INCIDENT MAPS

INCIDENT OBJECTIVES	1. Incident Name HIRZ / DELTA FIRES	2. Date 09/07/18	3. Time 2100												
4. Operational Period: September 08, 2018 Day Shift 0600 - 1800															
<p>5. General Control Objectives for the Incident (include alternatives)</p> <p style="text-align: center;">Leader's Intent</p> <p>A full suppression strategy will be implemented for both the Hirz and Delta fires through a combination of direct and indirect tactics. Efforts will be made to minimize impacts to residences, critical infrastructure and private timberlands through the application of well-planned tactical responses.</p> <p style="text-align: center;">Management Objectives</p> <ul style="list-style-type: none"> • Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles. • Minimize the threat to private property, critical infrastructure, and commercial timberlands. • Establish and strengthen cooperater, partner, and stakeholder relationships. • All suppression repair work will be conducted in close coordination with assigned READs. <p style="text-align: center;">Control Objectives</p> <p>Keep the Delta Fire:</p> <ul style="list-style-type: none"> • North of the line that runs from Delta to Mosquito Creek Ridge to minimize impacts to I-5 and protect the communities of Pollock, Lakehead, and Lakeshore. • South of Middle Ridge (west side of I-5) to protect private timberlands. • South of Hazel Creek Road (east side of I-5) to minimize threat to communities and residences along I-5 corridor. • East of the East Fork of the Trinity River to minimize impacts to Highway 3 and protect recreational sites. • West of Crane Mountain to halt eastern spread. <p>Hirz Fire:</p> <ul style="list-style-type: none"> • Continue to mop-up and patrol as needed to ensure that fire stays within existing containment lines. 															
<p>6. Weather Forecast for Period:</p> <p>WEATHER DISCUSSION...A change in the weather has taken place with the passage of a dry cold front late last night. We will see cooler temperatures today along with slightly higher humidities. Winds along the ridges will be from the north and northeast, but then become south and southwest in the afternoon. Terrain driven winds are expected over the remainder of the fire areas with areas of smoke. The atmosphere will also be more stable with lower mixing heights than the past few days. Fair to good humidity recoveries are expected tonight and we will once again see the south-southwest winds along the ridges shifting to the north-northeast around midnight. Expect little change on Sunday with temperatures up a degree or two and relative humidities down one to two percent along with the typical midday switch of ridgetop winds from north-northeast to south-southwest.</p>															
<p>7. General Safety Message:</p> <p>Potential for Spotting and Severe Fire Behavior</p> <ul style="list-style-type: none"> • Share weather observations and IMET updates with all personnel assigned to division • Establish "Decision Points" to withdraw • Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone) • Use "Risk Management" process prior to taking action, refer to IRPG pg.1 • Review "Severe fire behavior potential" IRPG pg. 68 • Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift• Factor in local conditions that will impact fire behavior prior to operations• Be mindful of rapidly changing fire and "explosive" fire behavior especially in areas of tree mortality.

FIRE WEATHER FORECAST

FORECAST NO. 29

NAME OF FIRE: Hirz & Delta Fires

PREDICTION FOR Saturday September 8th, 2018

UNIT: Shasta Trinity National Forest

TIME AND DATE

SIGNED: 

FORECAST ISSUED: 1930 Friday 09/07/18

Eric Evenson / Incident Meteorologist

WEATHER DISCUSSION...A change in the weather has taken place with the passage of a dry cold front late last night. We will see cooler temperatures today along with slightly higher humidities. Winds along the ridges will be from the north and northeast, but then become south and southwest in the afternoon. Terrain driven winds are expected over the remainder of the fire areas with areas of smoke. The atmosphere will also be more stable with lower mixing heights than the past few days. Fair to good humidity recoveries are expected tonight and we will once again see the south-southwest winds along the ridges shifting to the north-northeast around midnight. Expect little change on Sunday with temperatures up a degree or two and relative humidities down one to two percent along with the typical midday switch of ridgetop winds from north-northeast to south-southwest.

TODAY...

