**P5L2ZM (0514)**

## **INCIDENT ACTION PLAN**

**DAY SHIFT**

**SEPTEMBER 02, 2018 / 0600 - 1800**

**NIGHT SHIFT**

**SEPTEMBER 02 - 03, 2018 / 1800 - 0600**

**FIRE  
INFORMATION #  
(530) 628-0039**

INCIDENT MAPS

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>HIRZ FIRE</b>	2. Date 09/01/18	3. Time 2100
----------------------------	--------------------------------------	---------------------	-----------------

4. Operational Period: **September 02 – 03, 2018** Day / Night Shifts **0600 - 0600**

5. General Control Objectives for the Incident (include alternatives)

**Leader's Intent**

A full suppression strategy will be implemented for the Hirz Fire through a combination of direct and indirect tactics. Efforts will be made to minimize fire spread and severity across private timberlands and structures through the application of well-planned tactical responses.

**Management Objectives**

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure, and commercial timberlands while working with READs to reduce negative impacts to cultural/sensitive sites.
- Establish and strengthen cooperator, partner, and stakeholder relationships
- Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure.

**Control Objectives**

**Keep the Hirz Fire:**

- **North of Gilman Road** to protect private residences and property to the south.
- **South of Tom Neal Creek Road** to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area.
- **East of Middle Salt Creek to Green Mountain to North Fork Salt Creek** to protect private property and infrastructure values in and around the Interstate 5 corridor.
- **West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake** to protect private timberlands, natural resource values, including northern spotted owl habitat and recreation infrastructure.

6. Weather Forecast for Period:  
**WEATHER DISCUSSION...** Today will essentially be a repeat of Saturday. Temperatures will be slightly warmer than yesterday and relative humidities down about two percent. Humidity recoveries this morning are poor and poor humidity recoveries are expected tonight as well. This will allow for a longer burn period. Gusty northeast winds along the ridges will start the operational period with gusts 12-18 mph through 1100 before weakening. Note that ridgetop winds will become southwest after 1400. A shallow inversion will exist once again this morning, generally around 2000 feet, and should break around 1100. This will make for favorable conditions with respect to air operations. And higher mixing heights combined with an unstable atmosphere will lead to more smoke in the vertical once again.

7. General Safety Message:

**Major Hazards and Risks:**

**Communications-** Simply talking or conversing doesn't equal good communication. Does what you're talking about need to be communicated? What should you be talking about? Being an active listener is often the forgotten part of communication, but equally important. It's what makes communication a two-way street. Good communication is so important that it's part of LCES.

**Fatigue-** It's been an active season with time still left. Physical as well as mental fatigue are conditions that can be present at any time. Ensure that you aren't allowing your situation and decisions to be negatively affected by fatigue. Increased awareness to your situation will need to be present to ensure that you and those around you stay on the positive side of the safety curve.

# FIRE WEATHER FORECAST

FORECAST NO. 21

NAME OF FIRE: Hirz  
UNIT: Shasta Trinity National Forest

PREDICTION FOR Sunday September 2nd, 2018

TIME AND DATE

SIGNED: *Eric Evenson*  
Eric Evenson / Incident Meteorologist

FORECAST ISSUED: 1930 Saturday 09/01/18

**WEATHER DISCUSSION**... Today will essentially be a repeat of Saturday. Temperatures will be slightly warmer than yesterday and relative humidities down about two percent. Humidity recoveries this morning are poor and poor humidity recoveries are expected tonight as well. This will allow for a longer burn period. Gusty northeast winds along the ridges will start the operational period with gusts 12-18 mph through 1100 before weakening. Note that ridgetop winds will become southwest after 1400. A shallow inversion will exist once again this morning, generally around 2000 feet, and should break around 1100. This will make for favorable conditions with respect to air operations. And higher mixing heights combined with an unstable atmosphere will lead to more smoke in the vertical once again.

## TODAY...

Sky/weather.....Sunny, warmer, and drier. Areas of smoke. Inversion breaks after 1100.  
Max temperature.....80-85 ridgetops and 95-100 lower drainages.  
Min humidity.....14-18 percent ridges and 10-15 percent lower drainages.  
Wind (20 ft).....  
Slope/valley.....Downslope/Downvalley 3-5 mph until 1100, then upslope/upvalley 2-4 mph.  
Ridgetop.....Northeast winds 5 to 10 mph with gusts 12-18 mph until 1000. Winds becoming southwest after 1400 at speeds of 4 to 8 mph.  
Mixing height.....10,000 - 12,000 ft AGL.  
Transport winds.....Northeast 6 mph until 1000, then southwest 4 mph after 1400.  
CWR.....0 percent.  
LAL.....1.

