FIRE WEATHER FORECAST

FORECAST NO. 49

NAME OF FIRE: <u>Hirz & Delta Fires</u>

UNIT: Shasta Trinity National Forest

TIME AND DATE

FORECAST ISSUED: 1900 Tuesday 09/18/18

PREDICTION FOR: Wednesday September 19th, 2018

SIGNED: Jenemy Michael

Jeremy Michael / Incident Meteorologist

A Fire Weather Watch for Gusty Winds and Poor RH Recoveries Wed Eve-Thu Aftn

<u>WEATHER DISCUSSION:</u> Today's weather will be noticeable different from previous days. Afternoon winds will remain out of the north and continue to be gusty. Temperatures increase slightly with humidity values across the fire in the teens. For tonight, northerly winds will strengthen, with poor relative humidity recovery. Therefore, critical fire weather conditions are likely. The poor humidity recovery and gusty winds will continue into Thursday afternoon. Aligned drainages, such as the Interstate 5 Corridor, will see higher gusts surfacing, especially along the mid-slopes. Thursday and Friday, will be our hottest and driest day with many valleys near 90 degrees and ridgetops in the 80s. By the weekend, temperatures begin to cool and relative humidity increases.

TODAY Sky/weatherMostly sunny in the afternoon. Inversion breaks around 1000. Max temperature74-79 ridgetops and 81-86 lower drainages. Min humidity15-20 percent ridges and 11-16 percent lower drainages. Wind (20 ft) Slope/valleyDownslope/Downvalley 3 to 6 mph until 1000, then upslope/upvalley 3 to 7 mph. RidgetopNorth 7 to 12 mph, gusts to 18 mph until 1000, increasing 9 to 14 mph with gusts to 25 mph during the afternoon. Mixing height7,000 to 9,000 ft AGL. Transport windsNorth 10 mph until 1000, then North-Northwest 15 mph. CWR0 percent. LAL1.
TONIGHT Sky/weatherPartly cloudy skies. Shallow inversion develops after 2100. Min temperature53-58 ridgetops, 49-54 lower drainages. Max humidity36-41 percent ridges and 48-53 percent lower drainages. Wind (20 ft) Slope/valleyUpslope 3-7 mph becoming downslope/downvalley 4-9 mph after 2200. Aligned drainages could see gusts to 20 mph. RidgetopNorth 9 to 14 mph with gusts to 25 mph until 2000, then increasing North 13 to 18 mph with gusts to 30 mph. Mixing heightLowering to around 1700 ft AGL. Transport windsNorth-Northwest 15 mph until 2000, increasing to North 20 mph. CWR0 percent. LAL1.
THURSDAY Sky/weatherPartly cloudy in the morning, becoming mostly sunny in the afternoon. Inversion breaks around 1000. Max temperature77-82 ridgetops and 87-92 lower drainages. Min humidity15-20 percent ridges and 9-14 percent lower drainages. Wind (20 ft) Slope/valleyDownslope/Downvalley 4 to 9 mph until 1000, then upslope/upvalley 2 to 5 mph. RidgetopNorth-Northeast 10 to 20 mph, gusts to 30 mph until 1100, decreasing to 7 to 12 mph, gusts to 20 mph in the afternoon. Mixing height7,000 to 9,000 ft AGL. Transport windsNorth 20 mph until 1100, decreasing to North-Northeast 12 mph. CWR0 percent. LAL1.

FIRE BEHAVIOR FORECAST										
FORECAST NUMBER: 62	TYPE OF FIRE: Wildfire									
FIRE NAME: Hirz/Delta	OPERATIONAL PERIOD: September 19, 2018 Day/Night									
DATE ISSUED: September 18, 2018	TIME ISSUED: 2030									
UNIT: Shasta-Trinity NF, McCloud RD	SIGNED: Robert Scott, FBAN 530.990.4048									

INPUTS

WEATHER SUMMARY

See Fire Weather Forecast for Discussion

Weather:

Day: Mostly sunny in the afternoon. Inversion breaks around 1000. Night: Partly cloudy skies.

Inversion develops after 2100.

Day/Night RH:

Day/Night Temps: 74-79 ridgetops and 81-86 lower drainages then 53-58 ridgetops, 49-54 lower drainages.

15-20 percent ridges and 11-16 percent lower drainages then 36-41 percent ridges and 48-53

percent lower drainages.

