INCIDENT MAPS

INCIDENT OBJECTIVES	1. Incident Name HIRZ / DELTA FIRE	2. Date 09/05/18	3. Time 2100												
4. Operational Period: September 06, 2018 Day Shift 0600 - 1800															
<p>5. General Control Objectives for the Incident (include alternatives)</p> <p style="text-align: center;">Leader's Intent</p> <p>A full suppression strategy will be implemented for both the Hirz and Delta fires through a combination of direct and indirect tactics. Efforts will be made to minimize impacts to residences, critical infrastructure and private timberlands through the application of well-planned tactical responses.</p> <p style="text-align: center;">Management Objectives</p> <ul style="list-style-type: none"> • Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles. • Minimize the threat to private property, critical infrastructure, and commercial timberlands. • Establish and strengthen cooperator, partner, and stakeholder relationships • All suppression repair work will be conducted in close coordination with assigned READs. <p style="text-align: center;">Control Objectives</p> <p>Keep the Hirz Fire:</p> <ul style="list-style-type: none"> • North of Gilman Road to protect private residences and property to the south. • South of Tom Neal Creek Road to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area. • East of Middle Salt Creek to Green Mountain to North Fork Salt Creek to protect private property and infrastructure values in and around the Interstate 5 corridor. • West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake to protect private timberlands, natural resource values, including northern spotted owl habitat and recreation infrastructure. <p>Delta Fire:</p> <ul style="list-style-type: none"> • Safely employ aggressive tactics with an emphasis on point protection of private residences, while minimizing the threat to critical infrastructure and private timberlands. 															
<p>6. Weather Forecast for Period:</p> <p>WEATHER DISCUSSION... Yesterday (Wednesday) was a good reminder that the very warm and dry conditions are continuing to create an unstable atmosphere, which contributed to column development on the Delta fire. High temperatures and relative humidities will be similar to yesterday and this will result in the development of an unstable atmosphere once again. Ridgetop winds will be light in the morning, then south to southwest winds will develop and increase in speed. Upslope/upvalley winds are expected elsewhere. We will still see the shallow inversion break around 1100, but smoke will persist in the deep drainages and produce low visibilities. Tonight will have slightly better humidity recoveries and we will see another north-northeast push of winds on the ridgetops after 2400. Warm and dry conditions continue on Friday with some increasing high clouds in the afternoon along with the development of an unstable atmosphere.</p>															
<p>7. General Safety Message:</p> <p>Aggressive Risk Management is our primary means of maintaining safe wildland fire operations. Consistently evaluate fireline tactics and do not hesitate to adjust tactics as environmental and human factor conditions change – Review Risk Management Process in IRPG, page 1.</p>

FIRE WEATHER FORECAST

FORECAST NO. 25

NAME OF FIRE: Hirz

PREDICTION FOR Thursday September 6th, 2018

UNIT: Shasta Trinity National Forest

TIME AND DATE

SIGNED: 

FORECAST ISSUED: 1930 Wednesday 09/05/18

Eric Evenson / Incident Meteorologist

WEATHER DISCUSSION... Yesterday (Wednesday) was a good reminder that the very warm and dry conditions are continuing to create an unstable atmosphere, which contributed to column development on the Delta fire. High temperatures and relative humidities will be similar to yesterday and this will result in the development of an unstable atmosphere once again. Ridgetop winds will be light in the morning, then south to southwest winds will develop and increase in speed. Upslope/upvalley winds are expected elsewhere. We will still see the shallow inversion break around 1100, but smoke will persist in the deep drainages and produce low visibilities. Tonight will have slightly better humidity recoveries and we will see another north-northeast push of winds on the ridgetops after 2400. Warm and dry conditions continue on Friday with some increasing high clouds in the afternoon along with the development of an unstable atmosphere.

TODAY...

Sky/weather.....Sunny, warm, and dry. Areas of smoke. Inversion breaks around 1200.
Max temperature.....79-84 ridgetops and 95-100 lower drainages.
Min humidity.....15-20 percent ridges and 11-16 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Downslope/Downvalley 2-4 mph until 1100, then upslope/upvalley 2-4 mph.
Ridgetop.....Variable around 5 mph until 1100, then South-Southwest 6-10 mph with gusts to 14 to 18 mph.
Mixing height.....10,000 - 12,000 ft AGL.
Transport winds.....Variable 3 mph until 1100, then South-Southwest 8-10 mph.
CWR.....0 percent. LAL of 1.

TONIGHT...

Sky/weather.....Clear. Areas of smoke. Inversion developing after 2100.
Min temperature.....58-63 ridgetops, 56-60 lower drainages.
Max humidity.....40-45 percent ridges and 53-57 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Upslope 2-4 mph becoming downslope 2-4 mph after 2100.
Ridgetop.....South-Southwest 5-9 mph with gusts to 15 mph until 2400, then North-Northeast 5-10 mph.
Mixing height.....Lowering to around 2000 ft AGL.
Transport winds.....Southwest 7 mph until 2400, then North-Northeast 6 mph.
CWR.....0 percent. LAL of 1.

