INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
MILL CREEK 1		Date/Time From: 08/28/2018 0600	Date/Time To: 08/28/2018 2000
		TUE	TUE
3. Objective(s):			
Core Values:			
<ul style="list-style-type: none"> • Life – There is no higher value, weigh the consequences of all decisions against this value. • Respect – Through considerate interactions, create and maintain a productive work environment for your fellow firefighters, cooperators, and tribal members. 			
Course of Action:			
Minimize fire size using direct and indirect attack as appropriate, to keep the fire within the boundary of the Reservation and to protect infrastructure and economic interests.			
Objectives:			
<ol style="list-style-type: none"> 1. Maintain and improve relationships with Tribal Departments, Tribal Members, and cooperators. 2. Preserve economic values by protecting timber on tribal lands. 3. Minimize fire impacts to natural, cultural and heritage resources. 4. Provide timely and accurate information and notification to local communities and partners. 5. Maintain financial accountability and keep costs commensurate with the values at risk. 6. Implement suppression repair actions. 			
4. Operational Period Command Emphasis:			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located at:			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):			
<input checked="" type="checkbox"/> ICS 202	<input type="checkbox"/> ICS 207	Other Attachments: <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____

INCIDENT Weather Forecast

FORECAST NO: 9 **NAME OF FIRE:** Mill Creek 1
PREDICTION FOR: Day/Night **SHIFT** **UNIT:** BIA (Hoopa)
SHIFT DATE: 8/28/18 to 8/29/18 (0600-0600) **SIGNED:** Rich Thompson

Incident Meteorologist

TIME AND DATE FORECAST ISSUED: 8/27/18 @ 2000

WEATHER DISCUSSION: Warmer and drier conditions are anticipated across the fire through the operational period. Temperatures will climb into the 80s to lower 90s. Relative humidity will drop to low levels this afternoon with moderate to good recovery tonight. Typical diurnal winds will prevail with gusty upvalley/northwesterly winds this afternoon and evening.

On Wednesday and Thursday, temperatures are expected to be cooler with higher relative humidity. However on Friday, warmer and drier conditions are expected yet again.

WEATHER FORECAST (TODAY and TONIGHT):

WEATHER: Mostly clear with areas of smoke.

TEMPERATURES: Max: 84-92 below 2500 feet.
77-84 above 2500 feet.

Min: 54-62.

HUMIDITY: Min: 25-35%.

Max: 70-90% below 2500 feet.
50-70% above 2500 feet.

20 FT WINDS:

RIDGETOP:

0600-1100: North to northeast 2-5 MPH Gust 8 MPH.
1100-1400: Southwest 3-6 MPH Gust 10 MPH.
1400-2200: West to northwest 5-10 MPH Gust 15 MPH.
2200-0100: North 3-6 MPH Gust 10 MPH.
0100-0600: Northeast to east 2-5 MPH Gust 8 MPH.

SLOPE/VALLEY:

0600-1000: Variable/upslope 3-6 MPH.
1000-1400: Upvalley 3-6 MPH Gust 10 MPH.
1400-2000: Upvalley 6-12 MPH Gust 22 MPH.
2000-2300: Upvalley 3-6 MPH Gust 10 MPH.
2300-0600: Downslope/downvalley 3-6 MPH.

OUTLOOK (WEDNESDAY THROUGH FRIDAY):

On Wednesday and Thursday, a storm system will pass to the north and east of the area. This will result in cooler temperatures and higher relative humidity for the area. Additionally, the typical afternoon and evening winds could be enhanced a little bit as this system moves by. On Friday, the roller coaster will continue with warmer temperatures and lower relative humidity anticipated.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 9	TYPE OF INCIDENT: Wildland Fire
INCIDENT NAME: Mill Creek 1	OPERATIONAL PERIOD 28 August 2018
DATE ISSUED: 27 August 2018	TIME ISSUED: 2000
UNIT: Hoopa Valley Tribe	SIGNED <i>Ken Loda</i>
	Ken Loda, FBAN

INPUTS

WEATHER SUMMARY See the weather forecast preceding.

FUELS CONDITIONS

Fuels consist of primarily managed stands of conifers in various stages of maturity. Mature stands generally only support surface fire. Those in earlier stages of regrowth are fairly dense with logging slash and brush species in addition to the young trees. Fine dead fuel moisture is 10-12% at 0700, going to 5-8% by afternoon, and 1000-hr fuels are at 6-12%. Shrub live fuel moistures in higher elevations are running from 75 to 120%.

OUTPUTS

GENERAL FIRE BEHAVIOR

This narrative applies should the fire escape into an unburned area.

The fire's primary factors are heavy loads of dead and down fuels in all classes, with large areas of steep topography. Heavier fuels still burning at sunset are often holding heat overnight throughout the fire area, and overnight weather conditions there allow some fine fuels to continue to burn most of the night, primarily above 2500'. The recent fire activity has been most dependent upon slope and wind alignment, Areas dominated by shrubs and slash typically exhibit advanced fire behavior. In the right conditions fire in these areas can move into the crowns of adjacent mature stands.