## TONIGHT...

Sky/weather.....Clear. Areas of smoke. Inversion developing after 2100.  
Min temperature.....55-60 ridgetops, 60-65 lower drainages.  
Max humidity.....40-45 percent ridges and 43-47 percent lower drainages.  
Wind (20 ft).....  
Slope/valley.....Upslope 2-4 mph becoming downslope 2-4 mph after 2100.  
Ridgetop.....Southwest 4-8 mph with gusts to 12 mph until 2300, then North-Northeast at 5-10 mph and gusts to 15 mph after 0200.  
Mixing height.....Lowering to around 2000 ft AGL.  
Transport winds.....Southwest 5 mph until 2300, then Northeast around 7 mph.  
CWR.....0 percent.  
LAL.....1.

## MONDAY...

Sky/weather.....Continued sunny, warm and dry. Areas of smoke. Inversion breaks after 1100.  
Max temperature.....79-84 ridgetops and 94-99 lower drainages.  
Min humidity.....15-19 percent ridges and 11-16 percent lower drainages.  
Wind (20 ft).....  
Slope/valley.....Downslope/Downvalley 3-5 mph until 1100, then upslope/upvalley 2-4 mph.  
Ridgetop.....Northeast winds 5 to 10 mph with gusts to 15 mph until 1200. Winds becoming southwest at speeds of 4 to 8 mph after 1400.  
Mixing height.....10,000 - 12,000 ft AGL.  
Transport winds.....Northeast 6 mph until 1200, then southwest 4 mph after 1400.  
CWR.....0 percent.  
LAL.....1.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 34	TYPE OF FIRE: Wildfire
FIRE NAME: Hirz Fire	OPERATIONAL PERIOD: 09/02/18 0600-0600
DATE ISSUED: September 1, 2018	TIME ISSUED: 20:00
UNIT: CA-SHF-0001223	SIGNED: 
	Typed/printed: Jeff Shelton (LTAN)

## INPUTS

**WEATHER SUMMARY:** \*\*\* *Very Warm and Dry*\*\*\*  
Slow moving high pressure north of the region will maintain changes to the general airflow over the fire area. Expect declining RH recoveries to continue for the next several burn periods. By mid-week, stable conditions will promote persistent Southwest flow aloft and terrain driven surface winds.

Max. Daytime Temperatures- 85 to 95 degrees      Min. Daytime Humidity- 12 to 18%  
Min. Nighttime Temperatures- 53 to 58 degrees      Max. Overnight Humidity- 44 to 48%

Winds- Day: Northeast early, turning Southwest 4-8 mph, *GUSTS* to 14 mph along ridgetops until 1000  
Night: Northeast flow overnight; reinforcing diurnal Downslope/Downcanyon

***INVERSION BREAKING AROUND 1100...AIR FLOW WILL CHANGE BURNING CONDITIONS!***

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

- ***FDFM 3%***...All fuels (Grass, Brush, Timber) are now able to project their energy!...
- Firing operations have created multiple areas of underslung line...Plan accordingly!...
- Any tree torching is significant. A torching tree and 90% P(IG) don't mix!...
- Slow, intense backing fire is poised for slope reversal, identify and respect trigger points!...
- Very, very steep topography will focus the energy released by fire on your division.....
- Any spot fire has the ability to establish and grow quickly...Engage carefully!....
- Steep terrain will foster rollout as heavy fuels are continually weakened by deep seated fire....

#### SPECIFIC:

**All Divisions: *Poor RH recovery will support fire movement throughout the entire shift!***

**Flame Lengths-** 3 to 6 ft. in Grass/Litter/Understory, Up to 25 ft. in Brush...

**Rate of Spread-** Up to (6 ft./min. Litter/Understory)....(80 ft./min. in Grass)....(60 ft./min in Brush).....

**Spotting Distances-** Downwind; Up to .2 miles in Grass/Brush, Up to .3 miles in Timber (Torching)

**Probability of Ignition-** Increasing to **90%** at the peak of the burn period, down to <30% overnight

#### AIR OPERATIONS:

**Sunrise: 06:35**

**Sunset: 19:39**

Expect fair to good smoke dispersion during the morning hours with the inversion breaking up before noon. Mixing heights will then rapid rise to 12,000'. Anticipate terrain induced turbulence in areas with complex terrain; especially where drainages intersect.

