

HIRZ FIRE

CA-SHF-001223

P5L2ZM (0514)

INCIDENT ACTION PLAN

DAY SHIFT

SEPTEMBER 04, 2018 / 0600 - 1800

NIGHT SHIFT

SEPTEMBER 04 - 05, 2018 / 1800 - 0600

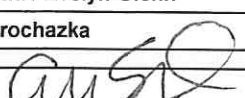

**FIRE
INFORMATION #
(530) 628-0039**

INCIDENT MAPS

INCIDENT OBJECTIVES	1. Incident Name HIRZ FIRE	2. Date 09/03/18	3. Time 2100
4. Operational Period: September 04 – 05, 2018 Day / Night Shifts 0600 - 0600			
<p>5. General Control Objectives for the Incident (include alternatives)</p> <p style="text-align: center;">Leader's Intent</p> <p>A full suppression strategy will be implemented for the Hirz Fire through a combination of direct and indirect tactics. Efforts will be made to minimize fire spread and severity across private timberlands and structures through the application of well-planned tactical responses.</p> <p style="text-align: center;">Management Objectives</p> <ul style="list-style-type: none"> • Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles. • Minimize the threat to private property, critical infrastructure, and commercial timberlands while working with READs to reduce negative impacts to cultural/sensitive sites. • Establish and strengthen cooperators, partners, and stakeholder relationships • All suppression repair work will be conducted in close coordination with assigned READs. <p style="text-align: center;">Control Objectives</p> <p>Keep the Hirz Fire:</p> <ul style="list-style-type: none"> • North of Gilman Road to protect private residences and property to the south. • South of Tom Neal Creek Road to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area. • East of Middle Salt Creek to Green Mountain to North Fork Salt Creek to protect private property and infrastructure values in and around the Interstate 5 corridor. • West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake to protect private timberlands, natural resource values, including northern spotted owl habitat and recreation infrastructure. 			
<p>6. Weather Forecast for Period:</p> <p>WEATHER DISCUSSION... Expect very similar conditions today to what we experienced on Monday. We'll begin with poor humidity recoveries again and with temperatures just as warm as yesterday, relative humidities will generally lower into the ten percent range. Gusty northeast ridgetop winds will exist through the morning hours before turning southwest in the afternoon. Elsewhere over the fire morning downslope/downvalley winds will turn upslope/upvalley around 1200. A shallow inversion will exist once again this morning, generally around 2000 feet, and should break around 1100. However, smoke will likely linger in the lower drainages. As the atmosphere gets more unstable and mixing heights increase by early afternoon, smoke will have the potential to become more vertical. Expect poor humidity recoveries tonight, but ridgetop winds will be lighter and more variable than the past few nights. Very warm and dry conditions will continue on Wednesday.</p>			
<p>7. General Safety Message:</p> <p>Fireline Hazards and Mop Up</p> <p>* Do not work directly above or below personnel during mop-up operations* Identify and make known burning stumps or roots that may cave in * Wear appropriate PPE* Watch for falling, rolling debris on steep slopes* Call out to crew personnel that may be affected by sudden rolling debris or rocks* For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall* Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking</p>

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 36

TYPE OF FIRE: Wildfire

FIRE NAME: Hirz Fire

OPERATIONAL PERIOD: 09/04/18 0600-0600

DATE ISSUED: September 3, 2018

TIME ISSUED: 20:00

UNIT: CA-SHF-0001223

SIGNED:

Typed/printed: Jeff Shelton (LTAN)

INPUTS

WEATHER SUMMARY:

***** Continued Very Warm, Dry and Smokey*****

High pressure north of the region will again provide continuity to the general airflow over the fire area. Expect poor RH recoveries to continue for the next several burn periods. By mid-week, anticipate Southwest flow aloft and mostly terrain driven surface winds.

Max. Daytime Temperatures- 88 to 98 degrees

Min. Daytime Humidity- 10 to 15%

Min. Nighttime Temperatures- 62 to 66 degrees

Max. Overnight Humidity- 35 to 45%

Winds- Day: Northeast early, turning Southwest 4-8 mph, **GUSTS** to 15 mph along ridgetops until 1100

Night: Northeast flow overnight; reinforcing diurnal Downslope/Downcanyon winds

INVERSION BREAKING AROUND 1100...AIR FLOW WILL CHANGE BURNING CONDITIONS!