Surface fire would spread 10 - 17 ch/hr with headfire aligned to slope in the understory fuels, up to 150 ch/hr in the brush-dominated sites. In all fuel types the backing and flanking spread will be around 1 - 2 ch/hr. In the understory of mature timber stands flame lengths typically 1' - 4', but up to 9' in heavy dead and down. Brush fields and younger reproduction stands could see flame lengths 25' or more when slope and wind align.

Spotting: Rollout potential exists throughout. The probability of ignition will be 40% through the night and 90% during peak burning conditions.

Local critical thresholds While we have been seeing mostly low to moderate fire behavior, the recent burning conditions have regularly exceeded all four local thresholds for large fire growth. We are forecast to meet or exceed all for at least part of today. Those thresholds are: 1) 20' wind speed over 7 mph; 2) RH lower than 34%; 3) temperatures over 82°, and: 4) 1000-hour fuel moistures less than 14%.

SPECIFIC FIRE BEHAVIOR

Division A and Z: Few threats to the line are expected in these divisions. Watch for snags and rollout,

Divisions B, and C: Continued internal burning. Forecast winds favor holding the lines on division B and west end of division C. Primary threats in these areas would be rollout, throughout the operational period. General conditions are favorable for burning operations in these divisions, if needed.

Division Y: Holding the line along the 603 road should benefit from upslope winds. There does not seem to be enough heat or areas of unburned fuel to challenge the line along the ridge and 6H road.

SAFETY

SAFETY: Watch for rollout, both timber and fire-loosened rocks.

AIR OPERATIONS: Smoke accumulation could complicate operations until late morning.

Division/Group Assignment List (ICS 204 WF)

HEALTH AND SAFETY MESSAGE

INCIDENT: **Mill Creek 1**

DATE: August 28, 2018

POISON OAK

- Considered one of the most hazardous plants in the Western United States!
- Only 15 to 20% of the US population are NOT allergic to Urushiol, the allergen in Poison Oak.
- Urushiol absorbs quickly into the skin (aka contact Dermatitis) causing itchy, blistering rash.
- Symptoms usually appear within the first 24 hours, but can take up to 6 days to manifest.
- Your immune system forms a defensive reaction to the allergen, not an immunity or tolerance. You may have little or no reaction the first time you come into contact, but could become progressively worse with repeated contact.

Recognition

Doesn't look the same in color, but you get the idea. If you don't know what it looks like, there's a good chance someone around you has seen it..... Touched it.....SUFFERED FROM IT.....

Treatment

Wash contacted area with soap and water as soon as possible.

Over the counter treatments such as Calamine lotion, Zinc Oxide, Zinc Carbonate, baking soda, colloidal oatmeal, 1% hydrocortisone and certain antihistamines can be used to relieve the discomfort.

Symptoms can last for as long as 3 weeks and certain cases may require something stronger. See the Medical Unit for evaluation and they can refer you to a physician if needed.

Even if you are not venturing out into the world of Poison Oak, you are still at risk of coming into contact with it. Line going personnel are bring it into camp every day!!! It's on clothes, packs, hose.....anything that absorbs oil that has been in the field has potentially become saturated with it.

Be especially careful when handling hose that has been used on the fire, it HAS been in Poison Oak.

Take precautions to not bring it back home to your loved ones. Isolate and clean your clothes and gear before you go home!

Safety Officers: Todd Demasters, Eric Fransted, Annamaria Echeverria, Don Stuke, Jon Garber, Colin Good

INCIDENT SAFETY ANALYSIS 215a

Mill Creek 1 - Tuesday, August 28th, 2018

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking. ~ Don't work above any personnel. ~ Be on the lookout for rolling rocks, debris, or burning material. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 6).
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Keep clutter off dash and inside cab. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs.
All	Heat Related Illness (HRI)& Dehydration	<ul style="list-style-type: none"> ~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~ Take Frequent breaks, minimum of 10 minutes every hour. ~ Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS which include. <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
All	Injury & Medical Emergency	<ul style="list-style-type: none"> ~ Assist injured employee appropriate medical care. ~ Use EMT's on Division for initial care. ~ Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
C, Y, Z	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 85 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
All	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while in roadway. ~ Use glow sticks to mark hazards. ~ Ensure personnel have a personal light (headlamp). ~ Watch for signs of fatigue. ~ Take breaks away from areas of known hazard.
All	Helicopter Operations	<ul style="list-style-type: none"> ~ Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. ~ Monitor Air to Ground communications. ~ Follow aviation safety guidelines in IRPG and IHOG.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED/PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2" - 3" burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW/PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2" - 3" burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN/PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG Page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
