# DELTAFIRE

CA-SHF-001444 P5L4L8 (0514)

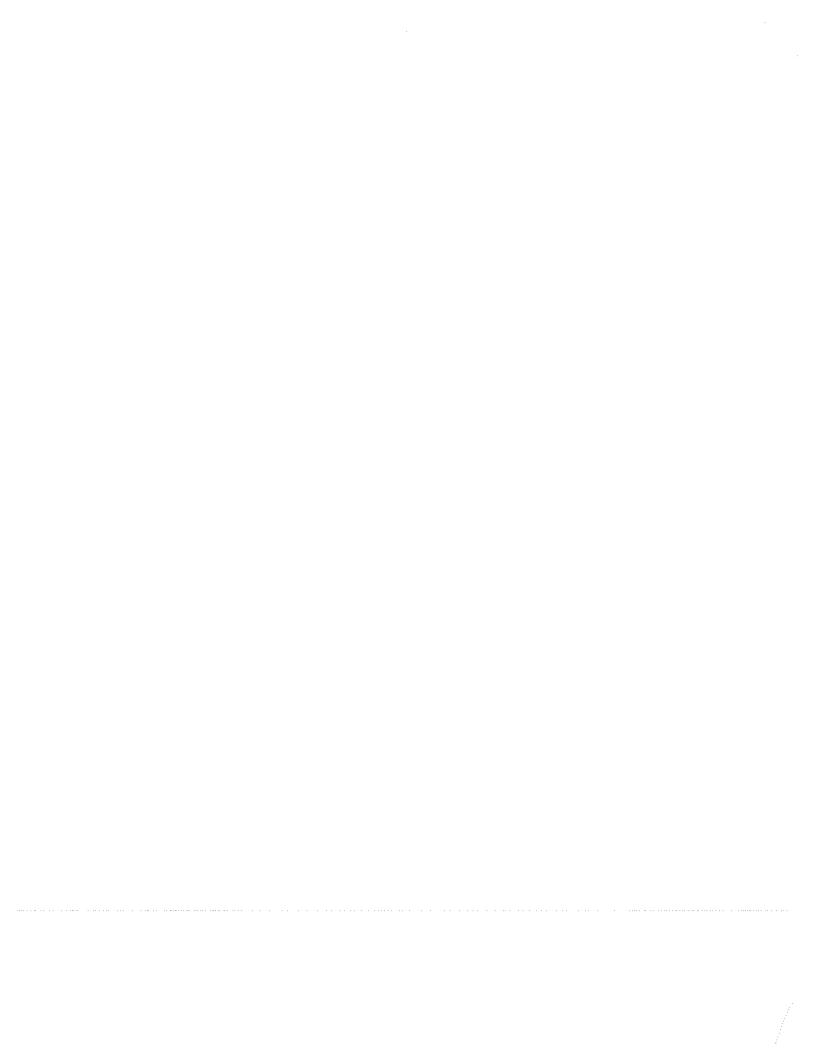

# INCIDENT ACTION PLAN DAY SHIFT SEPTEMBER 09, 2018 0600 - 1800

FIRE INFORMATION # (530) 628-0039

**INCIDENT MAPS** 

### 

4. Operational Period: September 09, 2018 Day Shift 0600 - 1800

5. General Control Objectives for the Incident (include alternatives)

### Leader's Intent

3. Time

2100

A full suppression strategy will be implemented for both the Hirz and Delta fires through a combination of direct and indirect tactics. Efforts will be made to minimize impacts to residences, critical infrastructure and private timberlands through the application of well-planned tactical responses.

### **Management Objectives**

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure, and commercial timberlands.
- Establish and strengthen cooperator, partner, and stakeholder relationships.
- All suppression repair work will be conducted in close coordination with assigned READs.

### **Control Objectives**

### Keep the Delta Fire:

- North of the line that runs from Delta to Mosquito Creek Ridge to minimize impacts to I-5 and protect the communities of Pollock, Lakehead, and Lakeshore.
- South of Middle Ridge (west side of I-5) to protect private timberlands.
- South of Hazel Creek Road (east side of I-5) to minimize threat to communities and residences along I-5 corridor.
- East of the East Fork of the Trinity River to minimize impacts to Highway 3 and protect recreational sites.
- West of Crane Mountain to halt eastern spread.

