through backing and flanking. Spotting will be less than 1/10 mile, Probability of ignition 30-40%.

### AIR OPERATIONS

Air operations may be limited during the day due to poor visibility caused by smoke.

8/28 Sunrise: 06:36

Sunset: 19:53

8/28 Sunrise: 06:37

### SAFETY

The shading effects of the smoke have resulted in limiting fire intensity and spread. Pay attention to any noticeable changes to smoke conditions, such as lifting and unexpected increases in visibility, as this can result in a substantial increase in fire behavior.

6. Control Operations/Work Assign	ments:								

- Be prepared for tactical firing in conjunction with DIV. W following the approved firing plan.
- Scout contingency lines to the West of 17 road down to Hwy. 96.
- Provide structure protection along Hwy. 96 and Salmon River road.

### 7. Special Instructions:

Consult with READ/Tribal Consultant for any new line construction. Draft from approved sites only.

Heritage Consultant Marshall Super will be POC for ALL Divisions.

READs and Heritage Consultants check in with DIVs when entering and exiting Divisions.

Avoid direct ignition in riparian areas. Use weed wash on a regular basis.

Maintain large diameter snags (>30") when possible.

DIV. W and DIV. Z will share the SOFR assigned to Div. W.

Control Operations/Work Assignments:								

### 6. Control Operations/Work Assignments:

- · Continue prep along 15N17 road in consideration of fire moving out of the wilderness.
- Patrol the 15N17 road where firing has been completed.
- Mop-up to the extent necessary to ensure containment while providing for firefighter safety.
- · Be prepared for tactical firing following the approved fire plan.

### 7. Special Instructions:

Consult with READ/Tribal Consultant for any new line construction. Draft from approved sites only. Heritage Consultant Marshall Super will be POC for ALL Divisions. READs and Heritage Consultants check in with DIVs when entering and exiting Divisions. DIV. W / DIV. Z will share the SOFR assigned to Div. W. Avoid direct ignition in riparian areas. Use weed wash on a regular basis. Maintain large diameter snags (>30") when possible.

DIV A,F,M, W REPAIR	HEAVY EQUIPMENT OPERATIONS	<ul> <li>Ensure communications are established with operator</li> <li>Use hand signals if other communications are unavare</li> <li>Maintain a 50'-100' exclusion area around equipment</li> <li>Use a spotter when backing.</li> </ul>	ilable.
INCIDENT	ORLEANS COMPLEX	DATE PREPARED:  August 27, 2017  TIME PREPARED: 1600 HOURS	OPERATIONAL PERIOD Day/Night Shift 08/28/17 0600-0600Prepared by: T. OConnell, Steve Davis Frank Pingiczer

### Lookouts Communications Escape Routes Safety Zones

### **Orleans Complex**

Operation Period: 08/28/2017 Day/Night Shift

### SAFETY MESSAGE

### Your Brain is the most important tool you bring to the fire

- Firefighting is a mental as well as a physical activity.
- Personnel responsible for the safety of others should spend the majority of their time on the mental side of firefighting.
- Those mental activities include; planning, ensuring effective communication, monitoring the fire environment, anticipating problems, and forecasting future needs.

### **MAJOR HAZARDS AND RISKS**

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	BUCKET DROPS	COMPLACENCY

### Be sure all elements of your safety plan are in place prior to engagement

### **Decision Points**

Establish Decision Point(s) when potential exists for your fire situation to degrade.

Insure that your situation awareness includes monitoring factors that relate to the Decision Point(s) you set.

Have a planned response in place.

Do not ignore a Decision Point that has been hit!

### Situational Awareness

Help maintain your Situational Awareness by doing the following:

- Constantly observing your environment.
- Interpret and process information received.
- Sharing information by discussing the situation.

Nor Cal Team 2 Safety Officers Terry O'Connell, Frank Pingiczer, Steve Davis SOF2

### TRAINING SPECIALIST MESSAGE

### Notice!

The TNSP Desk will be unstaffed Tuesday 8/29 until 1800 Hrs. If you need to close out a Training Package prior - Plan Ahead!

### TRAINEES:

In order to receive documented incident credit for your training assignment - you must both register and close out with the Training Specialist. Don't delay registration. It's to your advantage!

