HIRZ FIRE

CA-SHF-001223 P5L2ZM (0514)

INCIDENT ACTION PLAN

DAY SHIFT AUGUST 30, 2018 / 0600 - 1800

NIGHT SHIFT AUGUST 30 - 31, 2018 / 1800 – 0600

FIRE INFORMATION # (530) 628-0039

a a

INCIDENT OBJECTIVES 1. Incident Name HIRZ FIRE 2. Date 08/29/18 4. Operational Period: August 30 - 31, 2018 Day / Night Shifts 0600 - 0600

5. General Control Objectives for the Incident (include alternatives)

Leader's Intent

3. Time

2100

A full suppression strategy will be implemented for the Hirz Fire through a combination of direct and indirect tactics. Efforts will be made to minimize fire spread and severity across private timberlands and structures through the application of well-planned tactical responses.

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure, and commercial timberlands while working with READs to reduce negative impacts to cultural/sensitive sites.
- Establish and strengthen cooperator, partner, and stakeholder relationships
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

Keep the Hirz Fire:

- North of Gilman Road to protect private residences and property to the south.
- South of Tom Neal Creek Road to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area.
- East of Middle Salt Creek to Green Mountain to North Fork Salt Creek to protect private property and infrastructure values in and around the Interstate 5 corridor.
- West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake to protect
 private timberlands, natural resource values, including northern spotted owl habitat and recreation
 infrastructure.

6. Weather Forecast for Period:

WEATHER DISCUSSION... The pattern will change little today over the fire area. Any inversion will likely break after 1400. Temperatures will be about 3 degrees cooler than Wednesday, but little change in relative humidity as values start out this morning above 60 percent, drop below 40 percent after 1200, and then will likely climb back above 40 percent after 2100. Most of the fire will be affected by terrain driven winds, but ridgetop winds will be from the south and southwest at 6 to 10 mph and gusts to 15 mph between 1200 and 2400. We begin a gradual warming and drying trend on Friday with temperatures up 3 degrees from today and afternoon humidities down about 5 percent. Watch for gusty southwest ridgetop winds Friday afternoon.

General Safety Message:

The hazards on the incident have remained consistent over the course of the incident. However, this consistency can cause resources assigned long enough to become blind to the potential risks and hazards. Take accountability for your individual mindset and those around you.

WILDLIFE: Welcome to bear and mountain lion habitat. Bears will be curious and searching out our food sources.

DRIVING: Maintain safe speeds when behind the wheel. Slowing down is the best mitigation for numerous safety issues. Learn to recognize and pay attention to the warning signs of fatigue; WEAR YOUR SEAT BELTS; and always maintain awareness

CUMULATIVE FATIGUE: An active fire season, long hours worked, and back-to-back assignments can lead to serious cumulative fatigue. Monitor yourself, your subordinates, and others for fatigue. Take frequent short rest breaks, eat balanced meals, and get as much quality sleep as possible, stay hydrated.