0

### Hirz Fire:

Continue to mop-up and patrol as needed to ensure that fire stays within existing containment lines.

### 6. Weather Forecast for Period:

### WEATHER DISCUSSION

We return to our typical wind pattern today through Monday. This means north to northeast ridgetop winds at the start of the operational period and then switching to the south and southwest after 1100, before switching back to the north-northeast after 2200. During this same time period terrain driven winds will exist with downslope winds until 1100, before switching upslope through 2200, and then back to downslope for the remainder of the night. Temperatures will be up a degree or two today with relative humidities down 1-2 percent from yesterday. Humidity recoveries will be fair to good tonight with similar high temperatures and minimum relative humidities on Monday. Smoke from the Delta Fire will continue to be an issue through the period with reduced visibilities at times and impacts to air operations.

### 7. General Safety Message:

Today will begin the stages of transition to a change in command. That, combined with the arrival of many new personnel and equipment can result in confusion and uncertainty regarding assignment and chain of command. The influx of personnel not familiar with the area will need thorough and detailed briefings. This time of the fire is very busy so be purposeful and completely present when uploading new resources.

### FIRE BEHAVIOR FORECAST

Forecast Number: 44

Type of Incident: Wildfire

Incident Name: Hirz/Delta

Operational Period: 09/09/2018 0600-1800

Date/Time Issued: 09/08/2018 1930

Analyst: /S/ Kelly Allen, FBAN

Responsible Unit: CA-SHF-0001223

### WEATHER/FUELS SUMMA

Mostly sunny. Area of smoke. Inversion breaks around 1200.

Max Daytime Temps, 76-99 deg.

Min Daytime Humidity, 12-21%

20' Winds: Slope/valley: downslope 3-6 mph until 1100, becoming upslope/up valley 3-6 mph, gusts to 8

mph.

Ridgetop: NNW 5-10 mph with gusts to 15 mph until 1100, then SSW 6-12 mph in the afternoon

with gusts to 16 mph.

### **FIRE BEHAVIOR**

### General:

Fires are burning in grass/litter/understory, brush and mixed conifer with closed canopy of less than 20 ft. FDFM is 4%, making all fuels available to burn.

Increased fire behavior and reburn potential will be high on both fires especially where fuel, topography and winds align.

With a PIG of 90-100%, spot fires will be problematic and will be resistant to control efforts.

The drainages (Sacramento River and East Fork of the Trinity River) to the east and west of the Delta Fire will influence fire movement along the adjacent slopes as winds fuels and topography align.

### Specific:

### Hirz

Expect to see smoldering and creeping. No threats to the fire perimeter.

### Delta

Flame Lengths: 3-6 ft. in grass/litter/understory, Up to 25 in Brush

Rate of Spread: Up to 6 ft./min., litter/understory. 80 ft./min. in grass, 100 ft./min. in brush.

Spotting Distances: Downwind; Up to .25 miles in grass/brush, Up to .75 miles in timber.

Probability of Ignition: 80-90% at the peak of the burn period.

Fire will back downslope in the grass/litter/understory, then make short uphill runs once it reaches the bottom of the slope. Some slope reversal may occur in narrow drainages. In areas with alignment expect to see active short runs with single/group tree torching.

### **AIR OPERATIONS**

Smoke impacts will still affect Air Operations on different areas of the fire at different times of the shift. Base your actions accordingly.

