INCIDENT Weather Forecast

FORECAST NO: 21 **NAME OF FIRE:** Walker Fire
PREDICTION FOR: Friday Day SHIFT **UNIT:** Plumas NF
SHIFT DATE: Sept 20, 2019 **SIGNED:** Mike Smith *Mike Smith*
TIME AND DATE **Incident Meteorologist**
FORECAST ISSUED: 2100 Sept 19, 2019

WEATHER DISCUSSION: The weather system that brought showers to the fire area Wednesday and Thursday has now moved east of the region. A high pressure ridge is forecast to slide across the west coast today and Saturday bringing a period of warming and drying. Winds during this time should remain relatively light. Another Pacific weather system is forecast to pass through the Pacific Northwest on Sunday and may bring a few more light showers to the fire. The rain potential for Sunday is still uncertain but some cooling and higher RH is likely. Breezy north winds and another drying trend are indicated early next week.

WEATHER FORECAST:

WEATHER: Morning valley fog...otherwise partly cloudy to mostly sunny skies.

TEMPERATURES: Maximum temperatures 63-70.

HUMIDITY: Min RH 28-38%.

20 FT WINDS:

RIDGETOP – Light and variable in the morning becoming northeast 5-10 mph after about noon. Gusts to 15 mph in the late afternoon.

SLOPE/VALLEY - Downslope to downcanyon 2-5 mph becoming upslope to upcanyon 3-6 gusts to 12 mph in the afternoon

HAINES INDEX: 2

STABILITY/INVERSION: Morning inversions below about 4500 feet breaking to stable conditions by about noon. .

Outlook for Friday night: Mainly fair skies with some fog forming in the valleys late night. Minimum temperatures 35-45. Colder in some valleys. Maximum RH recovery 60-70%. Ridge winds becoming northeast to southeast 3-8 mph after about 2000. Slope winds becoming downslope to downcanyon 1 to 4 mph after about 2000.

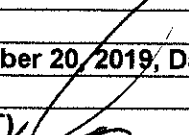

Extended forecast for Saturday: Mostly Sunny except for morning valley fog. Maximum temperatures 70-77. Min RH 22-30%. Ridge winds light east 3-8 mph. Slope winds becoming upslope to upcanyon 3-6 gusts to 12 mph after about noon. .

Extended forecast for Sunday: Partly cloudy with a slight chance of a light shower. Max temperatures 63-70. Min RH 30-40%. Ridge wind becoming southwest to west 6-15 mph by late morning with gusts to 20 mph in the afternoon. Slope winds becoming upslope to up canyon mainly southwest to northwest by late morning 4-8 mph with gusts to 14 mph in the afternoon.

Sunrise Thursday: 6:48

Sunset Thursday: 7:03

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 19	TYPE OF FIRE: Wildfire
FIRE NAME: Walker	OPERATIONAL PERIOD: September 20, 2019, Day
DATE ISSUED: September 19, 2019	TIME ISSUED: 2000
UNIT: Plumas NF	SIGNED: Diondray Wiley FBAN (T) 

INPUTS

WEATHER SUMMARY

****Review Incident Weather Forecast****

Weather: Morning valley fog, partly cloudy to mostly sunny skies.
Day Temps: 63-70 degrees
Day RH: 28-38%

20 FOOT WINDS: **Ridges:** Light and variable in the morning becoming NE 5-10mph about noon. Gust to 15mph in the late afternoon.
Slope/valley: Downslope 2-5 mph becoming upslope 3-6 gust to 12 mph.

FIRE BEHAVIOR

INPUTS:

- **Fuels:** Fuel moistures will increase with the moisture from the passing rainstorm, low temps and good overnight RH recovery
- **Topography:** Boulders and fire stressed trees can become dislodged and roll down chutes and steep drainages bringing additional debris with them.
- **Weather:** Be aware of inclement weather-related hazards.

FIRE BEHAVIOR: Fire behavior will be minimal throughout the fire perimeter and consist of smoldering in sheltered and large down and dead fuel. The potential for holdovers exists.

BRANCH I: Expect limited fire activity as yesterday's rains have increased fuel moistures rendering them less receptive to burning. Sheltered fuels may smolder and creep. Assigned work objectives should be successful. Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

BRANCH III: Expect limited fire activity as yesterday's rains have increased fuel moistures rendering them less receptive to burning. Sheltered fuels may smolder and creep. Assigned work objectives should be successful. Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

BRANCH V: Expect limited fire activity as yesterday's rains have increased fuel moistures rendering them less receptive to burning. Sheltered fuels may smolder and creep. Assigned work objectives should be successful. Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

