INCIDENT ACTION PLAN

DELTA FIRE

CA-SHF-001444 / P5L4L8 (0514)

HIRZ FIRE

CA-SHF-001223 / P5L2ZM (0514)

NIGHT OPERATIONAL PERIOD

SUNDAY-MONDAY
SEPTEMBER 16-17, 2018
1800-0600 HOURS

DELTA

HIRZ

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: NIGHT	
HIRZ / DELTA		Date/Time From: 09/16/2018 1800 SUN	Date/Time To: 09/17/2018 0600 MON
3. Objective(s):			
Leader's Intent			
A full suppression strategy will be implemented for both the Hirz and Delta fires through a combination of direct and indirect tactics. Efforts will be made to minimize impacts to residences, critical infrastructure and private timberlands through the application of well-planned tactical responses.			
Management Objectives			
<ul style="list-style-type: none"> • Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles. • Minimize the threat to private property, critical infrastructure, and commercial timberlands while working with the READs to reduce impacts to cultural and sensitive sites. • Establish and strengthen cooperators, partner, and stakeholder relationships. • All suppression repair work will be conducted in close coordination with assigned READs. 			
Control Objectives			
DELTA FIRE			
KEEP FIRE:			
<ul style="list-style-type: none"> • North of Dog Creek Road / Forest Road 21 (west side of I-5) to minimize impacts to I-5 and protect the communities of Pollock, Lakehead, and Lakeshore. • South of Middle Ridge (west side of I-5) to protect private timberlands. • South of Hazel Creek Road (east side of I-5) to minimize threat to communities and residences along I-5 corridor. • East of the Trinity River to minimize impacts to Highway 3 and protect recreational sites. • West of Crane Mountain to halt eastern spread. 			
HIRZ FIRE			
<ul style="list-style-type: none"> • Continue to mop-up and patrol as needed to ensure the fire stays within existing containment lines. • Continue suppression repair per the approved Suppression Repair Plan. 			
4. Operational Period Command Emphasis:			
AVOID TARGET FIXATION			
Priorities			
#1 - Division YY			
#2 - Division CC			
General Situational Awareness:			
-Success is not final, failure is not fatal: It is the courage to continue that counts.			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located at:

Facilities Unit	Rob Griffith / Craig Zimmermann (T)		
Ground Support Unit	Jeff Burch / Ron Brewer		
Communications Unit	Sal Bonilla Jr. / Tim McGuire / Kevin Janes		
Food Unit	Mike Chapman / Whitney Bonada		
Medical Unit	Eric Williams / Jeff Brooks (T)		

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 59	TYPE OF FIRE: Wildfire
FIRE NAME: Hirz/Delta	OPERATIONAL PERIOD: September 16, 2018, Night
DATE ISSUED: September 16, 2018	TIME ISSUED: 1030
UNIT: Shasta-Trinity NF, McCloud RD	SIGNED:  Robert Scott, FBAN 530.990.4048

INPUTS

WEATHER SUMMARY

****See Fire Weather Forecast****

Weather: Mostly clear, then becoming partly cloudy late. Patchy smoke. Inversion develops after 2100.
Min Temps: 50-55 ridgetops, 44-49 lower drainages.
Max RH: 44-49 percent ridges and 60-65 percent lower drainages.
20 FOOT WINDS: **Ridges:** South Southwest 4-9 mph with gusts to 17 mph through 2100 then becoming North 3-8 mph with gusts to 15.
Slope/valley: Upslope 3-7 mph becoming downslope 3-6 mph after 2100

FIRE BEHAVIOR

INPUTS:

- **Fuels:** Fuel moistures are near averages for this time of year. The exception is 1000hr fuels that are at the 90th percentile.
- **Topography:** Inversions will return tonight Topography may cause smoke to stay in the drainages, even those aligned with the SSW predicted wind direction and speed.

FIRE BEHAVIOR: Moderate humidity recovery tonight. Conditions for firing will remain favorable into the early morning hours at higher elevations. Drainage bottoms will see degraded firing conditions around 0100. Expect FL 5-8 ft. and ROS 12-25 ch/hr. in brush and FL 2-5 ft. and ROS 3-6ch/hr. in timber.

Probability of Ignition: 30%

BRANCH 9-DIV YY: Best opportunity to complete burn operations is early in the shift before humidity reaches 50% around 2300. Higher humidity and weak inversion will aid in holding and mopping up. Jackpots of fuel will continue to burn out.

DIV AA/ZZ/ CC: Continued burn down along Sanford Pass Road and into Wild Bill Gulch. Conditions for firing should remain favorable throughout the night.

BRANCH 4-DIV DD/GG Some heat remains near the DD/CC break. Little threat of spread.

BRANCH 7-DIV JJ/MM: Little threat of spread. Fire has held in the scattered pockets of fuel.

BRANCH 8 DIV PP/TT: Upper areas of DIV will remain above moisture of extinction. Active fire in heavier pockets of fuel. Any spots will have low spread rates.

DIV WW: Humidity recovery will be good this evening. Threat of spots in low.

Hirz Fire: Little threat of perimeter spread.

AIR OPERATIONS

Air operations may be impacted by smoke until sunset at 1917

SAFETY

**** Mop up to a distance commensurate with threat to containment line. ****

Delta Fire – Safety Message

INCIDENT # CA-SHF-001444

DATE: 09/16/18

TIME: 1800 – 0600 Night Shift

“SAFETY is a CORE VALUE to be integrated into ALL incident activities”

NIGHT OPERATIONS AND TACTICAL PATROL

There are a few “Watchout Situations” and other factors to remember during night operations.