FRIDAY...

Sky/weather.....Becoming partly cloudy. Warm and dry. Areas of smoke. Inversion breaks after 1100.
Max temperature.....80-85 ridgetops and 96-101 lower drainages.
Min humidity.....14-19 percent ridges and 10-15 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Downslope/Downvalley 2-4 mph until 1100, then upslope/upvalley 2-4 mph.
Ridgetop.....North-Northeast 5-10 mph until 1100, then South-Southwest 6-10 mph with gusts to 16 mph.
Mixing height.....10,000 - 12,000 ft AGL.
Transport winds.....Northeast 6 mph until 1100, then South-Southwest 8 mph.
CWR.....0 percent. LAL of 1.

FIRE BEHAVIOR FORECAST

Forecast Number: 38

Type of Incident: Wildfire

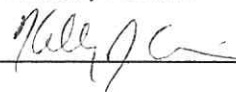

Incident Name: Hirz/Delta

Operational Period: 09/06/2018 Day/night

Date/Time Issued: 09/05/2018

Analyst: /S/ Kelly Allen, FBAN

Responsible Unit: CA-SHF-0001223

WEATHER/FUELS SUMMARY

Sunny, warm and dry with smoky areas, inversion breaks around 1200

Max Day time Temps: 79-100 deg. Min Night time Temps: 58-63 deg. Min day time humidity: 11-20%. Max night time humidity 40-53%. Winds Day: Downslope 2-4 mph turning upslope 2-4 mph. SSW gusts to 18 mph on ridgetops after 1100. Night upslope 2-4 until 2100, then SSW 5-9 mph with gusts to 15 mph then changing after 2400 to NNE 5-10 mph on ridgetops.

. FIRE BEHAVIOR

General: FDFM is 3%, making all fuels available to burn. Reburn potential is high on both fires especially where fuel, topography and winds align. With a PIG of near 100% spot fires will be problematic and will be resistant to control efforts.

Specific: Poor RH recovery will support fire growth throughout the entire shift.

Hirz

Expect to see smoldering, creeping and some single tree torching as wind direction/speed and topography align. Islands of fuel will still burn under the right conditions, but should not pose any problems to the fire perimeter.

Delta

Flame Lengths: 3-6 ft. in grass/litter/understory, Up to 25 in Brush

Rate of Spread: Up to 6 ft./min., litter/understory. 80ft./min. in grass, 100ft./min. in brush.

Spotting Distances: Downwind; Up to .25 miles in grass/brush, Up to .75 miles in timber.

Probability of Ignition: 90-100% at the peak of the burn period, down to 30% over night.

Expect Crown fire to be active as the understory burns.

AIR OPERATIONS

Expect the inversion to lift around 1200. Mixing heights will rise to 12,000'. Anticipate poor to fair visibility throughout the burn period especially if the Delta fire burns actively.

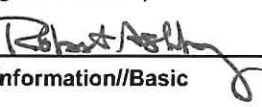

SAFETY

LCES: It changes as the fire changes. Update as needed and make it known to your resources.

SAFETY MESSAGE

Hirz/Delta Fire CA-SHF-001223	Day Shift	09/06/2018	0600-1800
-------------------------------	-----------	------------	-----------

MAJOR HAZARDS:

- Extreme Fire Behavior
- Driving
- Hazard Trees
- Dehydration, Heat Stress, and Fatigue
- Firing Operations

Fire Order of the Day – Give Clear instructions and be sure they are understood.

- **Aggressive Risk Management** is our primary means of maintaining safe wildland fire operations. Consistently evaluate fireline tactics and do not hesitate to adjust tactics as environmental and human factor conditions change – **Review Risk Management Process in IRPG, page 1.**
- **Dehydration, Heat Stress, and Fatigue** - Constantly monitor your water and electrolyte intake to avoid dehydration. Dehydration and long work hours, coupled with poor air quality and high temperatures all impact fatigue. Maintain the work to rest ratio, 2:1.
- **Firing Operations Safety** - Conduct a thorough briefing for all personnel, utilize Risk Management Process (see above), wear required PPE, utilize fully qualified personnel, and maintain LCES. Make the appropriate radio notifications prior to putting fire on the ground.

Hazardous Tree Indicators

It's important to identify the hazardous trees in your work area before engaging.

