HIRZ FIRE

CA-SHF-001223 P5L2ZM (0514)

INCIDENT ACTION PLAN

DAY SHIFT SEPTEMBER 01, 2018 / 0600 - 1800

NIGHT SHIFT SEPTEMBER 01 – 02, 2018 / 1800 – 0600

FIRE INFORMATION # (530) 628-0039

INCIDENT MAPS

•			

1. Incident Name 2. Date 3. Time HIRZ FIRE 08/31/18 2100 **INCIDENT OBJECTIVES** September 01 – 02, 2018 Day / Night Shifts 0600 - 0600 4. Operational Period: 5. General Control Objectives for the Incident (include alternatives) Leader's Intent A full suppression strategy will be implemented for the Hirz Fire through a combination of direct and indirect tactics. Efforts will be made to minimize fire spread and severity across private timberlands and structures through the application of well-planned tactical responses.

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure, and commercial timberlands while working with READs to reduce negative impacts to cultural/sensitive sites.
- Establish and strengthen cooperator, partner, and stakeholder relationships
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

Control Objectives

Keep the Hirz Fire:

- North of Gilman Road to protect private residences and property to the south.
- South of Tom Neal Creek Road to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area.
- East of Middle Salt Creek to Green Mountain to North Fork Salt Creek to protect private property and infrastructure values in and around the Interstate 5 corridor.
- West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake to protect
 private timberlands, natural resource values, including northern spotted owl habitat and recreation
 infrastructure.

6. Weather Forecast for Period:

<u>WEATHER DISCUSSION</u>...Warmer and drier conditions will continue over the fire area today. Temperatures will be about 5 degrees warmer than Friday and relative humidities down 6 to 8 percent. Ridgetop winds are expected to be northeast today and continue from that direction through tonight before switching back to the southwest after 1200 on Sunday. Elsewhere winds will mainly be terrain driven. Poor to fair humidity recoveries are expected tonight, which will expand the burn period deeper into the night with relative humidity recovering only in the 40 percent range. Slightly warmer and drier conditions are expected for Sunday. Both Saturday and Sunday the inversion will be more shallow, around 2000 feet, and is expected to break around 1100. Mixing heights will also be higher both days and with slightly more unstable conditions, the potential for smoke to become more vertical increases.

7. General Safety Message:

Major Hazards and Risks:

Transportation- Drive defensively with lights on. Know the travel plan within the Branches.

Steep Terrain-Watch your footing on steep slopes and rough ground. High risk of rolling rocks.

Hazard Trees-Check both green and burned trees for signs of weakness, rot and damaged roots.

Complacency-Many hazards still exist; stay focused on the task at hand.

Fire Behavior-Post lookouts, disengage early and know your escape routes safety zones.

Dehydration-Continue to drink fluids, 1 quart per hour minimum. Supplement with Gatorade.

Air Operations-Multiple aircraft, bucket drops, visibility, and communications.

Heavy Equipment-Make sure the operator can see you approaching. Do not work downhill from equipment.

	Heavy Equipment-Make sure the operator can see you approaching. Do not work downfill from Equipment.

ICS 203 NFES 1327

FIRE WEATHER FORECAST

FORECAST NO. 20

CWR.....0 percent.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 33	TYPE OF FIRE: Wildfire
FIRE NAME: Hirz Fire	OPERATIONAL PERIOD: 09/01/18 0600-0600
DATE ISSUED: August 31, 2018	TIME ISSUED: 20:00
UNIT: CA-SHF-0001223	SIGNED:
	Typed/printed: Jeff Shelton (LTAN)

INPUTS

WEATHER SUMMARY:

*** Warmer and Dryer, New Change of Wind Direction***

Building high pressure north of the region will bring changes to the general airflow over the fire area. Anticipate poorer RH recoveries for the next several burn periods. Into next week, stable conditions will promote Southwest flow aloft and terrain driven surface winds.

Max. Daytime Temperatures- 78-83 degrees
Min. Nighttime Temperatures- 53-58 degrees

Min. Daytime Humidity- 15 to 20% Max. Overnight Humidity- 44-48%

Winds- Day: Northeast surface flow 3-6 mph, *GUSTING* up to 15 mph along ridgetops **Night**: Northeast flow overnight; reinforcing diurnal Downslope/Downcanyon

LOW LEVEL INVERSION BREAKING AROUND 1100...EXPECT A CHANGE TO BURNING CONDITIONS!

