### INCIDENT Weather Forecast

FORECAST NO:

14

NAME OF FIRE: Walker Fire

PREDICTION FOR:

Saturday Day SHIFT

**UNIT: Plumas NF** 

SHIFT DATE:

Sept 14, 2019

SIGNED:

Mike Smith Mike Smith

TIME AND DATE

FORECAST ISSUED:

2100 Sept 13, 2019

Incident Meteorologist

...Fire Weather Watch Sunday Afternoon through Monday morning for strong wind and Low RH...

WEATHER DISCUSSION: High pressure over the region will bring another warm and dry day today. After only poor to moderate humidity recovery this morning, RH values are expected to drop into the teens most areas this afternoon with some lower teens likely. Conditions will be a little more unstable today and winds will be a little stronger as a weather system approaches from the west. This should clear out morning smoke a little quicker than the last couple of days. An unusually strong for the season Pacific frontal system is forecast to approach the coast on Sunday. This system will bring very strong winds and low humidity most of the day on Sunday. The dry windy conditions will make Sunday a critical fire weather day. Significant wetting rain is expected on Monday as the cold front moves through the northern half of the state.

#### **WEATHER FORECAST:**

WEATHER: Fair skies with smoke clearing by around 1100.

TEMPERATURES: Highs 79 to 85

**HUMIDITY: Minimum RH 12-18%.** 

20 FT WINDS:

RIDGETOP - Ridge winds south to southwest to 5 mph in the morning hours increasing after about 11 am to southwest 8-15 mph with afternoon gusts 20-25 mph.

SLOPE/VALLEY - Downslope to downcanyon to 5 mph in the morning hours\_becoming upslope to upcanyon mainly southwest to northwest 4-8 gusts to 15 mph after about noon.

HAINES INDEX: 5 with very dry air aloft and moderate instability.

STABILITY/INVERSION: Weak Inversions breaking after about 1100.

Ourlook for Saturday Night: Fair Skies. Low temperatures 38 to 50. Max RH recovery 55-65%. Ridge winds decreasing only slightly from the day about 8-12 gusts to 20 mph through the night. Slope winds Mainly southwest to northwest 4-8 mph with gusts to about 12 mph except lighter winds lower protected slopes.

Extended forecast for Sunday: Fair to partly cloudy. Highs 72 to 78. Min RH 12-18%. Ridge winds 8-12 gusts to 20 mph in the morning increasing through the morning and afternoon. Afternoon ridge winds 15-20 mph with gusts up to 40 mph. Afternoon slope winds mostly southwest to northwest 6-12 gusts to 30 mph. Wind eddies in canyons are likely.

Extended forecast for Monday: Mostly cloudy with rain or showers likely by mid day. Isolated thunderstorms possible in the afternoon. Max Temps 52-57. Minimum RH occurring early morning before rain begins at 50-60%. Southwest ridge winds 10-15 gusts 35 decreasing in the afternoon.

Sunrise Saturday: 6:42

Sunset Saturday: 7:13

#### FIRE BEHAVIOR FORECAST TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: September 14, 2019, Day DATE ISSUED: September 13, 2019 TIME ISSUED: 2000

SIGNED: Diondray Wiley FBAN (T)

#### **INPUTS**

#### WEATHER SUMMARY

FIRE NAME: Walker

**UNIT: Plumas NF** 

FORECAST NUMBER: 12

\*\*See Fire Weather Forecast for Discussion\*\*

Weather:

Fair skies, smoke clearing by 1100.

Day Temps:

\* 79-85degrees

\*10hr fuels: 4

\*ERC: 84

Day RH:

\*12-18%.

20 FOOT WINDS: Ridges: S-SW to 5mph increasing around 1100 to \*SW 8-15mph with afternoon gust 20-25 Slope/valley: Downslope up to 4mph through noon and becoming upslope SW-NW 3-8mph gust

14mph.

\*\*\*\*\*Exceeds Local Thresholds\*\*\*\*\*

#### **FIRE BEHAVIOR**

#### INPUTS:

- Fuels: Live and dead fuel moistures continue to decline. 10Hr fuels are in the single digits, current RAWS observations are 5-7% (7% is critical). Fuels above 4500' will be drier then fuels below 4500'.
- Topography: Be aware of the alignment of wind and topography. Wind speeds traveling through steep canyons can become compressed and increase in speed.

