## FIRE BEHAVIOR

### GENERAL

The Ukonom Fire has spread little the past several days. It could continue to burn further up drainage to the west toward Ukonom Lookout and southerly toward indirect containment lines. There is a potential to cross Ukonom and/or Lick Creek drainages.

The Haypress Fire is currently the most active within the Complex. Expect it to continue backing toward Wooley Creek and spread northerly and easterly into and within the Marble Mountain Wilderness. Expect continued movement in a southwesterly direction in the vicinity of Merrill Mountain toward the Klamath River/Salmon River. Continued spread on most of the western flank of the fire toward the Klamath River is expected.

### SPECIFIC FIRE BEHAVIOR

#### Daytime

Expect the fire behavior to be low to moderate during the operational period. Fire behavior will continue to be reduced if smoke continues to impact the area, especially in the lower portions of the Klamath River drainage.

Timber fuel types (generally no recent fire history or stringers in burn areas): potential worst-case surface fire spread (head fire) will be 3-6 chains/hour with flame length 2 to 4 feet. Occasional torching trees should be expected with a possibility of short-duration crown runs. Spotting distance to 1/10 of a mile, Probability of ignition 30-50%.

Recent Fire Scar areas (Haypress, Panther footprints): potential worst-case surface fire spread will be 2-4 chains/hour with flame length 2-5 feet. Most fire spread will be through dead down fuels but may involve brush which will increase intensities and spread rates. Anticipate spotting distances to 1/10 mile. Probability of ignition will be 30-50%.

**\*\*\*GUSTY OUTFLOW WINDS FROM THUNDERSTORMS CAN RESULT IN EXTREME FIRE BEHAVIOR\*\*\***

#### Nighttime

Expect the fire behavior to be much reduced during the night with primarily flanking and backing fire and spread rates up to 6 chains/hour. Flame lengths will be 1-4 feet, spotting will be less than 1/10 mile. Probability of ignition 10-30%.

## AIR OPERATIONS

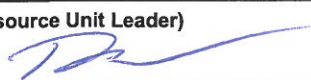

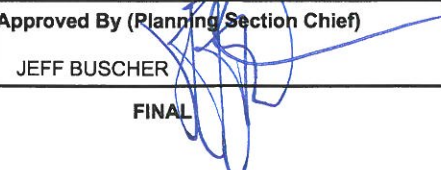

Air operations will be limited during the day due to poor visibility caused by smoke.

9/06 Sunrise: 06:45      Sunset: 19:38      9/06 Sunrise: 06:46

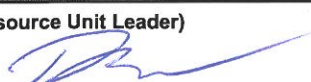

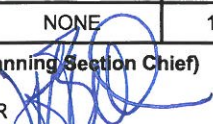

## SAFETY

Keep heads up for thunderstorm development and monitor your radio for storm tracking updates from the IMET.