### TRAINERS:

If you leave the incident before your trainee, or if your trainee is no longer assigned to you, you will need to complete a

Performance Evaluation for the time period your trainee <u>was</u> assigned to you. Please be sure the work you perform in their Position Task Book is complete.

Brad Smith - TNSP

209-770-4809 norcal2training@gmail.com

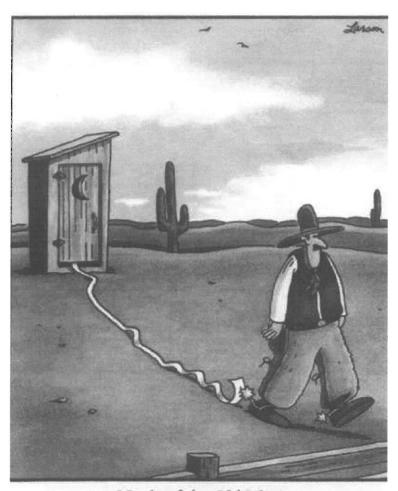

### Human Resource Message

### When is a Joke - Not a Joke?

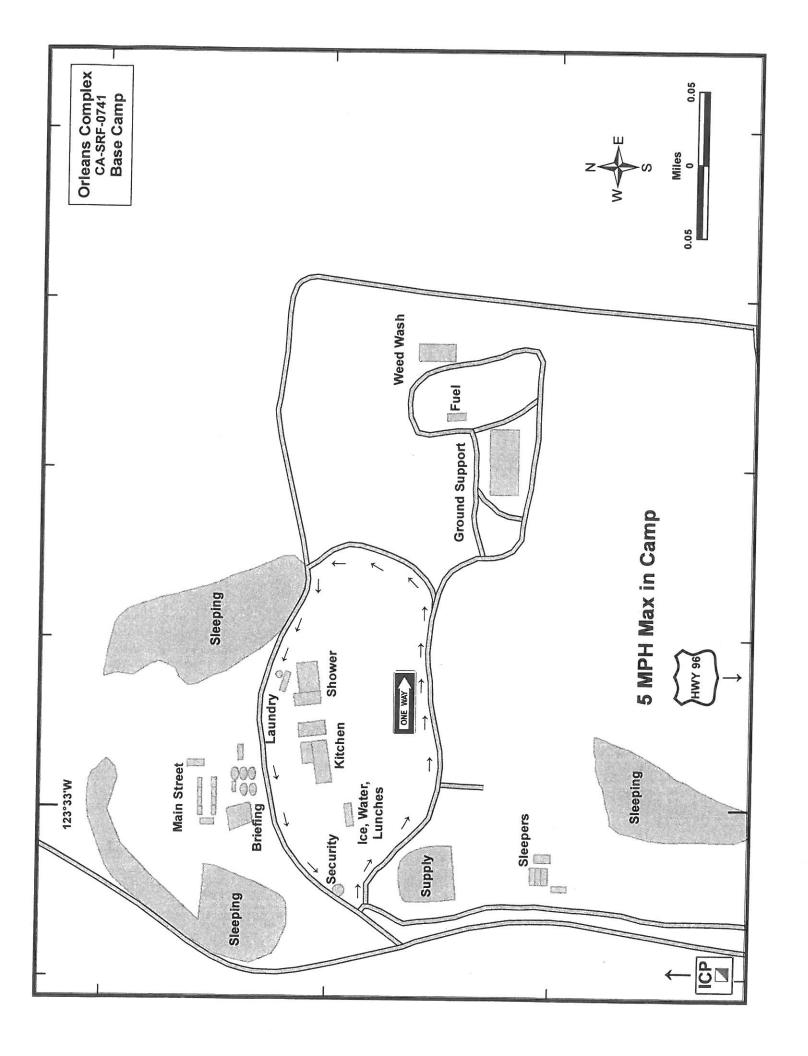

- 1. When it embarrasses someone,
- 2. When it is negative humor,
- 3. When it is a put-down because of sex, race, color, National origin, age, religion, mental or physical handicap or sexual orientation.

Humor and fun need to be part of our teamwork picture, but not when it is at the expense of others.

Nerds of the Old West
