DISCUSSION: A weak cold front will dissipate as it moves through the area this morning, but this will bring cooler air, higher humidities, and gusty north-northwest winds to the incident today. The valley inversion is expected to be moderate to strong with its top near the top of the fire this morning. As a result, active burning conditions may have continued all night at the top of the fire. As the inversion mixes out around noon, winds will increase and burning conditions will worsen over the mid and lower slopes of the fire. Wind eddies are possible during the transition from slope driven to cross slope winds in the afternoon. Conditions will moderate tonight as more cool, moist air moves into the area. Recoveries will be good over the lower slopes with moderate recoveries middle and top.

MONDAY:

- **WEATHER:** Mostly sunny.
- **WIND (20 FT): Exposed areas:** Variable 2-4 mph through 0900, then becoming upslope 2-4 mph through 1300, then north-northwest (cross slope) 4-8 mph with gusts to 12 mph. **Sheltered areas:** Downslope 1-3 mph through 0900, then upslope 2-5 mph. Locally north 3-6 mph in the afternoon.
- **MAX TEMPERATURES:** 78 top to 85 bottom
- **MIN RH:** 25-30% except locally 18% lower slopes.
- **CHANCE RAIN:** 0%
- **HAINES:** 4
- **MIXING HEIGHT:** 500 ft AGL or less, increasing to 1,500 ft AGL around 1200, then increasing to 3,000 ft AGL.
- **MIXING WINDS:** Light and variable through 1200 then north-northwest 5-10 mph.

MONDAY NIGHT:

- **WEATHER:** Mostly clear. Patchy low clouds over the ridgetops.
- **WIND (20 FT): Exposed areas:** North 5-10 mph through 1900, then becoming variable 2-4 mph. **Sheltered areas:** Variable (tending north) 3-6 mph through 1900, then downslope 1-3 mph.
- **MIN TEMPERATURES:** 40-45 lower slopes, 50-55 top.
- **MAX RH:** 75-80% lower slopes, 50-55% mid-slope and above.
- **CHANCE RAIN:** 0%
- **INVERSION:** Moderate developing around mid-slope. Thermal belt over the top third.

Locally north 3-6 mph in the afternoon.
- **MAX TEMPERATURES:** 74 top to 81 bottom

FIRE BEHAVIOR FORECAST

| FORECAST NUMBER: 007 | TYPE OF FIRE: Wildfire Full Suppression |
| FIRE NAME: Kerlin | OPERATIONAL PERIOD: 09-10-18 Day Shift |
| DATE ISSUED: 09-09-18 | TIME ISSUED: 2100 |

INPUTS

WEATHER SUMMARY:

Temp. 78-85, RH 18-30%, Winds NNW 2-4 mph early in the operational period then increasing to NNW 4-8 mph with gusts up to 12 mph especially on North aspects and aligned ridges.

Expect strong overnight recovery, in the 45-90% range, to dry out around noon on the ridges, 1500 in the drainages. Any gusty conditions can mix out the inversion earlier and allow winds to mix down into the drainages.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

ERCs have moved between the 90th and 97th percentile, Live fuel moistures are averaging 85%, but some local sites have measured LFM in ceanothus at 57%. All 1000 hr fuel moisture sites are showing 8% or less.

Fire will continue to back and creep in the timber understory, where fuels are continuous. Lack of fire history in the immediate fire area and a decadent understory, has resulted in some group and single tree torching with short duration crown runs in aligned drainages. Expect the Trinity River drainage to enhance the afternoon wind gusts that will challenge containment where ridges and doglegs run adverse to the wind. Decreased smoke production will allow for increased early sunlight on the fuels and increased POI.

Timber Fuels: ROS 10-15 ch/hr. FL 8-12 ft. Grass Fuels: 25-35 ch/hr. FL 2-6 ft.

POI: 58% Spotting Distance 1/2 mile, FDFM 6% on a West aspect after 1600 hrs.

SPECIFIC:

Division A/M will experience mostly favorable winds from the NNW. However, fire that has moved down slope through roll out or backing spread may be aligned for an uphill run when the wind becomes established in the river corridor. On the west side of the division this wind will continue to check fire spread if fire slops over and moves towards the Johnson Fire burn scar. Fire that has moved down to the A/M break will experience adverse wind, especially in the afternoon and test containment. Midslope burnouts may be wind tested when the upslope winds become established.

Division T/Z will experience mostly adverse winds in the afternoon. Expect gusty winds, in drainages that connect to the Trinity River, to become established in the early afternoon. Any open line, green islands, or torching tress will challenge Southern and Western containment through spotting. Decreased smoke production will allow for fuels to receive more sunlight and increase spotting potential.

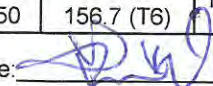

AIR OPERATIONS:

Lighter fuels in the eastern part of the fire will respond readily to retardant application. Smoke should affect visibility until late morning.

SAFETY

Afternoon gusty winds associated with the Trinity River diurnal wind effect will be channeled by the local topography. Although NW winds will be the dominant pattern, the winds aloft can mix down and suddenly increase winds in drainages not aligned with the NW pattern due to terrain channeling.

SAFETY MESSAGE

YOUR SAFETY IS DEPENDENT UPON YOUR ABILITY TO:

- **FORECAST** the future and how it will affect your safety.
- **PREDICT** fire behavior, and how the weather and terrain will influence it.
- **ANTICIPATE** problems and needs, finding solutions in advance.
- **RECOGNIZE** hazards and minimize risk exposure.

Please try and operate in a proactive mode, not a reactionary mode!

MAJOR HAZARDS AND RISKS

| | | |
|---|---|---|
| STEEP TERRAIN FATIGUE STUMP HOLES | ROLLING MATERIAL DEHYDRATION BUCKET DROPS | HEAVY EQUIPMENT HAZARD TREES POISON OAK |

COMMUNICATIONS RESPONSIBILITIES

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated "Leader's Intent."

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look
When it is done

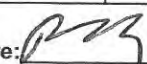

LOOK UP, LOOK DOWN, LOOK AROUND DURING MOP UP

NorCal Team 2 SOCIAL MEDIA and MEDIA POLICY*

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...)
- Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.

If you have questions about content you'd like to post on social media, contact a PIO!

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO incident email.

*Violation of this policy may result in disciplinary action including demobilization from the incident.