Sky/weather.....Becoming mostly sunny. Areas of smoke.
Max temperature.....76-81 ridgetops and 92-97 lower drainages.
Min humidity.....19-24 percent ridges and 15-20 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Downslope/Downvalley 3-6 mph until 1100, then
upslope/upvalley 3-6 mph.
Ridgetop.....North-Northwest 5-10 mph with gusts to 15 mph until 1100,
then becoming southwest 5 to 10 mph in the afternoon.
Mixing height.....6,000 to 8,000 ft AGL.
Transport winds....North 8 mph until 1100, then Southwest 7 mph.
CWR.....0 percent. LAL of 1.

TONIGHT...

Sky/weather.....Clear. Areas of smoke with reduced visibilities. Inversion
develops after 2200.
Min temperature.....52-57 ridgetops, 50-55 lower drainages.
Max humidity.....45-50 percent ridges and 63-68 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Upslope 3-6 mph becoming downslope 3-6 mph after 2200.
Ridgetop.....Southwest 5 to 10 mph until 2200, then North-Northeast 5 to
10 mph with gusts to 15 mph.
Mixing height.....Lowering to around 2000 ft AGL.
Transport winds....Southwest 7 mph until 2300, then North-Northeast 7 mph.
CWR.....0 percent. LAL of 1.

SUNDAY...

Sky/weather.....Mostly sunny. Areas of smoke. Inversion breaks around 1200.
Max temperature.....77-82 ridgetops and 93-98 lower drainages.
Min humidity.....18-23 percent ridges and 14-19 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Downslope/Downvalley 3-6 mph until 1100, then
upslope/upvalley 3-6 mph.
Ridgetop.....North-Northeast 5-10 mph until 1100, then becoming southwest
5-10 mph in the afternoon.
Mixing height.....7,000 to 9,000 ft AGL.
Transport winds....Northeast 7 mph until 1200, then Southwest 7 mph.
CWR.....0 percent. LAL of 1.

FIRE BEHAVIOR FORECAST

Forecast Number: 42

Type of Incident: Wildfire

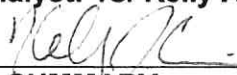

Incident Name: Hirz/Delta

Operational Period: 09/08/2018 0600-1800

Date/Time Issued: 09/07/2018 1930

Analyst: /S/ Kelly Allen, FBAN

Responsible Unit: CA-SHF-0001223

WEATHER/FUELS SUMMARY

Becoming mostly sunny. Areas of smoke/reduced visibilities.

Max Daytime Temps, 76-97 deg. Min Daytime Humidity, 15-24%

20' Winds Slope/valley: downslope 3-6 mph until 1100, becoming upslope/up valley 3-6 mph.
Ridgetop: NNW 5-10 mph with gusts to 15 mph until 1100, then SSW 5-10 mph in the afternoon.

. FIRE BEHAVIOR

General:

Fires are burning in grass/litter/understory, brush and mixed conifer with closed canopy of less than 20 ft. FDFM is 3%, making all fuels available to burn. Increased fire behavior and reburn potential will be high on both fires especially where fuel, topography and winds align. With a PIG of 90-100%, spot fires will be problematic and will be resistant to control efforts. The drainages (Sacramento River and East Fork of the Trinity River) to the east and west of the Delta Fire will influence fire movement along the adjacent slopes as winds fuels and topography align.

Specific:

Hirz

Expect to see smoldering, creeping and some single tree torching as wind direction/speed and topography align. Islands of fuel will still burn under the right conditions, but should not pose any problems to the fire perimeter.

Delta

Flame Lengths: 3-6 ft. in grass/litter/understory, Up to 25 in Brush
Rate of Spread: Up to 6 ft./min., litter/understory. 80 ft./min. in grass, 100 ft./min. in brush.
Spotting Distances: Downwind; Up to .25 miles in grass/brush, Up to .75 miles in timber.
Probability of Ignition: 90-100% at the peak of the burn period.

Expect active fire behavior to increase with no inversion to impede activity, however atmospheric stability will be such that column development will be minimized. Roll out on steep slopes is to be expected and will be difficult to control.

AIR OPERATIONS

Smoke impacts should be less after the frontal passage, making for better opportunities for aircraft support.

