FIRE BEHAVIOR

GENERAL

The Ukonom Fire has spread little the past several days. It could continue to burn further up drainage to the west toward Ukonom Lookout and southerly toward indirect containment lines. There is a potential to cross Ukonom and/or Lick Creek drainages.

The Haypress Fire is currently the most active within the Complex. Expect it to continue backing toward Wooley Creek and spread northerly and easterly into and within the Marble Mountain Wilderness. Expect continued movement in a southwesterly direction in the vicinity of Merrill Mountain toward the Klamath River/Salmon River. Continued spread on most of the western flank of the fire toward the Klamath River is expected.

SPECIFIC FIRE BEHAVIOR

Daytime

Expect the fire behavior to be low to moderate during the operational period. Fire behavior will continue to be reduced if smoke continues to impact the area, especially in the lower portions of the Klamath River drainage.

Timber fuel types (generally no recent fire history or stringers in burn areas): potential worst-case surface fire spread (head fire) will be 6-8 chains/hour with flame length 4 to 6 feet. Occasional torching trees should be expected with a possibility of short-duration crown runs. Spotting distance to 2/10 of a mile, Probability of ignition 40-60%.

Recent Fire Scar areas (Haypress, Panther footprints): potential worst-case surface fire spread will be 4-6 chains/hour with flame length 3-5 feet. Most fire spread will be through dead down fuels but may involve brush which will increase intensities and spread rates. Anticipate spotting distances to 2/10 mile. Probability of ignition at the peak of the burning period will be 40-60%.

Nighttime

Expect the fire behavior to be much reduced during the night with primarily flanking and backing fire and low spread rates. Flame lengths will be 1-4 feet, spotting will be less than 2/10 mile. Probability of ignition 20-40%.

AIR OPERATIONS

Air operations will be limited during the day due to poor visibility caused by smoke.

Groups	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES	
ALL	DANGER TREES	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG pages 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during "high wind events". 	
ALL	TRAFFIC & DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid slope, use caution. School is back in session. Observe posted speed limits. Watch for Children. Keep speeds down on Hwy 96, road is rough in spots. 	
NORTH, SOUTH, NIGHT	FIRING OPERATIONS	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Qualified personnel for all assignments. Trainees to have qualified trainers. Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan. Required PPE to be worn by all personnel involved. Establish LCES prior to implementing burning operations (IRPG p. 7). Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.

NORTH, SOUTH,	AIR OPERATIONS	<ul style="list-style-type: none"> Follow "Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources. 	
STRUCTURE NORTH, SOUTH	STRUCTURE PROTECTION	<ul style="list-style-type: none"> Ensure LCES is in place. Review Structure Protection; IRPG pages 12-16. The Small Things Make a Difference

- Stay focused on the small things that can compromise your safety
- Small issues may seem inconsequential when viewed alone
- Sometimes multiple small issues can develop into a major problem
- Mitigate small issues so they do not snowball into a major issue
- Communicate minor problems so everyone is aware

Follow the 30/30 rule: If you see lightning and hear thunderclaps follow in less than 30 seconds, take storm precautions.

1. Take shelter in vehicle or building if possible.
2. If outdoors, find low spot away from tall trees, wire fences, and utility lines.
3. If in open country, crouch low, with feet together, minimizing contact with the ground.
4. Don't group together.
5. Stay away from ridgetops, wide open areas, or near ledges or rock outcroppings.
6. Follow the thunderstorm safety guidelines on page 21 of the IRPG.
