0600 - 1800

**FIRE
INFORMATION #
(530) 628-0039**

INCIDENT MAPS

CORRECTED

INCIDENT OBJECTIVES

1. Incident Name

HIRZ / DELTA FIRE

2. Date

09/06/18

3. Time

21004. Operational Period: **September 07, 2018 Day Shift 0600 - 1800**

5. General Control Objectives for the Incident (include alternatives)

Leader's Intent

A full suppression strategy will be implemented for both the Hirz and Delta fires through a combination of direct and indirect tactics. Efforts will be made to minimize impacts to residences, critical infrastructure and private timberlands through the application of well-planned tactical responses.

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure, and commercial timberlands.
- Establish and strengthen cooperator, partner, and stakeholder relationships
- All suppression repair work will be conducted in close coordination with assigned READs.

Control Objectives**Keep the Hirz Fire:**

- North of Gilman Road to protect private residences and property to the south.
- South of Tom Neal Creek Road to protect private and federal timberlands and natural resource values, including Northern Spotted Owl habitat and Inventoried Roadless Area.
- East of Middle Salt Creek to Green Mountain to North Fork Salt Creek to protect private property and infrastructure values in and around the Interstate 5 corridor.
- West of Squaw Valley Creek, McCloud River and McCloud River arm of Shasta Lake to protect private timberlands, natural resource values, including northern spotted owl habitat and recreation infrastructure

Keep the Delta Fire:

- North of the line that runs from the Delta to Mosquito Ridge (west side of I-5) to minimize impacts to I-5 and protect the communities of Pollock, Lakehead and Lakeshore.
- South of Middle Ridge (west side of I-5) to protect private timberlands.
- South of North Salt Creek Road (east side of I-5) to minimize threat to communities and residences along I-5 corridor.
- East of Trinity River to minimize impacts to Highway 3 and protect recreational sites.
- West of Crane Mountain to halt eastern spread.

6. Weather Forecast for Period:

WEATHER DISCUSSION... Winds will be a concern today as south to southwest winds increase along the ridges with gusts to 20 mph possible in the afternoon. Over the remainder of the fire upslope and upvalley winds that become aligned with the general winds will also become gusty too. We will have slightly warmer and drier conditions today with respect to temperatures and humidities despite humidity recoveries being slightly better than the past few mornings. This will allow the atmosphere to become unstable once again in the afternoon. Smoke will likely be concentrated once again in and around the Delta Fire, but will then drift over the Hirz Fire in the afternoon. A dry cold front will move into the area around 2300 tonight and shift the ridgetop winds to the west and northwest with gusts in the 20 to 25 mph range possible through 1000 Saturday before diminishing. Downslope/downvalley winds tonight could be gusty when becoming aligned with the west to northwest winds. Temperatures will be 5 degrees cooler on Saturday with relative humidities about 5 percent higher than today.

7. General Safety Message:

Transition of Operational Resources:

During the course of a fire or a shift, institutional knowledge is developed. During transition periods, some of that knowledge maybe lost. As night resources shift ends and new resources arrive, knowledge will need to be passed along.

Some methods to limit the loss of this vital information between operational resources on the fireline include;

- Have a face to face transition whenever possible. Make sure you receive a through briefing and if unclear on any issues, ask questions.
- Resources spend a lot of time gathering "SA". The learning curve for fresh resources can be drastically reduced by receiving a through briefing.