- Strong winds
- Night Operations
- Steep Slopes
- Disease or bug-kill timber
- Trees and duff have been burning for an extended period
- High-risk tree species
- Numerous down trees
- Dead or broken tops and limbs overhead
- Accumulation of downed limbs
- Leaning or hung-up trees
- Look up, Look Down, Look Around
- After identifying the hazard trees: look for hazard control measures to mitigate your risks. IRPG pgs. 22 & 23

Driving & Fatigue

- Fatigue can cause us to mentally stray from the driving task. The roads on the Shasta-Trinity National Forest are very unforgiving.
- Use extreme caution when driving or parking on the Interstate 5 corridor.
- Do not drive in closed off areas of road construction on Interstate 5.
- Visibility may be impacted by heavy smoke. Use headlights and other overhead red lights if needed.
- It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble.
- Follow posted speed limits or slower: 25 MPH through McCloud. Stop at the posted STOP signs at all CHP road closures. Incident vehicles are not exempt.

Safety Officers: Charlotte Jordan, Brian Savage

Location	Hazard	Control or Abatement Action
All	Air Operations	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" in IRPG. • Don't rely on air resources for medical transport or resupply. • Visibility may be impaired. Have a backup plan. • Refer to IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Keep personnel out of drop zones. • Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.
All	Power and Utilities	<ul style="list-style-type: none"> • Notify all personnel of down electrical lines. • Refer to the IRPG page 24 for Power Line Safety • Always treat downed wires as energized • Identify and avoid high tension transmission lines. • Identify and avoid high pressure natural gas lines • Identify and avoid damaged gas service near structures • Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	<ul style="list-style-type: none"> • Share weather observations and IMET updates with all personnel assigned to division • Establish "Decision Points" to withdraw • Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone) • Use "Risk Management" process prior to taking action, refer to IRPG pg.1 • Review "Severe fire behavior potential" IRPG pg. 68 • Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift • Factor in local conditions that will impact fire behavior prior to operations • Be mindful of rapidly changing fire and "explosive" fire behavior especially in areas of tree mortality
All	Engagement in a tree mortality area	<ul style="list-style-type: none"> • Carefully evaluate values at risk and need for exposure • Maintain appropriate clearance distance from trees • Be alert for overhead hazards that may fall • Disengage operations at dark in areas of tree mortality • Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities • Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging • Be aware of rapid and extreme fire spread with little wind in pockets of high mortality • Ensure escape routes and safety zones are in place for extreme and rapid fire growth • Establish decision points for disengagement
All	Fatigue, Overexertion, dehydration and heat related illness	<ul style="list-style-type: none"> • Drink fluids throughout operational period (water and Gatorade) not energy drinks • Rotate crews out of smoky areas • Follow work / rest guidelines • Set a reasonable work pace and allow adequate rest breaks • Use buddy system to monitor personnel for heat related and fatigue issues • For Heat Related Injuries refer to IRPG pg.103
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking • Don't work above any personnel • Evaluate necessity to send personnel in areas with limited access • Use extreme caution when driving roads where rolling rocks may fall
All	Structure Protection & HAZMAT	<ul style="list-style-type: none"> • Identify and avoid damaged gas service near structures • Review "Wildland Urban Interface" Watch outs, IRPG page 12 • Use "Structure Size Up and Protection, IRPG 13-16 • Follow "HAZMAT Incident Operations" on pages 36- 38 in IRPG

