Fire Weather Forecast

THURSDAY SEP 13, 2018

FORECAST NO: 6
PREDICTION FOR: Thursday
SHIFT DATE: Sep 14, 2018
ISSUED: 1200, Sep 12, 2018

NAME OF FIRE:
UNIT:
Incident Meteorologist:

Kerlin
Shasta/Trinity N.F.
Tom Wright

DISCUSSION: The weather over the incident is expected to be relatively cool, humid, and uneventful for the next couple of days. Marine air will move in at night with some stratus over the ridges, and then edge back out during the days, but conditions remain cool with minimum humidity higher than average. Winds are also not expected to be of much concern with generally light, slope driven flow in most areas and light northwest winds over ridges and exposed areas.

FRIDAY:

- **WEATHER:** Morning low clouds, then partly cloudy and cool.
 - **WIND (20 FT): Ridges and exposed areas:** Variable 2-4 mph through 0900, then becoming upslope 2-4 mph through 1300, then northwest 3-6 mph with gusts to 10 mph. **Sheltered areas:** Downslope 1-3 mph through 0900, then variable 1-3 mph.
 - **MAX TEMPERATURES:** 68 top to 78 bottom
 - **MIN RH:** 30-35%.
 - **CHANCE RAIN:** 0%
 - **RAIN AMOUNTS:** 0"
 - **HAINES:** 3
 - **MIXING HEIGHT:** 500 ft AGL or less, increasing to 2,000 ft AGL around 1200, then increasing to 6,000 ft AGL.
 - **MIXING WINDS:** Northwest around 5 mph.
-

3-5 DAY OUTLOOK

Saturday: Partly cloudy and a little cooler. Highs 68-78. Min RH 25-30%. Winds W-NW 4-8 mph.

Sunday and Monday: Mostly sunny and warmer. Highs 75-85. Min RH 18-23%. Winds WNW 4-8 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 013	TYPE OF FIRE: Wildfire Full Suppression
FIRE NAME: Kerlin	OPERATIONAL PERIOD: 09-14-18 (3 Day Extended)
DATE ISSUED: 09-13-18	TIME ISSUED: 2100
UNIT: CA-SHF	SIGNED: <u> Matt Brown </u> Typed/printed: Matt Brown FBAN(t)

INPUTS

WEATHER SUMMARY:

Temp. 68-85, RH 18-35%, Winds upslope 2-4 mph early in the operational period then increasing to NW 3-8 mph with gusts up to 10 mph especially on North aspects and aligned ridges, but otherwise cross slope for most of the fire.

Expect strong overnight recovery, in the 45-100% range, to dry out around 1300 on the ridges, 1600 in the drainages. Any gusty conditions can mix out the inversion earlier and allow winds to mix down into the drainages.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

ERCs have trended back, below the average line. Live fuel moistures are averaging 85%, but some local sites have measured LFM in ceanothus at 57%. All 1000 hr fuel moisture sites are showing 8% or less.

Fire will continue to smolder in the timber understory, ground fuels and heavy dead component. Expect the Trinity River drainage to enhance the afternoon wind gusts. Any challenge to containment will be where ridges and doglegs run adverse to the wind. Upslope winds will pressure these pieces of line until mop-up is complete. Decreased smoke production will allow for increased early sunlight on the fuels and increased POI. Fire is not expected outside of its current perimeter. However, if a new fire is established, the current expected range of weather conditions should produce fire behavior characteristics listed below.

Timber Fuels: ROS 10-20 ch/hr. FL 7-10 ft. Grass Fuels: 20-35 ch/hr. FL 2-7 ft.

POI: 50-80% Spotting Distance 1/3 mile, FDFM 5-8% on a West aspect after 1600 hrs.

SPECIFIC:

Division A/M will experience mostly favorable winds from the NW. Suppression efforts have reduced fire behavior to smoldering well interior to the containment lines. Fire that has moved down to the A/M break will experience adverse upriver wind, especially in the afternoon. Midslope doglegs may be wind tested when the upslope winds become established. Slop overs or spots near the Trinity River will experience slow spread rates in the continuous fine fuels. Threats to values in the South have been reduced due to suppression efforts, the increased fine dead fuel moisture, and the shortened burn period.

Division T/Z will experience mostly adverse winds in the afternoon. Expect gusty winds, in drainages that connect to the Trinity River, to become established in the afternoon. With mop-up nearly complete, green islands, or torching trees pose very little threat to containment to Southern and Western lines through spotting. Decreased smoke production will allow for fuels to receive more sunlight and burn down heavy dead component

AIR OPERATIONS:

Continued mop-up has reduced smoke production. Expect good visibility for the operational period.

