7. General Safety Message: The hazards on the incident have remained consistent over the course of the incident. However, this consistency can cause resources assigned long enough to become blind to the potential risks and hazards. Take accountability for your individual mindset and those around you. WILDLIFE: Welcome to bear and mountain lion habitat. Bears will be curious and searching out our food sources. DRIVING: Maintain safe speeds when behind the wheel. Slowing down is the best mitigation for numerous safety issues. Learn to recognize and pay attention to the warning signs of fatigue; WEAR YOUR SEAT BELTS ; and always maintain awareness behind the wheel. CUMULATIVE FATIGUE: An active fire season, long hours worked, and back-to-back assignments can lead to serious cumulative fatigue. Monitor yourself, your subordinates, and others for fatigue. Take frequent short rest breaks, eat balanced meals, and get as much quality sleep as possible, stay hydrated.

OUTPUTS

FIRE BEHAVIOR

GENERAL: A Fuels and Fire Behavior Advisory is still effect for heavier than normal grass and low fuel moistures. The fire is burning in mixed brush and timber stands with timber litter. The fire will continue to move to the north and west during the midday and afternoon periods once the inversion clears. Expect similar fire conditions today as yesterday. Smoke will generally be held in the drainage bottoms and to the north of the fire early, then clearing through the day. The inversion layer and higher humidity's limit fire spread after about 2100 hours.

SPECIFIC:

Branch I

DIV A/B: No control problems expected continue to patrol and watch for rollout into the receptive fuels.

DIV F: No control problems expected, continue to monitor interior for fuels burning out.

DIV T: Be aware of reburn potential in the recent firing ops areas

Branch III

DIV U: Expect the fire to continue to flank and back into drainages north of the ridge between Green Mtn and High Mtn. Fire operations from central point should continue to back towards the main fire into the drainage, with rollout and single tree torching possible.

DIV W: Expect the fire to continue to the north slowly on Tombstone Mtn with rollout producing short duration runs uphill. Fire should remain within the understory, with occasional single and group torching.

Branch V

DIV Y: The fire continues to move North / Northeast along the McCloud River. Threat of the fire crossing the McCloud River still exists in sections 28 and 33.

DIV Z: No control problems expected, continue to monitor interior for fuels burning out.

Contingency Branches

DIV NN/OO/RR: If fire crosses the McCloud River, upslope runs can be expected.

DIV XX: No expected fire impacts.

AIR OPERATIONS: The thicker inversion may limit air operations until later in the day, but should clear enough for air operations by early to mid afternoon.

- Be aware of unburned fuel between you and the fire as the inversion clears and fire activity picks up in the afternoon.
- Watch for falling snags, especially in areas that have been burning for multiple shifts

SAFETY MESSAGE

Hirz Fire

CA-SHF-001223

Day-Night

June 30-31, 2018

MAJOR HAZARDS:

- **NARROW ROADS WITH STEEP DROP OFFS**
- **WEAKENED TREES FROM CURRENT AND PAST FIRES**
- **HEAT STRESS AND DEHYDRATION**
- **STEEP SLOPES WITH ASSOCIATED HAZARDOUS FOOTING AND ROLLING ROCKS**

The hazards on the incident have remained consistent over the course of the incident. However, this consistency can cause resources assigned long enough to become blind to the potential risks and hazards. Take accountability for your individual mindset and those around you.

WILDLIFE: Welcome to bear and mountain lion habitat. Bears will be curious and searching out our food sources.

DRIVING: Maintain safe speeds when behind the wheel. Slowing down is the best mitigation for numerous safety issues. Learn to recognize and pay attention to the warning signs of fatigue; **WEAR YOUR SEAT BELTS;** and always maintain awareness behind the wheel.

CUMULATIVE FATIGUE: An active fire season, long hours worked, and back-to-back assignments can lead to serious cumulative fatigue. Monitor yourself, your subordinates, and others for fatigue. Take frequent short rest breaks, eat balanced meals, and get as much quality sleep as possible, stay hydrated.

Bear Behavior

- Active from dawn to dusk
- Spend most of their time in search for food
- Curious- their nature is to investigate things that scare them initially
- Habitual- this means they will be back again if successful in getting food
- They are not always aware of their surroundings. It's possible to come across them without them knowing
- If you see a bear never run away, stand your ground and stare at them. Black bears often retreat but can bluff an advance
- If attacked fight for your life, don't play dead
- California Dept. of Fish and Wildlife does not trap or relocate bears. Their only course of action is to dispatch a nuisance/dangerous bear

Top Driving Mistakes

1. Multi-tasking While Driving

Driving Tip: When You Turn the Car On, Turn the Gadgets Off. No matter how busy your day is, when you're on the road, focus only on driving. Catch up on other activities later and avoid unnecessary accidents.

2. Following Too Closely

Driving Tip: One Thousand One, One Thousand Two, One Thousand Three. Leave a three-second cushion between you and the vehicle ahead – it could save your bumper and your life. Make sure to double or triple that time when the weather is bad, visibility reduced, the road conditions rough, or pavement is slick.

3. Backing Up

Driving Tip: Objects in the mirror are closer than they appear. Your mirrors have a margin of error; don't rely on them alone. Look over your shoulder before backing up. Use a spotter. Get out and look around to determine extent of danger zones, uneven ground or obstacles.