FIRE WEATHER FORECAST

FORECAST NO. 27

NAME OF FIRE: Hirz/Delta Fires

UNIT: Shasta Trinity National Forest

TIME AND DATE

FORECAST ISSUED: 1930 Thursday 09/06/18

PREDICTION FOR Friday September 7th, 2018

SIGNED: 
Eric Evenson / Incident Meteorologist

WEATHER DISCUSSION...Winds will be a concern today as south to southwest winds increase along the ridges with gusts to 20 mph possible in the afternoon. Over the remainder of the fire upslope and upvalley winds that become aligned with the general winds will also become gusty too. We will have slightly warmer and drier conditions today with respect to temperatures and humidities despite humidity recoveries being slightly better than the past few mornings. This will allow the atmosphere to become unstable once again in the afternoon. Smoke will likely be concentrated once again in and around the Delta Fire, but will then drift over the Hirz Fire in the afternoon. A dry cold front will move into the area around 2300 tonight and shift the ridgetop winds to the west and northwest with gusts in the 20 to 25 mph range possible through 1000 Saturday before diminishing. Downslope/downvalley winds tonight could be gusty when becoming aligned with the west to northwest winds. Temperatures will be 5 degrees cooler on Saturday with relative humidities about 5 percent higher than today.

FRIDAY...

Sky/weather.....Becoming partly cloudy in the afternoon. Very warm and dry.
Areas of smoke. Inversion breaks after 1100.

Max temperature.....80-85 ridgetops and 96-101 lower drainages.

Min humidity.....14-19 percent ridges and 10-15 percent lower drainages.

Wind (20 ft).....

Slope/valley.....Downslope/Downvalley 2-6 mph until 1100, then
upslope/upvalley 3-6 mph and gusts to 10 mph.

Ridgetop.....North-Northeast 5-10 mph with gusts to 15 mph until 1100,
then South-Southwest 8-12 mph with gusts to 20 mph.

Mixing height.....12,000 - 14,000 ft AGL.

Transport winds.....Northeast 6 mph until 1100, then South-Southwest 12 mph.

CWR.....0 percent. LAL of 1.

TONIGHT...

Sky/weather.....Partly cloudy. Areas of smoke.

Min temperature.....55-60 ridgetops, 53-58 lower drainages.

Max humidity.....43-48 percent ridges and 60-65 percent lower drainages.

Wind (20 ft).....

Slope/valley.....Upslope 3-6 mph becoming downslope 3-6 mph after 2200.

Ridgetop.....Southwest 8-12 mph with gusts to 16 mph until 2300,
then West-Northwest 8-14 mph with gusts 20-25 mph possible.

Mixing height.....Lowering to around 2000 ft AGL.

Transport winds.....Southwest 11 mph until 2300, then North-Northwest 12 mph.

CWR.....0 percent. LAL of 1.

SATURDAY...

Sky/weather.....Becoming mostly sunny. Areas of smoke.

Max temperature.....76-81 ridgetops and 92-97 lower drainages.

Min humidity.....19-24 percent ridges and 15-20 percent lower drainages.

Wind (20 ft).....

Slope/valley.....Downslope/Downvalley 3-6 mph until 1100, then
upslope/upvalley 3-6 mph.

Ridgetop.....North-Northwest 6-12 mph with gusts to 20 mph until 1100,
then becoming southwest 5 to 10 mph in the afternoon.

Mixing height.....6,000 to 8,000 ft AGL.

Transport winds.....Northeast 8 mph until 1200, then Southwest 7 mph.

CWR.....0 percent. LAL of 1.

FIRE BEHAVIOR FORECAST

Forecast Number: 40

Type of Incident: Wildfire

Incident Name: Hirz/Delta

Operational Period: 09/07/2018 0600-1800

Date/Time Issued: 09/06/2018 1930

Analyst: ISI Kelly Allen, FBAN

Responsible Unit: CA-SHF-0001223

16 Aug 18

WEATHER/FUELS SUMMARY

Smokey, becoming partly cloudy in the afternoon. Very warm and dry. Inversion breaks after 1100.

Max Daytime Temps, 80-101 deg. Min Daytime Humidity, 10-19%

20' Winds Slope/valley: downslope 2-6 mph until 1100, becoming upslope 3-6 mph with gusts to 10 mph.
Ridgetop: NNE 5-10 mph with gusts to 15 mph until 1100, then SSW 8-12 mph with gusts 20 mph

. FIRE BEHAVIOR

General:

Fires are burning in grass/litter/understory, brush and mixed conifer with closed canopy of less than 20 ft. FDFM is 3%, making all fuels available to burn.