20 FOOT WINDS:

Day/Night Ridges: North 7 to 12 mph, gusts to 18 mph until 1000, increasing 9 to 14 mph with gusts to

25 mph during the afternoon then North 9 to 14 mph with gusts to 25 mph until 2000, then increasing

North 13 to 18 mph with gusts to 30 mph.

Day/Night Slope/valley: Downslope/Downvalley 3 to 6 mph until 1000, then upslope/upvalley 3 to 7 mph then Upslope 3-7 mph becoming downslope/downvalley 4-9 mph after 2200. Aligned drainages

could see austs to 20 mph.

FIRE BEHAVIOR

INPUTS:

Fuels: Previously underburned aerial fuels are more susceptible to torching. Fuel moistures are slightly below averages for this time of year. The exception is 1000hr fuels that are at the 90th percentile.

Topography: Areas with Northern exposures will see the greatest impacts from forecast winds. DIV CC will see shear (swirling winds) as upslopes from Dog Creek interact with the general winds coming over Damnation Peak.

FIRE BEHAVIOR: In timber fuels, fire is re-burning areas that have previously seen fire during this incident. Some areas have had over story impacted by fire and are abnormally dry. During the hottest part of the day, 1530-1730, Expect FL of 13ft and ROS of 52ch/hr in brush and FL of 4-8ft and ROS of 10ch/hr in timber fuels.

Probability of Ignition: 90% in clear air.

Spotting Distance: .3 mile from ridgetop locations.

Day: BRANCH 9 - DIV PP/TT: Interior pockets continue to consume. Winds will push from the green to the black.

DIV WW/YY: Winds will be variable with up canyon winning out in the early morning. North winds will return near the end of shift. Torching remains possible on windward slopes. Pockets of unburned fuels could produce active fire behavior.

DIV ZZ/AA/CC: Higher locations of DIV CC will see North winds today. Lunch Gulch can expect variable winds as upslope and general winds interact near Damnation Peak. Elsewhere, only isolated areas of heat remain.

BRANCH 4 - DIV DD/GG: Except for the area near the CC/DD break, few areas of heat remain along the line. Torching just below windward ridges is possible.

DIV JJ/MM: Some small areas of fire as remaining fuel burns down.

Hirz Fire: Threat of spread from the fires edge remains low. Isolated burning of heavy fuel and stump holes is possible with increased wind.

Night: North - DIV PP/TT/WW/YY: Drier conditions will be offset by forecast north winds blowing from the green to the black. Little threat of escape or spots. Pockets of unburned fuel remain well within containment lines and will continue to consume.

South - DIV ZZ/AA/CC: Higher locations of DIV CC will see North winds tonight including Damnation Pass. Lower elevations will be protected. Modest humidity recover will reducing intensities but fire will continue to burn remaining fuel.

AIR OPERATIONS

Clear to moderate conditions with little smoke impact.

SAFETY

^{**} Complex terrain and differing winds will produce novel wind directions **

<u> Delta Fire – Safety Message</u>

INCIDENT: # CA-SHF-001444

DATE: 09/19 - 09/20 TIME: 0600 - 0600 Day / Night Shift

Keep Your Guard Up!

- Maintaining situational awareness takes effort!
- Continue planning to provide for safety then engage in your mission!
- · Watch for complacency in others, and help them stay sharp.
- Traffic is increasing, drive defensively!
- Be methodical and meticulous in your tactics to get the job done safely!

Keep Your Head in the Game!

Driving

- When driving keep speed at or below the posted speed limit and your headlights on.
- Stay as far to the right of the road as is safely possible.
- Stay alert for oncoming traffic that may "cheat" into your lane.
- Schools back in session, watch for school busses and children at bus stops.
- Always fasten your seat belt before the vehicle is set into motion.
- Slow down, slow down, slow down.

There are three main types of distracted driving: Visual-taking your eyes off the road; Manual-taking your hands off the wheel; Cognitive-taking your mind away from the task at hand. Don't drive distracted!

CIRCLE OF SAFETY:

- Walk around the vehicle.
- Check the windshield, wipers, and wiper fluid level.
- Keep windows, mirrors, and lights clean to better see and be seen.
- Check headlights, turn signals, tail lights, reflectors and running lights.
- Adjust mirrors.
- Check front and back tires (including wheels and lug nuts).
- Under the hood, check all fluid levels and especially the Air Filter.