SAFETY

Small changes in wind speed/direction and relative humidity can change fire behavior dramatically in a short amount of time. Be deliberate in your thought process in implementing tactics.

SAFETY MESSAGE

“Don’t Take Safety For Granted”

Hirz Fire and Delta Fire

Day Shift 09/07/2018 1800-0600

- **Snags and Hazard Trees** - Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being felled. Check overhead for dead branches and make a good assessment prior to parking your vehicles.
- **Driving on the Incident** – Driving is a concern on this incident. HWY 89 has heavy traffic due to the I-5 FRWY closure. There is freeway construction on S/B I-5 @ HWY 89. No fire vehicles are to bypass freeway detours and drive through construction areas- (There’s wet concrete!!!) Please drive slow through the community of McLeod, the speed limit is 25 MPH.
- **Hazardous Terrain** - Steep terrain is present throughout both fires. Rolling material has been a major issue. Rocks and trees have been loosened or dislodged by the fire. Evaluate your work area closely before entering. Spread workers out farther than 10 feet apart. Stagger workers so they are not working or walking directly below each other.
- **Firing Operations** – Conduct a thorough briefing for all personnel, utilize Risk Management Process, wear required PPE, utilize fully qualified personnel, and maintain LCES. Make the appropriate notifications prior to putting fire on the ground.

Look Up, Look Down,
Look Around

***Fuel Characteristics** – Assess prior to beginning operations.

***Terrain & Fuel Accumulations** – Scout prior to beginning operations and during operations.

***Wind** – Measure, observe, feel and notice changes.

***Fire Behavior** – Monitor constantly prior to and during operations.

***Safety** – Ask questions in unfamiliar situations.

The only dumb question is the one that wasn't asked.

Watchout Situation of the Day

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Incident Safety Officers: Brian Savage, Charlotte Jordan

Brian Savage

Location	Hazard	Control or Abatement Action
All	Air Operations	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" in IRPG. • Don't rely on air resources for medical transport or resupply. • Visibility may be impaired. Have a backup plan. • Refer to IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Keep personnel out of drop zones. • Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.
All	Power and Utilities	<ul style="list-style-type: none"> • Notify all personnel of down electrical lines. • Refer to the IRPG page 24 for Power Line Safety • Always treat downed wires as energized • Identify and avoid high tension transmission lines. • Identify and avoid high pressure natural gas lines • Identify and avoid damaged gas service near structures • Be aware of utility work under way in your work area
All	Potential for Spotting and Severe Fire Behavior	<ul style="list-style-type: none"> • Share weather observations and IMET updates with all personnel assigned to division • Establish "Decision Points" to withdraw • Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone) • Use "Risk Management" process prior to taking action, refer to IRPG pg.1 • Review "Severe fire behavior potential" IRPG pg. 68 • Maintain adequate escape routes and safety zones; continue to re-evaluate throughout the shift• Factor in local conditions that will impact fire behavior prior to operations• Be mindful of rapidly changing fire and "explosive" fire behavior especially in areas of tree mortality
All	Engagement in a tree mortality area	<ul style="list-style-type: none"> • Carefully evaluate values at risk and need for exposure• Maintain appropriate clearance distance from trees• Be alert for overhead hazards that may fall• Disengage operations at dark in areas of tree mortality • Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities• Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging • Be aware of rapid and extreme fire spread with little wind in pockets of high mortality• Ensure escape routes and safety zones are in place for extreme and rapid fire growth• Establish decision points for disengagement
All	Fatigue, Overexertion, dehydration and heat related illness	<ul style="list-style-type: none"> • Drink fluids throughout operational period (water and Gatorade) not energy drinks • Rotate crews out of smoky areas • Follow work / rest guidelines • Set a reasonable work pace and allow adequate rest breaks • Use buddy system to monitor personnel for heat related and fatigue issues • For Heat Related Injuries refer to IRPG pg.103
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking • Don't work above any personnel • Evaluate necessity to send personnel in areas with limited access • Use extreme caution when driving roads where rolling rocks may fall
Branch IX	Railroad	<ul style="list-style-type: none"> • Avoid areas of smoke generated from railroad ties that have been treated with creosote • Avoid foot traffic near any switch mechanism • Stay clear of train when passing at a minimum of 25ft • Never block tracks with vehicles • Do not leave anything on the rails or tracks
All	Structure Protection & HAZMAT	<ul style="list-style-type: none"> • Identify and avoid damaged gas service near structures • Review "Wildland Urban Interface" Watch outs, IRPG page 12 • Use "Structure Size Up and Protection, IRPG 13-16 • Follow "HAZMAT Incident Operations" on pages 36- 38 in IRPG