FIRE BEHAVIOR: Expect an increase in surface spread. Drier conditions will affect 10 hour fuels increasing their ability to carry fire. DIV I/K/M will see the greatest potential for isolated torching, small slope runs and spotting. When the inversion lifts at approx. 1100, fire behavior may increase in receptive fuel beds.

DIV A: There is potential for small slope runs and moderate fire behavior in receptive fuel beds. Antelope dip has the greatest area of vulnerability. Direct suppression tactics should be successful.

DIV C/E: Fire behavior will be minimal on the divisions, with the Wheeler peak area having the greatest potential. Any open line could experience slope runs.

DIV F/G: Small scale firing operations should be effective in the morning and early afternoon, forecasted winds should be in your favor. Winds have proven to become unpredictable throughout the intersecting drainages.

DIV I/K/M: Light winds in the morning and fuel moistures should support small scale firing operations. Conditions will change in the afternoon as wind gust develop. Moderate fire activity will continue to increase throughout the shift in the Clover Dip, Railroad Dip and Beaver Dip area.

DIV Q/V/X: Winds will become less favorable in the afternoon as they transition to SW with gust to 15-20 mph. Containment lines may be tested.

#### AIR OPERATIONS

The inversion is forecasted to lift 1100

#### SAFETY

#### 6. Control Operations/Work Assignments:

- · Utilize appropriate suppression tactics to keep fire in current foot print.
- · Balance the risk of exposure to hazards against the Mop Up standards for firefighter safety.
- · Hold and secure competed line.

#### 7. Special Instructions:

- Begin suppression repair, following the Suppression Repair Plan. Consult with READ prior to any repair.
- SOF2 Berry Hogge will be primarily working division E but will be available for division F and G.
- . THSP Nick Graver will be working divisions C and E.
- · FBATS will be working throughout all divisions.

# Walker Fire - Safety Message

#### INCIDENT # CA-PNF-001324

DATE: 9-14-2019 TIME: 0600-1800 Day

# **General Safety Concerns**

- **Driving-** Pedictable is preventable. Speeding=Accident. Slow down and keep an eye out for wildlife and civilians.
- **Wildlife-** Bees are becomming an issue. Avoid when possible and know the Medical Plan (ICS 206) in the event of an incident. Know your people, are any of them alergic?
- Stump Holes- Lots of stump holes are out there. Use your tools to probe in front as you walk.
- Dehydration It can take it's toll. So drink lots of WATER. Strive to drink 2 quarts per hour during heavy exertion.

# Individual Accountability

- Know where ALL of your resources are at ALL times.
- When sharing resources, ensure accountability is maintained.
- Review radio procedures with resources, and ensure all radios are properly cloned.
- Check in all assigned resources as they arrive under your supervision.
- Ensure ALL personnel check out at the end of each shift.
- Notify Branch or Communications when all personnel are safely off the line

## Make a Safety Difference

- As a supervisor, provide constant and relentless oversight.
- Stay focused on the task at hand, all the time!
- Come up with a safer way to perform a risky assignment.
- Discuss the near miss.
- Never tolerate "Hey, watch this!"
- Discuss the effects of fatigue, and mitigate the effects of fatigue.
- While in the fire zone, wear your hardhat when you leave the vehicle.
- Have a purpose in what you do.

Don't trust other drivers!

# Common Denominators of Fire Behavior On Tragedy Fires

- Most incidents happen on the smaller fires or on isolated portions of larger fires.
- Most fires are innocent in appearance before the "flare-ups" or "blow-ups". In some cases, tragedies occur in the mop-up stage.
- Flare-ups generally occur in deceptively light fuels.
- Fires run uphill surprisingly fast in chimneys, gullies, chutes and on steep slopes.
- Some suppression tools, such as helicopters or air tankers, can adversely affect fire behavior. The blasts of air from low flying helicopters and air tankers have been known to cause flare-ups.

Prepared by,

Team 4 Safety Group

1	DENT RISK ANALYSIS	(ICS 215a) Day Shift
BR/ DI	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING	<ul> <li>Use caution while driving on all incident roads. Non fire personnel speeds in the area are often faster than we normally drive</li> <li>Dirt roads may be slippery when wet. Watch out for possible stream debris from the rain</li> <li>Watch out for wildlife on all roads, especially during the dawn and dusk hours</li> <li>Drive defensively! Expect the unexpected around every curve</li> <li>Drive with headlights on; use chock blocks, keep windshields clean; use backers</li> <li>Watch for other vehicles, debris, and wildlife on the roads</li> <li>Use caution on area roads. The roads are very narrow with steep drop-offs</li> </ul>
ALL	HAZARD / DANGER TREES	<ul> <li>Refer to Hazard Tree Safety Guidelines (IRPG p.22-23)</li> <li>Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled</li> <li>Be especially alert around snags and green trees during wind events.</li> </ul>
ALL	FIRE BEHAVIOR	<ul> <li>Are you seeing what we have predicted?</li> <li>Conduct thorough assessments before starting work</li> <li>Ensure LCES is in place</li> <li>Plan &amp; Communicate your exit strategy with your crew and adjacent resources</li> <li>provide additional briefing for new resources and maintain communications</li> </ul>
ALL	WEATHER	"Keep Informed on fire weather conditions and forecasts."     Anticipate increasing and gusty winds.     Expect increased fire behavior, including spotting.     Communicate any increase in windspeed and direction.     Be especially alert around snags during wind events.
ALL	COMMUNICATIONS	<ul> <li>Share Situational Awareness (hazards, changes, etc.) to those who also have a need</li> <li>Radio Communications may be poor in some areas: use human repeaters as needed</li> <li>Ensure all personnel are familiar with the incident and IA communications plans</li> <li>Make sure all resources have radios cloned appropriately</li> <li>Ensure that non-agency resources understand radio use and procedures</li> </ul>
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel involved (inside rear cover IRPG).  Ensure LCES in place prior to engagement (IRPG p. 6)  Establish adequate safety zones (IRPG p.7) and escape routes  Use Downhill Line Checklist (IRPG p. 8)  Use "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3)  Utilize Risk Management Process (IRPG p.1)
ALL	STEEP TERRAIN & ROLLING MATERIAL	Avoid working below crews and equipment     Concentrate on your footing placement; take your time     Ensure adequate spacing between crewmembers so they can react to dislodged debris     Post lookouts to warn of rolling debris. SHOUT out to warn others     Look Up, Down and Around
ALL	HEAVY EQUIPMENT OPERATIONS	NEVER work below heavy equipment Ensure communications are established with operators Ensure ground personnel have safety illumination, with light-sticks being the minimum Maintain a 50'-100' exclusion area around equipment In timber increase safety distance to 2 ½ times canopy height
ALL	AIRCRAFT OPERATIONS	Use risk analysis to determine if any given flight is necessary  Keep personnel out of drop zones  Use air-to-ground freq. to communicate with aircraft  Use concise statements & clock directions when directing aircraft  Maintain good separation between ground forces & aerial ignition  Avoid "heli-mopping". Eliminate unnecessary pilot exposure
ALL	FIRING OPERATIONS	<ul> <li>Only personnel trained in the use of each device will be authorized to use firing equipment</li> <li>Ensure all personnel are aware of firing operation that may affect them</li> <li>Wear appropriate PPE</li> <li>Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed</li> </ul>
ALL	MOP UP OPERATIONS	Evaluate areas for hazard trees and locate stump holes for avoidance     Monitor fatigue, shorten shifts to increase rest where appropriate     Provide motivation to workers to maintain situational awareness and avoid complacency     Evaluate mop up distances against what is safe and necessary     Review and follow "Look Up, Look Down, Look Around"     Balance the risk of exposure to hazards against the Mop Up objective

#### Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training

Be Alert - Keep Calm - Think Clearly - Act Decisively

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident. IC is TFLD Jones. EMT Smith is providing medical care."

				Livir Smith is providing in

### Walker Fire Personal Mail

It's up to you to pick up and send your personal mail. Below is information that will help you make it happen:

#### Walker ICP, Taylorsville

Postal Service mail and packages can be sent and received at the Taylorsville Post Office.

Address incoming mail and packages to:

(Your Name) General Delivery Taylorsville, CA 95983

The Taylorsville Post Office will also receive FedEx and UPS packages as a courtesy to you.

#### FedEx and UPS should be mailed to:

(Your Name) 4368 Main Street Taylorsville, CA 95983

The Post Office only mails US Postal Service packages.

Taylorsville Post Office Hours:
Monday - Friday 1000 - 1400
Saturday 1130 - 1230 Knock on the (closed) retail window where the clerk normally sells stamps.
Sunday - Closed

#### Four Corners Camp

Address incoming mail and packages to:

(Your Name) General Delivery Portola, CA 96122

No FexEx or UPS arrangements have been made in Portola. The Portola Post Office will not receive FedEx or UPS packages.

Portola Post Office hours: Monday - Friday 0800 - 1700 Saturday and Sunday - Closed

# Got Pictures?

We're bringing the fireline virtually to folks for education and telling the Walker Fire story.

Email your Walker Fire images to us!

Please include your name, crew, where and when the photo was taken, and make sure everyone is wearing appropriate PPE! (Don't forget the gloves) Thanks!

# TRAINING SPECIALIST MESSAGE

# Ready to DEMOB? - Please bring with you:

- Your Task book
- A completed Performance Evaluation (225)
- A completed exit interview form
- Your trainer if possible

# Extra forms are available in our green trailer.

# **Trainers / Mentors:**

If you are leaving the incident before your assigned trainee or your trainee is reassigned:

You <u>must</u> complete a Performance Evaluation, ICS-Form 225 for the period the trainee was assigned to you.

11

# **Human Resource Message**

## **Helping One Another**

Everyone here today is playing a critical role in fighting the Walker fire. We all have our assignments that must be met in order to achieve our mission of protecting life, resources and property. Of course, we cannot accomplish our mission when one of our fellow team members may be experiencing a work and/or personal matter that is impacting their ability to keep focused and remain positive.

If we witness a team member who is having a rough go at it, become their "listening ear." Ask them how things are going. See if they want to take a break to talk. Give them the opportunity to vent and to share with you their concern. You may be the person that brings them back to where we need them to be by just listening and not talking. Just don't hug them like Smokey Bear below without the person's permission ©

Listening is often the thing needed to help someone.

# Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create to excessive erosion on the landscape. Without compromising public and firefighter safety.

- Reduce the potential for soil erosion and sedimentation
- Reduce the visual impacts of fire line as well other suppression activities when feasible
- Repair roads and drainage structures to a functioning condition
- Protect natural and cultural resources from additional potential damage

#### **Critical Guidelines**

Sensitive Sites are marked with yellow and black or red and black striped flagging.

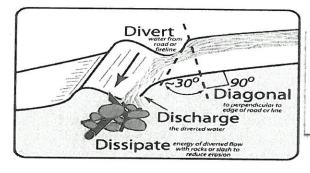

Back-hauled all trash and un-needed flagging. Please leave safety flagging in place.

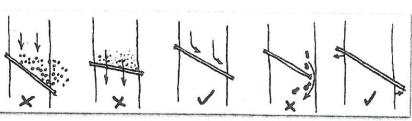

On Firelines, waterbars should be installed as described below, fire line covered with slash, and entrances blocked.

#### **Dozer Line**

Fire line Gradient (% slope)	Distance Between Waterbars (A) (feet)
0 to 10	No waterbars needed
10 to 20	100
21 to 40	75
41 to 60 (B)	50 (B)

- (A) These are guidelines and are not intended to restrict the implementation of more or less water bars if the need or lack of need is justified.
- (B) Firefighter safety should be taken into account; if slopes are too steep for safe implementation then waterbars should not be constructed, if sensitive resources are not present.
- DEPTH AND WIDTH: Waterbars need to be cut into surface, do not simply push up soil.
  - Waterbar depths for **dozer lines** should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
  - Waterbar depths for **hand lines** should be at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.

Helispots, Safety Zone, Spike Camp, and Staging Areas: These fire suppression activity areas should be repaired to standards similar to fire line repair. Waterbars place where appropriate. Use cleared vegetative material, and slash for soil cover

Watercourses: Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

- Do not remove large woody debris which was in the channel prior to the fire, bucked limbs and logs in watercourses from fire suppression activities should be removed from the watercourse.
- Where fire lines are constructed within 100 feet of intermittent and perennial streams, use certified weed free straw, wood strands, or slash to increase soil cover and prevent sediment from entering the stream channel.

#### Summary of Suppression Damage Repair Guidelines

Water Drafting Sites: Water sources developed as a water draft site are to be restored to a condition resembling pre fire use. Remove any dams, dikes, or other impoundments that were created for fire suppression activities.

Concentrations of Slash: Concentrations of slash created by fire suppression activities along roadways, developed recreation areas, and among structures should be chipped and spread across the cleared area. Chip piles should not exceed 6 inches in depth. Where appropriate, concentrations of slash can be lopped and scattered, not to exceed 18 inches in height.

#### OTHER SUPPRESSION DAMAGE REPAIR NEEDS:

- Repair fences, gates, and cattle guards so that they are functional. These repairs must be related to suppression fire activities.
- Hazard trees should be felled if they pose a safety threat to the general public. Hazard trees to be felled will be identified and marked by a Division Group Supervisor or Felling Boss, using the R5 Hazard Tree Guide.

# CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4 EXPECTATIONS

### **CONDUCT AND BEHAVIOR**

This team is committed to "ZERO TOLERANCE" of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are NOT allowed within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

#### Sexual Harassment

Inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC. What we PERMIT we PROMOTE!!!!

#### SAFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

#### **EMPHASIS AREAS**

### **Training**

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 Training Expectations – See back page.

#### **Evaluations**

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

### Injuries/Claims

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

#### Work Rest Cycles

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

#### **Position Qualifications**

Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any fire line position. Non-fireline positions may be filled based on the word of the employee pending home unit confirmation, which must be requested immediately. Contract dozer operators, tactical water tender operators and contract fallers must provide proof that they have received the annual fire refresher training.

#### Engagement/Disengagement

The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. This includes Geographic Area and incident briefings. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

#### Debriefing

All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or special incidents that occurred during the operational period.

### **Crew Time Reports/Shift Tickets**

It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be <u>reviewed and signed</u> by the next level supervisor. A finance "Rules of Engagement" document will be provided in the IAP explaining further requirements.

#### Social Media

It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident's professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.

