INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	9/10/2019	Date To:	9/11/2019
Lime and Kidder 2 Fire		Time From:	0600	Time To:	0600
3. Objective(s):					
Management Objectives					
•Ensure safety of emergency responders and the p	ublic				
•Protect residences, private property, and infrastruc	cture				
•Limit fire spread to the neighboring private industri	al timberlands				
•Invest firefighting resources into actions that have	a high probability of success				
•Minimize undesirable suppression-related fire effe	cts (e.g. high intensity tactical	burning)			
•Utilize MIST tactics when working in the Wildernes	ss				
•Establish and maintain good relationships with local information	al cooperators, stakeholders,	and public while pr	oviding accura	ite and timely	incident
Maintain fiscal accountability					
Control Objectives					
Lime Fire:					
Keep the fire West of Ash Creek					
Keep the fire South of Cottonwood Peak, Lon Keep the fire East of Cavuse Guich and North		eks			
Keep the fire East of Cayuse Gulch and North	1 of Hwy. 96				
Collier Fire: In patrol status					
Kidder 2:					
Keep the fire South of Kidder Creek					
Keep the fire West of Shelly Fork River					
 Keep the fire North and East of the Pacific Cr 	est Iraii				
General Situational Awareness:		S12			
Steep and rugged terrain, watch your footing. Be or	the lookout for rolling rocks,	debris, or burning r	naterial.		
5. Site Safety Plan Required?	Yes □ No Ø

Fire Weather Forecast

FORECAST NO: 1

NAME OF FIRE: Lime / Kidder 2

PREDICTION FOR: 0600 Tue - 0600 Wed

UNIT: CA-KNF

SHIFT DATE: 09/10

SIGNED:

TIME AND DATE

FORECAST ISSUED: 2000 09/09/19

eteorologist - Matt Mehle

... Scattered showers and thunderstorms possible today...

WEATHER DISCUSSION: Active weather possible across both the Lime and Kidder 2 fires with moisture and instability today. A few isolated showers/thunderstorms will be possible in the morning, but chances increase through the day. Developed storms will be capable of producing lightning, brief heavy rain and gusty/erratic winds. Showers/thunderstorms chances will diminish in the evening and end overnight. Winds will be breezy to gusty at time across the higher peaks mid-late afternoon. Be weather aware today and have a place to shelter in storms.

WEATHER FORECAST FOR TUESDAY:

WEATHER: Partly Cloudy. Isolated showers/thunderstorms in the morning becoming scattered in the afternoon. Patchy smoke.

TEMPERATURES: Max 75-82 F...above 4000' 62-70 F

24 HR Trend: Little Change.

HUMIDITY:

Min 20-30% ...above 4000' 40-50%

24 HR Trend: Little Change.

20-FOOT WIND: Light and variable to northeast less than 5 mph in the morning. West to northwest 3-6 mph mid-day becoming 5-10 mph in the afternoon gusts to 15 mph.

Chance of Wetting Rain (0.10"): 10-15%

LAL:2-3

WEATHER FORECAST FOR TUESDAY NIGHT:

WEATHER: A few showers/thunderstorms possible in the evening, them becoming partly to mostly cloudy overnight.

TEMPERATURES: Min 42-50 F.

24 HR Trend: Little Change.

HUMIDITY:

Max 85-100%...above 4000' 90-100%.

24 HR Trend: Little Change.

20-FOOT WIND: Northwest 6-12 mph with gusts to 15 mph in the evening becoming variable to possible northeast less than 5 mph overnight.

Chance of Wetting Rain (0.10"): 10-15%

LAL:2 becoming 1

EXTENDED FORECAST:

WEDNESDAY... Mostly sunny. Max temps 72-84 F above 4000' 62-68 F. Min RH 30-40%. North to Northwest 4-8 mph with gusts up to 15 mph in the afternoon.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: #3 TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: September 10, 2019 TIME ISSUED: September 9, 2019 UNIT: CA- Klamath N.F. SIGNED: Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY: **Please see attached Fire Weather Forecast**

Today: One more day of having a cool and unsettled air mass over the fire. Humidity recoveries should be excellent and isolated showers are possible from about mid afternoon into this evening. Instability will be marginal, but isolated thunderstorms cannot be ruled out. Dry and warmer weather will start on Wednesday and persist through the end of the week.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The crews did an excellent job taking advantage of the favorable weather conditions yesterday. There will be one more day of similar conditions before a warming and drying trend occurs. Crews should anticipate fire activity picking up starting Wednesday on any pieces of open line and should plan accordingly.