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- **DRY! FDFM 3%!!** Anticipate fuels of all sizes to release their energy completely and quickly!
- Smoke shading will affect air movement. If you can see blue sky, the fire has more potential!
- Identify alignment of wind and slope from unburnt islands towards established firelines!
- With P(IG)s up to 90%, your work can be an ignition source! Plan for IA fire outside the lines!
- Any spot fire has the ability to establish and grow quickly...Watch your smoke column!
- Identify rollout potential in newly burned areas....The "rollout clock" has now been reset!
- Recognize areas where "dirty" or understory burn are favorably aligned with slope and wind!

SPECIFIC:

All Divisions: Poor RH recovery will support fire movement throughout the entire shift!

Flame Lengths- 3 to 6 ft. in Grass/Litter/Understory, Up to 25 ft. in Brush...

Rate of Spread- Up to (6 ft./min. Litter/Understory)....(80 ft./min. in Grass)....(60 ft./min in Brush).....

Spotting Distances- Downwind; Up to .2 miles in Grass/Brush, Up to .3 miles in Timber (Torching)

Probability of Ignition- Unshaded **90%** at the peak of the burn period, down to $\leq 30\%$ overnight

AIR OPERATIONS:

Sunrise: 06:37

Sunset: 19:36

Expect only fair smoke dispersion during the morning hours with the inversion lifting around noon. Mixing heights will then slowly rise to 12,000'. Anticipate poor to fair visibility to migrate from the south towards the north as the day progresses.

SAFETY

Poor Visibility Can Provide a False Sense of Security!

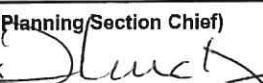

Where is Your Fire?.....Where are You?

Controlled Unclassified Information//Basic

1. Incident Name:		3.				
HIRZ		Branch:		Division/Group:		
2. Operational Period: NIGHT		NIGHT BR		Y		
Date/Time From: 09/04/2018 1800 TUE	Date/Time To: 09/05/2018 0600 WED					
4. Operations Personnel						
OPERATIONS CHIEF	STEVE BURNS		BRANCH DIRECTOR	DONOVAN LEE		
DIVISION/GROUP SUPERVISOR	KIM OLSON					
5. Resources Assigned this Period						
Strike Team / Task Force / Resource Designator	LWD	Leader	Number Persons	Drop Off PT./Time	Pick Up PT./Time	
6. Control Operations/Work Assignments:						
Continue burnout operations to Squaw Creek and down to McCloud River. Hold as necessary to ensure the fire remains within containment lines. Provide for structure protection at the McCloud River Club.						
7. Special Instructions:						
<u>NIGHT RESOURCES REPORT TO McCLOUD ICP AFTER SHIFT.</u> Backhaul trash and excess equipment, i.e. pumps, tanks, and any other unused logistical items. GPS existing and proposed lines and turn in to Situation Unit. Be prepared to support IA as directed by Operations Section Chief. Coordinate with READS to identify areas of concern. REMS 2 WILL BE AVAILABLE TO ALL DIVISIONS DURING NIGHT SHIFT OPERATIONS.

SAFETY MESSAGE

“SAFETY is a CORE VALUE to be integrated into ALL incident activities”

Hirz Fire

Day/Night Shift 09/4-5/2018 0600-0600

Please don't make any assumptions out there.

- **Snags and Hazard Trees** - Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being felled. Be especially alert around snags after dark. Check overhead for dead branches and make a good assessment prior to parking your vehicles.
- **Driving on the Incident** – Many of the roads are very narrow with minimal turn-outs. Practice defensive driving at all times. Adhere to posted speed limits and drive with headlights on. Be alert for wildlife on roads at all times. Increase following distances on dusty roads.
- **Hazardous Terrain** - Steep terrain is one of the most serious hazards on this incident. Rolling material has been a major issue. Rocks and trees have been loosened or dislodged by the fire. Evaluate your work area closely before entering. Spread workers out farther than 10 feet apart. Stagger workers so they are not working or walking directly below each other.
- **Hydration & Fatigue** - Monitor yourself and those you supervise. Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Pace yourselves.

OTHER SAFETY EXPECTATIONS...

