HIRZ FIRE

CA-SHF-001223 P5L2ZM (0514)

INCIDENT ACTION PLAN

DAY SHIFT AUGUST 31, 2018 / 0600 - 1800

NIGHT SHIFT

AUGUST 31 - SEPTEMBER 01, 2018 / 1800 - 0600

FIRE INFORMATION # (530) 628-0039

INCIDENT MAPS

1. Incident Name 2. Date 3. Time INCIDENT OBJECTIVES HIRZ FIRE 08/30/18 2100

5. General Control Objectives for the Incident (include alternatives)

Leader's Intent

Day / Night Shifts

0600 - 0600

A full suppression strategy will be implemented for the Hirz Fire through a combination of direct and indirect tactics. Efforts will be made to minimize fire spread and severity across private timberlands and structures through the application of well-planned tactical responses.

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure, and commercial timberlands while working with READs to reduce negative impacts to cultural/sensitive sites.
- Establish and strengthen cooperator, partner, and stakeholder relationships

August 31 – September 01, 2018

• Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

Keep the Hirz Fire:

4. Operational Period:

- North of Gilman Road to protect private residences and property to the south.
- South of Tom Neal Creek Road to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area.
- East of Middle Salt Creek to Green Mountain to North Fork Salt Creek to protect private property and infrastructure values in and around the Interstate 5 corridor.
- West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake to protect
 private timberlands, natural resource values, including northern spotted owl habitat and recreation
 infrastructure.

6. Weather Forecast for Period:

WEATHER DISCUSSION...A weak upper level trough of low pressure will pass over the fire area this morning bringing some clouds, but a trend towards warmer and drier conditions will take place this afternoon. Temperatures will be up 2-4 degrees and humidities down 4-8 percent. Inversion should break a little earlier than the past couple of days. Humidity recoveries tonight will not be as high as the past two nights and note that ridgetop winds will become northeast after 2400. Noticeably warmer and drier conditions will develop for Saturday and Sunday and poor to fair humidity recoveries are expected Saturday night and Sunday night which will allow for a longer burning period.

7. General Safety Message:

Labor Day Weekend!!!

Labor Day marks the official last holiday weekend of summer. Friday will begin the start of the Labor Day weekend. Expect an increase of population in the towns, recreational areas and surrounding roads. Many people will be traveling the roads that may not be familiar with mountain driving. There will be large increases of activity in recreational areas, including surrounding lakes, rivers, creeks and forest. Please, slow down when driving and be watchful for public, forest visitors, children, OHV riders and hunters.

INPUTS

WEATHER SUMMARY: See attached weather summary in the Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL: A Fuels and Fire Behavior Advisory is still effect for heavier than normal grass and low fuel moistures. The fire is burning in mixed brush and timber stands with timber litter and timber slash. The fire should become active sooner in the day as the inversion lifts earlier. With the warmer temperatures and drier air, expect to see an increase in single and group tree torching. Smoke will still hold in the drainages overnight but will clear out sooner. The inversion layer and higher humidity's set in later, limiting fire spread after about 2300 hours.

SPECIFIC:

Fuel Type		Rate of Spre feet per mind Day			Flame Lengt (in feet) Day	th Night	Spo Distand Day	Probability of Ignition (%) Day Night		
	Head	33-54	6-21	Head	10-13	5-7	Tree: .12	Night Tree: .12		
Brush	Flank	4-8	4-5	Flank	4-5	3-4			72	21
	Backing	2-3	2-3	Backing	2-4	2-3	Wind: .23	Wind: .12		
Timber	Head	4-8	2-6	Head	4-6	3-5	Tree: .12	Tree: .1		
Understory & Litter	Flank	2-3	>1-1	Flank	2-3	1-2	2		72	21
	Backing	1-2	>1-1	Backing	1-2	>1-2	Wind: .1-,2	Wind: .1	ė	

Branch I

DIV A/B: No control problems expected continue to patrol and watch for rollout into the receptive fuels.

DIV F: No control problems expected, continue to monitor interior for fuels burning out.

DIV T: Fire will be active in the logging slash, and be more receptive to spotting.

Branch III

DIV U: As the fire crosses the drainage below DP 68, expect the fire to increase in activity on the south facing slopes and favored ridges.