Increased fire behavior and reburn potential will be high on both fires especially where fuel, topography and winds align.

With a PIG of 90-100%, spot fires will be problematic and will be resistant to control efforts.

The drainages (Sacramento River and East Fork of the Trinity River) to the east and west of the Delta Fire will influence fire movement along the adjacent slopes as winds fuels and topography align.

Specific: Inversion breaks after 1100.

Hirz

Expect to see smoldering, creeping and some single tree torching as wind direction/speed and topography align. Islands of fuel will still burn under the right conditions, but should not pose any problems to the fire perimeter.

Delta

Flame Lengths: 3-6 ft. in grass/litter/understory, Up to 25 in Brush

Rate of Spread: Up to 6 ft./min., litter/understory. 80 ft./min. in grass, 100 ft./min. in brush.

Spotting Distances: Downwind; Up to .25 miles in grass/brush, Up to .75 miles in timber.

Probability of Ignition: 90-100% at the peak of the burn period.

Expect active fire activity under the inversion. Areas of intense activity may break through the inversion which will allow for extreme behavior to follow depending on the duration and height of the column. Rollput on steep slopes is to be expected.

AIR OPERATIONS

Smokey conditions may limit air support over areas of the fire. Smokey areas will change throughout the burn period.

SAFETY

Small changes in wind speed/direction and relative humidity can change fire behavior dramatically in a short amount of time. Be deliberate in your thought process in implementing tactics.

SAFETY MESSAGE

INCIDENT: Hirz / Delta Fire CA-SHF-001223

DATE: 09/07/2018 TIME: 0600-1800

Major Hazards and Risks:

- DRIVING
- FIRE WEAKENED TREES; STUMP HOLES; BURNING UNDERGROUND ROOTS.
- HEAT STRESS AND DEHYDRATION.
- ROLLING ROCKS AND OTHER MATERIAL ON STEEP SLOPES.

Fire Order of the Day – Know what your fire is doing at all times.

Transition of Operational Resources:

During the course of a fire or a shift, institutional knowledge is developed. During transition periods, some of that knowledge maybe lost. As night resources shift ends and new resources arrive, knowledge will need to be passed along.

Some methods to limit the loss of this vital information between operational resources on the fireline include;

- Have a face to face transition whenever possible. Make sure you receive a through briefing and if unclear on any issues, ask questions.
- Resources spend a lot of time gathering "SA". The learning curve for fresh resources can be drastically reduced by receiving a through briefing.

17. TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Does SA get reduced to a catch phrase or used in a passive sense? "Make sure you keep good SA out there today!"

- Situation Awareness is the foundation for decision making. Developing and maintaining situational awareness is a deliberate act; requiring energy and practice to improve its accuracy.
- Maintaining SA is difficult in the complex wildland fire environment. The closer our SA matches reality the more informed decisions we can make.
- The more accurate our SA, the greater our capacity is to increase margin into our tactics, thereby increasing our ability to be proactive rather than reactive.

DON'T BE

Unaware and unprepared. In this condition you will more than likely be surprised by changes in the environment.

Know the operational plan, understand the values at risk, conduct your risk assessments (Risk vs Gain), understand your part and be prepared 100% to execute the plan.