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Expect fine fuels to quickly become, and remain, receptive. Brush will follow closely behind...
- The fire is established within areas of large surface fuels. Resistance to control is high...
- Any tree torching is significant. A torching tree and 80% P(IG) don't mix.....
- Backing fire is consuming all fuels COMPLETELY; identify all your areas of slope reversal...
- Very, very steep topography will focus the energy released by fire on your division.....
- Persistently low relative humidity will support spotting early AND throughout the shift.....
- Steep terrain will foster rollout as heavy fuels are weakened by deep seated fire....

SPECIFIC:

All Divisions: Expect an earlier start to active fire...And extended burning into the night!

Flame Lengths- 3 to 6 ft. in Grass/Litter/Understory, Up to 20 ft. in Brush...

Rate of Spread- Up to (6 ft./min. Litter/Understory)....(60 ft./min. in Grass)....(50 ft./min in Brush).....

Spotting Distances- Downwind; Up to .1 miles in Grass/Brush, Up to .2 miles in Timber (Torching)

Probability of Ignition- Increasing to 80% at the peak of the burn period, down to <30% overnight

AIR OPERATIONS: Sunrise: 06:34 Sunset: 19:41

Expect poor smoke dispersion during the morning hours with the inversion breaking up before noon. Mixing heights will then rapid rise to 11,000'. Anticipate terrain induced turbulence in areas with complex terrain; especially where drainages intersect.

SAFETY

Base All Actions on Current..... AND Expected Fire Behavior!

Plan Ahead...."Hope is Not a Tactic"!!

## **SAFETY MESSAGE**

## Safety starts with YOU!!!

INCIDENT: HIRZ FIRE DATE: September 1-2, 2018 Day & Night Shift

## Major Hazards and Risks:

Transportation- Drive defensively with lights on. Know the travel plan within the Branches.

Steep Terrain-Watch your footing on steep slopes and rough ground. High risk of rolling rocks.

Hazard Trees-Check both green and burned trees for signs of weakness, rot and damaged roots.

Complacency-Many hazards still exist; stay focused on the task at hand.

Fire Behavior-Post lookouts, disengage early and know your escape routes safety zones.

Dehydration-Continue to drink fluids, 1 quart per hour minimum. Supplement with Gatorade.

Air Operations-Multiple aircraft, bucket drops, visibility, and communications.

Heavy Equipment-Make sure the operator can see you approaching. Do not work downhill from equipment.

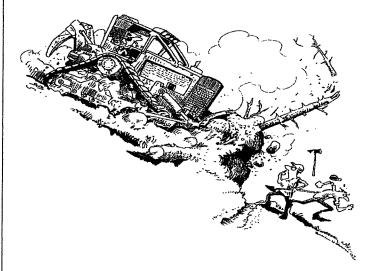

Fire Order of the Day - R emain in communications with crew, supervisor and adjoining forces

# **Fight Complacency**

- One common reason for firefighter injury is when the firefighter throws her/his mind into neutral and doesn't think about the work they are doing. Couple this with fatigue, and you really have a "WATCHOUT."
- There's a difference in between **just** getting the job done, versus getting the job done when **MENTALLY ENGAGED**.

So with that, when working keep your mind engaged and attentive to the task. Continually ask yourself if you are doing the job safely, the way you were trained. Keep an eye on your co-workers too. If you see them doing something that is unsafe, **YOU NEED TO SAY SOMETHING**.

# Watch Out Situation of the Day

5. UNINFORMED ON STRATEGY, TACTICS AND HAZARDS

# **Directing Helicopter Bucket Drops**

- ⇒Give general location on the incident.
- ⇒Finalize location with: Clock direction straight in front of the aircraft is 12 o'clock, out the right door is 3 o'clock, the tail is 6 o'clock and the left door is 9 o'clock. When giving directions, remember that helicopters generally orbit in a clockwise pattern; Describe prominent landmarks don't say "I'm wearing a yellow shirt", "I'm by a big tree", etc. Use a signal mirror (a compass works fine) or a 2-3 foot piece of flagging tied to a long stick. Stand in drop location (when safe) for ID, then move away before the drop.