## SAFETY

**Fire Moves Fastest Where You Move Slowest.....Identify Vulnerable Topography Early!**

***If You Stay Ready....You Don't Have to Get Ready!!***

# SAFETY MESSAGE

## MAKE it a Safe Day

INCIDENT: HIRZ FIRE

DATE: September 2-3, 2018 Day & Night Shift

### Major Hazards and Risks:

**Communications-** Simply talking or conversing doesn't equal good communication. Does what you're talking about need to be communicated? What should you be talking about? Being an active listener is often the forgotten part of communication, but equally important. It's what makes communication a two-way street. Good communication is so important that it's part of LCES.

**Fatigue-** It's been an active season with time still left. Physical as well as mental fatigue are conditions that can be present at any time. Ensure that you aren't allowing your situation and decisions to be negatively affected by fatigue. Increased awareness to your situation will need to be present to ensure that you and those around you stay on the positive side of the safety curve.

Fire Order of the Day – *Maintain prompt communications with your forces, your supervisor, and adjoining forces*

### Normalization of Deviance

- The concept that over time we deviate from the way we were taught to do something. Finding shortcuts to increase efficiency or get results. These shortcuts often come at the price of ensuring safety.
- It's not until we get hurt, fail, or have extreme consequences that we realize how far we've deviated from the correct and safe way to perform the task.

Don't let what you've "gotten away with" be your guide to future decisions and actions. This incident, like all others, is constantly changing. Make sure you are too!

### Watch Out Situation of the Day

16.GETTING FREQUENT SPOT FIRES  
ACROSS LINE

### Safe Driving Habits

- ⇒ Drive defensively at all times
- ⇒ Use your seatbelts
- ⇒ Follow posted speed limits
- ⇒ Lower speeds when off road
- ⇒ Increase following distances when on dirt roads
- ⇒ No cell phone use while driving
- ⇒ The California Vehicle Code still applies when assigned to an incident

Location	Hazard	Control or Abatement Action
All	Air Operations	<ul style="list-style-type: none"> <li>~ Follow "Aviation Watch-Out Situations" in IRPG, page 46</li> <li>~ Don't plan on air resources for medical transport or resupply. Visibility may be impaired. Have a backup plan.</li> <li>~ Refer to IRPG, pg 46, for directing bucket drops.</li> <li>~ Ensure positive communication with all air resources.</li> <li>~ Keep personnel out of drop zones.</li> <li>~ Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.</li> </ul>
All	Hazard Trees	<ul style="list-style-type: none"> <li>~ Follow "Hazard Tree Safety" guidelines, IRPG page 22</li> <li>~ Post lookouts, or use a spotter in mop-up areas with personnel</li> <li>~ Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events~ Post road guards when appropriate</li> </ul>
Branch I and Branch III, Branch V	Power and Utilities	<ul style="list-style-type: none"> <li>~ Notify all personnel of down electrical lines ~ Refer to the IRPG pages 24-25 for Power Line Safety~ Always treat downed wires as energized~ Identify and avoid high tension transmission lines.</li> <li>~ Identify and avoid high pressure natural gas lines~ Identify and avoid damaged gas service near structures~ Be aware of utility work under way in your work area</li> </ul>
All	Potential for Spotting and Severe Fire Behavior	<ul style="list-style-type: none"> <li>* Share weather observations and IMET updates with all personnel assigned to division* Establish "Decision Points" to withdraw * Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone)* Use "Risk Management" process prior to taking action, refer to IRPG (2014) pg.1 Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift* Factor in drought conditions and local ERC prior to operations*</li> </ul>
All	Engagement in a tree mortality area	<ul style="list-style-type: none"> <li>~ Carefully evaluate values at risk and need for exposure</li> <li>~ Maintain appropriate clearance distance from hazard trees</li> <li>~ Be alert for overhead hazards that may fall</li> <li>~ Disengage operations at dark in areas of tree mortality</li> <li>~ Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities~ Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging~ Establish decision points for disengagement</li> </ul>
All	Fatigue, overexertion, dehydration and heat related illness	<ul style="list-style-type: none"> <li>~ Drink fluids throughout operational period (water and Gatorade) not energy drinks ~ Set a reasonable work pace and allow adequate rest breaks * Follow work / rest guidelines</li> <li>~ Use buddy system to monitor personnel for heat related and fatigue issues~ For Heat Related Injuries refer to IRPG page109</li> </ul>
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> <li>~ Maintain 8'-10' spacing when working &amp; walking</li> <li>~ Don't work directly above or below any personnel</li> <li>~ Evaluate necessity to send personnel in areas with limited access</li> </ul>
All	Driving & Traffic	<ul style="list-style-type: none"> <li>~ Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool~ Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps ~ Use spotters when backing~ Honk horn to alert personnel when backing ~ Always use headlights ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill ~ Seat Belts are mandatory ~ No texting while driving ~ Watch for opposing traffic that may cross over into your lane on narrow winding roads~ Watch for falling rocks and debris on roadways in steep canyon areas of the fire ~ Use extra precautions when driving in congested areas</li> </ul>
All	Communications	<ul style="list-style-type: none"> <li>~ Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources~ Utilize Human repeaters where needed</li> </ul>
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> <li>~ Use warning lights and provide traffic control on roadways during smoky and night operations~ Rotate crews out of smoky areas during firing and mop-up operations * Utilize smoke monitoring equipment and -38- source advisors</li> </ul>

