FIRE BEHAVIOR

GENERAL

The Ukonom Fire is active and continues to show heat during IR flights. Upslope spread was observed yesterday. It will continue to slowly back toward Lick Creek and Ukonom Creek and possibly burn up drainage to the west toward Ukonom Lookout and southerly toward indirect containment lines. There is a potential to cross Ukonom and/or Lick Creek drainages.

The Haypress Fire is currently the most active within the Complex. Expect it to continue backing toward Wooley Creek and spread northerly and easterly into and within the Marble Mountain Wilderness. Continued movement westerly in the vicinity of Merrill Mountain toward indirect containment lines is expected.

SPECIFIC FIRE BEHAVIOR

Daytime

Expect the fire behavior to be moderate with the potential for extreme fire behavior due to high temperatures, low humidity, and moderately strong winds. Fire behavior will be reduced if smoke continues to impact the area.

Timber fuel types (generally no recent fire history or stringers in burn areas): potential worst-case surface fire spread will be 10-14 chains/hour with flame length 6 to 8 feet. Occasional torching trees should be expected, with the possibility of sustained crown runs. Spotting distance will be 1/4 to 1/2 of a mile. Probability of ignition will be 70-90%.

Recent Fire Scar areas (Haypress, Panther footprints): potential worst-case surface fire spread will be 8-10 chains/hour with flame length 4-6 feet. Most fire spread will be through dead down fuels but may involve brush which will increase intensities and spread rates. Anticipate spotting distances of 1/4 to 1/2 mile. Probability of ignition at the peak of the burning period will be 70-90%.

Nighttime

Expect the fire behavior to remain active through the night with head fire spread rates and other fire behavior attributes to be moderate. Spotting will be 2/10 to 4/10 mile, Probability of ignition 50-70%.

AIR OPERATIONS

Air operations will be limited during the day due to poor visibility caused by smoke.

9/01 Sunrise: 06:40

Sunset: 19:46

9/02 Sunrise: 06:41

SAFETY

Extremely warm dry conditions are expected for the next several days. Unless smoke impacts reduce potential fire behavior expect near extreme burning conditions. Pay attention to changes in smoke: lifting, clearing, increased brightness, etc.

INCID	ENT RISK ANALYSIS (ICS	215A) ORLEANS COMPLEX DAY/NIGHT SHIFT
Groups	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
NORTH, SOUTH, NIGHT CREEK	DANGER TREES	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during "high wind events".
NORTH, SOUTH, NIGHT CREEK	TRAFFIC & DRIVING	 Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid slope, use caution. School is back in session. Observe posted speed limits. Watch for Children. Keep speeds down on Hwy 96, road is rough in spots. Winds increasing or changing direction.
NORTH, SOUTH, NIGHT CREEK	FIRE WEATHER	 Weather becoming hotter and drier. Unstable atmosphere can promote rapid fire growth.
NORTH, SOUTH, NIGHT	FIRING OPERATIONS	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Qualified personnel for all assignments. Trainees to have qualified trainers. Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan. Required PPE to be worn by all personnel involved. Establish LCES prior to implementing burning operations (IRPG p. 7). Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.
NORTH, SOUTH, NIGHT	SPOT FIRES	 Size up prior to engagement. Watch for multiple spots. Ensure LCES is in place. Maintain Situational Awareness at all times
NORTH, SOUTH, NIGHT	MOP UP	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities.
SOUTH	CHIPPER OPERATIONS	 Ensure JHA is provided and signed by operators. Only qualified personnel will feed the chipper. Ensure appropriate PPE is used including eye and hearing protection.
NORTH, SOUTH, NIGHT CREEK	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access.
NORTH, SOUTH, NIGHT CREEK	BEAR PRECAUTIONS	 Pick up and remove all trash from fire line. Don't allow storage of food in tents Manage trash in spike camps to avoid attracting bears.
NORTH, SOUTH,	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
SOUTH	STRUCTURE PROTECTION	 Ensure LCES is in place. Review Structure Protection; IRPG pages 12-16. Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone. Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zone.
NORTH, SOUTH, NIGHT CREEK	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	 Drink 2 to 1 water to sports drinks. Recognize symptoms of HEAT RELATED ILLNESS which include; Lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating.
NORTH, SOUTH, REPAIR CREEK	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing.

SAFETY MESSAGE

Situational Awareness

Situation awareness involves being aware of what is happening in the vicinity to understand how information, events, and one's own actions will impact goals and objectives, both immediately and in the near future.

Raise your awareness by asking these questions:

- What information is not known that needs to be known?
- Is the information I currently have valid, or has it become outdated?
- Are there barriers in place such as excessive motivation, complacency, overload, fatigue or poor communications?

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	BUCKET DROPS	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

Briefing Protocol

Brief your personnel using the IRPG checklist prior to engagement.

Re-brief anytime your plan changes, unexpected changes compromise the plan or your safety, or anytime essential information becomes known and needs to be communicated.

Ask questions to be sure essential content is understood.

Steps To Protect Yourself From Illnesses

- Wash your hands often
- Avoid touching your eyes, nose, or mouth, germs spread this way
- Try to avoid close contact with sick people
- Practice good health habits. Get plenty of sleep drink plenty of fluids, and eat healthy food
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
- If you are sick with flu-like illness, separate that person from the rest of your crew and others, seek treatment at the medical unit.
