Today: Another day of warm and dry weather conditions. Winds will be light and terrain driven in the morning becoming West to Northwest in the afternoon. OUTPUTS

FIRE BEHAVIOR

GENERAL:

The hard work by the crews continue to diminish the chances of the Lime Fire moving from its current perimeter every day. The recon flight yesterday afternoon showed very little heat on any of the divisions even with direct sunlight and warmer temperatures. The Kidder 2 Fire continues to consume the heavier fuels as it backs down the rocky ridge towards the natural slide barrier to the south and the no-name drainage to the east. There is a chance of a strong southwest wind at the end of the weekend with the incoming low pressure.

SPECIFIC:

Div. A- After several days of having the edge lined and limited smoke, this division should be quiet. Use the night IR flight data to ensure none of the heat signatures have potential to threaten the line.

Div. D- This division looks excellent. Mitigate any of the heavier fuels which have roll-out potential.

Div. W- This area is going to be tested by the winds when they turn out of the Southwest on Sunday. Use the night IR flight data to ensure the heat signatures won't threaten the line especially on the two unburned fingers.

Div. Z- There still may be some burning material up in Lime and/or Brushy Gulch holding heat which may show themselves with several days of drying. However, these areas should be well surrounded by black and pose limited concern to the fire line.

Div. K & Div. S- There will continue to be roll-out potential in Div. K on the very steep slopes. Make sure to flag any areas which rolled-out so they can be checked for heat in the future. Div. S will continue to have heat along the southern edge until it gets out of the timber stringer and reaches the natural barriers to the Southwest. The Southwest corner is a weak point with its continuous fuels and the forecasted winds on Sunday. Prepare accordingly.

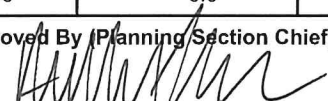

AIR OPERATIONS:

Over communicate with aircraft if/when the Unmanned Aerial System (UAS) is working in your division.

SAFETY

Always think about the "what if" scenario and have a plan for even the rare events.

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness.