All	Communications	<ul style="list-style-type: none"> • Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. • Ensure all know frequency and protocol for contacting resources • Utilize Human repeaters where needed • Provide a detailed briefing for all personnel assigned to the Incident • Document briefings on unit log • Use Risk Management Process in evaluating all assignments • Explain leadership responsibilities and expectations from all personnel assigned to task • Determine hazards, and mitigation protocol to limit exposure • Review 215a • Discuss expected fire behavior, and plans for retreat • Discuss weather, Escape Routes, Safety Zones • Discuss communication plan including all tactical, aerial, and command frequencies • Discuss Emergency Plan outlined in the ICS-206 Medical Plan
All	Driving & Traffic	<ul style="list-style-type: none"> • Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool • Always wear hardhats in fire area when outside of vehicle • Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps • Watch for opposing traffic that may cross over into your lane on narrow winding roads • Watch for falling rocks and debris on roadways in steep canyon areas of the fire • Use extra precautions when driving in congested areas • Use spotters when backing • Always use headlights • Yield to pedestrians and bicycles • Observe posted speed limits • Follow 3 second rule of following distance when driving • Use chock blocks, turn wheels into hill • Seat Belts are mandatory • No texting while driving • Use extreme caution when driving or parking on I-5. Do not drive in coned off areas of road construction on highway.
All	Heavy Equipment Operations and Suppression Repair	<ul style="list-style-type: none"> • Ensure communications are established with operator prior to work • Maintain identified safety exclusion area around equipment, IRPG pg 80 • Before approaching; make eye contact with operator and wait for blade placement on ground • Avoid working below equipment where rolling material could jeopardize safety • Before moving or transporting equipment identify low hanging wires, ensure there is clearance ~ Require crewmembers to maintain a safe distance of 300 ft. from Excavator equipment ~ Have suppression crew nearby with water in case friction or sparks ignite woody debris
All	Fireline Hazards and Mop Up	<ul style="list-style-type: none"> * Do not work directly above or below personnel during mop-up operations * Identify and make known burning stumps or roots that may cave In * Wear appropriate PPE * Watch for falling, rolling debris on steep slopes * Call out to crew personnel that may be affected by sudden rolling debris or rocks* * For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall * Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> • Use warning lights and provide traffic control on roadways during smokey and night operations • Rotate crews out of smokey areas during firing and mop-up operations • Contact Communications when firing operations are initiated for potential increase in smoke production
All	Marijuana Plantations	<ul style="list-style-type: none"> • Leave area quietly in the same direction that you entered and notify DIVS • Watch for hazardous materials and be aware of possible traps in the grow area • Use extreme caution during encounters • Individuals guarding plantation may be armed • Grower may become confrontational, maintain calm demeanor and leave area
All	Chain Saw Operations	<ul style="list-style-type: none"> • Only fell and buck trees within your expertise, and training • Look up, down around for hazard tree indicators : trees burning for long periods of time, dead, broken ,or burnt out tops and limbs overhead • Follow "Procedural Felling Operations" on page 79 in IRPG • Do not fall trees during high wind events • Use precautionary measures when re-fueling saws to prevent "fuel geysering "
All	Environmental Hazards	<ul style="list-style-type: none"> • Be alert for rattlesnakes, watch footing and hand placement around rocks • Check yourself for ticks, watch for bees and other insects that bite • Watch out for wildlife inside fire area and along roadways. • Practice Bear Avoidance- Clean up all debris and trash during each operational period
All	Firing Operations & Devices	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Wear appropriate PPE. • Ensure aerial and ground ignition plans have been adequately developed and personnel are briefed.

7. Name & Location	Remote Locations
--------------------	------------------

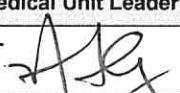

Special Medical Emergency Procedures for remote locations.

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

Human Resource Message

Work and Fatigue in Wildland Firefighting effects your physical and emotional state!

Wildland Firefighting is arduous work, performed for long shifts in difficult environmental conditions. The work can be dangerous due to the fire and working conditions. Heat, smoke, rolling rocks, falling snags, and other hazards threaten the worker. Fatigue can impair performance and decision making, increasing the risk of injury. Prolonged exposure to fatigue, stress, smoke, and poor nutrition has the potential to increase the incidence of upper respiratory illness, but also mental lapses.

The stress response is necessary to prepare an athlete, firefighter or soldier for a maximal effort in a physical challenge, but it can be unhealthy if it occurs too often in the wrong setting.

Fatigue—A sense of tiredness, either mental or physical, brought on by stress (lack of sleep, physical work, nutritional inadequacies, or mental stresses). Fatigue following work or sleep deprivation is a normal state and can be reversed with adequate recovery or rest.

Accumulated (Chronic) Fatigue—Fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, resulting in decreased productivity, compromised immune function, and reduced alertness.

Correct Nutrition, Hydration and Rest are good coping mechanisms for stress and fatigue. Make use of your down time and rest per the work/rest guidelines.

Michelle Hale HRSP(T) 619-813-4202

Local Government Resources on CFAA

If you are demobing from this incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the
instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

HIRZ FIRE STATUS

Incident Start Date: August 9, 2018	Incident Start Time: 1:55 AM
Incident Type: Wildfire	Cause: Human, under investigation

DELTA FIRE STATUS

Incident Start Date: September 5, 2018	Incident Start Time: 12:51 PM
Incident Type: Wildfire	Cause: Human, under investigation

PHOTOGRAPHS AND VIDEOS—The Information Section would greatly appreciate getting copies of videos and pictures you took. For example, photos showing the effect of moderate fire behavior, suppression-repair work, crews doing mop-up would be great! If your photos have people in them, ensure everyone is in full PPE. Email your photos to our Gmail account (address above) or bring your videos and pictures to the Information trailer. Tell us who took them, where, and a little bit about what we're seeing if you have time. Your photos and videos will be vetted and possibly used on our social media sites.

MEDIA—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does *not* imply that the news media may interfere with incident operations while they are in the areas of concern.

LOST AND FOUND—The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, bring it to the Information Section with information about where you found it.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. (WGS84)		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND	CALCORD / Channel 13	156.0750	T-6	156.0750	T-6
TACTICAL					
7. CONTINGENCY: <i>Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</i>					
8. ADDITIONAL INFORMATION: <i>Updates/Changes, etc.</i>					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