Incident Safety Officers: Brian Savage, Charlotte Jordan, & Jeremy Lawson(t) Charlotte Jordan Soft

Hirz Fire Risk Analysis 215A CA-SHF-001223 - September 1-2, 2018

- 111	I I I I I I I I I I I I I I I I I I I	CA-3HF-001223 - September 1-2, 2018
Location	Hazard	Control or Abatement Action
All	Air Operations	~ Follow "Aviation Watch-Out Situations" in IRPG, page 46
All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22     ~ Post lookouts, or use a spotter in mop-up areas with personnel     ~ Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events~ Post road guards when appropriate
Branch I and Branch III, Branch V	Power and Utilities	~ Notify all personnel of down electrical lines ~ Refer to the IRPG pages 24-25 for Power Line Safety~ Always treat downed wires as energized~ Identify and avoid high tension transmission lines. ~ Identify and avoid high pressure natural gas lines~ Identify and avoid damaged gas service near structures~ Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	* Share weather observations and IMET updates with all personnel assigned to division* Establish "Decision Points" to withdraw * Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone)* Use "Risk Management" process prior to taking action, refer to IRPG (2014) pg.1 Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift* Factor in drought conditions and local ERC prior to operations*
All	Engagement in a tree mortality area	~ Carefully evaluate values at risk and need for exposure ~ Maintain appropriate clearance distance from hazard trees ~ Be alert for overhead hazards that may fall ~ Disengage operations at dark in areas of tree mortality ~ Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities~ Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re- engaging~ Establish decision points for disengagement
All	Fatigue, overexertion, dehydration and heat related illness	~ Drink fluids throughout operational period (water and Gatorade) not energy drinks ~ Set a reasonable work pace and allow adequate rest breaks * Follow work / rest guidelines ~ Use buddy system to monitor personnel for heat related and fatigue issues~ For Heat Related Injuries refer to IRPG page109
All	Steep Terrain & Rolling Debris	~ Maintain 8'-10' spacing when working & walking ~ Don't work directly above or below any personnel ~ Evaluate necessity to send personnel in areas with limited access
All	Driving & Traffic	~ Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool~ Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps ~ Use spotters when backing~ Honk horn to alert personnel when backing ~ Always use headlights ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill ~ Seat Belts are mandatory ~ No texting while driving ~ Watch for opposing traffic that may cross over into your lane on narrow winding roads~ Watch for falling rocks and debris on roadways in steep canyon areas of the fire ~ Use extra precautions when driving in congested areas
All	Communications	~ Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources~ Utilize Human repeaters where needed
All	Firefighter & Public Smoke Exposure	Use warning lights and provide traffic control on roadways during smoky and night operations~ Rotate crews out of smoky areas during firing and mop-up operations * Utilize smoke monitoring equipment and Air resource advisors