DIV W: Potential rollout may increase the chances for slope reversal as the fire backs down the northwest slope into the drainage below the control line.

Branch V

DIV Y: The fire continues to back off the ridge into the Tom Dow Creek, but should be mostly sheltered from the winds. **DIV Z:** No control problems expected, continue to monitor interior for fuels burning out.

Contingency Branches

DIV NN/OO/RR: If fire crosses the McCloud River, upslope runs can be expected.

DIV XX: No expected fire impacts.

AIR OPERATIONS: The inversion will lift sooner, allowing for air operations to commence earlier.

- Common terminology is critical in our communication with each other.
- Definition: Spot Fire A fire outside the perimeter of the main fire by rolling or flying sparks or embers.
- Definition: Flare Up Any sudden acceleration of fire spread or intensification of a fire.

1. Incident Name: Branch: Division/Group: HIRZ 2. Safety Message

INCIDENT NAME: Hirz Fire CA-SHF-001223

OPERATIONAL PERIOD: Day* Night 8/31-9/1

Labor Day Weekend!!!

Labor Day marks the official last holiday weekend of summer. Friday will begin the start of the Labor Day weekend. Expect an increase of population in the towns, recreational areas and surrounding roads. Many people will be traveling the roads that may not be familiar with mountain driving. There will be large increases of activity in recreational areas, including surrounding lakes, rivers, creeks and forest. Please, slow down when driving and be watchful for public, forest visitors, children, OHV riders and hunters.

Risk Management

"Risk management doesn't get in the way of doing the mission - it is the way we do the mission."

Being alert of existing and new hazards is critical during all phases of the fire. Mitigations are constantly made during suppression, mop-up, patrol, and repair work. It is important that we stay on top of the risks involved in our actions throughout the day. Use the following process to quickly assess risk for the situations you face throughout the day.

<u>Step 1</u> - Identify the hazards. Make this an ongoing, continuous process in your daily decision making routine. Gather as much information as possible.

<u>Step 2</u> - Assess the risk levels. The probability and severity of an undesirable outcome linked to identified hazards = RISK.

<u>Step 3</u> - Analyze and select control or mitigation measures. <u>Limiting exposure is almost always an option.</u>

Step 4 - Reassess risk level with controls in place (residual risk).

Step 5 - Make your risk informed decision based on the residual risk. Ask the **risk vs. gain** question - is the benefit of the action I'm considering worth the risk I'll be taking?

Step 6 - Monitor the situation

USE THE RISK MANAGEMENT PROCESS PRIOR TO STARTING OPERATIONS AND AS THEY CHANGE THROUGHOUT THE DAY.

Safety of Firefighters and the Public is Our First Priority!

Team 5 Safety Officers:

Charlotte Jordan ,Brian Savage , Jeremy Lawson (T)