Location	Hazard	Control or Abatement Action
All	Air Operations	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" in IRPG • Don't rely on air resources for medical transport or resupply • Visibility may be impaired. Have a backup plan • Refer to IRPG for directing bucket drops • Ensure positive communication with all air resources • Keep personnel out of drop zones • Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective
All	Power and Utilities	<ul style="list-style-type: none"> • Notify all personnel of down electrical lines. • Refer to the IRPG page 24 for Power Line Safety • Always treat downed wires as energized • Identify and avoid high tension transmission lines. • Identify and avoid high pressure natural gas lines • Identify and avoid damaged gas service near structures • Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	<ul style="list-style-type: none"> • Share weather observations and IMET updates with all personnel assigned to division • Establish "Decision Points" to withdraw • Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone) • Use "Risk Management" process prior to taking action, refer to IRPG pg. 1 • Review "Severe fire behavior potential" IRPG pg. 68 • Maintain adequate escape routes and safety zones, continue to re-evaluate throughout the shift • Factor in local conditions that will impact fire behavior prior to operations • Be mindful of rapidly changing fire and "explosive" fire behavior especially in areas of tree mortality
All	Engagement in a tree mortality area	<ul style="list-style-type: none"> • Carefully evaluate values at risk and need for exposure • Maintain appropriate clearance distance from trees • Be alert for overhead hazards that may fall • Disengage operations at dark in areas of tree mortality • Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities • Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging • Be aware of rapid and extreme fire spread with little wind in pockets of high mortality • Ensure escape routes and safety zones are in place for extreme and rapid fire growth • Establish decision points for disengagement
All	Fatigue, Overexertion, dehydration and heat related illness	<ul style="list-style-type: none"> • Drink fluids throughout operational period (water and Gatorade) not energy drinks • Rotate crews out of smoky areas • Follow work / rest guidelines • Set a reasonable work pace and allow adequate rest breaks • Use buddy system to monitor personnel for heat related and fatigue issues • For Heat Related Injuries refer to IRPG pg. 103
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking • Don't work above any personnel • Evaluate necessity to send personnel in areas with limited access • Use extreme caution when driving roads where rolling rocks may fall
All	Structure Protection & HAZMAT	<ul style="list-style-type: none"> • Identify and avoid damaged gas service near structures • Review "Wildland Urban Interface" Watch outs, IRPG page 12 • Use "Structure Size Up and Protection, IRPG 13-16 • Follow "HAZMAT Incident Operations" on pages 36- 38 in IRPG

All	Communications	<ul style="list-style-type: none"> • Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. • Ensure all know frequency and protocol for contacting resources • Utilize Human repeaters where needed • Provide a detailed briefing for all personnel assigned to the Incident • Document briefings on unit log • Use Risk Management Process in evaluating all assignments • Explain leadership responsibilities and expectations from all personnel assigned to task • Determine hazards, and mitigation protocol to limit exposure • Review 215a • Discuss expected fire behavior, and plans for retreat • Discuss weather, Escape Routes, Safety Zones • Discuss communication plan including all tactical, aerial, and command frequencies • Discuss Emergency Plan outlined in the ICS-206 Medical Plan
All	Driving & Traffic	<ul style="list-style-type: none"> • Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool • Always wear hardhats in fire area when outside of vehicle • Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps • Watch for opposing traffic that may cross over into your lane on narrow winding roads • Watch for falling rocks and debris on roadways in steep canyon areas of the fire • Use extra precautions when driving in congested areas • Use spotters when backing • Always use headlights • Yield to pedestrians and bicycles • Observe posted speed limits • Follow 3 second rule of following distance when driving • Use chock blocks, turn wheels into hill • Seat Belts are mandatory • No texting while driving • Use extreme caution when driving or parking on I-5. Do not drive in corded off areas of road construction on Interstate 5.
All	Heavy Equipment Operations and Suppression Repair	<ul style="list-style-type: none"> • Ensure communications are established with operator prior to work • Maintain identified safety exclusion area around equipment, IRPG pg 80 • Before approaching; make eye contact with operator and wait for blade placement on ground • Avoid working below equipment where rolling material could jeopardize safety • Before moving or transporting equipment identify low hanging wires, ensure there is clearance ~ Require crewmembers to maintain a safe distance of 300 ft. from Excavator equipment ~ Have suppression crew nearby with water in case friction or sparks ignite woody debris
All	Fireline Hazards and Mop Up	<ul style="list-style-type: none"> • Do not work directly above or below personnel during mop-up operations • Identify and make known burning stumps or roots that may cave in • Wear appropriate PPE • Watch for falling, rolling debris on steep slopes • Call out to crew personnel that may be affected by sudden rolling debris or rocks • For logs that may roll re-position perpendicular to the slope • Watch for weakened trees that may pose danger or fall • Scout areas for mop up prior to work • Maintain 8'-10' spacing when working & walking
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> • Use warning lights and provide traffic control on roadways during smokey and night operations • Rotate crews out of smokey areas during firing and mop-up operations • Contact Communications when firing operations are initiated for potential increase in smoke production
All	Marijuana Plantations	<ul style="list-style-type: none"> • Leave area quietly in the same direction that you entered and notify DIVS • Watch for hazardous materials and be aware of possible traps in the grow area • Use extreme caution during encounters • Individuals guarding plantation may be armed • Grower may become confrontational, maintain calm demeanor and leave area
All	Chain Saw Operations	<ul style="list-style-type: none"> • Only fell and buck trees within your expertise, and training • Look up, down around for hazard tree indicators: trees burning for long periods of time, dead, broken, or burnt out tops and limbs overhead • Follow "Procedural Felling Operations" on page 79 in IRPG • Do not fall trees during high wind events • Use precautionary measures when re-fueling saws to prevent "fuel geysering"
All	Environmental Hazards	<ul style="list-style-type: none"> • Be alert for rattlesnakes, watch footing and hand placement around rocks • Check yourself for ticks, watch for bees and other insects that bite • Watch out for wildlife inside fire area and along roadways • Practice Bear Avoidance • Clean up all debris and trash during each operational period
All	Firing Operations & Devices	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Wear appropriate PPE. • Ensure aerial and ground ignition plans have been adequately developed and personnel are briefed.