All	Communications	<ul style="list-style-type: none"> Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources Utilize Human repeaters where needed Provide a detailed briefing for all personnel assigned to the Incident Document briefings on unit log Use Risk Management Process in evaluating all assignments Explain leadership responsibilities and expectations from all personnel assigned to task Determine hazards, and mitigation protocol to limit exposure Review 215a Discuss expected fire behavior, and plans for retreat Discuss weather, Escape Routes, Safety Zones Discuss communication plan including all tactical, aerial, and command frequencies Discuss Emergency Plan outlined in the ICS-206
All	Driving & Traffic	<ul style="list-style-type: none"> Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool Always wear hardhats in fire area when outside of vehicle Practice "Defensive Driving" techniques traveling on all roads and city streets, ICP, base and spike camps Watch for opposing traffic that may cross over into your lane on narrow winding roads Watch for falling rocks and debris on roadways in steep areas of the fire Use extra precautions when driving in congested areas Use spotters when backing Always use headlights Yield to pedestrians and bicycles Observe posted speed limits Follow 3 second rule of following distance when driving Use chock blocks, turn wheels into hill Seat Belts are mandatory No texting while driving Use extreme caution when driving or parking on I-5. Do not drive in coned off areas of road construction on Interstate 5.
All	Heavy Equipment Operations and Suppression Repair	<ul style="list-style-type: none"> Ensure communications are established with operator prior to work Maintain identified safety exclusion area around equipment Before approaching; make eye contact with operator and wait for blade placement on ground Avoid working below equipment where rolling material could jeopardize safety Before moving or transporting equipment identify low hanging wires, ensure there is clearance Require crewmembers to maintain a safe distance of 300 ft. from Excavator equipment Have suppression crew nearby with water in case sparks ignite woody debris
All	Fireline Hazards and Mop Up	<ul style="list-style-type: none"> Do not work directly above or below personnel during mop-up operations Identify and make known burning stumps or roots that may cave in Wear appropriate PPE Watch for falling, rolling debris on steep slopes Call out to crew personnel that may be affected by sudden rolling debris or rocks For logs that may roll re-position perpendicular to the slope Watch for weakened trees that may pose danger or fall Scout areas for mop up prior to work Maintain 8'-10' spacing when working & walking
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> Use warning lights and provide traffic control on roadways during smokey and night operations Rotate crews out of smokey areas during firing and mop-up operations Contact Communications when firing operations are initiated for potential increase in smoke production
All	Marijuana Plantations	<ul style="list-style-type: none"> Leave area quietly in the same direction that you entered and notify DIVS Watch for hazardous materials and be aware of possible traps in the grow area Use extreme caution during encounters Individuals guarding plantation may be armed Grower may become confrontational, maintain calm demeanor and leave area
All	Chain Saw Operations	<ul style="list-style-type: none"> Only fell and buck trees within your expertise, and training Look up, down around for hazard tree indicators : trees burning for long periods of time, dead, broken ,or burnt out tops and limbs overhead Follow "Procedural Felling Operations" on page 79 in IRPG Do not fall trees during high wind events Use precautionary measures when re-fueling saws to prevent "fuel geysering "
All	Environmental Hazards	<ul style="list-style-type: none"> Be alert for rattlesnakes, watch footing and hand placement around rocks Check yourself for ticks, watch for bees and other insects that bite Watch out for wildlife inside fire area and along roadways. Practice Bear Avoidance- Clean up all debris and trash during each operational period
All	Firing Operations & Devices	<ul style="list-style-type: none"> Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial and ground ignition plans have been adequately developed and personnel are briefed.

