## INPUTS

**WEATHER SUMMARY** \*\*See Fire Weather Forecast\*\*

\*\*\* RED FLAG WARNING AFTER 1300 for STRONG WINDS AND LOW RELATIVE HUMIDITY \*\*\*

**Weather:** Partly cloudy. Areas of smoke. Inversion breaks around 1000.

**Max Temps:** 72-77 ridgetops and 85-90 lower drainages.

**Min RH:** 17-22 percent ridges and **12-17 percent lower drainages.**

**20 FOOT WINDS:** Ridges: North-Northeast 4-9 mph with gusts 15 mph until 1000, becoming South-Southwest 7-12 mph during the late morning and then **Southwest-West 10-15 mph with gusts to 25 mph in the afternoon.**

Slope/valley: Downslope/Downvalley 2-6 mph until 1000, then upslope/upvalley 3-8 mph.

## FIRE BEHAVIOR

**INPUTS:**

- **Fuels:** Lack of inversion on North and East sides of fire will increase fine fuel availability.
- **Topography:** Ridge locations will experience the highest winds since the initial slope runs of September 5<sup>th</sup>. Winds will be strongest on ridge tops with reduced speeds in drainages. Drainages aligned with wind, East/West and Northeast/Southwest will experience enhanced wind speeds, especially on the West and South sides of the fire.

**FIRE BEHAVIOR:** Increased winds will push the fire along aligned ridges and drainages. On ridgetop locations after 1500, expect FL of 14ft and ROS of 60ch/hr in brush and FL of 5-8ft and ROS of 10-12ch/hr in timber fuels. Crown fire potential is also elevated as ladder fuel is present in most timber stands.

**Probability of Ignition:** 90% in clear air.      **Spotting Distance:** .4 mile from ridgetop locations.

**BRANCH 9 - DIV YY:** Burn and holding operations will be tested today as winds shift to the North. Long range spotting is possible from torching trees near the ridge tops. Fire perimeter will catch any fire driven to the East or South.

**DIV ZZ:** Forecast winds will not be a factor for holding as fire perimeters are present in the area. Slope runs out of Campbell Creek are toward DP-30 are possible.

**DIV AA:** Continued backing and flanking into Dog Creek today. Winds will be favorable for holding along Dog Creek Rd until late afternoon. Some West wind influence is possible as wind direction swings from Southwest to more Northerly.

**BRANCH 7 – DIV DD:** Condition for containment and holding will be favorable until late in the evening. The threat of fire moving onto the DIV from the North exists.

**DIV GG:** Fools Gulch, Watson Creek and Wildcat Peak are places fire can make slope runs to the South as wind rotates to the North. Spotting from ridgetop locations is possible. Fire moving South has several drainages to follow with fuels capable of group torching.

**DIV JJ:** After inversion lifts, fire will continue to move North through patchy fuels. Conditions will be favorable for containment and holding as wind rotates North.

**BRANCH 8 - DIV MM:** After inversion lifts, fire will continue to move North through patchy fuels. Conditions will be favorable for containment and holding as wind rotates North.

**DIV PP/TT:** Firing and holding operations will be challenged during the afternoon hours. Conditions will be more favorable as wind moves past the Northwest direction. Low humidity well after dark will expand the burn period.

**DIV WW:** Burn window will be difficult to forecast as the interaction of upper level dry air and moist air of the Sacramento River drainage interact. Lower portions of the DIV will be mostly protected from general winds but dry air will be present.

**Hirz Fire:** Threat of spread from the fires edge remains low. Winds will affect areas of the fire that are in rehab mode. Monitor conditions and have an escape plan in place.

## AIR OPERATIONS

Air operations will be hampered by inversion in the morning. Most areas will experience clearing by late afternoon.

## SAFETY

\*\* Dry and windy conditions will lengthen burn periods. Expect to transition to more aggressive fire behavior sooner in the burn period and persist longer into the evening \*\*

# FIRE WEATHER FORECAST

FORECAST NO. 35

NAME OF FIRE: Hirz & Delta Fires

TIME AND DATE

FORECAST ISSUED: 1930 Monday 09/10/18

PREDICTION FOR: Tuesday September 11th, 2018

SIGNED: Gary Zell  
Gary Zell / Incident Meteorologist

**\*\*\*RED FLAG WARNING IN EFFECT FROM 1300 TODAY THROUGH 0800 WEDNESDAY FOR STRONG AND GUSTY WINDS AND LOW RELATIVE HUMIDITY LEVELS\*\*\***

**WEATHER DISCUSSION:** A storm system entering the Pacific Northwest will result in stronger winds through Wednesday morning, especially between mid-slope and ridgetop levels. Terrain driven winds are expected below mid-slope locations except where the drainages align with the general wind flow direction. Temperatures will be a couple of degrees cooler today, but humidity levels will be similar to the last couple of days. The storm system will then drop south along the Pacific Coast Wednesday, with moderating relative humidity levels and cooler temperatures. Wind speeds will remain elevated on Wednesday, but will stay below critical thresholds.