7. Name & Location	Remote Locations	

Special Medical Emergency Procedures for remote locations.

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

8. Prepared By (Medical Unit Leader)	9. Date/Time	10. Reviewed By (Safety Officer)	11. Date/Time

Incident Operations Driving

These standards address driving by personnel actively engaged in wildland fire or all-hazards response activities, including driving while assigned to a specific incident or during initial attack fire response (includes time required to control the fire and travel to a rest location). In the absence of more restrictive agency policy, these guidelines will be followed during mobilization and demobilization as well. Individual agency driving policies shall be consulted for all other non-incident driving.

Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty-day.

- **No driver will drive more than 10 hours (behind the wheel) within any duty-day.**
- **Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.**
- **A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift.**

Exception to the minimum off-duty hour requirement is allowed when essential to:

- **Accomplish immediate and critical suppression objectives, or**
- **Address immediate and critical firefighter or public safety issues.**

As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hours work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.

HIRZ FIRE	
Incident Start Date: August 9, 2018	Incident Start Time: 1:55 AM
Incident Type: Wildfire	Cause: Human, under investigation

DELTA FIRE	
Incident Start Date: September 5, 2018	Incident Start Time: 12:51 PM
Incident Type: Wildfire	Cause: Human, under investigation

PHOTOGRAPHS AND VIDEOS—The Information Section would greatly appreciate getting copies of videos and pictures you took. For example, photos showing the effect of moderate fire behavior, suppression-repair work, crews doing mop-up would be great! If your photos have people in them, ensure everyone is in full PPE. Email your photos to our Gmail account (address above) or bring your videos and pictures to the Information trailer. Tell us who took them, where, and a little bit about what we're seeing if you have time. Your photos and videos will be vetted and possibly used on our social media sites.

MEDIA—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does *not* imply that the news media may interfere with incident operations while they are in the areas of concern.

LOST AND FOUND—The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, bring it to the Information Section with information about where you found it.

Date and Time Needed: _____ Point of Contact at Delivery Location: _____

OTHER / NOTES:

Who are you ?

Name of division, position, assignment

Where are you?

Division, Drop Point, Road

What do you have?

Green, Yellow, Red injury or illness

What do you need?

Agency, Ground Ambulance, Air Ambulance, Air Hoist

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha, Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2nd - 3rd burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2nd - 3rd burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>		
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND	CALCORD / Channel 13	156.0750	T-6	156.0750	T-6
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