FIRE WEATHER FORECAST

FORECAST NO. 18

| NAME OF FIRE: Hirz PREDICTION FOR Thursday August 30, 2018 UNIT: Shasta Trinity National Forest TIME AND DATE FORECAST ISSUED: 1930 Wednesday 08/29/18 PREDICTION FOR Thursday August 30, 2018 SIGNED: SigneD: Fric Evenson / Incident Meteorologist | |
|---|---|
| WEATHER DISCUSSION The pattern will change little today over the fire area. Any inversion will like break after 1400. Temperatures will be about 3 degrees cooler than Wednesday, but little change in relative humidity as values start out this morning above 60 percent, drop below 40 percent after 1200, and then will likely climb back above 40 percent after 2100. Most of the fire will be affected by terrain driven winds, but ridgetop winds will be from the south and southwest at 6 to 10 mph and gusts to 15 mph between 1200 and 2400. We begin a gradual warming and drying trend on Friday with temperature 3 degrees from today and afternoon humidities down about 5 percent. Watch for gusty southwest ridgetop winds Friday afternoon. | , |
| TODAY Sky/weatherSunny. Hazy with areas of smoke. Inversion breaking after 1400. Max temperature71-75 ridgetops and 85-90 lower drainages. Min humidity28-34 percent ridges and 23-28 percent lower drainages. Wind (20 ft) Slope/valleyDownslope/Downvalley 2-4 mph until 1200, then upslope/upvalley 3-5. RidgetopSouth-Southwest winds 6-10 mph. Gusts to 15 mph after 1200. Mixing heightAround 6000 ft AGL. Transport windsSouthwest around 8 mph. CWR0 percent. LAL1. | , |
| TONIGHT Sky/weatherClear. Areas of smoke. Inversion developing after 2100. Min temperature50-54 ridgetops, 56-60 lower drainages. Max humidity60-64 percent ridges and 56-60 percent lower drainages. Wind (20 ft) Slope/valleyUpslope 2-4 mph becoming downslope 2-4 mph after 2100. RidgetopSouth-Southwest 4-8 mph. Gusts to 15 mph until 2400. Mixing heightLowering to around 5000 ft AGL. Transport windsSouth-Southwest 3 to 6 mph. CWR0 percent. LAL1. | |
| FRIDAY Sky/weatherSunny. Hazy with areas of smoke. Inversion breaking after 1200. Max temperature74-78 ridgetops and 88-92 lower drainages. Min humidity23-27 percent ridges and 19-23 percent lower drainages. Wind (20 ft) Slope/valleyDownslope/Downvalley 2-4 mph until 1200, then upslope/upvalley 3-5. RidgetopSouth-Southwest winds 6-10 mph. Gusts to 15 mph after 1200. Mixing heightAround 7000 ft AGL. Transport windsSouthwest around 10 mph. CWR0 percent. LAL1. | |

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 31 TYPE OF FIRE: Wildfire

FIRE NAME: Hirz Fire OPERATIONAL PERIOD: 08/30/18 0700-0700

DATE ISSUED: 08/29/18 TIME ISSUED: 19:00

UNIT: CA-SHF-1223 SIGNED: Brian Newman FBAN (T) Brian Newman

INPUTS

WEATHER SUMMARY: See attached weather summary in the Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL: A Fuels and Fire Behavior Advisory is still effect for heavier than normal grass and low fuel moistures. The fire is burning in mixed brush and timber stands with timber litter. The fire will continue to move to the north and west during the midday and afternoon periods once the inversion clears. Expect similar fire conditions today as yesterday. Smoke will generally be held in the drainage bottoms and to the north of the fire early, then clearing through the day. The inversion layer and higher humidity's limit fire spread after about 2100 hours.

SPECIFIC:

| Fuel Type | | Rate of Spre feet per mind Day | | | Flame Lengt (in feet) Day | h Night | Spo Distand Day | | bility of on (%) Night | |

| | Backing | 1-2 | >1-1 | Backing | 1-2 | >1-2 | Wind: .12 | Wind: .1 | s3 | |

Branch I

DIV A/B: No control problems expected continue to patrol and watch for rollout into the receptive fuels.

DIV F: No control problems expected, continue to monitor interior for fuels burning out.

DIV T: Be aware of reburn potential in the recent firing ops areas

Branch III

DIV U: Expect the fire to continue to flank and back into drainages north of the ridge between Green Mtn and High Mtn. Fire operations from central point should continue to back towards the main fire into the drainage, with rollout and single tree torching possible.

DIV W: Expect the fire to continue to the north slowly on Tombstone Mtn with rollout producing short duration runs uphill. Fire should remain within the understory, with occasional single and group torching.

Branch V

DIV Y: The fire continues to move North / Northeast along the McCloud River. Threat of the fire crossing the McCloud River still exists in sections 28 and 33.

DIV Z: No control problems expected, continue to monitor interior for fuels burning out.

Contingency Branches

DIV NN/OO/RR: If fire crosses the McCloud River, upslope runs can be expected.

DIV XX: No expected fire impacts.

AIR OPERATIONS: The thicker inversion may limit air operations until later in the day, but should clear enough for air operations by early to mid afternoon.

