WEATHER DISCUSSION...The main point for this evening will be gusty winds persisting well into the evening with only modest relative humidity recoveries. Winds will gradually die down after 2200 and especially after midnight. Temperatures will be similar to last night with 40s to 50s across the fire. On Sunday, winds will be lighter than today, but remain warm and dry. By Sunday night, rather poor relative humidity recovery is expected for the ridges through Monday morning. Temperatures will also be warmer, especially across the ridgetops. Heading into next week, the warming and drying trend will continue with the typical afternoon and overnight wind patterns.

TONIGHT...

Sky/weather.....Mostly Clear. Patchy smoke. Inversion develops after 0100.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 57	TYPE OF FIRE: Wildfire
FIRE NAME: Hirz/Delta	OPERATIONAL PERIOD: September 15, 2018, Night
DATE ISSUED: September 15, 2018	TIME ISSUED: 1030
UNIT: Shasta-Trinity NF, McCloud RD	SIGNED:  Robert Scott, FBAN 530.990.4048 Kelly Allen FBAN

INPUTS

WEATHER SUMMARY

** See Fire Weather Forecast **

Weather: Mostly clear. Patchy smoke. Weak inversion develops after 0100.
Min Temps: 49-54 ridges, 44-49 lower drainages
Max RH: 44-49% ridges. 53-58% lower drainages.
20 FOOT WINDS: Ridges: South Southwest 10-15 mph with gusts to 25 mph through 2200 diminishing to 7-12 mph by 2400 and 3-7 mph overnight.
Slope/valley: Upslope 3-7 mph becoming downslope 3-6 mph after 2200

FIRE BEHAVIOR

INPUTS:

- **Fuels:** Fine fuels will be available longer into the burn period, allowing the fire to be more active until late evening.
- **Topography:** Topography may cause smoke to stay in the drainages, even those aligned with the SSW predicted wind direction and speed.

FIRE BEHAVIOR: Good night time humidity late into the shift will keep fire behavior mainly to the heavy concentrations of fuel under the thickest canopies. Some fuel and terrain driven fire spread will be seen early in the shift. Expect FL 5-8 ft. and ROS 12-16ch/hr. in brush and FL 2-6 ft. and ROS 4-7ch/hr. in timber. Behavior will moderate as humidity increases and a weak inversion develops after 0100.

Probability of Ignition: 20%

BRANCH 9-DIV YY: Best opportunity to complete burn operations is early in the shift before humidity reaches 50% around 2400. Higher humidity and weak inversion will aid in holding and mopping up. Jackpots of fuel will continue to burn out.

DIV AA/ZZ: Holding operations will be good as interior islands continue to burn out.

DIV CC: Firing operations around Damnation Pk., will be successful until 2400-0100 when humidity increases above 50%. Holding operations will be more effective as humidity continues to increase and inversion builds in. Interior pockets will continue to consume.

BRANCH 7-DIV MM: Little threat of spread. Fire has held in the scattered pockets of fuel.

BRANCH 4-DIV DD/GG/JJ Scattered pockets in the heavier fuels along the fire line still have heat. Little threat of spread.

BRANCH 8 DIV PP/TT: Holding operations will be favorable, aided by increased humidity and inversion. Any spots will have low spread rates.

DIV WW: Holding operations will be good as concentrations of heavy fuels/interior islands burn out in Shotgun Cr.

Hirz Fire: Little threat of perimeter spread.

AIR OPERATIONS

Air operations may be impacted by smoke until sunset at 1920

SAFETY

**Common denominator of Fatality fires: In relatively light fuels such as grass and light brush **

Delta Fire – Safety Message

INCIDENT # CA-SHF-001444

DATE: 09/15/18

TIME: 1800 – 0600 Night Shift

“SAFETY is a CORE VALUE to be integrated into ALL incident activities”

COMMUNICATION RESPONSIBILITIES

All firefighters have *five* communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

Leadership

All leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated “Leader’s Intent.”

- **Task** = **What** is to be done
- **Purpose** = **Why** it is to be done
- **End State** = How it should **look** when done

Mop-Up Operations

Balance the risk of exposure to hazards against the mop-up objective potentially achieved.

- Evaluate areas for hazard trees and locate stump holes for avoidance.
- Monitor fatigue; shorten shifts to increase rest where appropriate.
- Provide motivation to workers to maintain situational awareness and avoid complacency.
- Evaluate mop up distances against what is safe and necessary.
- Review and follow “Look Up, Look Down, Look Around” procedures (IRPG p. 3-4).

Driving

- When driving, keep speed at or **below** the posted speed limit.
- Drive defensively! Expect the unexpected around every curve.
- Watch out for debris and wildlife on the roads.
- Don't tail gate, keep a safe distance between vehicles on dirt roads.
- Always fasten your seat belt before the vehicle is set into motion.
- Use a “Backer” when backing your vehicle. Do a walk around if a “Backer” is not available

Prepared by,
Team 4 Safety Group

INCIDENT RISK ANALYSIS

(ICS 215a) Night Shift

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Traffic volume is high. I-5 is open Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22-23). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & Communicate your exit strategy, with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	COMPLEX AVIATION OPERATIONS	<ul style="list-style-type: none"> Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. Ensure coordination and communication are in place and understood by all involved resources in a mission. Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	STEEP TERRAIN & ROLLING MATERIAL	<ul style="list-style-type: none"> Avoid working below crews and equipment. Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around Frequently.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	POWERLINES / UTILITIES	<ul style="list-style-type: none"> Notify all personnel of down electrical lines. IRPG Page 24 -- Take time to do a Tailgate Safety Briefing Always treat downed wires as energized. Avoid parking under any type of overhead lines. Identify all gas lines in and around structures. Report damaged service lines.
ALL	SMOKE	<ul style="list-style-type: none"> Periodically rotate crews out of smoky conditions on line when possible. Locate spike camps above inversion if possible. Monitor crew's health. Get medical care for early signs of respiratory illness. Provide rest breaks; have crews get as much sleep as possible; hydrate!
ALL	ATV / UTV	<p>From the Red Book: FS-UTV Helmet (for fire use) Helmets must have Snell SA certification. Wearing hardhats while driving or riding on a UTV is not allowed. Forest Service Policy provides no exception to the helmet requirement for low speeds, smooth travel surfaces, or administration use (FSH 6709.11. Chapter 10).</p>

CERTAIN STANDARDS OF CONDUCT

The first day Team 4 assumed command of this incident there was notice in the IAP that spelled out the expectations of everyone on this incident.

The expectations given were that there would be **“ZERO TOLERANCE”** of careless, illegal, inappropriate and unsafe actions.

These are certain standards of conduct we as professional adults know are not acceptable in the workplace. It is conduct that really doesn't have to be written as a specific rule or specifically prohibited by signage or otherwise. You all should know what is not acceptable conduct.

I just wanted to give you a reminder of the camp expectations to give you every opportunity to **do the right thing**.