Charlotte Jolan SOFI

Hirz Fire Risk Analysis 215A CA-SHF-001223 - August 31-Sept 1, 2018

11112	FIFE RISK Affaiysis 215A	CA-SHF-001223 - August 31-Sept 1, 2018
Location	Hazard	Control or Abatement Action
All	Air Operations	~ Follow "Aviation Watch-Out Situations" in IRPG,pg 46 ~ Don't plan on air resources for medical transport or resupply. Visibility may be impaired. Have a backup plan. ~ Refer to IRPG, pg 46, for directing bucket drops. ~ Ensure positive communication with all air resources. ~ Keep personnel out of drop zones. ~ Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.
All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Post lookouts, or use a spotter in mop-up areas with personnel ~ Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events~ Post road guards when appropriate
Branch I and Branch III, Branch V	Power and Utilities	~ Notify all personnel of down electrical lines.~ Refer to the IRPG pages 24-25 for Power Line Safety~ Always treat downed wires as energized~ Identify and avoid high tension transmission lines. ~ Identify and avoid high pressure natural gas lines~ Identify and avoid damaged gas service near structures~ Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	* Share weather observations and IMET updates with all personnel assigned to division* Establish "Decision Points" to withdraw * Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone)* Use "Risk Management" process prior to taking action, refer to IRPG (2014) pg.1 Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift* Factor in drought conditions and local ERC prior to operations*
All	Engagement in a tree mortality area	~ Carefully evaluate values at risk and need for exposure ~ Maintain appropriate clearance distance from hazard trees ~ Be alert for overhead hazards that may fall ~ Disengage operations at dark in areas of tree mortality ~ Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities~ Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re- engaging~ Establish decision points for disengagement
All	Fatigue, overexertion, dehydration and heat related illness	~ Drink fluids throughout operational period (water and Gatorade) not energy drinks ~ Set a reasonable work pace and allow adequate rest breaks * Follow work / rest guidelines ~ Use buddy system to monitor personnel for heat related and fatigue issues~ For Heat Related Injuries refer to IRPG page109
All	Steep Terrain & Rolling Debris	~ Maintain 8'-10' spacing when working & walking ~ Don't work directly above or below any personnel ~ Evaluate necessity to send personnel in areas with limited access
All	Driving & Traffic	~ Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool~ Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps ~ Use spotters when backing~ Honk horn to alert personnel when backing ~ Always use headlights ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill ~ Seat Belts are mandatory ~ No texting while driving ~ Watch for opposing traffic that may cross over into your lane on narrow winding roads~ Watch for falling rocks and debris on roadways in steep canyon areas of the fire ~ Use extra precautions when driving in congested areas
All	Communications	~ Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources~ Utilize Human repeaters where needed
All	Firefighter & Public Smoke Exposure	~ Use warning lights and provide traffic control on roadways during smoky and night operations~ Rotate crews out of smoky areas during firing and mop-up operations * Utilize smoke monitoring equipment and Air resource advisors

Branch I and Branch III, Branch V	Heavy Equipment Operations	~ Ensure communications are established with operator prior to work ~ Maintain identified safety exclusion area around equipment, IRPG, pg 86 ~ Before approaching; make eye contact with operator and wait for blade placement on ground ~ Avoid working below equipment where rolling material could jeopardize safety ~ Before transporting equipment identify low hanging wires and ensure there is clearance
All	Night Operations	~ Maintain high visibility in work area near roadways. ~ Use glow sticks to mark hazards. ~ Watch for signs of fatigue ~ Scout and evaluate all areas of work prior to engagement ~ Watchout Situation – In country not seen in daylight
All	Uninformed on Strategy / Tactics / hazards	~ Provide a detailed briefing for all personnel assigned to the Incident ~ Document briefings on unit log ~ Use Risk Management Process in evaluating all assignments ~ Explain leadership responsibilities and expectations from all personnel assigned to task~ Determine hazards, and mitigation protocol to limit exposure. ~ Review 215a~ Discuss weather, fire behavior, Escape Routes, Safety Zones~ Discuss communication plan including all tactical, aerial, and command frequencies~ Discuss Emergency Plan outlined in the ICS-206 WF Medical Plan
Branch I and Branch III, Branch V	Fireline Hazards and Mop Up	* Do not work directly above or below personnel during mop-up operations* Identify and make known burning stumps or roots that may cave In * Wear appropriate PPE* Watch for falling, rolling debris on steep slopes* Call out to crew personnel that may be affected by sudden rolling debris or rocks* For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall* Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking
All	Chain Saw Operations	~ Only fell and buck trees within your expertise, and training ~ Look up, down, & around for hazard tree indicators: trees burning for long periods of time,dead,broken,or burnt out tops and limbs overhead~ Follow "Procedural Felling Operations" IRPG page 85 ~ Do not fall trees during high wind events~ Use precautionary measures when re-fueling saws to prevent "fuel geysering"
All	Environmental Hazards	~ Be alert for rattlesnakes, watch footing and hand placement around rocks~ Check yourself for ticks, watch for bees and other insects that bite~ Watch out for livestock and wildlife inside fire area and along roadways.~Practice Bear Avoidance- Clean up all debris and trash during each operational period * Stay alert for mountain lions in areas of work ~ Be aware of poison oak and avoid or use proper hygiene if exposed.
Branch I and Branch III, Branch V	Firing Operations & Devices	~ Only personnel trained in the use of each device will be authorized to use firing equipment.~ Ensure all personnel are aware of firing operation that may affect them.~ Wear appropriate PPE. ~ Ensure aerial and ground ignition plans have been adequetly developed and personnel are briefed.
Division Z	Chipper Operations	~ Block chipper tires when unhooked from towing vehicle and insure full extension of support leg.~ When working in roadway use warning systems for traffic.~ Check all safety shutdowns to be sure they are working properly.~ Check direction of discharge. Make sure discharge is pointed away from work areas or roadways. Position down-wind if possible.~ Never operate chipper alone.~ Never reach into the infeed shroud. Feed short material on top of longer material or lay short pieces on the infeed tray and push into chipper with long branches or long piece of wood. Do not use rakes or shovels to push material into feeder. Check material for rocks before feeding into chipper.~ Do not use your hand or feet to push material into feeder.~ Hard hat, eye protection, gloves, and ear protection will be worn at all times when working near chipper.~ Review JHA with workers
Branch III, Branch V	Masticator	* Require crewmembers to maintain a safe distance of 300 ft. from the equipment * Have suppression crew nearby with water in case friction or sparks ignite woody debris