- Be aware of unburned fuel between you and the fire as the inversion clears and fire activity picks up in the afternoon.
- Watch for falling snags, especially in areas that have been burning for multiple shifts

SAFETY MESSAGE

Hirz Fire CA-SHF-001223

Day-Night

June 30-31, 2018

MAJOR HAZARDS:

- NARROW ROADS WITH STEEP DROP OFFS
- **WEAKENED TREES FROM CURRENT AND PAST FIRES**
- HEAT STRESS AND DEHYDRATION
- STEEP SLOPES WITH ASSOCIATED HAZARDOUS FOOTING AND ROLLING ROCKS

The hazards on the incident have remained consistent over the course of the incident. However, this consistency can cause resources assigned long enough to become blind to the potential risks and hazards. Take accountability for your individual mindset and those around you.

WILDLIFE: Welcome to bear and mountain lion habitat. Bears will be curious and searching out our food sources.

DRIVING: Maintain safe speeds when behind the wheel. Slowing down is the best mitigation for numerous safety issues. Learn to recognize and pay attention to the warning signs of fatigue; WEAR YOUR SEAT BELTS; and always maintain awareness behind the wheel.

CUMULATIVE FATIGUE: An active fire season, long hours worked, and back-to-back assignments can lead to serious cumulative fatigue. Monitor yourself, your subordinates, and others for fatigue. Take frequent short rest breaks, eat balanced meals, and get as much quality sleep as possible, stay hydrated.

Bear Behavior

- ☐ Active from dawn to dusk
- ☐ Spend most of their time in search for food
- □ Curious- their nature is to investigate things that scare them initially
- ☐ Habitual- this means they will be back again if successful in getting food
- ☐ They are not always aware of their surroundings. It's possible to come across them without them knowing
- ☐ If you see a bear never run away, stand your ground and stare at them. Black bears often retreat but can bluff an advance
- ☐ If attacked fight for your life, don't play dead
- ☐ California Dept. of Fish and Wildlife does not trap or relocate bears. Their only course of action is to dispatch a nuisance/dangerous bear

Top Driving Mistakes

1. Multi-tasking While Driving

Driving Tip: When You Turn the Car On, Turn the Gadgets Off. No matter how busy your day is, when you're on the road, focus only on driving. Catch up on other activities later and avoid unnecessary accidents.

2. Following Too Closely

Driving Tip: One Thousand One, One Thousand Two, One Thousand Three, Leave a three-second cushion between you and the vehicle ahead - it could save your bumper and your life. Make sure to double or triple that time when the weather is bad, visibility reduced, the road conditions rough, or pavement is slick.

3. Backing Up

Driving Tip: Objects in the mirror are closer than they appear. Your mirrors have a margin of error; don't rely on them alone. Look over your shoulder before backing up. Use a spotter. Get out and look around to determine extent of danger zones, uneven ground or obstacles.

4. Incorrect Merging

Driving Tip: Yellow is for Yield. Accidents often occur when you are stuck behind a driver who interprets yield as stop. Don't be the quilty party. Use the ramp as a means for merging into traffic, not causing it.

5. Failure to Yield on a Left-Hand Turn

Driving Tip: Check the Flow Before You Go. Look at the road you are turning into to make sure that no vehicles or pedestrians are in your path.

afety Officers: Brian Savage, Charlotte Jordan, Jeremy Lawson (T)