Branch I and Branch III, Branch V	Heavy Equipment Operations	~ Ensure communications are established with operator prior to work ~ Maintain identified safety exclusion area around equipment, IRPG, pg 86 ~ Before approaching; make eye contact with operator and wait for blade placement on ground ~ Avoid working below equipment where rolling material could jeopardize safety ~ Before transporting equipment identify low hanging wires and ensure there is clearance
All	Night Operations	~ Maintain high visibility in work area near roadways. ~ Use glow sticks to mark hazards. ~ Watch for signs of fatigue ~ Scout and evaluate all areas of work prior to engagement ~ Watchout Situation – In country not seen in daylight
All	Uninformed on Strategy / Tactics / hazards	~ Provide a detailed briefing for all personnel assigned to the Incident ~ Document briefings on unit log ~ Use Risk Management Process in evaluating all assignments ~ Explain leadership responsibilities and expectations from all personnel assigned to task~ Determine hazards, and mitigation protocol to limit exposure. ~ Review 215a~ Discuss weather, fire behavior, Escape Routes, Safety Zones~ Discuss communication plan including all tactical, aerial, and command frequencies~ Discuss Emergency Plan outlined in the ICS-206 WF Medical Plan
Branch I and Branch III, Branch V	Fireline Hazards and Mop Up	* Do not work directly above or below personnel during mop-up operations* Identify and make known burning stumps or roots that may cave In * Wear appropriate PPE* Watch for falling, rolling debris on steep slopes* Call out to crew personnel that may be affected by sudden rolling debris or rocks* For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall* Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking
All	Chain Saw Operations	~ Only fell and buck trees within your expertise, and training ~ Look up, down, & around for hazard tree indicators: trees burning for long periods of time,dead,broken,or burnt out tops and limbs overhead~ Follow "Procedural Felling Operations" IRPG page 85 ~ Do not fall trees during high wind events~ Use precautionary measures when re-fueling saws to prevent "fuel geysering"
All	Environmental Hazards	~ Be alert for rattlesnakes, watch footing and hand placement around rocks~ Check yourself for ticks, watch for bees and other insects that bite~ Watch out for livestock and wildlife inside fire area and along roadways.~Practice Bear Avoidance- Clean up all debris and trash during each operational period * Stay alert for mountain lions in areas of work ~ Be aware of poison oak and avoid or use proper hygiene if exposed.
Branch I and Branch III, Branch V	Firing Operations & Devices	~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Ensure all personnel are aware of firing operation that may affect them. ~ Wear appropriate PPE. ~ Ensure aerial and ground ignition plans have been adequetly developed and personnel are briefed.
Division Z Group 1	Chipper Operations	~ Block chipper tires when unhooked from towing vehicle and insure full extension of support leg. ~ When working in roadway use warning systems for traffic. ~ Check all safety shutdowns to be sure they are working properly.~ Check direction of discharge. Make sure discharge is pointed away from work areas or roadways. Position down-wind if possible. ~ Never operate chipper alone. ~ Never reach into the infeed shroud. Feed short material on top of longer material or lay short pieces on the infeed tray and push into chipper with long branches or long piece of wood. Do not use rakes or shovels to push material into feeder. Check material for rocks before feeding into chipper. ~ Do not use your hand or feet to push material into feeder. ~ Hard hat, eye protection, gloves, and ear protection will be worn at all times when working near chipper.~ Review JHA with workers
Branch III, Branch V	Masticator	* Require crewmembers to maintain a safe distance of 300 ft. from the equipment * Have suppression crew nearby with water in case friction or sparks ignite woody debris

Special Medical Emergency Procedures for remote locations and night shift:

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP. Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate recourses to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

- 1. Determine the nature of the emergency.
- 2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. <u>Green</u> (Non-Life Threatening), <u>Yellow</u> (Serious Injury/Illness), <u>Red</u> (Life Threatening Injury/Illness).
- 3. If the injury is life threatening, then clear designated frequency for emergency traffic.
- 4. Identify the on-scene point of contact by position.
- 5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
- 6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
- 7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
- 8. Identify preferred method of patient transport. Ground or Air.
- 9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

# Human Resource Message

# Fatigue can lead to miscommunication and shorter tempers which can lead to interpersonal problems.

Fighting fatigue is a team effort. Don't allow it to creep in while you aren't looking. Stay vigilant and ensure that those that work for you and with you are remaining vigilant with as well.

Andrea Cabida HRSP 707-330-9939 Michelle Hale HRSP(T) 619-813-4202

# FINANCE MESSAGE

### **CLAIMS**

If you have lost or damaged property/equipment while on the incident, there are several types of claims that can be filed, depending on whether it is government property or personal property. Refer to the Interagency Incident Management Handbook under Chapter 30 and Chapter 70 for the proper procedures and forms to use.

## Things to keep in mind:

- 1. Take a picture. A picture is worth a thousand words they say! Do it from a couple of different angles.
- 2. If there are any witnesses to the incident make sure you get their names and phone numbers. Getting a witness statement is your responsibility.
- 3. Document the circumstances. The user of the property must describe the circumstances of the loss or damage on the proper form. If you are not sure of the form to use, stop by comp/claims to find out.
- 4. Tell your supervisor and Division Supervisor as soon as possible about the situations and damage.
- 5. Bring the damage property into Supply, Communications, or Ground Support/Mechanics, so they can help you in determining the best method of replacement and if repairing on incident is possible.
- 6. Don't wait until you are demobing to come in and see us in Comp/Claims. It sometimes takes a few days to process your requests.

For Federal claims Contact Elaine Downing @ 916-591-9031 For CalFire contact Dave Reese @ 916-765-6169

## Local Government Resources on CFAA

If you are demobing from this incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

# OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT
