6. Weather Forecast for Period: <b>WEATHER DISCUSSION</b> ...Winds will be a concern today as south to southwest winds increase along the ridges with gusts to 20 mph possible in the afternoon. Over the remainder of the fire upslope and upvalley winds that become aligned with the general winds will also become gusty too. We will have slightly warmer and drier conditions today with respect to temperatures and humidities despite humidity recoveries being slightly better than the past few mornings. This will allow the atmosphere to become unstable once again in the afternoon. Smoke will likely be concentrated once again in and around the Delta Fire, but will then drift over the Hirz Fire in the afternoon. A dry cold front will move into the area around 2300 tonight and shift the ridgetop winds to the west and northwest with gusts in the 20 to 25 mph range possible through 1000 Saturday before diminishing. Downslope/downvalley winds tonight could be gusty when becoming aligned with the west to northwest winds. Temperatures will be 5 degrees cooler on Saturday with relative humidities about 5 percent higher than today.															
7. General Safety Message: <b>Transition of Operational Resources:</b> During the course of a fire or a shift, institutional knowledge is developed. During transition periods, some of that knowledge maybe lost. As night resources shift ends and new resources arrive, knowledge will need to be passed along. Some methods to limit the loss of this vital information between operational resources on the fireline include; <ul style="list-style-type: none"> <li>• Have a face to face transition whenever possible. Make sure you receive a through briefing and if unclear on any issues, ask questions.</li> <li>• Resources spend a lot of time gathering "SA". The learning curve for fresh resources can be drastically reduced by receiving a through briefing.</li> </ul>

## FRIDAY...

Sky/weather.....Becoming partly cloudy in the afternoon. Very warm and dry.  
Areas of smoke. Inversion breaks after 1100.  
Max temperature.....80-85 ridgetops and 96-101 lower drainages.  
Min humidity.....14-19 percent ridges and 10-15 percent lower drainages.  
Wind (20 ft).....  
Slope/valley.....Downslope/Downvalley 2-6 mph until 1100, then  
upslope/upvalley 3-6 mph and gusts to 10 mph.  
Ridgetop.....North-Northeast 5-10 mph with gusts to 15 mph until 1100,  
then South-Southwest 8-12 mph with gusts to 20 mph.  
Mixing height.....12,000 - 14,000 ft AGL.  
Transport winds.....Northeast 6 mph until 1100, then South-Southwest 12 mph.  
CWR.....0 percent. LAL of 1.

---

## TONIGHT...

Sky/weather.....Partly cloudy. Areas of smoke.  
Min temperature.....55-60 ridgetops, 53-58 lower drainages.  
Max humidity.....43-48 percent ridges and 60-65 percent lower drainages.  
Wind (20 ft).....  
Slope/valley.....Upslope 3-6 mph becoming downslope 3-6 mph after 2200.  
Ridgetop.....Southwest 8-12 mph with gusts to 16 mph until 2300,  
then West-Northwest 8-14 mph with gusts 20-25 mph possible.  
Mixing height.....Lowering to around 2000 ft AGL.  
Transport winds.....Southwest 11 mph until 2300, then North-Northwest 12 mph.  
CWR.....0 percent. LAL of 1.

---

## SATURDAY...

Sky/weather.....Becoming mostly sunny. Areas of smoke.  
Max temperature.....76-81 ridgetops and 92-97 lower drainages.  
Min humidity.....19-24 percent ridges and 15-20 percent lower drainages.  
Wind (20 ft).....  
Slope/valley.....Downslope/Downvalley 3-6 mph until 1100, then  
upslope/upvalley 3-6 mph.  
Ridgetop.....North-Northwest 6-12 mph with gusts to 20 mph until 1100,  
then becoming southwest 5 to 10 mph in the afternoon.  
Mixing height.....6,000 to 8,000 ft AGL.  
Transport winds.....Northeast 8 mph until 1200, then Southwest 7 mph.  
CWR.....0 percent. LAL of 1.

## FIRE BEHAVIOR FORECAST

**Forecast Number:** 40

**Type of Incident:** Wildfire

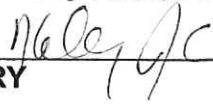

**Incident Name:** Hirz/Delta

**Operational Period:** 09/07/2018 0600-1800

**Date/Time Issued:** 09/06/2018 1930

**Analyst:** /S/ Kelly Allen, FBAN

**Responsible Unit:** CA-SHF-0001223

### WEATHER/FUELS SUMMARY

Smokey, becoming partly cloudy in the afternoon. Very warm and dry. Inversion breaks after 1100.

Max Daytime Temps, 80-101 deg.      Min Daytime Humidity, 10-19%

20' Winds Slope/valley: downslope 2-6 mph until 1100, becoming upslope 3-6 mph with gusts to 10 mph.  
Ridgetop: NNE 5-10 mph with gusts to 15 mph until 1100, then SSW 8-12 mph with gusts 20 mph

### . FIRE BEHAVIOR

#### General:

Fires are burning in grass/litter/understory, brush and mixed conifer with closed canopy of less than 20 ft. FDFM is 3%, making all fuels available to burn.

Increased fire behavior and reburn potential will be high on both fires especially where fuel, topography and winds align.

With a PIG of 90-100%, spot fires will be problematic and will be resistant to control efforts.