Hirz Fire Risk Analysis 215A CA-SHF-001223 - August 30-31, 2018

| 11 | IIZ FITE KISK ATTATYSIS 215A | CA-SHF-001223 - August 30-31, 2018 |
|---|---|---|
| Location | Hazard | Control or Abatement Action |
| All | Air Operations | ~Follow "Aviation Watch-Out Situations" in IRPG,pg 46 ~Don't plan on air resources for medical transport or resupply. Visibility may be impaired. Have a backup plan. ~Refer to IRPG, pg 46, for directing bucket drops. ~Ensure positive communication with all air resources. ~Keep personnel out of drop zones. ~Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective. |
| All | Hazard Trees | ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 |
| Branch I and Branch III, Branch V | Power and Utilities | ~ Notify all personnel of down electrical lines.~ Refer to the IRPG pages 24-25 for Power Line Safety~ Always treat downed wires as energized~ Identify and avoid high tension transmission lines. ~ Identify and avoid high pressure natural gas lines~ Identify and avoid damaged gas service near structures~ Be aware of utility work under way in your work area |
| All | Potential for Spotting and Severe Fire Behavior | * Share weather observations and IMET updates with all personnel assigned to division* Establish "Decision Points" to withdraw * Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone)* Use "Risk Management" process prior to taking action, refer to IRPG (2014) pg.1 Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift* Factor in drought conditions and local ERC prior to operations* |
| All | Engagement in a tree mortality area | ~ Carefully evaluate values at risk and need for exposure ~ Maintain appropriate clearance distance from hazard trees ~ Be alert for overhead hazards that may fall ~ Disengage operations at dark in areas of tree mortality ~ Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities~ Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re- engaging~ Establish decision points for disengagement |
| All | Fatigue,Overexertion,dehydration and heat related illness | Drink fluids throughout operational period (water and Gatorade) not energy drinks Set a reasonable work pace and allow adequate rest breaks * Follow work / rest guidelines Use buddy system to monitor personnel for heat related and fatigue issues For Heat Related Injuries refer to IRPG page109 |
| Ali | Steep Terrain & Rolling Debris | Maintain 8'-10' spacing when working & walking Don't work directly above or below any personnel Evaluate necessity to send personnel in areas with limited access |
| All | Driving & Traffic | ~ Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool~ Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps ~ Use spotters when backing~ Honk horn to alert personnel when backing ~ Always use headlights ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill ~ Seat Belts are mandatory ~ No texting while driving ~ Watch for opposing traffic that may cross over into your lane on narrow winding roads~ Watch for falling rocks and debris on roadways in steep canyon areas of the fire ~ Use extra precautions when driving in congested areas |
| All | Communications | ~ Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources~ Utilize Human repeaters where needed |
| All | Firefighter & Public Smoke Exposure | ~Use warning lights and provide traffic control on roadways during smoky and night operations~ Rotate crews out of smoky areas during firing and mop-up operations * Utilize smoke monitoring equipment and Air resource advisors |