### SAFETY

Local Thresholds-Watch Out: Combinations of any of these factors can greatly increase fire behavior: 20' wind speed over 3 mph. RH less than 21%. Temperature over 73. Burning Index over 30

## FIRE WEATHER FORECAST

FORECAST NO. 31 NAME OF FIRE: _Hirz & Delta Fires UNIT: Shasta Trinity National Forest TIME AND DATE FORECAST ISSUED: _1930 Saturday 09/08/18	PREDICTION FOR Sunday September 9th, 2018  SIGNED: Eric Evenson / Incident Meteorologist

# **SAFETY MESSAGE**

Delta Fire - CA-SHF-001223 Hirz Fire - CA-SHF-001444

Day Shift 09/09/2018

0600-1800

### **MAJOR HAZARDS:**

- NEW PERSONNEL UNFAMILIAR WITH THE LOCAL AREA AND CONDITIONS.
- POTENTIAL ALLIGNMENT OF TOPOGRAPHY, WIND AND FUEL
- UNFAMILIAR WITH FOREST ROAD SYSTEMS AND TRAVEL ROUTES

### Fire Order of the Day - Post lookouts where there is possible danger.

Transition – Today will begin the stages of transition to a change in command. That, combined with the arrival of many new personnel and equipment can result in confusion and uncertainty regarding assignment and chain of command. The influx of personnel not familiar with the area will need thorough and detailed briefings. This time of the fire is very busy so be purposeful and completely present when uploading new resources.

### Fire Behavior –

Hirz- Smoldering with single tree torching, low to moderate fire behavior.

<u>Delta</u> - If the winds align with the overall topography there is a high probability of extreme fire behavior and rapid rates of spread. Posting lookouts and having communication with escape route and safety zones identified is critical.

- > All personnel need to be aware of communications, escape routes, and safety zones! In addition, post experienced lookouts and verify command and tactical frequencies.
- > Hydration becomes critical as we work with higher temps and lower relative humidity. Be alert to heat stress in yourself and others.

11.UNBURNED FUEL BETWEEN YOU AND THE FIRE

### **COMMUNICATIONS TIPS**

- ☐Put more emphasis on eye-to-eye communication.

  Delivering messages or information verbally is the best way to ensure a complete understanding of the material.
- □What? Speak up! Most people need to speak louder.
- □Question whether what you are saying is understandable or if it can it be made clearer. Many miscommunications are a result of vagueness or ambiguity.
- □Listen to comments or questions co-workers may have. Giving correct answers to these questions often provides a greater sense of understanding and can actually increase productivity and dedication.
- ☐Make sure you fully understand the communications plan and the assigned frequencies. This is especially important in unified command situations.