SAFETY

Afternoon gusty winds associated with the Trinity River diurnal wind effect will be channeled by the local topography. Although NW winds will be the dominant pattern, the winds aloft can mix down and suddenly increase winds in drainages not aligned with the NW pattern due to terrain channeling. Ash pits and stump holes are well developed at this stage of the fire. Use caution when working in areas with heavy ground fuels.

ASSIGNMENT LIST (ICS 204)

1. Incident Name: Kerlin Fire		2. Operational Period: Date From: 09/14/18 Date To: 09/15/18 Time From: 0700 Time To: 1900			3. Branch: Div/Group: A / Z

AIR OPERATIONS SUMMARY ICS-220

Incident Name / Number: Kerlin Fire / CA-SHF-001438
 Sunrise: 6:54
 Startup: 19:23
 Cutoff: 19:23
 Sunset: 19:23

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.
 Track all dipsites and amount of water taken from each one.

All GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES, FORMAT.

AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc.
 If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB/D and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.

See and avoid cables along South Fork of Trinity River. Power lines on both west and east side of river.

Be aware of general aviation in and out of the Hyampom Airport.

INCIDENT RISK ANALYSIS
KERLIN FIRE CA-SHF-001438
(ICS 215A) Day Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	HAZARD TREES	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines in the IRPG. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during "high wind events".
ALL	DRY FUEL CONDITIONS	<ul style="list-style-type: none"> Establish and maintain LCES. Heavy grass crop, fuel moistures at critical levels. Anticipate intense burning and rapid rates of spread. Watch for spot fires. Allow for adequate time to escape routes and safety zones.
ALL	TRAFFIC & DRIVING	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques. Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Use chock blocks, turn wheels into hill. Many roads are narrow and mid slope, use caution. Watch for local traffic, they know the roads and may be traveling fast.
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air when practical. Evaluate unburned islands/Increase situational awareness.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention.
ALL	COMPLACENCY	<ul style="list-style-type: none"> Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Situational awareness must be maintained for the duration of the incident. Stay focused on your task and the surrounding environment.
ALL	FATIGUE	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue.
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	<ul style="list-style-type: none"> Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include <ul style="list-style-type: none"> Lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating
Repair	CHIPPER OPERATIONS	<ul style="list-style-type: none"> Ensure JHA is provided and signed by operators. Only qualified personnel will feed the chipper. Ensure appropriate PPE is used including eye and hearing protection.
ALL	MARIJUANA PLANTATIONS	<ul style="list-style-type: none"> Maintain situational awareness. Watch for open areas and sign of improvements or irrigation systems. Be aware of evidence that cultivation has occurred in the area. If you stumble upon an area with probable cultivation be extremely cautious, exit on the same route you arrived and notify supervisor immediately.
INCIDENT NAME: KERLIN ICS 215a		DATE PREPARED: September 14, 2018 TIME PREPARED: 1600 HOURS OPERATIONAL PERIOD Day Shift 09/14/15 0700-1800 Prepared by T. OConnell, S. Davis, F. Pingiczer.

KERLIN

Operation Period: 09/14- 09/15 2018 Day Shift

SAFETY MESSAGE

Stay focused on the safety aspects of your assignment

- Ensure LCES is in place prior to engagement.
- Establish decision points when conditions can deteriorate.
- Take weather observations.
- Monitor the fire environment for changes in the fuel, topographic and weather elements. Forecast the fire behavior.
- Evaluate the work area for hazards, communicate hazards, mitigate or avoid the hazards.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION DRIVING	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
--	--	--

Be sure all elements of your safety plan are in place prior to engagement

Hazard Tree Safety

Inspect area for hazard trees before starting work. Are there trees that have been falling, leaning, hung up, or have broken tops? Are there high risk species? How long has the fire been burning in the area?

Identify hazards trees fell or avoid the hazard and flag.

Take down hazard trees only with qualified sawyers and then only if necessary.

Mop Up Hazards

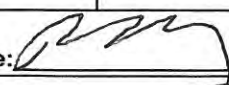

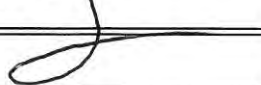

Wear proper PPE including eye protection.

Watch for stump holes, ash, heat, and spray back when using nozzles.

Don't forget to look up while working around trees.

Stay focused, do not become complacent.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>		
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG PAGE 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