SUPPRESSION REPAIR GROUP: Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

AIR OPERATIONS

Limited morning inversion braking to slightly unstable conditions

SAFETY

****STANDARD FIREFIGHTING ORDERS #8 GIVE CLEAR INSTRUCTIONS AND BE SURE THEY ARE UNDERSTOOD.*****

Division/Group Assignment List (ICS 204 WF)
Controlled Unclassified Information//Basic

1. Incident Name: WALKER		3.	
2. Operational Period: DAY		Branch:	Division/Group: A / C / E
Date/Time From: 09/20/2019 0700 FRI	Date/Time To: 09/20/2019 1900 FRI		

4. Operations Personnel			
OPERATIONS CHIEF	DAVE SOLDAVINI TOM BROWNING	BRANCH DIRECTOR	
DIVISION/GROUP SUPERVISOR	LOGAN SANDERS DAVID CARR (T)	AIR OPERATIONS	STACI DICKSON

6. Control Operations/Work Assignments:

- Utilize appropriate suppression tactics to keep fire in current containment lines.
- Balance the risk of exposure to hazards against the Mop Up standards for firefighter safety.
- Hold and secure completed line.

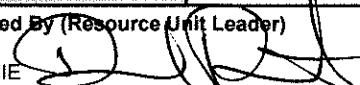

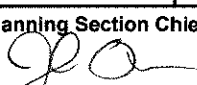

7. Special Instructions:

- Beware of mine locations.
- Continue suppression repair, following the Suppression Repair Plan. Consult with READ prior to any repair.
- Back-haul excess equipment and trash.
- No repair in areas flagged with Red and Black striped flagging.
- SOF2 Larry Wright will be working in all divisions and will contact DIVS when crossing divisional boundaries.
- FOBS will be moving throughout divisions as needed and will contact DIVS when crossing divisional boundaries.
- READ, REAF, ARCH, and THSPs will be working in all divisions and will contact DIVS when crossing divisional boundaries.

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING	<ul style="list-style-type: none"> • Use caution while driving on all incident roads. Non fire personnel speeds in the area are often faster than we normally drive • Dirt roads may be slippery when wet. Watch out for possible stream debris from the rain • Watch out for wildlife on all roads, especially during the dawn and dusk hours • Drive defensively! Expect the unexpected around every curve • Drive with headlights on; use chock blocks, keep windshields clean; use backers • Watch for other vehicles, debris, and wildlife on the roads • Use caution on area roads. The roads are very narrow with steep drop-offs
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Refer to Hazard Tree Safety Guidelines (IRPG p.22-23) • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled • Be especially alert around snags and green trees during wind events.
ALL	STEEP TERRAIN & ROLLING MATERIAL	<ul style="list-style-type: none"> • Avoid working below crews and equipment • Concentrate on your footing placement; take your time • Ensure adequate spacing between crewmembers so they can react to dislodged debris • Post lookouts to warn of rolling debris. SHOUT out to warn others • Look Up, Down and Around
ALL	MOP UP OPERATIONS	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance • Monitor fatigue, shorten shifts to increase rest where appropriate • Provide motivation to workers to maintain situational awareness and avoid complacency • Evaluate mop up distances against what is safe and necessary • Review and follow "Look Up, Look Down, Look Around" • Balance the risk of exposure to hazards against the Mop Up objective
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • NEVER work below heavy equipment • Ensure communications are established with operators • Ensure ground personnel have safety illumination, with light-sticks being the minimum • Maintain a 50'-100' exclusion area around equipment • In timber increase safety distance to 2 ½ times canopy height
ALL	CAMP CRUD	<ul style="list-style-type: none"> • See the Medical Unit at the onset of signs/symptoms • Take vitamins, drink lots of water and juice • Eat balanced meals • Get as much rest as possible • Use hand sanitizers, and take precautions when using "common use" areas
ALL	FATIGUE & COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor ALL resources for level of fatigue. • Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share Situational Awareness (hazards, changes, etc.) to those who also have a need • Radio Communications may be poor in some areas: use human repeaters as needed • Ensure all personnel are familiar with the incident and IA communications plans • Make sure all resources have radios cloned appropriately • Ensure that non-agency resources understand radio use and procedures
ALL	WEATHER	<ul style="list-style-type: none"> • "Keep informed on fire weather conditions and forecasts." • Anticipate increasing and gusty winds. • Expect increased fire behavior, including spotting. • Communicate any increase in wind speed and direction. • Be especially alert around snags during wind events.

Operation Period: 09/20/2019 Day Shift

SAFETY MESSAGE

Incident Management Team Transition

- Supervisors have changed. Know who you are working for.
- Take the time to understand the plan. Ensure all resources completely understand the assignment, the Communications Plan, and the Medical Plan.
- Briefings: Required every shift, for all personnel, for new assignments, and for changing conditions.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE BEES	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
----------------------------------	---	--

Be sure all elements of your safety plan are in place prior to engagement

Hazard Trees

- All trees need to be considered hazardous until they are evaluated.
- Even large healthy looking trees can be dangerous due to forest health issues.
- Use the look up, down, and all around process when working around or under trees.
- Minimize the number of personnel exposed, and the exposure time.
- Avoid unnecessary exposure around suspect trees during windy periods.
- Mitigate or close areas around hazardous trees in work areas.