7. Name & Location	Remote Locations
--------------------	------------------

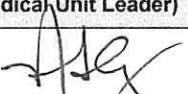

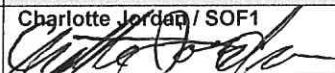

Special Medical Emergency Procedures for remote locations.

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. **Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP.** Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. **Green (Non-Life Threatening), Yellow (Serious Injury/Illness), Red (Life Threatening Injury/Illness).**
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
8. Identify preferred method of patient transport. **Ground or Air.**
9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

8. Prepared By (Medical Unit Leader)	9. Date/Time	10. Reviewed By (Safety Officer)	11. Date/Time

Finance Demob 101

As resources start timing out its time to start to think about demobing. Think about the following:

- Check in with us 1-2 days before your demob day. Get a draft of your time document to review and check for errors.
- Allow yourself plenty of time to go through the demob process.
 - Overhead: You will need to go through the different sections in the ICP, so allow no less than 1 hour for demob.
 - Equipment/Contractors: Because you have to get an inspection as well as going through the ICP sections for signatures before demob, it would be good to plan for 2 hours.
- Come to Finance with your final shift ticket and/or CTRs completed, with signatures.

FINANCE MESSAGE

Make sure you are documenting your CTR's with the correct Fire Name and Job Code.

With new fire starts we need to charge accordingly on what fire you worked on for your shift.

HIRZ FIRE	
Incident Start Date: August 9, 2018	Incident Start Time: 1:55 AM
Incident Type: Wildfire	Cause: Human, under investigation

DELTA FIRE	
Incident Start Date: September 5, 2018	Incident Start Time: 12:51 PM
Incident Type: Wildfire	Cause: Human, under investigation

PHOTOGRAPHS AND VIDEOS—The Information Section would greatly appreciate getting copies of videos and pictures you took. For example, photos showing the effect of moderate fire behavior, suppression-repair work, crews doing mop-up would be great! If your photos have people in them, ensure everyone is in full PPE. Email your photos to our Gmail account (address above) or bring your videos and pictures to the Information trailer. Tell us who took them, where, and a little bit about what we're seeing if you have time. Your photos and videos will be vetted and possibly used on our social media sites.

MEDIA—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does *not* imply that the news media may interfere with incident operations while they are in the areas of concern.

LOST AND FOUND—The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, bring it to the Information Section with information about where you found it.

MAIL SERVICE—

For USPS mail, use the following address:

Delta or Hirz Fire ICP
Your name, Order #
General Delivery
McCloud, CA 96057

For UPS or FedEx packages, use the following address:

Hirz Fire Suppression Repair

Repair Objectives

- **Minimize Surface and Gully Erosion**
- **Minimize Loss of Soil Productivity due to Erosion In Cleared Areas**
- **Repair Meadows and Wetlands Damaged By Suppression Activities**
- **Minimize Spread of Noxious Weed Infestations**
- **Minimize Excessive Side-Cast Fuels Along Roads**
- **Minimize Impacts to Inventoried Roadless Areas and Wild & Scenic River Corridors**
- **Repair Impacts to Cultural and Historic Resources**
- **Repair Damage to National Forest Roads and Trails Caused by Fire Suppression Activities**
- **Review by Agency READ/REAFs for On-Site Verification of Objectives Completed**

Suppression Repair Focus

- **Dozer Lines**
- **Hand Lines**
- **Roads and Trails**
- **Safety Zones and Staging Areas**
- **Drop Points**
- **Helispots**
- **Water Sources**

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on firelines.

Fireline slope %		Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.

Date and Time Needed: _____ **Point of Contact at Delivery Location:** _____

OTHER / NOTES:

Who are you ?

Name of division, position, assignment

Where are you?

Division, Drop Point, Road

What do you have?

Green, Yellow, Red injury or illness

What do you need?

Agency, Ground Ambulance, Air Ambulance, Air Hoist

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND	CALCORD / Channel 13	156.0750	T-6	156.0750	T-6
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