**STANDARD OPERATING PROCEDURES—FINANCE SECTION**  
**“How to Earn an Honest Day’s Pay for an Honest Day’s Work”**  
**YOU ARE ENTITLED TO ACTUAL HOURS WORKED!!**

---

**WORK REST CYCLE**

IT IS NATIONAL DIRECTION TO MEET A 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work.. Every effort shall be made to manage work hours so you don’t exceed the maximum of 16 hrs. Work hours exceeding 16 hrs shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person’s responsibility to comply with this direction to manage for fatigue and safety.

**OPERATIONAL SHIFTS**

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

**DUTY STATUS**

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

**PERSONNEL/EQUIPMENT TIME REPORTING**

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

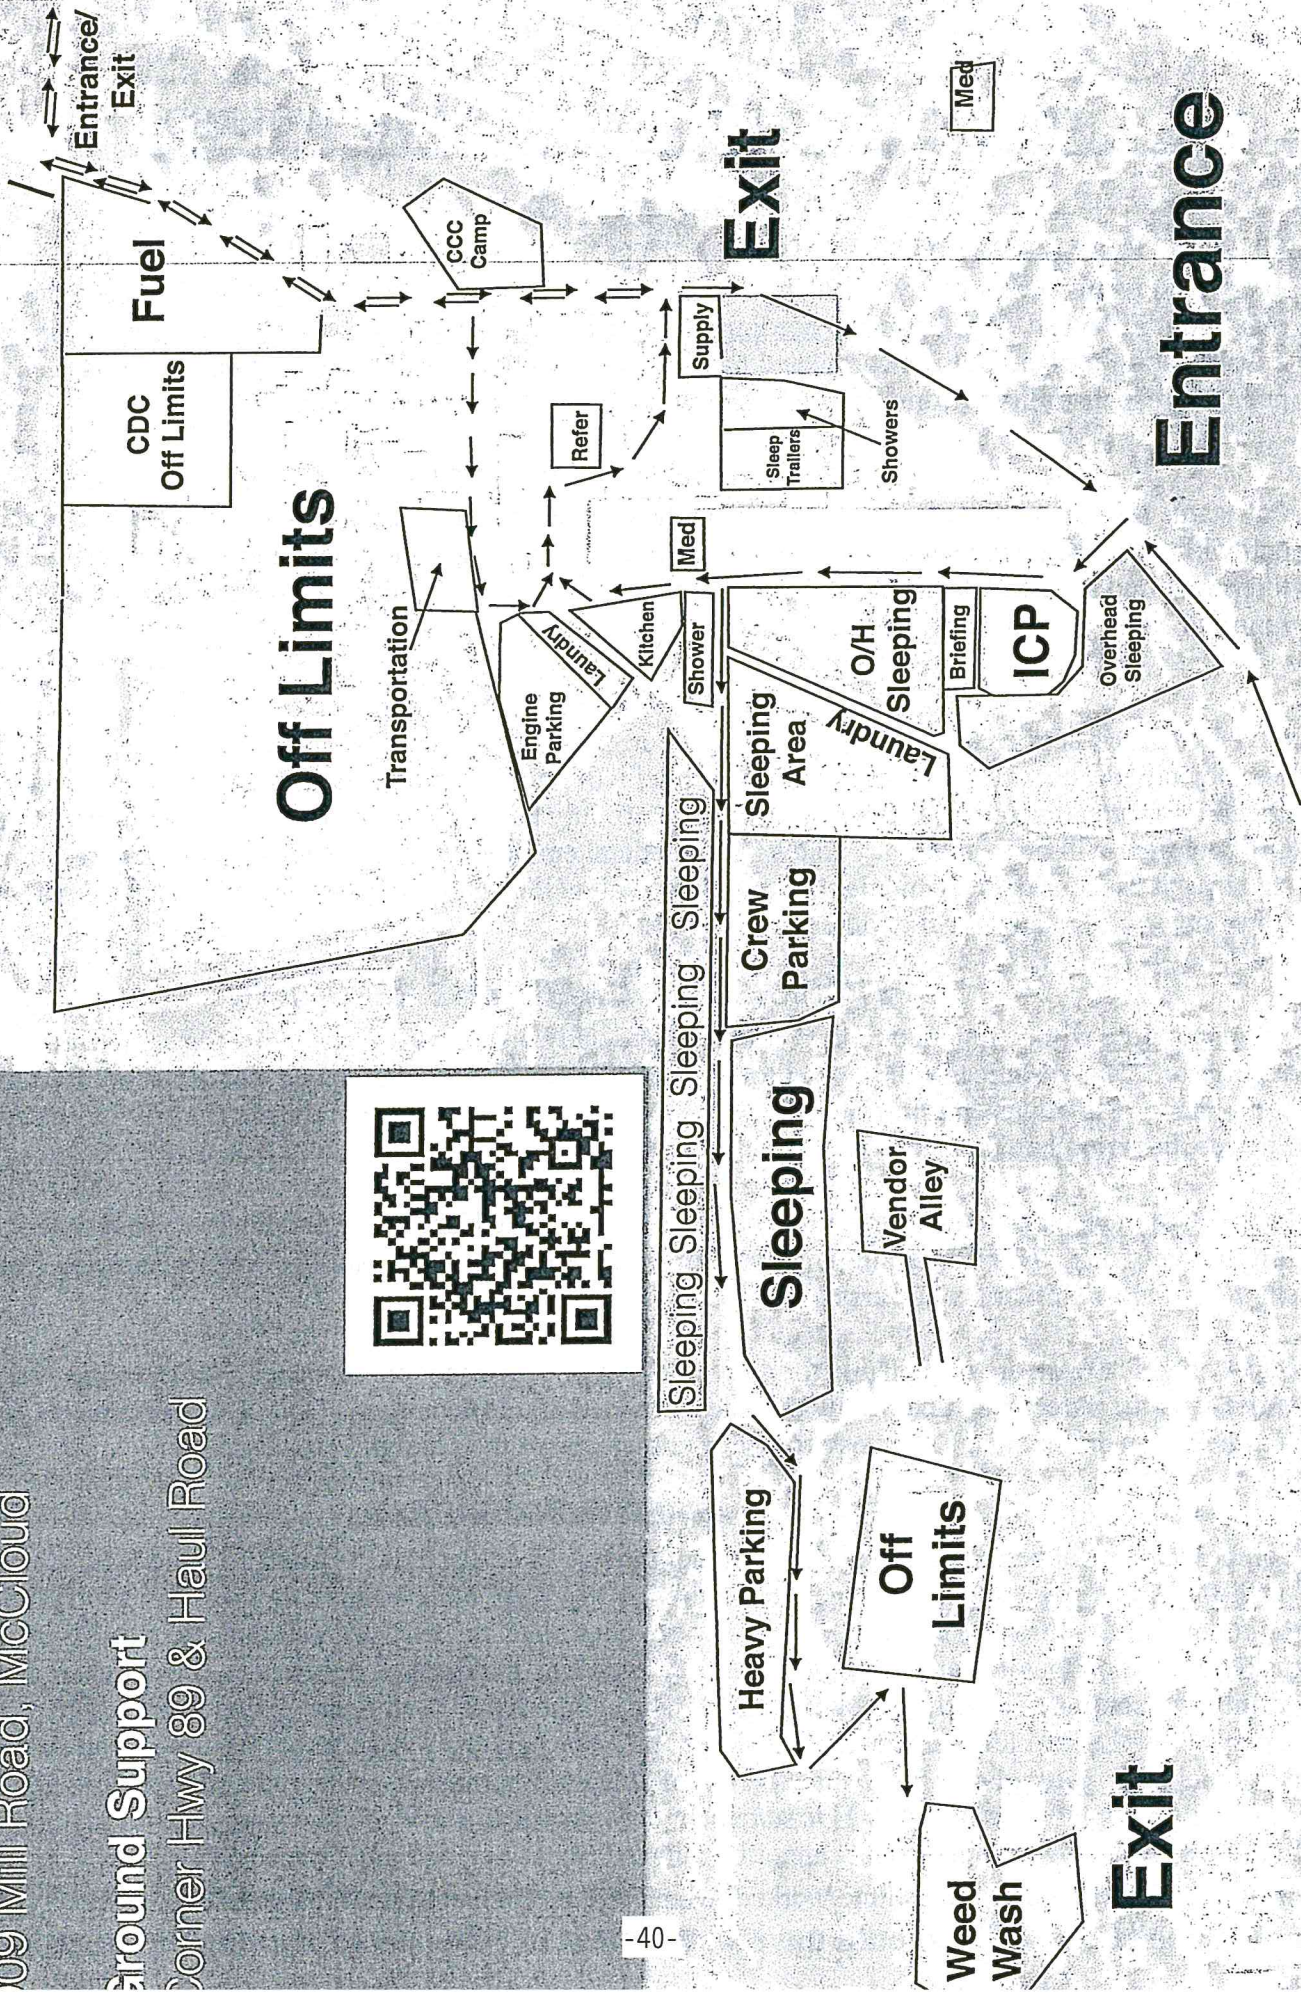

Supervisor’s - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

**MEAL AND OTHER WORK BREAKS**

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fireline **MAY BE** compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For **personnel in support positions**, and fireline personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. This statement does not mean you don’t show all meal breaks if taken. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If meal breaks are NOT able to be taken, CTR should have a sta<sup>-39</sup>-ment in remarks explaining the situation.**