Team 4 Safety

(ICS 215a) Day - Night Shift

	LIAZADDONO ACTIONO (CONTINUE)	(ICS 213a) Day - Night Shiπ
BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS	 Practice "Defensive Driving" techniques. Traffic volume is high. I-5 is open Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke.
	AND DRIVING	Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22-23). Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & Communicate your exit strategy, with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications.
ALL	FIRING OPERATIONS	 Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Ensure ground personnel have safety illumination, with light-sticks being the minimum. Maintain a 50'-100' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
	STEEP TERRAIN	Avoid working below crews and equipment. Concentrate on your footing placement; take your time.
ALL	& ROLLING MATERIAL	 Ensure adequate spacing between crewmembers so they can react to dislodged debris. Post lookouts to warn of rolling debris. SHOUT out to warn others. Look Up, Down and Around Frequently.
ALL	FATIGUE / COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AVIATION OPERATIONS	 Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. Ensure coordination and communication are in place and understood by all involved resources in a mission. Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the incident and IA communications plans. Make sure all resources have radios cloned appropriately. Ensure that non-agency resources understand radio use and procedures.
ALL	POWERLINES / UTILITIES	 Notify all personnel of down electrical lines. IRPG Page 24 Take time to do a Tailgate Safety Briefing Always treat downed wires as energized. Avoid parking under any type of overhead lines. Identify all gas lines in and around structures. Report damaged service lines.
ALL	END OF ASSIGNMENT	 Not mentally engaged in the task at hand. You or your driver are driving faster than when you arrived. Not giving good, thorough briefings. Your hardhat and web gear are still on the truck.
e i fem Sum	WATCH - OUTS	Assuming all is good because you worked this piece of ground yesterday. All conversations are around what you're going to do when you get home. You and your folks are tripping and stumbling more than usual.

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

•	of Emergency	Ex: Unconscious, difficu	e or limb threatening injury or illi ity breathing, bleeding severely, 2° – 3°	hess. Evacuation need bums more than 4 palm size	i is immediate es, heal stroke, disoriented.
	AND	□YELLOW / PRIORITY :	2 Serious Injury or Illness. Evacı	uation may be DELAYE	D if necessary.
	sport Priority prity 1, 2, 3)		nable to walk, 2° - 3° burns not more the Minor Injury or Illness. Non-Eme		
	f Injury or Illness & enism of Injury	ex. opiana, suama, nim	o, rearrelated lintess.		ary of Injury or Illness is, Struck by Falling Tree)

INCIDENT REPLACEMENT POLICY & PROCESS

<u>Prior to release</u> from the incident, personnel may request replacement of equipment and supplies that were damaged, lost, or consumed during the incident. There is a distinct difference in the process to replace cache equipment and supplies and non-cache or specialized equipment. Damaged property **will be turned into the Supply Unit** prior to an Incident Replacement Requisition being approved.

Replacement of cache equipment is documented on a 213 General Message form and filled at the Supply Unit or approved for replacement at the home unit. Approval for replacement of non-standard cache items has been delegated to the IC, Finance Section Chief and IBA. You should initiate this process at least two days prior to demob.

Personnel who need to replace/repair damaged property will document the request and circumstances on a 213 General Message signed by your Incident Supervisor. The lost or damaged item(s) will then be taken to either, Supply, Communications or Ground Support for inspection and recommendation for replacement or repair. Bring the completed form to COMP/CLAIMS who will review the request and forward it to the FSC. The IC/FSC will make a decision as to whether or not the items can be replaced or repaired with incident funds.

Items originally purchased through use of preparedness funds which need to be replaced due to normal wear and tear should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, e.g. wind event destroys tent, items are burned over or caused by actions where there is no negligence, the incident could, upon receipt of required documentation and proof of damage, authorize replacement using the Incident Replacement Requisition.

In some cases, the cache replacement is not acceptable on some specialty items (e.g. sleeping bag or specialty packs). These items may be replaced with no more than "cache" quality and cost. The IBA or FSC must approve these requests.

If your request is approved, provide the approval and support documentation to Ordering or Supply for issuing an "S" number.

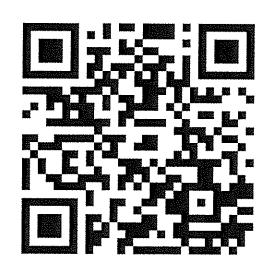

Please feel free to visit Comp/Claims Unit Leader Scott Parsons or myself if you have any questions.

Sherri Bennett, CIIMT 4, Finance Section Chief

What news or entertainment information would you like to see on fire camp bulletin boards?

We would love to hear your thoughts or feedback on how we can improve your experience!

Fill out our survey and return to PIO shop or reply from your phone at this link: https://goo.gl/forms/DKNquF8W2Sxm3U3I3

1. Camp boards are typically posted with things like, sports scores, the National Sit Report, puzzles, pictures, sections from newspapers, the shower or laundry hours...

Mark only one

- o I look at the camp boards and find the information on them useful.
- I'd like to see different types of information on the camp board.
- I don't have time to read a board, QR codes or links to helpful websites
 I can look at on my phone would be more useful.
- Other:

2. Would you like to see any of the following on a camp board? Check all that apply.

local history
shower and laundry hours
sports scores
coffee/muffin shops in town
local restaurant names and locations
thank you cards from the community

international news
local news
comics
puzzles
Human Resource message
local geology, geography, wildlife, points of interest
current incident maps and stats
current incident news release
regional fire situation
national fire situation/ SIT report
Safety Information
transportation map/ camp map
links to official fire information such as inciweb
Other:

3. If you look at camp boards, how long do you typically spend looking at them?

Mark only one.

- o I don't
- one minute or less
- one minute or more

4. How do you charge your mobile devices on assignment?

Check all that apply.

in my vehicle

solar charger

battery pack

local coffee shop

Other:

5. Would a charging station in camp be helpful? Circle One.

Yes No

6. Please add any other feedback or comments below...

DELTA FIRE Human Resource Message September 19, 2018

ZERO TOLERANCE

FOR ALCOHOL

AND/OR

ILLEGAL DRUGS

ON THIS INCIDENT

The quickest way to get demob'd is engage in activities involving alcohol or drugs on this incident. Also Law Enforcement will be called to deal with any suspected illegal activities.

If you have issues with substances, I can assist putting you in touch with professionals that will help you.

Adam Alvarez, HRSP - 707-373-8715

Delta-Hirz Fire Suppression Repair

Repair Objectives

- Minimize Surface and Gully Erosion
- Minimize Loss of Soil Productivity due to Erosion In Cleared Areas
- Repair Meadows and Wetlands Damaged By Suppression Activities
- Minimize Spread of Noxious Weed Infestations
- Minimize Excessive Side-Cast Fuels Along Roads
- Minimize Impacts to Inventoried Roadless Areas and Wild & Scenic River Corridors
- Repair Impacts to Cultural and Historic Resources
- Repair Damage to National Forest Roads and Trails Caused by Fire Suppression Activities
- Review by Agency READ/REAFs for On-Site Verification of Objectives Completed

Suppression Repair Focus

- Dozer Lines
- Hand Lines
- Roads and Trails
- Safety Zones and Staging Areas
- Drop Points
- Helispots
- Water Sources

Effective Waterbars

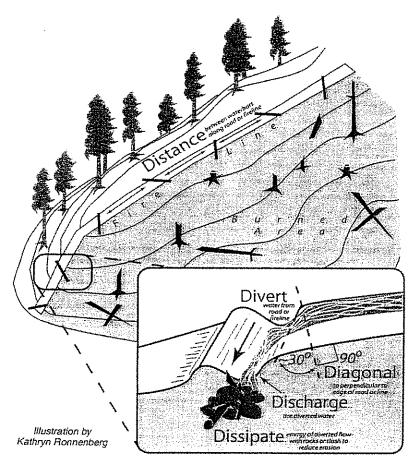

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %		Maximum Distance Apart <u>(feet)</u>
1-5	***************************************	200
6 - 20		125
21 – 40		60
41 – 60		40
>60	***************	25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.

Waterbars should be no more 2-3 feet tall on dozer lines to enable future access.

Stage 2 Suppression Repair Guidelines

(Apply to National Forest System Lands only on dozer lines with moderate to heavy suppression generated debris)

Applicable Suppression Repair Plan Objectives

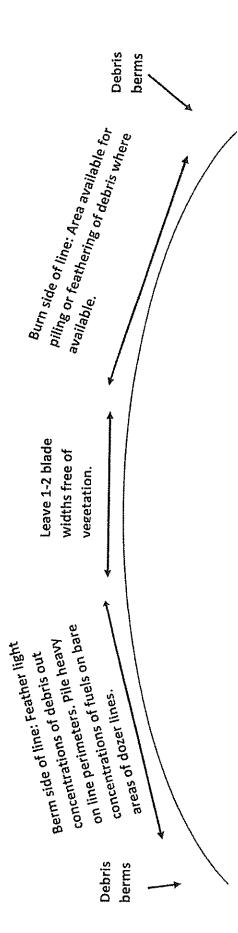

- Minimize loss of soil productivity due to potential erosion in cleared areas.
- Minimize surface erosion.
- Minimize excessive side-cast fuels.

