FIRE WEATHER FORECAST

CORECAST NO. 47

NAME OF FIRE: Hirz & Delta Fires

UNIT: Shasta Trinity National Forest

TIME AND DATE

FORECAST ISSUED: 1930 Sunday 09/16/18

PREDICTION FOR: Monday September 17th, 2018

SIGNED: Levery Michael

Jeremy Michael / Incident Meteorologist

<u>WEATHER DISCUSSION:</u> Temperatures will be slightly warmer and drier compared to Sunday as the warming trend is expected to persist into Tuesday. A weak trough will pass through the area, briefly holding temperatures and humidity values steady into Wednesday, before the warming and drying trend returns Thursday and Friday. The typical ridgetop wind pattern will continue tonight, with south to southwest winds in the evening switching around from the north overnight. Terrain driven winds will occur below ridgetop locations.

TODAY
Sky/weatherPartly cloudy. Patchy smoke. Inversion breaks around 1000.
Max temperature70-75 ridgetops and 78-83 lower drainages.
Min humidity19-24 percent ridges and 16-21 percent lower drainages. Wind (20 ft)
Slope/valleyDownslope/Downvalley 3 to 6 mph until 1000, then
upslope/upvalley 3 to 7 mph. RidgetopNorth 3 to 7 mph until 1000, then becoming South 5 to 10 mph with gusts to 18 mph.
Mixing height6,000 to 8,000 ft AGL.
Transport windsNorth 5 mph until 1000, then South 9 mph.
CWR0 percent.
LAL1.
TOMOUT
TONIGHT Sky/weatherPartly cloudy. Patchy smoke. Inversion develops after 2100. Min temperature51-56 ridgetops, 45-50 lower drainages. Max humidity45-50 percent ridges and 60-65 percent lower drainages.
Wind (20 ft)
Slope/valleyUpslope 3-7 mph becoming downslope 3-6 mph after 2100. RidgetopSouth-Southwest 5 to 10 mph with gusts to 18 mph until 2100, then becoming North 3 to 8 mph with gusts to 15 mph.
Mixing heightLowering to around 2200 ft AGL.
Transport windsSouth-Southwest 9 mph until 2100, then North 4 mph.
CWR0 percent. LAL1.
LALICO CONTRACTOR CONT
TUESDAY
Sky/weatherPartly cloudy, increasing clouds late in the day. Patchy smoke. Inversion breaks around 1000.
Max temperature71-76 ridgetops and 80-85 lower drainages.
Min humidity20-25 percent ridges and 17-22 percent lower drainages.
Wind (20 ft)
Slope/valleyDownslope/Downvalley 3 to 6 mph until 1000, then upslope/upvalley 3 to 7 mph.
RidgetopNorth 3 to 7 mph until 1000, then becoming Southwest
4 to 9 mph with gusts to 17 mph.
Mixing height8,000 to 10,000 ft AGL. Transport windsNorth 4 mph until 1000, then Southwest 7 mph.
CWR percent.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 60 TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: September 17, 2018 Day/Night FIRE NAME: Hirz/Delta DATE ISSUED: September 16, 2018 TIME ISSUED: 2030 UNIT: Shasta-Trinity NF, McCloud RD SIGNED: 1/1C Q Robert Scott, FBAN 530.990.4048

INPUTS

WEATHER SUMMARY

See Fire Weather Forecast for Discussion

Weather:

Day: Partly cloudy. Patchy smoke. Inversion breaks around 1000. Night: Partly cloudy. Patchy

smoke. Inversion develop after 2100.

Day/Night RH:

Day/Night Temps: 70-75 ridgetops and 78-83 lower drainages then 51-56 ridgetops, 45-50 lower drainages. 19-24 percent ridges and 16-21 percent lower drainages then 40-45 percent ridges and 59-64

percent lower drainages.

20 FOOT WINDS: Day/Night Ridges: North 3 to 7 mph until 1000, then becoming South 5 to 10 mph with gusts to 18

mph then South-Southwest 5 to 10 mph with gusts to 18 mph until 2100, then becoming North 3 to 8

mph with gusts to 15 mph.