SPECIFIC:

- **Div. A-** The crews and helicopters are doing a great job gaining an anchor point. Today should be another good day to continue to go direct and pick up any of the hotter pieces along the edge.
- **Div. D-** It will be important to pick up any of the slops on the north side of the ridge just above Longfellow Creek as the fuel loading increases with limited options as you move out to the north/northwest of this predominant ridgeline.
- **Div. W-** The crews did an excellent job gaining access and coordinating with the aircraft to start cutting out the piece of heat on the upper portion of Ash Creek. There should be another day of favorable conditions to secure this piece as much as possible before the warming trend.
- **Div. Z-** The run the fire made two days ago created some good black to work off of in this division. The northwesterly winds want to keep pushing the fire in Brushy Gulch to Hwy 96 and Ash Creek. This will need to be pinned down until crews are able to turn the corner. It will be important to have contingency plans and trigger points in place to shut down Hwy 96 and evacuate Ash Creek if the triggers are met.
- **Div. K & Div. S-** It is anticipated both divisions on the Kidder 2 fire will see minor perimeter growth each day, mostly from the consumption of dead and downed 1000-hour fuel as the fire backs down towards Kidder Creek.

AIR OPERATIONS:

The aircraft have been effective working with the crews to "hotspot" the fire until the areas can be cut out. Continue to use them to take advantage of the favorable weather conditions.

SAFETY

Be heads up when working around the snags at the higher elevations as they have had several days of burning to weaken and are burning on steep slopes.

HEALTH AND SAFETY MESSAGE Life First: Stop, Think, Talk then Act.

INCIDENT: Lime and Kidder 2 Fire

DATE: September 10, 2019 0600-0600

Major Hazards and Risks:

- * STEEP TERRAIN: Watch your footing at all times in steep terrain.
- * ROLLING ROCKS: Watch and listen for rolling rocks...they are coming down.
- **DEHYDRATION:** Remember to drink 4-6 quarts of fluid each operational period.
- * DRIVING: Driving will continue to be a daily hazard. Please slow down and watch for others.
- * HAZARD TREES: Assess ALL Trees in Work Areas....In addition to suppression and mop-up operations, assess hazard trees where you sleep or take breaks.
- * ANIMALS: Watch out for bears, rattlesnakes, yellow jackets, and check yourself for ticks.
- **EXTREME FIRE BEHAVIOR:** Leave yourself a way out. Safety zones and Escape Routes!

Narrative: As time moves on with this incident, so does our risk. With each passing day the very roots that secure the trees around you are burning away or the tree itself is burning from within just waiting for the right opportunity to come down on you. With the upcoming rain, although maybe just a dusting, it could be enough to bring down multiple boulders and rocks. Never stop looking at the environment around you.

Life First

- 1. Life First everyone goes home. We cannot accept any loss of life; while we are well aware of the challenges and the hazards our people face every day in the fire environment, together we can work to eliminate unnecessary exposure and increase the odds that everyone goes home in 2019.
- It means that knowing the dangers we face, we still expect that our personnel will not engage unless they can do so with the greatest margin of safety.
- We expect our emergency responders to refuse assignments where hazards cannot be satisfactorily addressed.
- We ask people to take risks in fire every day, sending them to work in environments that are known to be hazardous, but we should only do so where the values we have determined threatened justify the risks and the probability of success is high.
- o The way to achieve our goal of zero fatalities is to train, to practice risk management, to think, to communicate, and to foster a learning environment to seek smarter ways to meet our objectives in every situation, and to learn and improve every day.