Branch I and Branch III, Branch V	Heavy Equipment Operations	<ul style="list-style-type: none"> <li>~ Ensure communications are established with operator prior to work</li> <li>~ Maintain identified safety exclusion area around equipment , IRPG, pg 86 ~ Before approaching; make eye contact with operator and wait for blade placement on ground ~ Avoid working below equipment where rolling material could jeopardize safety ~ Before transporting equipment identify low hanging wires and ensure there is clearance</li> </ul>
All	Night Operations	<ul style="list-style-type: none"> <li>~ Maintain high visibility in work area near roadways.</li> <li>~ Use glow sticks to mark hazards. ~ Watch for signs of fatigue</li> <li>~ Scout and evaluate all areas of work prior to engagement ~ Watchout Situation – In country not seen in daylight</li> </ul>
All	Uninformed on Strategy / Tactics / hazards	<ul style="list-style-type: none"> <li>~ Provide a detailed briefing for all personnel assigned to the Incident</li> <li>~ Document briefings on unit log ~ Use Risk Management Process in evaluating all assignments ~ Explain leadership responsibilities and expectations from all personnel assigned to task~ Determine hazards, and mitigation protocol to limit exposure. ~ Review 215a~ Discuss weather, fire behavior, Escape Routes, Safety Zones~ Discuss communication plan including all tactical, aerial, and command frequencies~ Discuss Emergency Plan outlined in the ICS-206 WF Medical Plan</li> </ul>
Branch I and Branch III, Branch V	Fireline Hazards and Mop Up	<ul style="list-style-type: none"> <li>* Do not work directly above or below personnel during mop-up operations* Identify and make known burning stumps or roots that may cave In * Wear appropriate PPE* Watch for falling, rolling debris on steep slopes* Call out to crew personnel that may be affected by sudden rolling debris or rocks* For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall* Scout areas for mop up prior to work * Maintain 8'-10' spacing when working &amp; walking</li> </ul>
All	Chain Saw Operations	<ul style="list-style-type: none"> <li>~ Only fell and buck trees within your expertise, and training</li> <li>~ Look up, down, &amp; around for hazard tree indicators : trees burning for long periods of time,dead,broken,or burnt out tops and limbs overhead~ Follow "Procedural Felling Operations" IRPG page 85</li> <li>~ Do not fall trees during high wind events~ Use precautionary measures when re-fueling saws to prevent "fuel geysering "</li> </ul>
All	Environmental Hazards	<ul style="list-style-type: none"> <li>~ Be alert for rattlesnakes, watch footing and hand placement around rocks~ Check yourself for ticks, watch for bees and other insects that bite~ Watch out for livestock and wildlife inside fire area and along roadways.~Practice Bear Avoidance- Clean up all debris and trash during each operational period * Stay alert for mountain lions in areas of work ~ Be aware of poison oak and avoid or use proper hygiene if exposed.</li> </ul>
Branch I and Branch III, Branch V	Firing Operations & Devices	<ul style="list-style-type: none"> <li>~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Ensure all personnel are aware of firing operation that may affect them. ~ Wear appropriate PPE.</li> <li>~ Ensure aerial and ground ignition plans have been adequately developed and personnel are briefed.</li> </ul>
Division Z Group 1	Chipper Operations	<ul style="list-style-type: none"> <li>~ Block chipper tires when unhooked from towing vehicle and insure full extension of support leg. ~ When working in roadway use warning systems for traffic. ~ Check all safety shutdowns to be sure they are working properly.~ Check direction of discharge. Make sure discharge is pointed away from work areas or roadways. Position down-wind if possible. ~ Never operate chipper alone. ~ Never reach into the infeed shroud. Feed short material on top of longer material or lay short pieces on the infeed tray and push into chipper with long branches or long piece of wood. Do not use rakes or shovels to push material into feeder. Check material for rocks before feeding into chipper. ~ Do not use your hand or feet to push material into feeder. ~ Hard hat, eye protection, gloves, and ear protection will be worn at all times when working near chipper.~ Review JHA with workers</li> </ul>
Branch III, Branch V	Masticator	<ul style="list-style-type: none"> <li>* Require crewmembers to maintain a safe distance of 300 ft. from the equipment</li> <li>* Have suppression crew nearby with water in case friction or sparks ignite woody debris</li> </ul>