| Branch I and Branch III, Branch V | Heavy Equipment Operations | ~ Ensure communications are established with operator prior to work ~ Maintain identified safety exclusion area around equipment, IRPG, pg 86 ~ Before approaching; make eye contact with operator and wait for blade placement on ground ~ Avoid working below equipment where rolling material could jeopardize safety ~ Before transporting equipment identify low hanging wires and ensure there is clearance |
|---|---|---|
| All | Night Operations | ~ Maintain high visibility in work area near roadways. ~ Use glow sticks to mark hazards. ~ Watch for signs of fatigue ~ Scout and evaluate all areas of work prior to engagement ~ Watchout Situation – In country not seen in daylight |
| All | Uninformed on Strategy / Tactics / hazards | ~ Provide a detailed briefing for all personnel assigned to the Incident ~ Document briefings on unit log ~ Use Risk Management Process in evaluating all assignments ~ Explain leadership responsibilities and expectations from all personnel assigned to task~ Determine hazards, and mitigation protocol to limit exposure. ~ Review 215a~ Discuss weather, fire behavior, Escape Routes, Safety Zones~ Discuss communication plan including all tactical, aerial, and command frequencies~ Discuss Emergency Plan outlined in the ICS-206 WF Medical Plan |
| Branch I and Branch III, Branch V | Fireline Hazards and Mop Up | * Do not work directly above or below personnel during mop-up operations* Identify and make known burning stumps or roots that may cave In * Wear appropriate PPE* Watch for falling, rolling debris on steep slopes* Call out to crew personnel that may be affected by sudden rolling debris or rocks* For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall* Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking |
| All | Chain Saw Operations | ~ Only fell and buck trees within your expertise, and training ~ Look up, down, & around for hazard tree indicators: trees burning for long periods of time,dead,broken,or burnt out tops and limbs overhead~ Follow "Procedural Felling Operations" IRPG page 85 ~ Do not fall trees during high wind events~ Use precautionary measures when re-fueling saws to prevent "fuel geysering" |
| All | Environmental Hazards | ~ Be alert for rattlesnakes, watch footing and hand placement around rocks~ Check yourself for ticks, watch for bees and other insects that bite~ Watch out for livestock and wildlife inside fire area and along roadways.~Practice Bear Avoidance- Clean up all debris and trash during each operational period * Stay alert for mountain lions in areas of work ~ Be aware of poison oak and avoid or use proper hygiene if exposed. |
| Branch I and Branch III, Branch V | Firing Operations & Devices | Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial and ground ignition plans have been adequetly developed and personnel are briefed. |
| Division Z | Chipper Operations | ~ Block chipper tires when unhooked from towing vehicle and insure full extension of support leg.~ When working in roadway use warning systems for traffic.~ Check all safety shutdowns to be sure they are working properly.~ Check direction of discharge. Make sure discharge is pointed away from work areas or roadways. Position down-wind if possible.~ Never operate chipper alone.~ Never reach into the infeed shroud. Feed short material on top of longer material or lay short pieces on the infeed tray and push into chipper with long branches or long piece of wood. Do not use rakes or shovels to push material into feeder. Check material for rocks before feeding into chipper.~ Do not use your hand or feet to push material into feeder.~ Hard hat, eye protection, gloves, and ear protection will be worn at all times when working near chipper.~ Review JHA with workers |
| Branch III, Branch V | Masticator | * Require crewmembers to maintain a safe distance of 300 ft. from the equipment * Have suppression crew nearby with water in case friction or sparks ignite woody debris |

Special Medical Emergency Procedures for remote locations and night shift:

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP. Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate recourses to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

- 1. Determine the nature of the emergency.
- 2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. <u>Green</u> (Non-Life Threatening), <u>Yellow</u> (Serious Injury/Illness), <u>Red</u> (Life Threatening Injury/Illness).
- 3. If the injury is life threatening, then clear designated frequency for emergency traffic.
- 4. Identify the on-scene point of contact by position.
- 5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
- 6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
- 7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
- 8. Identify preferred method of patient transport. Ground or Air.
- 9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

Incident Operations Driving

These standards address driving by personnel actively engaged in wildland fire or all-hazards response activities, including driving while assigned to a specific incident or during initial attack fire response (includes time required to control the fire and travel to a rest location). In the absence of more restrictive agency policy, these guidelines will be followed during mobilization and demobilization as well. Individual agency driving policies shall be consulted for all other non-incident driving.

Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty-day.

- No driver will drive more than 10 hours (behind the wheel) within any duty-day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
- A driver shall drive only if they have had at least <u>8 consecutive hours off</u> duty before beginning a shift.

Exception to the minimum off-duty hour requirement is allowed when essential to:

- Accomplish immediate and critical suppression objectives, or
- Address immediate and critical firefighter or public safety issues.

As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hours work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.

Local Government Resources on CFAA

If you are demobing from this incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief

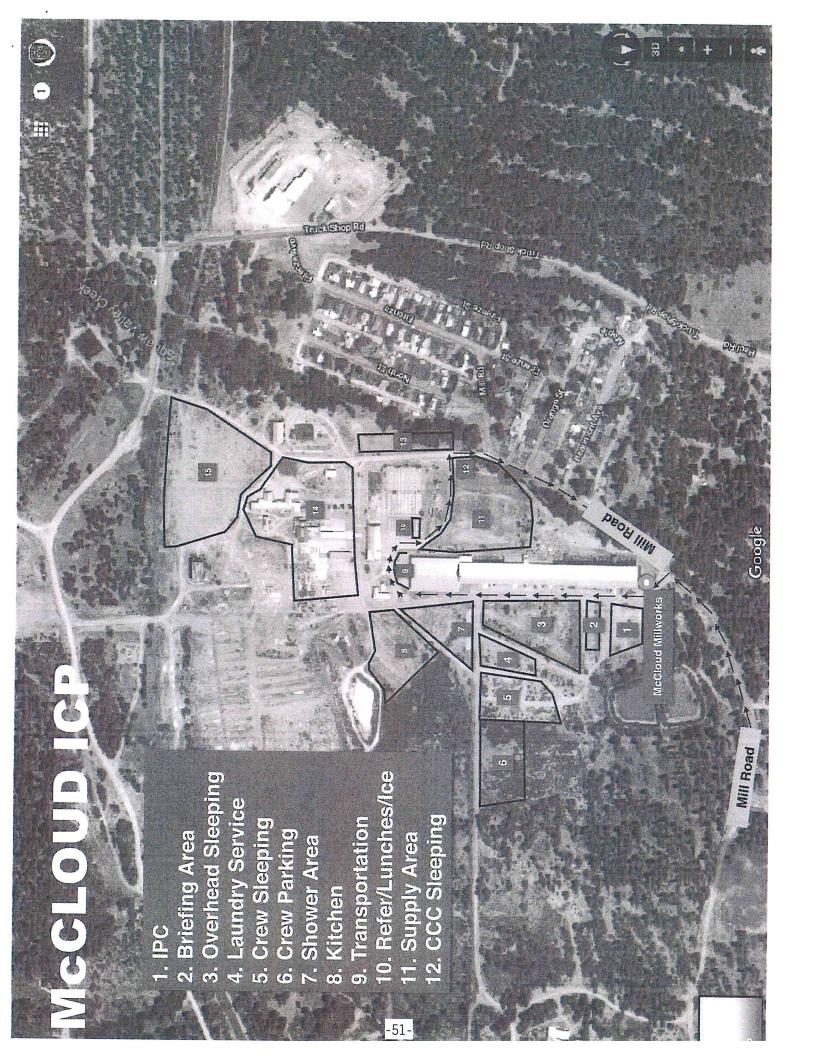

The Incident keeps the Pink copy and you keep the Golden.

The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

| CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." | | | | | | | | | |
|--|---|---------------------------------|-----------------------|-------------------------|---|--|--|--|--|
| | RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness. | | | | | | | | |
| | Injury or Illness & ism of Injury | | | | Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree) | | | | |
| Transpo | ort Request | | | | Air Ambulance / Short Haul/Hoist Ground Ambulance / Other | | | | |
| Patien | t Location | | | | Descriptive Location & Lat. / Long. (WGS84) | | | | |
| Incide | Incident Name Geographic Name + "Medical" (Ex: Trout Meadow Medical) | | | | | | | | |
| On-Scene Inci | ident Commander | | | | Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones) | | | | |
| Patie | ent Care | | | | Name of Care Provider (Ex: EMT Smith) | | | | |
| 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) | | | | | | | | | |
| Patient Assessm | Patient Assessment: See IRPG page 106 | | | | | | | | |
| Treatment: | | | | | | | | | |
| 4. TRANSPORT | | | | -1-4-/1\ D-64- | ETA A. F | | | | |
| Evacuation Loca | tion (ir ainerent): (Descr | iptive Location (drop point, ii | ntersection, etc.) or | Lat. / Long.) Patient's | ETA to Evacuation Location: | | | | |
| Helispot / Extraction Site Size and Hazards: | | | | | | | | | |
| 5. ADDITIONAL | RESOURCES / EQUIPN | MENT NEEDS: | | | | | | | |
| Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication | | | | | | | | | |
| 6. COMMUNICA Function | COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Function Channel Name/Number Receive (RX) Tone/NAC * Transmit (TX) Tone/NAC * | | | | | | | | |
| COMMAND | Channel Name/Number | Receive (RX) | Tone/NAC | Transmit (TA) | TOTIONAC | | | | |
| AIR-TO-GRND | | | | | | | | | |
| TACTICAL | | | | | | | | | |
| 7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. | | | | | | | | | |
| . ADDITIONAL | INFORMATION: Updates | s/Changes, etc. | | | | | | | |

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
