NW CA will sit between the outgoing trough of low pressure to the east and a ridge of high pressure to the west. The result will be cool but dry northerly flow and a very gradual warming and drying trend through Sunday. Today will see temperatures return to the 70s. RH values fall back to near normal with minimums near 30% however good to great recoveries are expected to continue through the weekend. Weak offshore flow will also return to the upper slopes and ridge tops during the late night and early morning hours...but daytime winds will generally be onshore and light.

Smoke Transport Wind: N 20 mph.
LAL: 1
CWR: 0 %.

EXTENDED OUTLOOK (SUN-TUE):

Sunny but some high clouds passing at times as a strong ridge of high pressure gradually builds over the area and will bring a warm and drying trend. Temperatures should rise 5-10 degrees each day with daytime highs reaching near 90 by Tuesday. Relative humidity will also fall to slightly below normal for this time of year with day time minimums reaching the 20-25% by Monday and the upper teens on Tuesday. Northeast winds will return during the nights and mornings through Monday however wind speeds look light and non-critical.

B-Steep Slopes
C-Dehydration

D- Complacency

Assess The Situation

Determine Hazard Controls

PROCEDURAL APPROACH TO SAFETY

In a fire situation there are subjective hazards that we as firefighters create, and there are objective hazards such as fire entrapment, snags, rolling debris, and terrain that are inherent to firefighting. The subjective hazards we have control over just by using our attitudes and abilities. The objective hazards we cannot eliminate. The possibility of injury or entrapment is always there, the probability may be large or small. We must take steps to reduce the risks associated with our actions. By using a set procedure each operational period, we can minimize exposure to hazards and better ensure our safety by taking the following steps.

- Determine what the assignment is
- Identify the hazards
- Analyze the risks
- Implement steps to ensure safety
- Re-analyze the situation as it changes