**Team Safety Officers** 

Charlotte Jordan Frian Savage

Location	Hazard	Control or Abatement Action
All	Air Operations	Pollow "Aviation Watch-Out Situations" in IRPG. Don't rely on air resources for medical transport or resupply. Visibility may be impaired. Have a backup plan. Refer to IRPG for directing bucket drops. Ensure positive communication with all air resources. Keep personnel out of drop zones. Use clear concise statements when directing aircraft. Use clock directions from pilot's perspective.
All	Power and Utilities	Notify all personnel of down electrical lines.* Refer to the IRPG page 24 for Power Line Safety. Always treat downed wires as energized. Identify and avoid high tension transmission lines. Identify and avoid high pressure natural gas lines. Identify and avoid damaged gas service near structures. Be aware of utility work under way in your work area.
All	Potential for Spotting and Severe Fire Behavior	Share weather observations and IMET updates with all personnel assigned to division. Establish "Decision Points" to withdraw  Ensure LCES is in place (Lookout, Communications, Escape route and Safety Zone). Use "Risk Management" process prior to taking action, refer to IRPG pg.1. Review "Severe fire behavior potential" IRPG pg. 68.  Maintain adequate escape routes and safety zones; continue to reevaluate throughout the shift. Factor in local conditions that will impact fire behavior prior to operations. Be mindful of rapidly changing fire and "explosive" fire behavior especially in areas of tree mortality.
All	Engagement in a tree mortality area	Carefully evaluate values at risk and need for exposure Maintain appropriate clearance distance from trees Be alert for overhead hazards that may fall Disengage operations at dark in areas of tree mortality Conduct thorough briefings on hazards, fire behavior and trees soundness and integrity associated with dead and dying before engagement of suppression activities Clear area of all personnel prior to bucket or retardant drops and evaluate work area before re-engaging Be aware of rapid and extreme fire spread with little wind in pockets of high mortality Ensure escape routes and safety zones are in place for extreme and rapid fire growth Establish decision points for disengagement
All	Fatigue, Overexertion, dehydration and heat related illness	Drink fluids throughout operational period (water and Gatorade) not energy drinks. Rotate crews out of smoky areas. Follow work / rest guidelines. Set a reasonable work pace and allow adequate rest breaks. Use buddy system to monitor personnel for heat related and fatigue issues. For Heat Related Injuries refer to IRPG.
All	Steep Terrain & Rolling Debris	Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access. Use caution when driving roads where rolling rocks may fall.
Branch IX	Railroad	<ul> <li>Avoid areas of smoke generated from railroad ties that have been treated with creosote</li> <li>Avoid foot traffic near any switch mechanism</li> <li>Stay clear of train when passing at a minimum of 25ft</li> <li>Never block tracks with vehicles</li> <li>Do not leave anything on the rails or tracks</li> </ul>
All	Structure Protection & HAZMAT	<ul> <li>Identify and avoid damaged gas service near structures</li> <li>Review "Wildland Urban Interface" Watch outs, IRPG page 12</li> <li>Use "Structure Size Up and Protection, IRPG 13-16</li> <li>Follow "HAZMAT Incident Operations" on pages 36- 38 in IRPG</li> </ul>
All	Communications	<ul> <li>Utilize the ICS 205 and review daily for any changes to establish and maintain communication with aviation resources, and suppression organization.</li> <li>Ensure all know frequency and protocol for contacting resources</li> <li>Utilize Human repeaters where needed</li> <li>Provide a detailed briefing for all personnel assigned to the Incident</li> <li>Document briefings on unit log</li> <li>Use Risk Management Process in evaluating all assignments</li> <li>Explain leadership responsibilities and expectations from all personnel assigned to task</li> <li>Determine hazards, and mitigation protocol to limit exposure</li> <li>Review 215a</li> <li>Discuss expected fire behavior and plans for retreat</li> <li>Discuss weather, Escape Routes, Safety Zones</li> <li>28- iss communication plan including all tactical, aerial, and command frequencies</li> <li>Discuss Emergency Plan outlined in the ICS-206</li> </ul>

