

HIRZ FIRE

Incident Action Plan

Day Shift August 22, 2018 (0600 – 2000) Night Shift August 22-23, (1800-0800)

Know Your Fire Orders

#9 Maintain control of your forces at all times.

Heavy Equipment Operations.

- Establish visual & radio communication methods are in place prior to engaging.
- Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Increase distance to 300'+ when working with Masticators.
- Make positive eye contact with operator before approaching. Approach only when the equipment is idled down, all implements have been lowered to the ground, and you're invited toward the cab.
- Close roads or trails if necessary for Firefighter and public safety.

Maintain a High Level of Situational Awareness
CA-SHF-001223, (0514) P5L2ZM
Shasta Trinity National Forest

Operations Map

INCIDENT OBJECTIVES	1. Incident Name Hirz	2. Date 08/21/2018	3. Time 2000
4. Operational Period August 22 – August 23, 2018 DAY - NIGHT SHIFT			
<p>LEADERS INTENT</p> <p>A full suppression strategy will be implemented for the Hirz Fire through a combination of direct and indirect strategies. Efforts will be made to minimize fire spread and severity across private timberlands and structures through the application of well-planned tactical responses.</p> <p>CONTROL OBJECTIVES</p> <p>Keep the Hirz Fire:</p> <ul style="list-style-type: none"> • North of Gilman Road to protect private residences and property to the south. • South of Tombstone Mountain to protect private and federal timber lands and natural resource values, including Northern Spotted Owl habitat and inventoried Roadless Area. • East of Middle Salt Creek to Green Mountain to protect private property and infrastructure values in and around the Interstate 5 corridor. • West of McCloud River and McCloud River Arm of Shasta Lake to protect private timberlands, natural resource values, including Northern Spotted Owl habitat, and recreation infrastructure. <p>MANAGEMENT OBJECTIVES</p> <ol style="list-style-type: none"> 1) Provide for emergency personnel and public safety at all times. 2) Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principals are in place. 3) Minimize adverse impacts to private property, infrastructure, natural resources and cultural/heritage resources. 4) Consult with READS to identify and manage potential impacts to sensitive areas. 			
6. Weather Forecast for Period <ul style="list-style-type: none"> • See attached weather forecast. 			
7. General Safety Message <ul style="list-style-type: none"> • See attached safety messages.

FIRE WEATHER FORECAST

FORECAST NO. 10

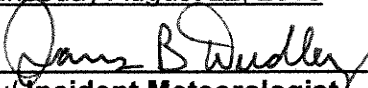

NAME OF FIRE: Hirz

PREDICTION FOR Wednesday August 22, 2018

UNIT: Shasta Trinity National Forest

TIME AND DATE

FORECAST ISSUED: 2000 Tuesday 08/21/18

SIGNED: 
Jim Dudley/ Incident Meteorologist

WEATHER DISCUSSION...A trough of low pressure will remain over the fire area today and it will move to the east on Thursday. Weak high pressure will take its place Friday and Saturday. Temperatures will trend higher today and level off on Thursday with relative humidity trending lower today and showing little change in trend on Thursday. Winds at the surface will remain terrain driven with normal day and night slope and valley conditions prevailing. Inversions will form after 2200 each night and dissipate after 1300 each afternoon. *****IRAWS 11 at Green Mtn, IRAWS 12 at Bollibakka and IRAWS 21 at Tombstone Mountain data are available via radio. Access on 163.350 mhz by keying radio and using #0011, #0012 or #0021 (must be line of sight)*****

.TODAY...

Sky/weather.....Sunny. Hazy and areas of smoke. Inversion breaking after 1300.
Max temperature.....86-89 ridge tops and 94-99 lower drainages.
Min humidity.....12-17 percent.
Wind (20 ft).....
Slope/valley.....Downcanyon 2-5 mph through 0900 then upslope/upcanyon 3-6 mph after 1100. Gusts to 9 mph after 1300.
Ridgetop.....Southwest 8-11 mph.
Mixing height.....Rising to 5500 ft AGL in the afternoon.
Transport winds.....Southwest around 9 mph.
CWR.....0 percent.
LAL.....1.

.TONIGHT...

Sky/weather.....Clear. Hazy and areas of smoke.
Min temperature.....67-72.
Max humidity.....30-35 percent ridges and 55-60 percent lower drainages.
Wind (20 ft).....
Slope/valley.....Upslope 3-6 mph through 2000 then downslope 2-5 mph with gusts to 12 mph after 2300.
Ridgetop.....Southwest 3-6 mph.
Mixing height.....Lowering to around 300 ft AGL.
Transport winds.....East to northeast around 3 mph.
CWR.....0 percent.
LAL.....1.

.THURSDAY...

Sky/weather.....Sunny. Hazy and areas of smoke. Inversion breaking after 1100.
Max temperature.....88-91 ridge tops and 96-101 lower drainages.
Min humidity.....11-16 percent.
Wind (20 ft).....
Slope/valley.....Downcanyon 2-5 mph through 0900 then upslope/upcanyon 3-6 mph after 1100. Gusts to 9 mph after 1300.
Ridgetop.....South to southwest 8-11 mph.
Mixing height.....Rising to 4500 ft AGL in the afternoon.
Transport winds.....West around 7 mph.
CWR.....0 percent.
LAL.....1.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"

Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS:

Provide incident summary (including number of patients) and command structure. *Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat. / Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

SEVERITY

TRANSPORT PRIORITY

URGENT-RED Life threatening injury or illness.
Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.

Ambulance or MEDEVAC helicopter. Evacuation need is **IMMEDIATE.**

PRIORITY-YELLOW Serious Injury or illness.
Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.

Ambulance or consider air transport if at remote location. Evacuation may be **DELAYED.**

ROUTINE-GREEN
Not a life threatening injury or illness. *Ex: Sprains, strains, minor heat-related illness.*

Non-Emergency. Evacuation considered **Routine of Convenience.**

Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short-Haul/Hoist/ Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. Start with most severe.

Patient Assessment: (See IRPG page 106)

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)

Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

- | | | | | |
|--|--|--------------------------------------|--|---------------------------------|
| <input type="checkbox"/> Paramedic/EMT(s) | <input type="checkbox"/> SKED/Backboard/C-Collar | <input type="checkbox"/> Crew(s) | <input type="checkbox"/> Burn Supplies | <input type="checkbox"/> Oxygen |
| <input type="checkbox"/> Trauma Bag | <input type="checkbox"/> Medication(s) | <input type="checkbox"/> IV/Fluid(s) | <input type="checkbox"/> Cardiac Monitor/AED | |
| <input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter) | | | | |

6. COMMUNICATIONS:

- Run Medical Emergency on Command

- Coordinate with air ambulance on CALCORD tone 6

7. CONTINGENCY:

Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates / Changes, etc.

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training
- If air or ground ambulance is DELAYED: Package and transport patient to rendezvous with incoming Ambulance.
Re-route EMS helicopter to rendezvous point as appropriate.

HIRZ INCIDENT RISK ANALYSIS (215a)

Day Shift, August 22, 2018 (0600 to 2000) and Night Shift, August 22-23 (1800-0800)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice “Defensive Driving” techniques traveling on all roads in both rural and urban settings ~ Slowdown in limited visibility (smoky/dusty) & congested areas. Increase following distances ~ Honk horn to alert personnel when backing. Use spotters when available ~ Expect two way traffic on one lane roads. Stay on your side, and approach corners with caution ~ Headlights ON. Manually turn on Headlights. Most vehicles have "auto" headlights ~ NO riding in the back of pick-ups.
ALL	Hazard Trees	<ul style="list-style-type: none"> ~ Green Trees & Fire weakened trees continue to be a threat ~ Scout work area for aerial hazards prior to engagement to ensure a safe work area ~ Follow “Hazard Tree Safety” guidelines, page 22, 23 in IRPG, 2018 ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights. ~ Flag off areas of concern, communicate to Division, adjoining resources, and brief relief resources ~ Post a "Lookout" if possible to control the area of concern
B, F, T, U	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Establish visual & radio communication methods are in place prior to engaging ~ Make positive eye contact with operator before approaching. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ ~ Increase distance to 300'+ when working with Masticators. ~ Refer to page 86 in IRPG, 2018
ALL	Hydration & Heat Illness	<ul style="list-style-type: none"> ~ Drink water & Electrolyte drinks before, during, and after shifts. (2 waters to 1 sports drink). ~ Do NOT mix with water or dilute electrolyte drink. It must be consumed as is for the body to absorb properly. ~ Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration, & medical attention. ~ Pace work to avoid heat injuries ~ Heat exhaustion is characterized by: Weakness, Extreme Fatigue, Nausea, Dizziness & Headaches, clammy skin, persistent muscle cramps, decreased urine output. ~ Refer to Medical Plan in IAP for additional EMS care and Evacuation
B, F, T, U, Y, Z	Steep, Rugged Terrain, Cliffs, Rocky Ledges	<ul style="list-style-type: none"> ~ Unforgiving terrain, Cliffs and Rocky Ledges. Ensure you remain focused when walking. ~ Be on the lookout for rolling rocks, debris, or burning material that could cross your control lines ~ Evaluate necessity to send personnel in areas with limited access. ~ Utilize the Risk Management Process on page 1 in the IRPG 2018
B, F, T, U, Y, Z	Indirect Fireline	<ul style="list-style-type: none"> ~ Fireline location; refer to pg 84 in IRPG, 2018 ~ Coordinate LCES for all personnel involved ~ If Considering Indirect Attack Strategy, utilize pg 83 in IRPG, 2018 ~ If considering Downhill Line Construction, Follow the Checklist (IRPG pg. 9)
B, F, T, Z	Fire Behavior	<ul style="list-style-type: none"> ~ Expect an increase of Fire Behavior after the Inversion lifts. ~ Provide weather forecasts/observations for all personnel assigned ~ Communicate significant weather changes to all personnel on your division ~ Review "Alignments & patterns for Dangerous Fire Behavior" pg 73 in IRPG, 2018 ~ Develop Management Action Points/Trigger Points for disengagement of resources and make them known to all. Re-assess as needed. ~ Use "Risk Management Process" prior to engaging in suppression actions, referring to ~ Ensure LCES is in place before engagement of resources ~ Adhere to the 10 Standard Firefighting Orders & mitigate the 18 Watch Out Situations ~ Post experienced lookouts. Monitor current weather conditions and forecasts ~ Maintain adequate Escape Routes to Safety Zones. Advise all personnel if these are compromised or change

HIRZ INCIDENT RISK ANALYSIS (215a)

Day Shift, August 22, 2018 (0600 to 2000) and Night Shift, August 22-23 (1800-0800)

B, F, T, Z	Firing Operations & Devices	<ul style="list-style-type: none"> ~ Ensure aerial/ground ignition plans have been developed and personnel are briefed. ~ One qualified individual (Burn Boss) must be responsible for controlling and directing the firing operation. Identify the Firing Boss, Holding Boss and let them be known ~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Brief all resources including adjoining Divisions on the approved plan ~ Before firing operations begin, ensure that: Lookouts are in place, Communications are established; escape routes and safety zones are known to all. ~ Make sure that safety zones are not compromised by the firing operations or vehicles blocking the roadways. All vehicles will be staged in the direction of the "Escape Route", ~ Utilize the "Risk Management Process" on pg 1 in IRPG for implementing the plan ~ Wear appropriate PPE. ~ Keep your Escape Routes and Safety Zones free of vehicles and equipment 	
ALL	Wildlife & Insects (bee's, wild horses, snakes, Mt. lions)	<ul style="list-style-type: none"> ~ If allergic to bee stings, let your DIVS & Medic/EMT's know. ~ Check yourself daily for tick bites. ~ Do NOT feed wildlife or livestock ~ Wildlife is most active at Dusk and Dawn. Keep eyes roaming the roadways for the unexpected encounter ~ Leave wildlife alone. Backhaul ALL Trash please. 	
ALL	Aircraft Operations	<ul style="list-style-type: none"> ~ Review and discuss Aviation Watch Out Situations listed in IRPG pg. 46 ~ Ensure resources are clear of "Target Area" during bucket or retardant use. ~ Use clock directions from pilot's perspective and mirror flashes. ~ Ensure use of qualified personnel when involved with longline operations. ~ Keep non-essential personnel away from dip sites (natural and/or man-made) 	
B	Power & Utilities	<ul style="list-style-type: none"> ~ Always treat downed wires as energized. ~ Communicate - Identify - Isolate - Deny Entry ~ Refer to pages 24 & 25 in IRPG, 2018 for Power Line Safety. ~ Be aware that powerlines lying on metal fences can send dangerous currents along the fence for miles. 	
ALL	Medical Emergencies	<ul style="list-style-type: none"> ~ Review, understand and discuss with your resources the Medical Plan in the IAP. ~ Refer to the Medical Incident Report on pages 118 – 119 in 2018 IRPG for info into Communications ~ Develop Division/Crew Pre-Plan in block #6 on the Medical Plan and fill in necessary information to assist you with an Incident within an Incident. ~ Base all operational decisions and activities on these 3 questions: <ol style="list-style-type: none"> 1.) What are we going to do if someone gets hurt? 2.) How will we get them out of here? 3.) How long will it take to get them to a hospital? ~ If the answers are insufficient, stop, re-assess and consider alternate strategies and tactics. ~ Have Alternate plan in place when aircraft is grounded due to visibility issues. ~ If air or ground ambulance is delayed: package and transport patient to rendezvous with incoming ambulance. ~ If Night extraction by Air Ambulance with Hoist capabilities and NVG (Night Vision Goggles) is required, the following will assist in a smooth extraction. <ul style="list-style-type: none"> * <u>Minimum</u> of a 20' x 20' clearing * 3 GREEN Glow Sticks placed on edges of clearing forming a triangle to assist pilot in visual horizon. * Turn ALL headlamps and vehicle lights OFF * Communicate with Air Ambulance on CALCORD tone 6

After Action Review part 1

Fire Communication Category

How to conduct an effective AAR

An AAR is a professional discussion of an event with the objective to identify successes and failures. It is a tool that leaders, teams, crews and units can use to get maximum benefit from every incident or project. It is essential for wildland firefighters to learn from our mistakes and to capitalize on our successes. It is considered a valuable tool in high-risk professions where the smallest mistakes can lead to disastrous results. ***FYI – an AAR is not a critique and not a forum to assign blame. It's an open, honest and professional discussion for purposes of improvement.***

Once you (the leader/facilitator) have demonstrated that the AAR works and that it will be part of your team's Standard Operating Procedures, the discussion will become more open. Finding out *what* they did is not nearly as important as *why* they did it. Good active listening skills are essential. Do not immediately try to solve or correct the issue, but let it play out. Try to get to the root of the issue. The leader must be a part of the AAR and will have to accept criticism. This is important because the team will be looking for affirmation of the AAR process.

- Have the AAR as soon after an event as possible with all the personnel involved if at all possible.
- The leader's role is to insure there is skilled facilitation of the AAR.
- Make sure everyone participates.
- Pay attention to time.
- Establish clear ground rules: encourage candor and openness, all participants have equal ownership, focus on improving performance, and keep all discussions confidential.
- End on a positive note.

1. What was planned?

Review the intent of the mission
Desired "End State" (what does "Right" look like).

2. What actually happened?

Establish the facts
Pool multiple perspectives to build a shared picture of what happened.

3. Why did it happen?

Analysis of cause and effect
Focus on WHAT not WHO.
Provide progressive refinement for drawing out explanations of what occurred.

4. What are we going to do next time?

Correct Weaknesses
Focus on items you can fix, rather than external forces outside of your control.

References: The Wildland Fire Category Development and Progress Reports has multiple additional references on conducting effective AARs, many designed specifically for wildland firefighters and leaders.

TRAINING SPECIALIST MESSAGE

HIRZ INCIDENT TRAINEES:

**I Know You Are Out There!!!
Beat the Rush!!!**

All Trainees, in order to receive documented/proper credit for your training assignment you must register with the Incident Training Specialist.

As of August 21, 2018 the ROSS Trainee Report shows 94 Trainees assigned to the incident. The current numbers are low for those who have actually checked in with Training. Please come by and get checked to ensure a quick and efficient check out process during demob.

****Important Reminder for CICCIS Participants****

- *Every assignment requires a completed ICS 225 Form (Appendix D). **CICCIS Qualification Guide, July 2018***
- *To receive the proper documentation and improve the quality of the trainee assignment, a trainee shall check in with the assigned Training Specialist (TNSP) at an incident when a TNSP is assigned. **CICCIS Qualification Guide July 2018.***

Human Resource Message

Communication

Communication is a two-way street. When communication becomes a one-way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- It can be like the telephone game. It starts with specific information and by the time it gets to the end it very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

“The single biggest problem in communication is the illusion that it has taken place”....by George Bernard Shaw

Feel free to call/text or come by any time from 0530 to 2200 if you have questions, concerns, or just want to chat. Our office is in between the Incident Commander's Trailer and Fire Behavior.
