NIGHT SHIFT

9/9/2018 1800

to

9/10/2018 0600

Fire Information (707) 902-3749

Sunday

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Kerlin Fire	2. Operational Period:	Date From: 9/9/2018	Date To: 9/10/2018	
		Time From: 1800	Time To: 0600	

3. Objective(s):

- Management Objectives**
- Ensure that strategies and tactics provide for firefighter and public safety by utilizing national risk management standards and the implementation of appropriate mitigations.
 - Reduce firefighter exposure and limit suppression impacts by engaging in tactics with a high probability of success.
 - Establish and strengthen cooperators, partner, and stakeholder relationships.
 - Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and economic interests.
 - Share critical information affecting public through accurate and timely dissemination of information.
 - Identify and assess suppression repair needs in coordination with Resource Advisors.
- Control Objectives**
- Keep the fire:
- West of County Road 311
 - South of Lake Mountain Ranch
 - North of Cold Spring Creek Ridge
 - East of South Fork Mountain

General situational awareness

5. Site Safety Plan Required? Yes No

DISCUSSION...Winds this afternoon and this evening will be very similar to the past couple of afternoons, with temperatures and RH similar as well to Saturday. RH recoveries may be a bit better tonight, and that trend will continue into the upcoming week with a cooling trend and gradually higher RH. These afternoon/evening winds may subside midweek.

TONIGHT... Sky/weather.....Mostly clear. CWR.....0 percent. LAL.....1.

Temperature.....79 at forecast start...Min 43.

RH....32 percent at forecast start...Max 85 percent lower slopes...60 to 70 percent midslope...40 to 50 percent local higher ridgetops.

Wind (20 ft).....North winds 8 to 12 mph in the evening with gusts to 20 mph on exposed ridges...becoming **downslope/downvalley 3 to 6 mph overnight**.

Mixing height.....2900 ft AGL at forecast start...otherwise 2900 ft AGL decreasing to 300-1600 ft AGL late in the evening. Transport winds.....Northwest around 13 mph decreasing to 5 mph overnight.

MONDAY... Sky/weather.....Sunny. CWR.....0 percent. LAL.....1.

Temperature.....Max 79.

RH....Min 30 percent.

Wind (20 ft).....Variable 3 to 5 mph...becoming northerly 8 to 12 mph in the afternoon with local gusts to 20 mph in exposed ridges.

Mixing height.....1600 ft AGL increasing to 3500-4100 ft AGL late in the morning. Transport winds.....Northwest 8 to 14 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 006	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Kerlin	OPERATIONAL PERIOD: 09-09-18 Night Shift
DATE ISSUED: 09-09-18	TIME ISSUED: 1200
UNIT: CA-SHF	SIGNED: <u> Matt Brown </u> Typed/printed: Matt Brown FBAN(t)

INPUTS

WEATHER SUMMARY: **Warm, Dry, Evening Gusty Winds**

Temp. 43-53, RH 40% on ridges, 70% in drainages, Winds North 8-12 mph with gusts up to 20 mph early in the operational period then Downslope 3-6 mph after midnight.

Expect good overnight recovery, in the 50-70% range with the highest numbers in the drainages, ridges will be moderate around the mid 40's. After midnight, expect winds to be downslope and downriver.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

ERCs continue to trend towards the 97th percentile, Live fuel moistures are averaging 85%, but some local sites have measured LFM in ceanothus at 57%. All 1000 hr fuel moisture sites are showing 8% or less.

The fire will remain active until the RH recovery allows the dead component to approach the moisture of extinction, sometime after midnight. Lack of fire history in the immediate fire area and a decadent understory, has resulted in some group and single tree torching with short duration crown runs in aligned drainages. Spotting has been observed up to ½ mile from the fire's edge. Expect the Trinity River drainage to provide evening wind gusts that will challenge containment where ridges run adverse to the wind, until 2100 hours. Expect the downslope winds to carry fire towards the Trinity river after midnight.

Timber Fuels: ROS 15-20 ch/hr. FL 6-12 ft. Grass Fuels: 30-35 ch/hr. FL 3-7 ft. After midnight- Timber Fuels: head ROS 8-10 ch/hr, FL 4-7 ft, backing 5 ch/hr, Grass Fuels: head 10-15 ch/hr, FL 1-2 ft, backing 5-10 ch/hr.

POI: 67% Spotting Distance 1/2 mile FDFM 5%, then dropping to POI: 26% and FDFM 10% after midnight.

SPECIFIC:

Division A/M will experience mostly favorable winds from the NW combining with the upslope winds early in the operational period. This wind will continue to check fire spread to the NE. At the **A/M** break, expect winds to be gusty and adverse until after sunset on parts of the line that run into the Trinity river. Fuels will be receptive to spotting along the Trinity river corridor. Any spots that become established will have abundant continuous fine fuels to spread in. After midnight, expect downslope and downriver winds to be adverse and carry fire deeper into Mill Creek and Middle Creek.

Division T/Z will experience mostly adverse winds early in the shift, especially on ridges. Expect strong gusty winds in drainages that connect to the Trinity River until after sunset. Downslope and downriver winds after midnight will check fire spread in the South and West but pressure lines in the East and North.

AIR OPERATIONS:

Lighter fuels in the eastern part of the fire will respond readily to retardant application. Clear skies are expected until sunset.

SAFETY

Afternoon gusty winds associated with the Trinity River diurnal wind effect will be channeled by the local topography. Although NW winds will be the dominant pattern, the winds aloft can mix down and suddenly increase winds in drainages not aligned with the NW pattern due to terrain channeling.

INCIDENT RISK ANALYSIS

KERLIN FIRE CA-SHF-001438

(ICS 215A) Night Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	HAZARD TREES	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines in the IRPG Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events".
ALL	DRY FUEL CONDITIONS	<ul style="list-style-type: none"> Establish and maintain LCES. Heavy grass crop, fuel moistures at critical levels. Anticipate intense burning and rapid rates of spread. Watch for spot fires. Allow for adequate time to escape routes and safety zones.
ALL	TRAFFIC & DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution. Watch for local traffic, they know the roads and may be traveling fast.
ALL	STRUCTURE DEFENSE	<ul style="list-style-type: none"> Review Structure Protection guidelines in the IRPG Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone. Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. Look for propane tanks and other hazardous materials.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue.
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	<ul style="list-style-type: none"> Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include <ul style="list-style-type: none"> Lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas. Ensure all personnel are familiar with the incident and IA communications plans.
ALL	MARIJUANA PLANTATIONS	<ul style="list-style-type: none"> Maintain situational awareness. Watch for open areas and sign of improvements or irrigation systems. Be aware of evidence that cultivation has occurred in the area. If you stumble upon an area with probable cultivation be extremely cautious, exit on the same route you arrived and notify supervisor immediately.

Night Shift

SAFETY MESSAGE

“TAKE YOUR TIME TO DO IT SAFELY”

- Use time wisely to focus on safety issues, there is NOTHING that is more important.
- Do not let a sense of urgency, or the hazardous mindsets of “impulsiveness” or “mission fixation” compromise your safety.
- Any time spent planning for safety will pay dividends in the end.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE STUMP HOLES	ROLLING MATERIAL DEHYDRATION POISON OAK	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
---	---	--

Be sure all elements of your safety plan are in place prior to engagement

Night Operations Hazards

Your ability to maintain your situational awareness at night is compromised by your inability to see hazards and other visual indicators in your work area.

Other challenges faced during night operations:

- Ability to maintain your orientation
- Difficulty seeing hazards beyond your headlamp
- Difficulty estimating distances
- Inability to use landmarks as reference
- Blowing smoke can increase visual difficulties
- Logistical support is limited

Situational Awareness

Help maintain your Situational Awareness by doing the following:

- Constantly observing your environment.
- Interpret and process information received.
- Integrate information into your situation and plan.
- Sharing information by discussing the situation.
- Continually re-evaluation your situation and plan.

TRAINING SPECIALIST MESSAGE

Incident Trainees who have not done so, should register their assignment with the Incident Training Specialist at the earliest opportunity

It is to your advantage to complete the (quick) registration process sooner than later. Avoid Delays At DEMOB.

Scan the QR Code below to access and complete the Trainee Registration Form. Then stop by the Training Desk with your Task Book and Red Card to complete the Registration Process.

The TNSP may be contacted at 209-770-4809 for training related questions.

Brad Smith
Training Specialist

NorCal Team 2 SOCIAL MEDIA and MEDIA POLICY*

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...)
- Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim. (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.

If you have questions about content you'd like to post on social media, contact a PIO!

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO incident email.

*Violation of this policy may result in disciplinary action including demobilization from the incident.

<p>Use the following items to communicate situation to communications/dispatch.</p>																													
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p> <p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i></p>																													
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>																												
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>																										
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other																										
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>																										
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>																										
On-Scene Incident Commander			Name of on-scene IC of incident within an Incident <i>(Ex: TFLD Jones)</i>																										
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>																										
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p> <p>Patient Assessment: See IRPG PAGE 106</p> <p>Treatment:</p>																													
<p>4. TRANSPORT PLAN:</p> <p>Evacuation Location <i>(if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:</p>																													
Helispot / Extraction Site Size and Hazards:																													
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p>																													
<p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrinsic</i></p>																													
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Function</th> <th style="width: 25%;">Channel Name/Number</th> <th style="width: 15%;">Receive (RX)</th> <th style="width: 15%;">Tone/NAC *</th> <th style="width: 15%;">Transmit (TX)</th> <th style="width: 15%;">Tone/NAC *</th> </tr> </thead> <tbody> <tr> <td>COMMAND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>AIR-TO-GRND</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>TACTICAL</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table>						Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *	COMMAND						AIR-TO-GRND						TACTICAL					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *																								
COMMAND																													
AIR-TO-GRND																													
TACTICAL																													
<p>7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p>																													
<p>8. ADDITIONAL INFORMATION: Updates/Changes, etc.</p>																													
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