All	Driving & Traffic	• Use low gears on steep grades, drive slowly and pull over periodically to allow brakes to cool• Always wear hardhats in fire area when outside of vehicle•, • Watch for opposing traffic that may cross over into your lane on narrow winding roads• Watch for falling rocks and debris on roadways in steep areas of the fire • Use extra precautions when driving in congested areas • Use spotters when backing• Always use headlights • Yield to pedestrians and bicycles• Observe posted speed limits • Follow 3 second rule of following distance when driving • Use chock blocks, turn wheels into hill• Seat Belts are mandatory• No texting while driving *Use extreme caution when driving or parking on I-5. Do not drive in coned off areas of road construction on Interstate 5.
All	Heavy Equipment Operations and Suppression Repair	Ensure communications are established with operator prior to work     Maintain identified safety exclusion area around equipment Before approaching; make eye contact with operator and wait for blade placement on ground     Avoid working below equipment where rolling material could jeopardize safety     Before moving or transporting equipment identify low hanging wires, ensure there is clearance     Require crewmembers to maintain a safe distance of 300 ft. from Excavator equipment     Have suppression crew nearby with water in case sparks ignite woody debris
Division AA Division MM	Chipper Operations	~ Block chipper tires when unhooked from towing vehicle When working in roadway use warning systems for traffic.~ Check all safety shutdowns to be sure they are working properly.~ Check direction of discharge. Make sure discharge is pointed away from work areas, pedestrian walkways, or roadways. Never operate chipper alone.~ Do not wear clothing which may become tangled with brush being feed into chipper.~ Never reach into the infeed shroud. Feed short material on top of longer material or lay short pieces on the infeed tray and push into chipper with long branches or long piece of wood. Do not use rakes or shovels to push material into feeder. Do not use your hand or feet to push material into feeder.~ Hard hat, eye protection, gloves, and ear protection will be worn at all times when working near chipper.~ Review JHA with workers
All	Fireline Hazards and Mop Up	* Do not work directly above or below personnel during mop-up operations * Identify and make known burning stumps or roots that may cave in * Wear appropriate PPE * Watch for falling, rolling debris on steep slopes * Call out to crew personnel that may be affected by sudden rolling debris or rocks* For logs that may roll re-position perpendicular to the slope * Watch for weakened trees that may pose danger or fall * Scout areas for mop up prior to work * Maintain 8'-10' spacing when working & walking
All	Firefighter & Public Smoke Exposure	•Use warning lights and provide traffic control on roadways during smokey and night operations• Rotate crews out of smokey areas during firing and mop-up operations• Contact Communications when firing operations are initiated for potential increase in smoke production
All	Marijuana Plantations	Leave area quietly in the same direction that you entered and notify DIVS  Watch for hazardous materials and be aware of possible traps in the grow area  Use extreme caution during encounters Individuals guarding plantation may be armed  Grower may become confrontational, maintain calm demeanor and leave area
All	Chain Saw Operations	Only fell and buck trees within your expertise, and training Look up, down around for hazard tree indicators: trees burning for long periods of time, dead, broken ,or burnt out tops and limbs overhead. Follow "Procedural Felling Operations" on page 79 in IRPG. Do not fall trees during high wind events. Use precautionary measures when refueling saws to prevent "fuel geysering."
Ali	Environmental Hazards	<ul> <li>Be alert for rattlesnakes, watch footing and hand placement around rocks</li> <li>Check yourself for ticks, watch for bees and other insects that bite</li> <li>Watch out for wildlife inside fire area and along roadways. Practice Bear Avoidance- Clean up all debris and trash during each operational period</li> </ul>
All	Firing Operations & Devices	Only personnel trained in the use of each device will be authorized to use firing equipment.     Ensure all personnel are aware of firing operation that may affect them.     Wear appropriate PPE.     Ensure aerial and ground ignition plans have been adequately developed and personnel are briefed.

### **MEDICAL PLAN (ICS 206 WF)**

	Lat:	
	Long:	
7. Name & Location	Remote Locations	

Special Medical Emergency Procedures for remote locations.

Identify your EMT's for each Division. In the event of a medical emergency, notify your division supervisor (DIVS) and initiate care with available resources on scene. Follow the MEDICAL INCIDENT REPORT (MIR) procedure on pages 118-119 in the 2018 IRPG or from last page of the IAP. Using the MIR, notify Hirz Communications of the type of emergency and the location over the command channel. This will initiate the Incident Within Incident (IWI) procedures to get the appropriate resources to assist in the emergency.

The DIVS, or designee, shall coordinate the incident and direct necessary actions. Take the following actions:

- 1. Determine the nature of the emergency.
- 2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening. <u>Green (Non-Life Threatening)</u>, <u>Yellow (Serious Injury/Illness)</u>, <u>Red (Life Threatening Injury/Illness)</u>.
- 3. If the injury is life threatening, then clear designated frequency for emergency traffic.
- 4. Identify the on-scene point of contact by position.
- 5. Hirz Communications will contact the Medical Unit Leader and Safety immediately.
- 6. Identify number injured, patient assessment(s), location (geographic and/or GPS coordinates), and agency of the patient(s).
- 7. Identify on-scene medical personnel by division and position (i.e. Tango Medic, Tango EMT)
- 8. Identify preferred method of patient transport. Ground or Air.
- 9. Determine any additional resources or equipment needed.

Continually evaluate the Evacuation Plan, develop contingencies in the event the first plan is not effective.

# **FINANCE MESSAGE**

Make sure you are documenting your CTR's with the correct Fire Name and Job Code.

With new fire starts we need to charge accordingly on what fire you worked on for your shift.

HIRZ CA-SHF-001223 (0514) L2ZM

DELTA CA-SHF-001444 (0514) L4L8

Any questions please come see Finance

## **Finance Message**

### **Incident Operations Driving**

These standards address driving by personnel actively engaged in wildland fire or all-hazards response activities, including driving while assigned to a specific incident or during initial attack fire response (includes time required to control the fire and travel to a rest location). In the absence of more restrictive agency policy, these guidelines will be followed during mobilization and demobilization as well. Individual agency driving policies shall be consulted for all other non-incident driving.

Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the current agency work/rest policy for determining length of duty-day.

- No driver will drive more than 10 hours (behind the wheel) within any duty-day.
- Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
- A driver shall drive only if they have had at least <u>8 consecutive hours off</u> duty before beginning a shift.

Exception to the minimum off-duty hour requirement is allowed when essential to:

- · Accomplish immediate and critical suppression objectives, or
- Address immediate and critical firefighter or public safety issues.

As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hours work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.

Incident Start Date: August 9, 2018	Incident Start Time: 1:55 AM
Incident Type: Wildfire	Cause: Human, under investigation
DELTA FIRE	
Incident Start Date: September 5, 2018	Incident Start Time: 12:51 PM
Incident Type: Wildfire	Cause: Human, under investigation

PHOTOGRAPHS AND VIDEOS— Information needs photos and videos! Please share the amazing fire photos and videos you are taking in the field - fire behavior, air ops, ground crews, fire landscapes, night ops, suppression repair ... Ensure all fire personnel in photos/videos are in full PPE as appropriate to the task or setting. Photos/videos may be emailed directly from your phone to DeltaFireSHF@gmail.com or come by the Information trailer near the entrance of the ICP and we will assist. Include photographer's name (so we can give photo credit) and approximate location (road, mountain, DIV, DP...) Photos and videos will be reviewed and possibly used on our social media sites.

MEDIA—California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does *not* include crime scenes and private property, and it does not imply that the news media may interfere with incident operations while they are in the areas of concern.

LOST AND FOUND-The Information Section manages lost-and-found items for the incident. If you have lost an item, leave your contact information and item description with an information officer. If you have found an item, please bring it to the Information trailer with information about when and where you found it.

MAIL SERVICE— Mail and packages may be picked up at the Information trailer

For USPS mail, use the following address: Hirz/Delta Fire Your name, Resource Order # General Delivery

McCloud, CA 96057

For UPS or FedEx packages, use address: Hirz/Delta Fire Your name, Resource Order # 909 Mill Road McCloud, CA 96057

# Hirz Fire Suppression Repair

# Repair Objectives

- Minimize Surface and Gully Erosion
- Minimize Loss of Soil Productivity due to Erosion In Cleared Areas
- Repair Meadows and Wetlands Damaged By Suppression Activities
- Minimize Spread of Noxious Weed Infestations
- Minimize Excessive Side-Cast Fuels Along Roads
- Minimize Impacts to Inventoried Roadless Areas and Wild & Scenic River Corridors
- Repair Impacts to Cultural and Historic Resources
- Repair Damage to National Forest Roads and Trails Caused by Fire Suppression Activities
- Review by Agency READ/REAFs for On-Site Verification of Objectives Completed

# **Suppression Repair Focus**

- Dozer Lines
- Hand Lines
- Roads and Trails
- Safety Zones and Staging Areas
- Drop Points
- Helispots
- Water Sources

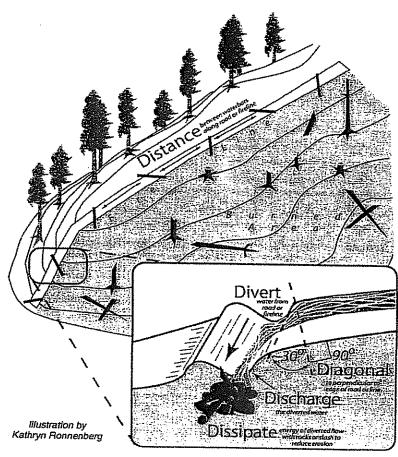

# **Effective Waterbars**

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

# Recommended spacing for waterbars on firelines.

Fireline slope %		Maximum Distance Apart <u>(feet)</u>
1 5	**>>**	200
6-20	*************************	125
21 – 40	*******************	60
41 – 60	***************************************	40
>60		25

Waterbars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.