Driving

- When driving keep the speed at or below the posted speed limit and turn your headlights on. Is the posted speed limit a safe speed under the current conditions and traffic?
- **Use caution on unimproved roads as some have soft shoulders. Some roads are also only one lane with pullouts!**
- Watch for and anticipate stock and wildlife.
- Always fasten your seat belt before the vehicle is set into motion. Use backlers.
- Don't tail gate, especially in dusty conditions.
- Slow down, slow down, and slow down!

TRAINING SPECIALIST MESSAGE

Due to the complexity change and transition to a Type 2 Incident-

All trainees on the Walker Fire will need to register or update their assignment with the Training Specialist regardless of:

- Whether you have already registered
- You have closed your training package under the Type 1 Complexity.

Use this QR code to update / register your assignment and then stop by the Training Specialist office with your Task Book and Red Card to complete the process.

***Brad Smith-TNSP
Mike Dunkel-TNSP (t)***

WALKER FIRE
Human Resource Message
September 20, 2019

Sexual harassment is **unwelcome sexual behavior**, which could be expected to make a person feel offended, humiliated or intimidated. **It is also illegal**. It can be physical, verbal or written. Sexual harassment is covered in the workplace when it happens:

- At work.
- At work-related events.
- Between people sharing the same workplace.
- Between colleagues outside of work.

I want to focus on that last point. Maybe at one time you were in a consensual workplace relationship, or everyone participated in inappropriate joking around. However when the relationship ends and you are told NO, or if someone is no longer comfortable joking in that manner and says to stop!

NO MEANS NO! AND STOP MEANS STOP!

I am just trying to help you keep your job

Adam Alvarez, HRSP - 707-373-8715
Julie Nelson, HRSP (T) – 307-421-8151

Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create to excessive erosion on the landscape. Without compromising public and firefighter safety.

- Reduce the potential for soil erosion and sedimentation
- Reduce the visual impacts of fire line as well other suppression activities when feasible
- Repair roads and drainage structures to a functioning condition
- Protect natural and cultural resources from additional potential damage

Critical Guidelines

Sensitive Sites are marked with yellow and black or red and black striped flagging.

Back-hauled all trash and un-needed flagging. Please leave safety flagging in place.

On Firelines, waterbars should be installed as described below, fire line covered with slash, and entrances blocked.

Dozer Line

Fire line Gradient (% slope)	Distance Between Waterbars ^(A) (feet)
0 to 10	No waterbars needed
10 to 20	100
21 to 40	75
41 to 60 ^(B)	50 ^(B)

- (A) These are guidelines and are not intended to restrict the implementation of more or less water bars if the need or lack of need is justified.

(B) Firefighter safety should be taken into account; if slopes are too steep for safe implementation then waterbars should not be constructed, if sensitive resources are not present.

- **DEPTH AND WIDTH: Waterbars need to be cut into surface**, do not simply push up soil.
 - Waterbar depths for **dozer lines** should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
 - Waterbar depths for **hand lines** should be at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.

Helispots, Safety Zone, Spike Camp, and Staging Areas: These fire suppression activity areas should be repaired to standards similar to fire line repair. Waterbars place where appropriate. Use cleared vegetative material, and slash for soil cover

Watercourses: Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

- Do not remove large woody debris which was in the channel prior to the fire, bucked limbs and logs in watercourses from fire suppression activities should be removed from the watercourse.
- Where fire lines are constructed within 100 feet of intermittent and perennial streams, use certified weed free straw, wood strands, or slash to increase soil cover and prevent sediment from entering the stream channel.

Summary of Suppression Damage Repair Guidelines

Water Drafting Sites: Water sources developed as a water draft site are to be restored to a condition resembling pre fire use. Remove any dams, dikes, or other impoundments that were created for fire suppression activities.

Concentrations of Slash: Concentrations of slash created by fire suppression activities along roadways, developed recreation areas, and among structures should be chipped and spread across the cleared area. Chip piles should not exceed 6 inches in depth. Where appropriate, concentrations of slash can be lopped and scattered, not to exceed 18 inches in height.

OTHER SUPPRESSION DAMAGE REPAIR NEEDS:

- Repair fences, gates, and cattle guards so that they are functional. These repairs must be related to suppression fire activities.
- Hazard trees should be felled if they pose a safety threat to the general public. Hazard trees to be felled will be identified and marked by a Division Group Supervisor or Felling Boss, using the R5 Hazard Tree Guide.

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site
F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the
instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>		
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG PAGE 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