- Lookouts
- Communications
- Escape Routes
- * Safety Zones

These are four easy words to say, but what do they mean? How are you going to implement them and how do they interact with each other? Please make sure everyone understands what needs to be done, who to talk to and what needs to be communicated. Remember adjoining division resources need that information also.

INCIDENT SAFETY ANALYSIS 215a

CA-KNF-007074 - Tuesday, September 10, 2019

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Driving & Traffic	 Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters when backing. Honk horn to alert personnel when backing. Watch for logging trucks. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. Stay on Highways 5, 96 and 3 when driving to incidents. Use the 3 second rule for following distance when driving. Use extra caution when turning onto Hwy 96 from Lime Gulch Rd. Ensure that windshields are kept clean of dust and bugs.
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts (IRPG pg 6).
All	Air Operations	 Follow " Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
All	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Avoid working below heavy equipment.
All	Helicopter Operations	 Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. Monitor A-G communications. Follow aviation safety guidelines in IRPG 57 and IHOG.
All	Extreme Fire Behavior	 Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions, refer to page 1, IRPG.
All	Indirect Fireline	 Post lookouts, identify escape routes and safety zones (IRPG pg. 7). Review "Strategy/Indirect Attack" (IRPG pg. 83).
All	Injury & Medical Emergency	∼ Assist injured employee appropriate medical care. ∼ Use EMT's on Division for initial care. ∼ Follow medical protocol as outlined in ICS-206 & IRPG Pgs 105-119
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.
All	Wildlife & Livestock	 Watch out for wildlife & livestock inside fire area and along roadways. Clean up all debris and trash during each operational period.
All	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Know and utilize the ICS 205 and ensure clear communications. Utilize human repeaters when working in dead spots.
All	Poisonous Plants	~ Identify and avoid hazard areas. ~ Launder clothing. ~ Shower frequently.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients
 - Triggers Incident within Incident (IWI)
- Division Supervisor/Operations contact YICC on "Black Net" (Command) for the Lime Fire and "KNF River" for the Kidder 2 Fire.
 - Division Supervisor or *POC will run "Medical-Emergency" on the Command frequency.
 - Division Supervisor or *POC to use "Medical Incident Report" worksheet on back of this page or in IRPG.
 - Medical Unit Leader will monitor "Black Net"

*POC (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients
 - Does not trigger Incident within Incident (IWI)
- Division Supervisor contacts YICC on "Black Net" (Command) for the Lime Fire and "KNF River" for the Kidder 2 Fire.
 - Division Supervisor or *POC will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or *POC to use "Medical Incident Report" worksheet on back of this page or in IRPG.
 - Medical Unit Leader will monitor "Black Net"

IN-CAMP – 24 HOUR MEDICAL

Contact MEDL 805-570-9061 or 661-487-6323. If emergency,

ICS 206 6/2017

9. PREPARED BY: (Medical Unit Leader Mike Lencioni MEDL

10. REVIEWED BY: (Safety Officer).

Rick Bertram SOFR

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY

PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH. Use the following items to communicate situation to communications/dispatch. 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." ☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. Severity of Emergency / Transport YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Priority Ex: Significant trauma, unable to walk, 2º - 3º burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness Nature of Injury or Illness Brief Summary of Injury or Illness Mechanism of Injury (Ex: Unconscious, Struck by Falling Tree) Air Ambulance / Short Haul/Hoist Transport Request Ground Ambulance / Other Patient Location Descriptive Location & Lat. / Long. (WGS84) Incident Name Geographic Name + "Medical" (Ex: Trout Meadow Medical) On-Scene Incident Commander Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones) Name of Care Provider Patient Care (Ex: EMT Smith) 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG page 106 Treatment: 4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location: Helispot / Extraction Site Size and Hazards: 5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication 6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Function Channel Name/Number Receive (RX) Tone/NAC * Transmit (TX) Tone/NAC * COMMAND AIR-TO-GRND TACTICAL 7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. 8. ADDITIONAL INFORMATION: Updates/Changes, etc.

ICS 206 WF (03/18)

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