## MEDICAL PLAN (ICS 206 WF)

Special Medical Emergency Procedures for remote locations and night shift:

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

8. Prepared By (Medical Unit Leader)	9. Date/Time	10. Reviewed By (Safety Officer)	11. Date/Time
Newton Ong / MEDL 	09/01/18 1900 	Charlotte Jordan / SOF1 	9/01/18 1900

## *Human Resource Message*

### **MUTUAL:**

possessed, experienced, performed, etc., by each of two or more with respect to the other; reciprocal

### **CONSIDERATION:**

thoughtful or sympathetic regard or respect; thoughtfulness for others

### **RESPECT:**

esteem for or a sense of the worth or excellence of a person, a personal quality or ability, or something considered as a manifestation of a personal quality or ability

Andrea Cabida HRSP 707-330-9939

Michelle Hale HRSP(T) 619-813-4202

## FINANCE MESSAGE

Per Interagency Fire Business Management Handbook Chapter 10:

Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty day:

### **Driving:**

- A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift.

**Work/Rest Guidelines** should be met on all incidents. Plan for and ensure all personnel are provided a minimum 2:1 work/rest ratio (for every 2 hours of work or travel, provide 1 hour of sleep and/or rest).

- If you work over 16 hours this must be justified and approved by the IC. All shifts that exceed 16 hours and those that do not meet 2:1 work/ratio must be justified. Justification will be documented in the daily incident records (CTR or letter). Documentation shall include mitigation measures used to reduce fatigue.

**For Federal Employees the end of the pay period is on Saturday, September 01, 2018. Due to the holiday please make sure to get your time in by the close of business on Tuesday, September 4, 2018. If you need to fax your time into your home unit please come in and see finance or put your fax number or email address at the bottom in the remarks section of your CTR with please send to home unit.**

# PUBLIC INFORMATION SECTION

Incident Information Line: (530) 628-0039

STATUS	
Incident Start Date: August 9, 2018	Incident Start Time: 1:55 AM
Incident Type: Wildfire	Cause: human, under investigation

**MEDIA**—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does *not* imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found by scanning the QR code (right).

409.5

**CAL FIRE SOCIAL MEDIA POLICY**—When assigned to a CAL FIRE incident, you will adhere FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Media Policy by scanning the QR code (right).

Social Media

**PHOTOGRAPHS AND VIDEOS OF INCIDENT**—We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone who has the capability to take video and photographs and post them to social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional, or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all who are attached to this incident. Posting an inappropriate video, photo, or blog comment could expose you to unwanted ramifications. It may be unsafe to shoot photos or video, and firefighters who are concentrating on a camera loses their situational awareness.

The Information Section would like copies of videos and pictures you safely took while not in an emergency situation, fire suppression activity, or in an overhead assignment. Bring your videos and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our social media sites.

**LOST AND FOUND**—The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, bring it to the Information Section with information about where you found it.

**MAIL SERVICE**—To receive mail, use the following address:

Hirz Fire  
Your name, Order #  
General Delivery  
McCloud, California 96057

## Local Government Resources on CFAA

If you are demobing from this incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief

The Incident keeps the Pink copy and you keep the Golden.  
The Original and Green you mail to OES Headquarters as per the  
instructions on the front of your F-42

## OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

**Questions?**

Name of division, position, assignment ....

# Where are you?

Division, Drop Point, Road .....

# What do you have?

Green, Yellow, Red injury or illness .....

# What do you need?

Agency, Ground Ambulance, Air Ambulance, Air Hoist

# MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> Ex: Unconscious, difficulty breathing, bleeding severely, 2 <sup>o</sup> – 3 <sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. Ex: Significant trauma, unable to walk, 2 <sup>o</sup> – 3 <sup>o</sup> burns not more than 1-3 palm sizes. <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. <b>Non-Emergency transport</b> Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient!)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND	CALCORD / Channel 13	156.0750	T-6	156.0750	T-6
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