Slope/valley: Downslope/Downvalley 3 to 6 mph until 1000, then upslope/upvalley 3 to 7 mph then

Upslope 3-7 mph becoming downslope 3-6 mph after 2100.

FIRE BEHAVIOR

INPUTS:

Fuels: Fuel moistures are near averages for this time of year. The exception is 1000hr fuels that are at the 90th percentile. Underburned fuel inside containment line will quickly transition to group torching.

Topography: Fire is running out of run to move. Movement will be localized to remain pockets of fuel inside of control lines.

FIRE BEHAVIOR: Mop up is reducing the chance of spots via embers. Roll out will remain the prominent method of fire spread and slop overs. Where present, pockets of interior surface fuel and brush will continue to consume. During the hottest part of the day, 1530-1730, Expect FL of 11ft and ROS of 35ch/hr in brush and FL of 3-6ft and ROS of 8ch/hr in timber fuels.

Probability of Ignition: 80% in clear air.

Spotting Distance: .2 mile from ridgetop locations.

Day: BRANCH 9 - DIV PP/TT: Potential for slope runs up to Middle Ridge remains. Broken surface fuels on the reverse slope will slow spread.

DIV WW/YY: Torching remains possible on Southern slopes. Pockets of unburned fuels could produce active fire behavior.

DIV ZZ/AA/CC: Only isolated areas of heat remain. Rollout from areas above the line remains possible. Firing operations in Lunch Gulch will have favorable wind after 1000.

BRANCH 4 - DIV DD/GG: Except for the area near the CC/DD break, few areas of heat remain along the line. Rollout remains possible.

DIV JJ/MM: Torching near ridges could produce spots during the hottest part of the day.

Hirz Fire: Threat of spread from the fires edge remains low. Remaining hot spots have very little fuel to run.

Night: North - DIV PP/TT/WW/YY: Forecast north winds at upper elevations will aid holding. Humidity recover will be near moisture of extinction at lower elevations. Little threat of escape or spots.

South - DIV ZZ/AA/CC: Winds will switch to the North around 2100 with moderate humidity recovery. Fire will remain active into the morning hours. Lower elevations will experience humidity near the moisture of extinction. Little threat of escape or spots.

AIR OPERATIONS

Clear to moderate conditions with little smoke impact.

SAFETY

** Moderate fire behavior conditions still exist. Fire will respond to light fuels and slope will upslope runs. **

6. Control Operations/Work Assig	nments:						

- - Conduct suppression repair activities on dozerlines, handlines, and roads.
 - Refer to the Suppression Repair Plan for objectives and specifications.

7. Special Instructions:

ICS 204 WF (1/14)

Coordinate with READs to identify suppression repair needs.

WTT1 Scott Valley & 268 9/27 Nick Kraus Z HEBB 0-119 9/25 Arry Shaver

Delta Fire - Safety Message

INCIDENT # CA-SHF-001444

DATE: **09/17/18-9/18/18**

TIME: 0600 - 0600

Day / Night Shift

Fight Complacency

- Leadership's responsibility to initiate.
- Stay mentally engaged on the task at hand.
- Address complacency in your daily AAR, implement training evolutions.
- Promote good discussions (training, situation awareness, tasks and tactics).
- Clearly identify the day's mission and purpose.
- Use the "Buddy System" and watch out for each other. If you see something, say something.
- Ask yourself: "Are you or your crew doing the job safely, the way you were trained?"
 " Can we do a better job?
- Look for a "new" or "fresh" approach to repetitive assignments and possible future trainings.

Hazardous Tree Felling

- Establish cut/no cut criteria.
- Risk assessment.
- Situational awareness checklist.
- Secure area.
- Relocate work area.
- Role/responsibility of swamper/lookout.
- Use of warning devices.
- Escape route.
- Weak/split top, Limb location, condition, density, and hidden defects.
- Absence of needles, leaves, bark, or limbs.
- Leaning or hung-up trees.

Ash Pit Hazards

- Extensive root systems of trees.
- Deep duff or peat layers.
- Brush, sawdust, decking piles.
- Rodent holes.
- Indicators- insects swarming or hovering, translucent smokes, smell.
- Identify high risk locations.
- Identify and flag ash pit hazards.
- White ash circles.

Prepared by,

Team 4 Safety Group

(ICS 215a) Day - Night Shift

		MANAGER
	Incident Name: Delta Fire	Operational Period: 0600 - 0600 September 17-18, 2018
ALL	WATCH - OUTS	 Not giving good, thorough briefings. Your hardhat and web gear are still on the truck. Assuming all is good because you worked this piece of ground yesterday. All conversations are around what you're going to do when you get home. You and your folks are tripping and stumbling more than usual. It's taking longer to get out of camp.
ALL		equipment. Ensure all personnel are aware of firing operation that may affect them. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed. Not mentally engaged in the task at hand. You or your driver are driving faster than when you arrived.
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & Communicate your exit strategy, with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications. Only personnel trained in the use of each device will be authorized to use firing
ALL	POWERLINES / UTILITIES	 Notify all personnel of down electrical lines. IRPG Page 24 Take time to do a Tailgate Safety Briefing Always treat downed wires as energized. Avoid parking under any type of overhead lines. Identify all gas lines in and around structures. Report damaged service lines.
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	AVIATION OPERATIONS	 Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. Ensure coordination and communication are in place and understood by all involved resources in a mission. Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	FATIGUE / COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	STEEP TERRAIN & ROLLING MATERIAL	 Avoid working below crews and equipment. Concentrate on your footing placement; take your time. Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around Frequently.
ALL	HEAVY EQUIPMENT OPERATIONS	Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light sticks being the minimum.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22-23). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	AND DRIVING	 Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS TRAFFIC HAZARDS	MITIGATIONS / WARNINGS / REMEDIES Practice "Defensive Driving" techniques. Traffic volume is high. I-5 is open Use spotters when backing.

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

INCIDENT REPLACEMENT POLICY & PROCESS

<u>Prior to release</u> from the incident, personnel may request replacement of equipment and supplies that were damaged, lost, or consumed during the incident. There is a distinct difference in the process to replace cache equipment and supplies and non-cache or specialized equipment. Damaged property **will be turned into the Supply Unit** prior to an Incident Replacement Requisition being approved.

Replacement of cache equipment is documented on a 213 General Message form and filled at the Supply Unit or approved for replacement at the home unit. Approval for replacement of non-standard cache items has been delegated to the IC, Finance Section Chief and IBA. You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request and circumstances on a 213 General Message signed by your Incident Supervisor. The lost or damaged item(s) will then be taken to either, Supply, Communications or Ground Support for inspection and recommendation for replacement or repair. Bring the completed form to COMP/CLAIMS who will review the request and forward it to the FSC. The IC/FSC will make a decision as to whether or not the items can be replaced or repaired with incident funds.

Items originally purchased through use of preparedness funds which need to be replaced due to normal wear and tear should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, e.g. wind event destroys tent, items are burned over or caused by actions where there is no negligence, the incident could, upon receipt of required documentation and proof of damage, authorize replacement using the Incident Replacement Requisition.

In some cases, the cache replacement is not acceptable on some specialty items (e.g. sleeping bag or specialty packs). These items may be replaced with no more than "cache" quality and cost. The IBA or FSC must approve these requests.

If your request is approved, provide the approval and support documentation to Ordering or Supply for issuing an "S" number.

Please feel free to visit Comp/Claims Unit Leader Scott Parsons or myself if you have any questions.

Sherri Bennett, CIIMT 4, Finance Section Chief

DELTA FIRE Human Resource Message September 17, 2018

COMMUNICATION

- Communication is a two way street.
- Many disputes arise from miscommunication which lead to misunderstandings.
- You need to listen to hear what is being said, and take the time to clarify when you are not sure what is being communicated.
- Let the other person finish their thought without interruption. This demonstrates dignity and respect towards the person you are conversing with.
- Whatever it is, clear the communication lines in a respectful manner to make sure you're on the same page.
- Common curtesy and basic manners when communicating aid in eliminating miscommunication that may led to disputes.

COMMUNICATION WAS SURE YOU TALK TWO-WAY STREET

Adam Alvarez, HRSP - 707-373-8715

Delta-Hirz Fire Suppression Repair

Repair Objectives

- Minimize Surface and Gully Erosion
- Minimize Loss of Soil Productivity due to Erosion In Cleared Areas
- Repair Meadows and Wetlands Damaged By Suppression Activities
- Minimize Spread of Noxious Weed Infestations
- Minimize Excessive Side-Cast Fuels Along Roads
- Minimize Impacts to Inventoried Roadless Areas and Wild & Scenic River Corridors
- Repair Impacts to Cultural and Historic Resources
- Repair Damage to National Forest Roads and Trails Caused by Fire Suppression Activities
- Review by Agency READ/REAFs for On-Site Verification of Objectives Completed

Suppression Repair Focus

- Dozer Lines
- Hand Lines
- Roads and Trails
- Safety Zones and Staging Areas
- Drop Points
- Helispots
- Water Sources

Effective Waterbars

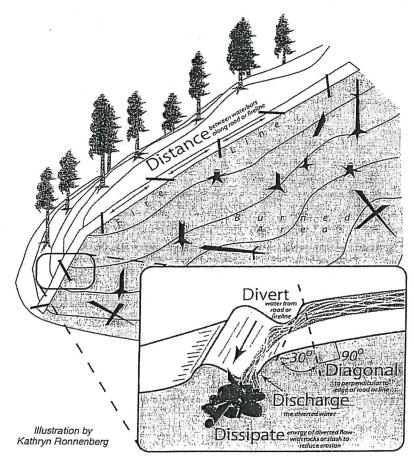

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %	4	Maximum Distance Apart <u>(feet)</u>
1 – 5		200
6 - 20		125
21 - 40		60
41 - 60		40
>60		25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.

Waterbars should be no more 2-3 feet tall on dozer lines to enable future access.

Stage 2 Suppression Repair Guidelines

(Apply to National Forest System Lands only on dozer lines with moderate to heavy suppression generated debris)

Applicable Suppression Repair Plan Objectives

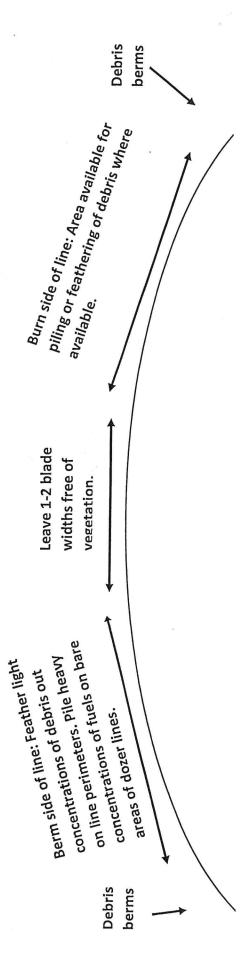

- Minimize loss of soil productivity due to potential erosion in cleared areas.
 - Minimize surface erosion.
- Minimize excessive side-cast fuels.

General Instructions

- Pile excessive amounts of suppression generated debris.
- Smaller concentrations of suppression generated debris can be feathered back into scraped side slope areas in order to breakdown fuel concentrations and reduce erosion.

Piling Specifications

- Piles should be located at least 10 feet away from tree boles and preferably out of the drip line of the canopy where possible.
 - If working in close or closed canopy piles should be built in a configuration that prevents excessive tree scorch (e.g. small piles, windrowed piles).
- If working in large openings on large dozer lines piles can be larger (e.g. 25x25 feet).
- Compress piles as much as possible to improve burn consumption.
- Piles should be clean (free of soil) to ensure adequate consumption during burning and reduced risk of escape in spring.
