to

8/17/2018 1800

Friday

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Stone Fire</p>	2. Operational Period:	Date From: 8/17/2018 Time From: 0600	Date To: 8/17/2018 Time To: 1800
---	-------------------------------	---	-------------------------------------

3. Objective(s):
Management Objectives

- Ensure strategies and tactics commit responders to operations with a high probability of success and minimizes exposure through the application of sound risk management principles.
- Minimize the threat to communities, infrastructure and natural resources.
- Establish and strengthen cooperator, partner and stakeholder relationships.
- Work closely with assigned resource advisors to minimize suppression impacts to sensitive cultural and natural sites.

- Control Objectives
- Keep the fire east of County Road 91
 - Keep the fire South of National Forest Road 42N60
 - Keep the fire North of County Road 85 to NF 41N10 to 42N10
 - Keep the fire West of State Highway 139

General Situational Awareness:

Forecast:

Spot Forecast for Stone Fire...CA-MDF
National Weather Service Medford OR
851 PM PDT Thu Aug 16 2018

.DISCUSSION...

It will be exceptionally dry the next couple of days. Winds will be fairly light, though they will likely become a bit gusty each afternoon and early evening due to strong surface heating in this very dry air mass. In the larger scale, the upper level low will move by from west to east well north of the area Friday, and then high pressure will build in stronger for Saturday. A new upper level low will move in northwest of the area along the Oregon coast Sunday into Monday. This is likely to continue the exceptionally dry weather across the Modoc.

.FRIDAY...

Sky/weather.....Sunny, except for smoke.
Max temperature.....85-90.
Min humidity.....5-9 percent.
Eye level winds.....Light and variable 0-2 mph until late morning,
then up slope and west-southwest 1-3 mph with gusts
3-5 mph in the afternoon.
Wind (20 ft).....Light and variable 5 mph or less until late morning,
then west-southwest 5-10 mph.
Mixing height.....500 ft AGL or less, increasing to 5,000 ft AGL around
1100 PDT, then increasing to 9,000-11,000 ft AGL in
the afternoon.
Transport winds.....North 0-5 mph until late morning, becoming WSW
5-10 mph.
CWR.....0 percent.
LAL.....1.

.FRIDAY NIGHT...

Sky/weather.....Clear, except for smoke.
Min temperature.....Around 60.
Max humidity.....30-40 percent.
Eye level winds.....West 1-3 mph with gusts 3-5 mph early evening,
becoming NW mid-late evening, then downslope and
NE 0-2 mph overnight.
Wind (20 ft).....West 5-10 mph, becoming NW 5-10 mph mid-late evening,
then NE 0-5 mph after midnight.
Mixing height.....9100 ft AGL decreasing to 100-200 ft AGL early
in the evening.
Transport winds.....West 5-10 mph, becoming NW 10 mph mid-late evening,
then northeast 5 mph overnight.
CWR.....0 percent.
LAL.....1.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 001	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Stone	OPERATIONAL PERIOD: 8-17-18 Day Shift
DATE ISSUED: 8-16-18	TIME ISSUED: 2100
UNIT: CA-MDF	SIGNED: <u>Matt Brown</u>
	Typed/printed: Matt Brown FBAN(t)

INPUTS

WEATHER SUMMARY: Warming and drying trend will continue through the weekend with single digit humidity and afternoon gusty winds.

Temp: 85-90 RH: 5-9% Winds WSW 5-10 mph

Both ERC and 1000 hr Fuel Moistures are in the 97th percentile. Live fuels recorded on 8-5-18 in Sage were 100% and 122% at locations closest to the fire. Fine Dead is expected to be 3-4% with a PI of 90%.

RH recovery is expected to be moderate at 47-52%

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire will likely respond to the overnight RH recovery and a shallow inversion by moderating ROS and intensity. The fire area will likely experience some light smoke in the morning, shading fuels and reducing spotting potential. As the day warms and dries, expect an early return of the burn period with more intense burning than the previous day due to the reduction in RH. Expect spot distances to remain short to moderate range as source material remains relatively light in concentration; however, the robust and continuous grass crop will most likely remain highly receptive and generate spreading fires as the P.I. approaches 90% during the high of the afternoon.