4. Incorrect Merging

Driving Tip: Yellow is for Yield. Accidents often occur when you are stuck behind a driver who interprets yield as stop. Don't be the guilty party. Use the ramp as a means for merging into traffic, not causing it.

5. Failure to Yield on a Left-Hand Turn

Driving Tip: Check the Flow Before You Go. Look at the road you are turning into to make sure that no vehicles or pedestrians are in your path.

Location	Hazard	Control or Abatement Action
All	Air Operations	~Follow "Aviation Watch-Out Situations" in IRPG,pg 46 ~Don't plan on air resources for medical transport or resupply. Visibility may be impaired. Have a backup plan. ~Refer to IRPG, pg 46, for directing bucket drops. ~Ensure positive communication with all air resources. ~Keep personnel out of drop zones. ~Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.
All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Post lookouts, or use a spotter in mop-up areas with personnel ~ Don't park vehicles or take breaks in high concentrations of hazard trees~ Establish trigger points for disengagement during high wind events~ Post road guards when appropriate
Branch I and Branch III, Branch V	Power and Utilities	~ Notify all personnel of down electrical lines.~ Refer to the IRPG pages 24-25 for Power Line Safety~ Always treat downed wires as energized~ Identify and avoid high tension transmission lines. ~ Identify and avoid high pressure natural gas lines~ Identify and avoid damaged gas service near structures~ Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	* Share weather observations and IMET updates with all personnel assigned to division* Establish "Decision Points" to withdraw * Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone)* Use "Risk Management" process prior to taking action, refer to IRPG (2014) pg.1 Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift* Factor in drought conditions and local ERC prior to operations*
All	Engagement in a tree mortality area	~ Carefully evaluate values at risk and need for exposure ~ Maintain appropriate clearance distance from hazard trees ~ Be alert for overhead hazards that may fall ~ Disengage operations at dark in areas of tree mortality ~ Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities~ Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging~ Establish decision points for disengagement
All	Fatigue,Overexertion,dehydration and heat related illness	~ Drink fluids throughout operational period (water and Gatorade) not energy drinks ~ Set a reasonable work pace and allow adequate rest breaks * Follow work / rest guidelines ~ Use buddy system to monitor personnel for heat related and fatigue issues~ For Heat Related Injuries refer to IRPG page109
All	Steep Terrain & Rolling Debris	~ Maintain 8'-10' spacing when working & walking ~ Don't work directly above or below any personnel ~ Evaluate necessity to send personnel in areas with limited access
All	Driving & Traffic	~ Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool~ Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps ~ Use spotters when backing~ Honk horn to alert personnel when backing ~ Always use headlights ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill ~ Seat Belts are mandatory ~ No texting while driving ~ Watch for opposing traffic that may cross over into your lane on narrow winding roads~ Watch for falling rocks and debris on roadways in steep canyon areas of the fire ~ Use extra precautions when driving in congested areas
All	Communications	~ Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources~ Utilize Human repeaters where needed
All	Firefighter & Public Smoke Exposure	~Use warning lights and provide traffic control on roadways during smoky and night operations~ Rotate crews out of smoky areas during firing and mop-up operations * Utilize smoke monitoring equipment and Air resource advisors

Branch I and Branch III, Branch V	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Ensure communications are established with operator prior to work ~ Maintain identified safety exclusion area around equipment , IRPG, pg 86 ~ Before approaching; make eye contact with operator and wait for blade placement on ground ~ Avoid working below equipment where rolling material could jeopardize safety ~ Before transporting equipment identify low hanging wires and ensure there is clearance
All	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area near roadways. ~ Use glow sticks to mark hazards. ~ Watch for signs of fatigue ~ Scout and evaluate all areas of work prior to engagement ~ Watchout Situation – In country not seen in daylight
All	Uninformed on Strategy / Tactics / hazards	<ul style="list-style-type: none"> ~ Provide a detailed briefing for all personnel assigned to the Incident ~ Document briefings on unit log ~ Use Risk Management Process in evaluating all assignments ~ Explain leadership responsibilities and expectations from all personnel assigned to task~ Determine hazards, and mitigation protocol to limit exposure. ~ Review 215a~ Discuss weather, fire behavior, Escape Routes, Safety Zones~ Discuss communication plan including all tactical, aerial, and command frequencies~ Discuss Emergency Plan outlined in the ICS-206 WF Medical Plan

MEDICAL PLAN (ICS 206 WF)

Special Medical Emergency Procedures for remote locations and night shift:

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

Incident Operations Driving

These standards address driving by personnel actively engaged in wildland fire or all-hazards response activities, including driving while assigned to a specific incident or during initial attack fire response (includes time required to control the fire and travel to a rest location). In the absence of more restrictive agency policy, these guidelines will be followed during mobilization and demobilization as well. Individual agency driving policies shall be consulted for all other non-incident driving.

Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty-day.

- No driver will drive more than 10 hours (behind the wheel) within any duty-day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
- A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift.

Exception to the minimum off-duty hour requirement is allowed when essential to:

- Accomplish immediate and critical suppression objectives, or
- Address immediate and critical firefighter or public safety issues.

As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hours work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