Special Medical Emergency Procedures for remote locations and night shift:

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP. Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate recourses to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following

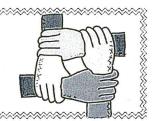

- 1. Determine the nature of the emergency.
- 2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green** (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).
- 3. If the injury is life threatening, then clear designated frequency for emergency traffic.
- 4. Identify the on-scene point of contact by position.
- 5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
- 6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
- 7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
- 8. Identify preferred method of patient transport. Ground or Air.
- 9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not

FINANCE MESSAGE

COMPENSABLE MEAL BREAKS

THE EXCEPTION NOT THE RULE

Time for a meal period is not compensable if the employee is not required to perform substantial duties. When an employee's time and attention is primarily occupied by a private pursuit such as eating a meal, then the employee is completely relieved from duty and is not entitled to compensation. A minimum of a 30 minute break for shifts of 8 hours or more must be taken. (Sitting in the dining area eating is considered non-compensable)

Personnel on the fireline may be compensated for their meal period if <u>all</u> of the following conditions are met:

- The fire is not controlled, and
- The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and
- The compensable meal break is approved by the supervisor at the next level and it is documented with a justification written in the remarks section on the CTR.

Time spent eating during travel interruptions is non-compensable.

Example: Eating while waiting in an airport or stopping at a restaurant, it must be shown as a break on the CTR. Time spent eating while traveling in a plane, bus, or other vehicle is compensable.

TRAINING MESSAGE

HIRZ INCIDENT CA-SHF-001223

TRAINEES!!!!

THE INCIDENT TRAINING SPECIALIST IS CURRENTLY LOCATED AT THE McCLOUD CAMP LOCATION.

ANY TRAINEES ASSIGNED TO THE SHASTA DAM CAMP LOCATION PLEASE SEE ASSIGNED PLANS CHIEF FOR A TRAINEE DATA FORM.

PLEASE GET CHECKED IN WITH TRAINING TO ENSURE PROPER CREDIT FOR YOUR TRAINING ASSIGNMENT.

Thank you

Incident Training Specialist (Team 5)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

CONTACT	COMMUNICATIONS	6 / DISPATCH (Verify correct frequency prior to starting	report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

		ononty patient, unconscious, struck Smith is providing medical care."	by a failing tree. Reque	sting air ambulance to Fo	rest Road 1 at (Lat./Long.) This will be the Trout	
And the property of the control of t	ity of Emergency / Transport Priority RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.					
Nature of Inju & Mechanisn					Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)	
Transport	Request				Air Ambulance / Short Haul/Hoist Ground Ambulance / Other	
Patient L	ocation			ı	Descriptive Location & Lat. / Long. (WGS84)	
Incident	t Name				Geographic Name + "Medical" (Ex: Trout Meadow Medical)	
On-Scene Incide	ent Commander				Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)	
Patien	t Care				Name of Care Provider (Ex: EMT Smith)	
3. INITIAL PATIE	NT ASSESSMENT	: Complete this section for each patie	ent as applicable (start with	the most severe patient)		
Patient Assessmen	nt: See IRPG page	: 106				
Treatment:						
4. TRANSPORT P	LAN:			200 E-10 Part (201-100)		
Evacuation Location	on (if different): (De	escriptive Location (drop point,	intersection, etc.) or l	.at. / Long.) Patient's	ETA to Evacuation Location:
