FIRE BEHAVIOR

GENERAL

The Haypress Fire is currently the most active within the Complex. Expect it to continue backing toward Wooley Creek, spread westerly toward indirect containment lines, and spread northerly into and within the Marble Mountain Wilderness.

The Ukonom Fire is also active at the easterly edge near Ukonom Creek and Lick Creek and continues to burn with a slow rate of spread. It will continue to back toward Lick Creek and Ukonom Creek and burn up drainage to the west toward Ukonom Lookout and southerly toward indirect containment lines. There is a potential to cross Ukonom and/or Lick Creek drainages.

SPECIFIC FIRE BEHAVIOR

Daytime

Expect the fire behavior to be low to moderate until early afternoon. Fire spread will be primarily backing and flanking with some upslope movement during the early portion of the operational period.

Timber fuel types (generally no recent fire history or stringers in burn areas): potential worst-case surface fire spread will be 8-12 chains/hour with flame length 4 to 6 feet. Occasional torching trees should be expected, with the possibility of short-duration crown runs. Spotting distance will be up to 2/10 - 3/10 of a mile. Probability of ignition will be 60-80%.

Recent Fire Scar areas (Haypress, Panther footprints): potential worst-case surface fire spread will be 4-8 chains/hour with flame length 3-5 feet. Most fire spread will be through heavy dead down fuels but may involve brush which will increase intensities. Anticipate spotting distances up to 2/10 - 3/10 of a mile. Probability of ignition at the peak of the burning period will be 60-80%.

Nighttime

Expect the fire behavior to moderate after midnight with head fire spread rates significantly reduced with primary spread through backing and flanking. Spotting will be less than 1/10 mile, Probability of ignition 30-40%.

AIR OPERATIONS

Air operations will be limited during portions of the day due to poor visibility caused by smoke.

8/29 Sunrise: 06:37 Sunset: 19:51 8/30 Sunrise: 06:38

SAFETY

Fire intensity has increased for the past two afternoons when the smoke has lifted. Pay attention to your surroundings so changing conditions can be recognized and relayed to others.