SPECIFIC:

Limited direct attack opportunities will be present in all divisions with light fuel loading in the early parts the shift. As the burn period establishes, after the inversion breaks, expect intense burning with spotting up to ½ mile. Normal burning conditions should produce ROS of 15-20 ch/hr and flame lengths 4-6 ft. in the grass shrub mix. When the fire transitions into the shrub understory, expect ROS of 55-60 ch/hr and flame lengths of 10-15 ft. with tree torching and short duration crown runs in heavy concentrations of conifer.

Expect increased spot distance, ROS and flame lengths with pyrocumulus outflow winds.

Divisions A/M will experience adverse wind conditions, rapid ROS and increased flame length during the burning period. Pyrocumulus outflow winds will add to the prevailing wind and may cause ROS to exceed expectations, or observed fire behavior from the previous operational period.

Division Z will experience favorable winds under normal burning conditions. Outflow winds will challenge containment and pressure established control lines.

AIR OPERATIONS:

Smoke may linger in the morning, obscuring air operation opportunities early in the burning period. As the fire moves into areas covered with more grass and less conifer, expect increased effectiveness with retardant application.

SAFETY

Expect dramatic shifts in fire behavior due to outflow winds from pyrocumulus development. Signs of increased atmospheric instability will be late morning cumulus formation. As smoke columns rise and gain access to the upper layer of instability, a pyrocumulus will form and then collapsed at an unpredictable time. Many times an outflow wind will immediately follow a period of sudden calm. Make sure your LCES is based upon the effect of outflow winds and reduce exposure to situations of unburned fuel between you and the fire when visual indicators of instability are present.

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DANGER TREES	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during "high wind events".
ALL	DRY FUEL CONDITIONS	<ul style="list-style-type: none"> Establish and maintain LCES. Heavy grass crop, fuel moistures at critical levels. Anticipate intense burning and rapid rates of spread. Watch for spot fires. Allow for adequate time to escape routes and safety zones.
ALL	TRAFFIC & DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Some roads are dead end, with poor turn-arounds, scout roads first. Watch for livestock.
DIV A/M	STRUCTURE PROTECTION	<ul style="list-style-type: none"> Review Structure Protection; IRPG Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone. Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. Look for propane tanks and other hazardous materials.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> Follow Aviation "Watch-Out Situations", IRPG. Don't plan on air resources for medical transport or resupply. Refer to IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	SPOT FIRES	<ul style="list-style-type: none"> Size up prior to engagement. Watch for multiple spots. Ensure LCES is in place. Maintain Situational Awareness at all times.
ALL	FIRE WEATHER	<ul style="list-style-type: none"> Winds increasing or changing direction. Weather becoming hotter and drier. Unstable atmosphere can promote rapid fire growth.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> A written guideline shall be prepared and approved for major burning operations. Conduct thorough briefing for all personnel (inside rear cover IRPG). Qualified personnel for all assignments. Trainees to have qualified trainers. Required PPE to be worn by all personnel involved. Establish LCES prior to implementing burning operations.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue.
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	<ul style="list-style-type: none"> Drink 3 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include; Lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing.

INCIDENT NAME STONE ICS 215a	DATE PREPARED: <p style="text-align: center;">August, 16, 2018</p>	OPERATIONAL PERIOD Day Shift 08/17/18 0600-1800 Prepared by: T. OConnell, Steve Davis Frank Pingiczer

Operation Period: 08/17/2018 Day Shift

SAFETY MESSAGE

WHAT IS THE PROBABILITY OF SUCCESS?

- When you are developing your tactical plan honestly weigh the probability of successfully completing your objectives.
- Do you have the time, resources, logistical support, and supervision needed for the assignment?
- Do you have all elements of your safety plan in place?
- Are the risks associated with the assignment worth the gain?
- When your probability of success is low, it should be a red flag to consider an alternative plan.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
--	---	--

Be sure all elements of your safety plan are in place prior to engagement

Weather Observations

Communicate the fire weather and fire behavior forecast to your personnel

Take local weather observations at your place of work

Communicate the local weather to all of your personnel

Establish decision points to monitor weather issues that can compromise your safety

Transition Day

- Today you may have a new supervisor.
- Please recognize that there may be new people on the incident who you can help during this transition by sharing your Situational Awareness and other information you have gathered to help make this transition seamless.
- The mission of NorCal Team 2 is to provide everything essential for you to safely and effectively accomplish the incident objectives.
- Please feel free to contact any team member about how we can most effectively support your needs.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or Illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or Illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