The drainages (Sacramento River and East Fork of the Trinity River) to the east and west of the Delta Fire will influence fire movement along the adjacent slopes as winds fuels and topography align.

#### Specific: Inversion breaks after 1100.

#### Hirz

Expect to see smoldering, creeping and some single tree torching as wind direction/speed and topography align. Islands of fuel will still burn under the right conditions, but should not pose any problems to the fire perimeter.

#### Delta

**Flame Lengths:** 3-6 ft. in grass/litter/understory, Up to 25 in Brush

**Rate of Spread:** Up to 6 ft./min., litter/understory. 80 ft./min. in grass, 100 ft./min. in brush.

**Spotting Distances:** Downwind; Up to .25 miles in grass/brush, Up to .75 miles in timber.

**Probability of Ignition:** 90-100% at the peak of the burn period.

Expect active fire activity under the inversion. Areas of intense activity may break through the inversion which will allow for extreme behavior to follow depending on the duration and height of the column. Rollput on steep slopes is to be expected.

### AIR OPERATIONS

Smokey conditions may limit air support over areas of the fire. Smokey areas will change throughout the burn period.

### SAFETY

Small changes in wind speed/direction and relative humidity can change fire behavior dramatically in a short amount of time. Be deliberate in your thought process in implementing tactics.

## SAFETY MESSAGE

INCIDENT: Hirz / Delta Fire CA-SHF-001223

DATE: 09/07/2018 TIME: 0600-1800

### Major Hazards and Risks:

- **DRIVING**
- **FIRE WEAKENED TREES; STUMP HOLES; BURNING UNDERGROUND ROOTS.**
- **HEAT STRESS AND DEHYDRATION.**
- **ROLLING ROCKS AND OTHER MATERIAL ON STEEP SLOPES.**

Fire Order of the Day – *Know what your fire is doing at all times.*

### Transition of Operational Resources:

During the course of a fire or a shift, institutional knowledge is developed. During transition periods, some of that knowledge maybe lost. As night resources shift ends and new resources arrive, knowledge will need to be passed along.

Some methods to limit the loss of this vital information between operational resources on the fireline include;

- Have a face to face transition whenever possible. Make sure you receive a through briefing and if unclear on any issues, ask questions.
- Resources spend a lot of time gathering "SA". The learning curve for fresh resources can be drastically reduced by receiving a through briefing.

17.TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

**Does SA get reduced to a catch phrase or used in a passive sense? "Make sure you keep good SA out there today!"**

- Situation Awareness is the foundation for decision making. Developing and maintaining situational awareness is a deliberate act; requiring energy and practice to improve its accuracy.
- Maintaining SA is difficult in the complex wildland fire environment. The closer our SA matches reality the more informed decisions we can make.
- The more accurate our SA, the greater our capacity is to increase margin into our tactics, thereby increasing our ability to be proactive rather than reactive.

### **DON'T BE**

**Unaware** and unprepared. In this condition you will more than likely be surprised by changes in the environment.

Know the operational plan, understand the values at risk, conduct your risk assessments (Risk vs Gain), understand your part and be prepared 100% to execute the plan.

Location	Hazard	Control or Abatement Action
All	Air Operations	<ul style="list-style-type: none"> <li>• Follow "Aviation Watch-Out Situations" in IRPG.</li> <li>• Don't rely on air resources for medical transport or resupply.</li> <li>• Visibility may be impaired. Have a backup plan.</li> <li>• Refer to IRPG for directing bucket drops.</li> <li>• Ensure positive communication with all air resources.</li> <li>• Keep personnel out of drop zones.</li> <li>• Use clear concise statements when directing aircraft. 7. Name & Location	Remote Locations
--------------------	------------------

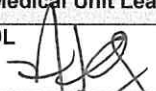

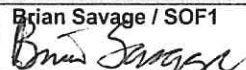

Special Medical Emergency Procedures for remote locations.

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

## Incident Operations Driving

These standards address driving by personnel actively engaged in wildland fire or all-hazards response activities, including driving while assigned to a specific incident or during initial attack fire response (includes time required to control the fire and travel to a rest location). In the absence of more restrictive agency policy, these guidelines will be followed during mobilization and demobilization as well. Individual agency driving policies shall be consulted for all other non-incident driving.

Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty-day.

- No driver will drive more than 10 hours (behind the wheel) within any duty-day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
- A driver shall drive only if they have had at least 8 consecutive hours off duty before beginning a shift.

Exception to the minimum off-duty hour requirement is allowed when essential to:

- Accomplish immediate and critical suppression objectives, or
- Address immediate and critical firefighter or public safety issues.

As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hours work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.

<b>Incident Type:</b> Wildfire	<b>Cause:</b> Human, under investigation

**PHOTOGRAPHS AND VIDEOS**—The Information Section would greatly appreciate getting copies of videos and pictures you took. For example, photos showing the effect of moderate fire behavior, suppression-repair work, crews doing mop-up would be great! If your photos have people in them, ensure everyone is in full PPE. Email your photos to our Gmail account (address above) or bring your videos and pictures to the Information trailer. Tell us who took them, where, and a little bit about what we're seeing if you have time. Your photos and videos will be vetted and possibly used on our social media sites.

**MEDIA**—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does *not* imply that the news media may interfere with incident operations while they are in the areas of concern.

**LOST AND FOUND**—The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, bring it to the Information Section with information about where you found it.