1. All ATV/UTV operators must be licensed and wear a full or ¾ face motorcycle helmet.
2. JHA's are required for chipper use. (Brief, sign form & turn into Safety)
3. Be very familiar with Medical Plan. Know ahead of time how you will manage an emergency.
4. Back haul all trash from the line. Once the bears find reward, they will come back for more.
5. Adhere to the traffic plans/routes on the line. Announce your position & direction on the TAC if required.
6. Pay attention to the small details and look out for each other.

Your resume says, 'Only You can prevent forest fires.' Listen, pal... we work as a team here.

Incident Safety Officers: Brian Savage, Charlotte Jordan, & Jeremy Lawson

Charlotte Jordan SOFI

Location	Hazard	Control or Abatement Action
All	Air Operations	<ul style="list-style-type: none"> ~ Follow "Aviation Watch-Out Situations" in IRPG, page 46 ~ Don't plan on air resources for medical transport or resupply. Visibility may be impaired. Have a backup plan. ~ Refer to IRPG, pg 46, for directing bucket drops. ~ Ensure positive communication with all air resources. ~ Keep personnel out of drop zones. ~ Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Post lookouts, or use a spotter in mop-up areas with personnel ~ Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events~ Post road guards when appropriate
Branch I and Branch III, Branch V	Power and Utilities	<ul style="list-style-type: none"> ~ Notify all personnel of down electrical lines ~ Refer to the IRPG pages 24-25 for Power Line Safety~ Always treat downed wires as energized~ Identify and avoid high tension transmission lines. ~ Identify and avoid high pressure natural gas lines~ Identify and avoid damaged gas service near structures~ Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	<ul style="list-style-type: none"> * Share weather observations and IMET updates with all personnel assigned to division* Establish "Decision Points" to withdraw * Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone)* Use "Risk Management" process prior to taking action, refer to IRPG (2014) pg.1 Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift* Factor in drought conditions and local ERC prior to operations*
All	Engagement in a tree mortality area	<ul style="list-style-type: none"> ~ Carefully evaluate values at risk and need for exposure ~ Maintain appropriate clearance distance from hazard trees ~ Be alert for overhead hazards that may fall ~ Disengage operations at dark in areas of tree mortality ~ Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities~ Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging~ Establish decision points for disengagement
All	Fatigue, overexertion, dehydration and heat related illness	<ul style="list-style-type: none"> ~ Drink fluids throughout operational period (water and Gatorade) not energy drinks ~ Set a reasonable work pace and allow adequate rest breaks * Follow work / rest guidelines ~ Use buddy system to monitor personnel for heat related and fatigue issues~ For Heat Related Injuries refer to IRPG page109
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking ~ Don't work directly above or below any personnel ~ Evaluate necessity to send personnel in areas with limited access
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool~ Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps ~ Use spotters when backing~ Honk horn to alert personnel when backing ~ Always use headlights ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill ~ Seat Belts are mandatory ~ No texting while driving ~ Watch for opposing traffic that may cross over into your lane on narrow winding roads~ Watch for falling rocks and debris on roadways in steep canyon areas of the fire ~ Use extra precautions when driving in congested areas
All	Communications	<ul style="list-style-type: none"> ~ Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources~ Utilize Human repeaters where needed
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> ~ Use warning lights and provide traffic control on roadways during smoky and night operations~ Rotate crews out of smoky areas during firing and mop-up operations * Utilize smoke monitoring equipment and Air resource advisors