- In country not seen during the day.
- On a hill side where rolling material can ignite fuel below.
- Wind can increase and/or change direction.
- Dust and darkness can obstruct view while driving, slow down.

Leaders Set The Example

All leaders of firefighters have the responsibility to provide a model their subordinates will emulate and follow. You should:

- Share the hazards and hardships with your subordinates.
- A positive attitude is infectious.
- Don't show discouragement when facing setbacks.
- Choose the difficult right over the easy wrong.
- Provide “Leaders Intent”.

End of Assignment Watch-Outs

- Not mentally engaged in the task at hand
- You or your driver are driving faster than when you arrived
- Not giving good, thorough briefings
- Your hardhat and web gear are still on the truck
- Assuming all is good because you worked this piece of ground yesterday
- All the conversations are around what you're going to do when you get home
- You and your folks are tripping and stumbling more than usual
- It's taking you longer to get out of camp

Hazard Tree Indicators

- Tree burning for any period of time.
- High risk tree species (rot and shallow roots).
- Numerous downed trees.
- Dead, broken, or burning tops and limbs overhead.
- Accumulation of needles, bark, or limbs.
- Leaning or hung-up trees.

Eliminate the hazards with qualified sawyers and modify suppression tactics or fireline location to avoid high risk areas. Always provide timely feedback to others regarding any hazard trees.

Prepared by,

Team 4 Safety Group

INCIDENT RISK ANALYSIS

(ICS 215a) Night Shift

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Traffic volume is high. I-5 is open Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22-23). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	STEEP TERRAIN & ROLLING MATERIAL	<ul style="list-style-type: none"> Avoid working below crews and equipment. Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around Frequently.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AVIATION OPERATIONS	<ul style="list-style-type: none"> Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. Ensure coordination and communication are in place and understood by all involved resources in a mission. Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	POWERLINES / UTILITIES	<ul style="list-style-type: none"> Notify all personnel of down electrical lines. IRPG Page 24 -- Take time to do a Tailgate Safety Briefing Always treat downed wires as energized. Avoid parking under any type of overhead lines. Identify all gas lines in and around structures. Report damaged service lines.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & Communicate your exit strategy, with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	END OF ASSIGNMENT WATCH - OUTS	<ul style="list-style-type: none"> Not mentally engaged in the task at hand. You or your driver are driving faster than when you arrived. Not giving good, thorough briefings. Your hardhat and web gear are still on the truck. Assuming all is good because you worked this piece of ground yesterday. All conversations are around what you're going to do when you get home. You and your folks are tripping and stumbling more than usual. It's taking longer to get out of camp.
INCIDENT NAME: Delta Fire		Operational Period: 1800 – 0600 September 16, 2018
		

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES)	Federal	Contractor	Local Government
Patient Assessment:	Age:	Weight:	Chief Complaint:
Skin Signs: (color/moisture/temp)	Level of Consciousness:	BP:	HR: Respirations:
Treatment:			

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards)	Patient's ETA to Location:
--	----------------------------

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***

INCIDENT REPLACEMENT POLICY & PROCESS

Prior to release from the incident, personnel may request replacement of equipment and supplies that were damaged, lost, or consumed during the incident. There is a distinct difference in the process to replace cache equipment and supplies and non-cache or specialized equipment. Damaged property **will be turned into the Supply Unit** prior to an Incident Replacement Requisition being approved.

Replacement of cache equipment is documented on a 213 General Message form and filled at the Supply Unit or approved for replacement at the home unit. Approval for replacement of non-standard cache items has been delegated to the IC, Finance Section Chief and IBA. You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request and circumstances on a 213 General Message signed by your Incident Supervisor. The lost or damaged item(s) will then be taken to either, Supply, Communications or Ground Support for inspection and recommendation for replacement or repair. Bring the completed form to COMP/CLAIMS who will review the request and forward it to the FSC. The IC/FSC will make a decision as to whether or not the items can be replaced or repaired with incident funds.

Items originally purchased through use of preparedness funds which need to be replaced due to normal wear and tear should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, e.g. wind event destroys tent, items are burned over or caused by actions where there is no negligence, the incident could, upon receipt of required documentation and proof of damage, authorize replacement using the Incident Replacement Requisition.

In some cases, the cache replacement is not acceptable on some specialty items (e.g. sleeping bag or specialty packs). These items may be replaced with no more than "cache" quality and cost. The IBA or FSC must approve these requests.

If your request is approved, provide the approval and support documentation to Ordering or Supply for issuing an "S" number.

Please feel free to visit Comp/Claims Unit Leader Scott Parsons or myself if you have any questions.

Sherri Bennett, CIIMT 4, Finance Section Chief

DELTA FIRE
Human Resource Message
September 16, 2018

C E R T A I N S T A N D A R D S O F C O N D U C T

The first day Team 4 assumed command of this incident there was notice in the IAP that spelled out the expectations of everyone on this incident.

The expectations given were that there would be **“ZERO TOLERANCE”** of careless, illegal, inappropriate and unsafe actions.

These are certain standards of conduct we as professional adults know are not acceptable in the workplace. It is conduct that really doesn't have to be written as a specific rule or specifically prohibited by signage or otherwise. You all should know what is not acceptable conduct.

I just wanted to give you a reminder of the camp expectations to give you every opportunity to **do the right thing**.

Adam Alvarez, HRSP - 707-373-8715