General Instructions

- Pile excessive amounts of suppression generated debris.
- Smaller concentrations of suppression generated debris can be feathered back into scraped side slope areas in order to breakdown fuel concentrations and reduce erosion.

Piling Specifications

- Piles should be located at least 10 feet away from tree boles and preferably out of the drip line of the canopy where possible.
 - If working in close or closed canopy piles should be built in a configuration that prevents excessive tree scorch (e.g. small piles, windrowed piles).
- If working in large openings on large dozer lines piles can be larger (e.g. 25x25 feet),
- Compress piles as much as possible to improve burn consumption.
- Piles should be clean (free of soil) to ensure adequate consumption during burning and reduced risk of escape in spring.

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

EXPECTATIONS

Welcome to this Incident.
Thank You for your Cooperation & Support!

CONDUCT AND BEHAVIOR

This team is committed to "ZERO TOLERANCE" of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are NOT allowed within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

Sexual Harassment

Inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC. What we PERMIT we PROMOTE!!!!

SAFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

EMPHASIS AREAS

Training

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 Training Expectations – See back page.

Evaluations

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

Injuries/Claims

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

Work Rest Cycles

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

Position Qualifications

Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any fire line position. Non-fireline positions may be filled based on the word of the employee pending home unit confirmation, which must be requested immediately. Contract dozer operators, tactical water tender operators and contract fallers must provide proof that they have received the annual fire refresher training.

Engagement/Disengagement

The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. This includes Geographic Area and incident briefings. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

Debriefing

All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or special incidents that occurred during the operational period.

Crew Time Reports/Shift Tickets

It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be <u>reviewed and signed</u> by the next level supervisor. A finance "Rules of Engagement" document will be provided in the IAP explaining further requirements.

Social Media

It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident's professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.

We look forward to working with you as a valuable member of this effort. If you have any questions or feedback, please feel free to contact any Command and General Staff Member.

JAY KURTH

Incident Commander

ROCKY W. OPLIGER

Deputy Incident Commander

THANK YOU FOR YOUR COOPERATION AND GOOD WORK!!

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4 TRAINING EXPECTATIONS

- 1. Upon arrival at the incident and after check-in, the trainee will bring the following documents to the initial meeting with the training specialist:
 - a. A properly initiated Position Task Book.
 - b. Your Request Number and your Agency (3) letter identifier.
 - c. Your agencies Fire Chief or Training Officers name, address, and phone number to insure that a copy of the training documents will be mailed back to your home unit.
 - d. Your current Incident Qualification Card (red card) that identifies you as a Trainee in the position you are seeking to be trained.
- 2. Have you identified or has a Trainer been assigned to you and if so, have the Trainer present when you meet with the training specialist.
- 3. At closeout and prior to entering the demobilization process, you should complete, sign, and review with the trainer the Final exit interview form. Once the form is complete, bring the following documents to the Training Specialist for closeout;
 - a. Position Task Book (Evaluation Record dated and signed by the Trainer).
 - b. Completed ICS 225 (Personal Evaluation Record) dated and signed by both the trainee and trainer.
 - c. Completed Final Exit Interview Form dated and signed by both the trainee and the trainer.

Trainer Expectations

- 1. Arrive with the Trainee at the initial meeting with the Training Specialist.
- 2. Be ready to provide your Contact information and your Incident Request number.
- 3. Have a Current Incident Qualifications Card (Red Card) in a position of equal or greater qualifications that the Trainee is trying to achieve.
- 4. Be willing to educate, support, and provide professional and consistent feed back to the trainee during the assignment.
- 5. Throughout the incident the trainer shall continue to monitor and review with the trainee their tasks and goals within the task book.
- 6. The trainer, where appropriate is expected to sign off task's that are achieved by the trainee and to complete and sign the following documents.
 - a. ICS 225 (Personal Evaluation Form)
 - b. Evaluation Record at the back of the task book.
- 7. The trainer shall portray a positive and professional attitude that lets the trainee know that it is desirable to ask for direction and feedback.
- 8. When accepting the role as a trainer, you are expected to act in a professional manner that represents the California Interagency Incident Management Team 4 and your home agency.