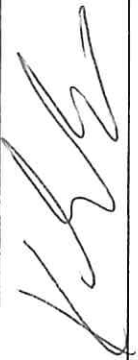

Branch I and Branch III, Branch V, Contingency Branch	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Ensure communications are established with operator prior to work ~ Maintain identified safety exclusion area around equipment , IRPG, pg 86 ~ Before approaching; make eye contact with operator and wait for blade placement on ground ~ Avoid working below equipment where rolling material could jeopardize safety ~ Before transporting equipment identify low hanging wires and ensure there is clearance
All	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area near roadways. ~ Use glow sticks to mark hazards. ~ Watch for signs of fatigue ~ Scout and evaluate all areas of work prior to engagement ~ Watchout Situation – In country not seen in daylight
All	Uninformed on Strategy / Tactics / hazards	<ul style="list-style-type: none"> ~ Provide a detailed briefing for all personnel assigned to the Incident ~ Document briefings on unit log ~ Use Risk Management Process in evaluating all assignments ~ Explain leadership responsibilities and expectations from all personnel assigned to task ~ Determine hazards, and mitigation protocol to limit exposure. ~ Review 215a ~ Discuss weather, fire behavior, Escape Routes, Safety Zones ~ Discuss communication plan including all tactical, aerial, and command frequencies ~ Discuss Emergency Plan outlined in the ICS-206 WF Medical Plan
Branch I and Branch III, Branch V	Fireline Hazards and Mop Up	<ul style="list-style-type: none"> * Do not work directly above or below personnel during mop-up operations * Identify and make known burning stumps or roots that may cave In * Wear appropriate PPE * Watch for falling, rolling debris on steep slopes * Call out to crew personnel that may be affected by sudden rolling debris or rocks * For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall * Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Only fell and buck trees within your expertise, and training ~ Look up, down, & around for hazard tree indicators : trees burning for long periods of time, dead, broken, or burnt out tops and limbs overhead ~ Follow "Procedural Felling Operations" IRPG page 85 ~ Do not fall trees during high wind events ~ Use precautionary measures when re-fueling saws to prevent "fuel geysering "
All	Environmental Hazards	<ul style="list-style-type: none"> ~ Be alert for rattlesnakes, watch footing and hand placement around rocks ~ Check yourself for ticks, watch for bees and other insects that bite ~ Watch out for livestock and wildlife inside fire area and along roadways. ~ Practice Bear Avoidance- Clean up all debris and trash during each operational period * Stay alert for mountain lions in areas of work ~ Be aware of poison oak and avoid or use proper hygiene if exposed.
Branch I and Branch III, Branch V	Firing Operations & Devices	<ul style="list-style-type: none"> ~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Ensure all personnel are aware of firing operation that may affect them. ~ Wear appropriate PPE. ~ Ensure aerial and ground ignition plans have been adequately developed and personnel are briefed.
All	Excavator	<ul style="list-style-type: none"> * Require crewmembers to maintain a safe distance of 300 ft. from the equipment * Have suppression crew nearby with water in case friction or sparks ignite woody debris

Special Medical Emergency Procedures for remote locations and night shift:

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

Human Resource Message

It's hard to be positive and have a good attitude when you are sick.

One way to stay healthy is to be CLEAN. Don't forget to SHOWER!

Michelle Hale HRSP(T) 619-813-4202

PUBLIC INFORMATION SECTION

Incident Information Line: (530) 628-0039

STATUS	
Incident Start Date: August 9, 2018	Incident Start Time: 1:55 AM
Incident Type: Wildfire	Cause: human, under investigation

MEDIA—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does *not* imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found by scanning the QR code (right).

409.5

CAL FIRE SOCIAL MEDIA POLICY—When assigned to a CAL FIRE incident, you will adhere FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Media Policy by scanning the QR code (right).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT—We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone who has the capability to take video and photographs and post them to social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional, or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all who are attached to this incident. Posting an inappropriate video, photo, or blog comment could expose you to unwanted ramifications. It may be unsafe to shoot photos or video, and firefighters who are concentrating on a camera loses their situational awareness.

The Information Section would like copies of videos and pictures you safely took while not in an emergency situation, fire suppression activity, or in an overhead assignment. Bring your videos and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our social media sites.

LOST AND FOUND—The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, bring it to the Information Section with information about where you found it.

MAIL SERVICE—To receive mail, use the following address:

Hirz Fire Suppression Repair

Repair Objectives

- **Minimize Surface and Gully Erosion**
- **Minimize Loss of Soil Productivity due to Erosion In Cleared Areas**
- **Minimize Spread of Noxious Weed Infestations**
- **Minimize Excessive Side-Cast Fuels Along Roads**
- **Minimize Impacts to Inventoried Roadless Areas and Wild & Scenic River Corridors**
- **Repair Impacts to Cultural and Historic Resources**
- **Repair Damage to National Forest Roads and Trails Caused by Fire Suppression Activities**
- **Review by Agency READ/REAFs for On-Site Verification of Objectives Completed**

Suppression Repair Focus

- **Dozer Lines**
- **Hand Lines**
- **Roads and Trails**
- **Safety Zones and Staging Areas**
- **Drop Points**
- **Helispots**
- **Water Sources**

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND	CALCORD / Channel 13	156.0750	T-6	156.0750	T-6
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