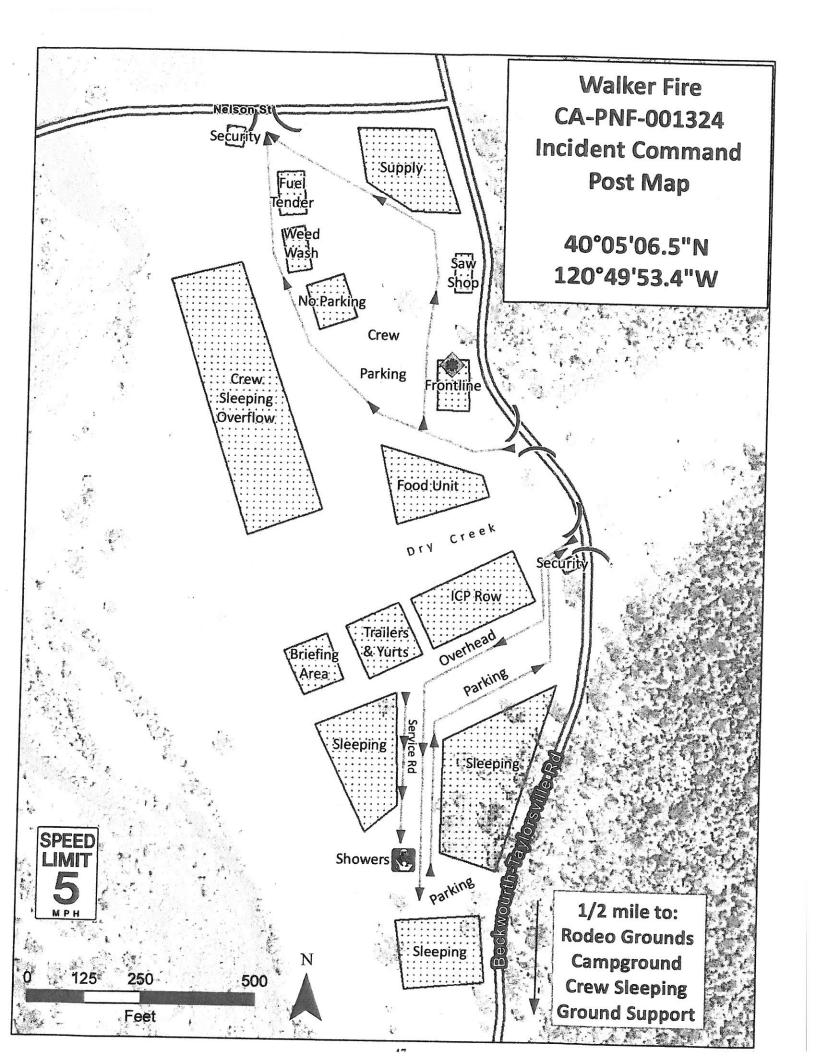

We look forward to working with you as a valuable member of this effort. If you have any questions or feedback, please feel free to contact any Command and General Staff Member.

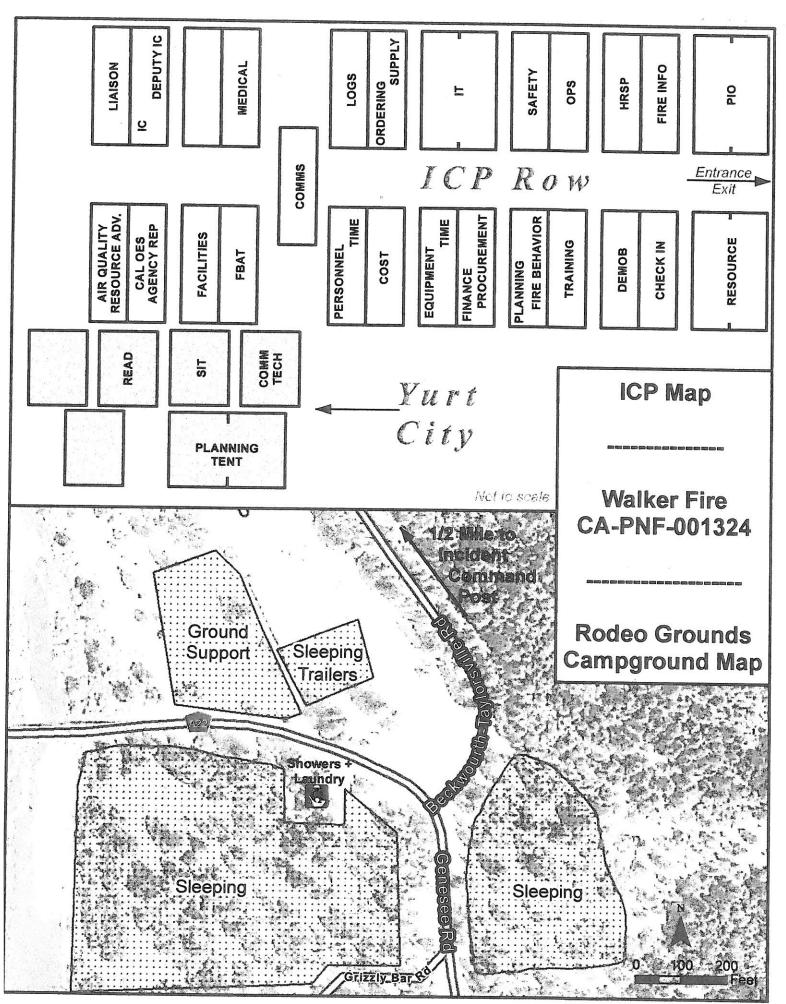

JAY KURTH

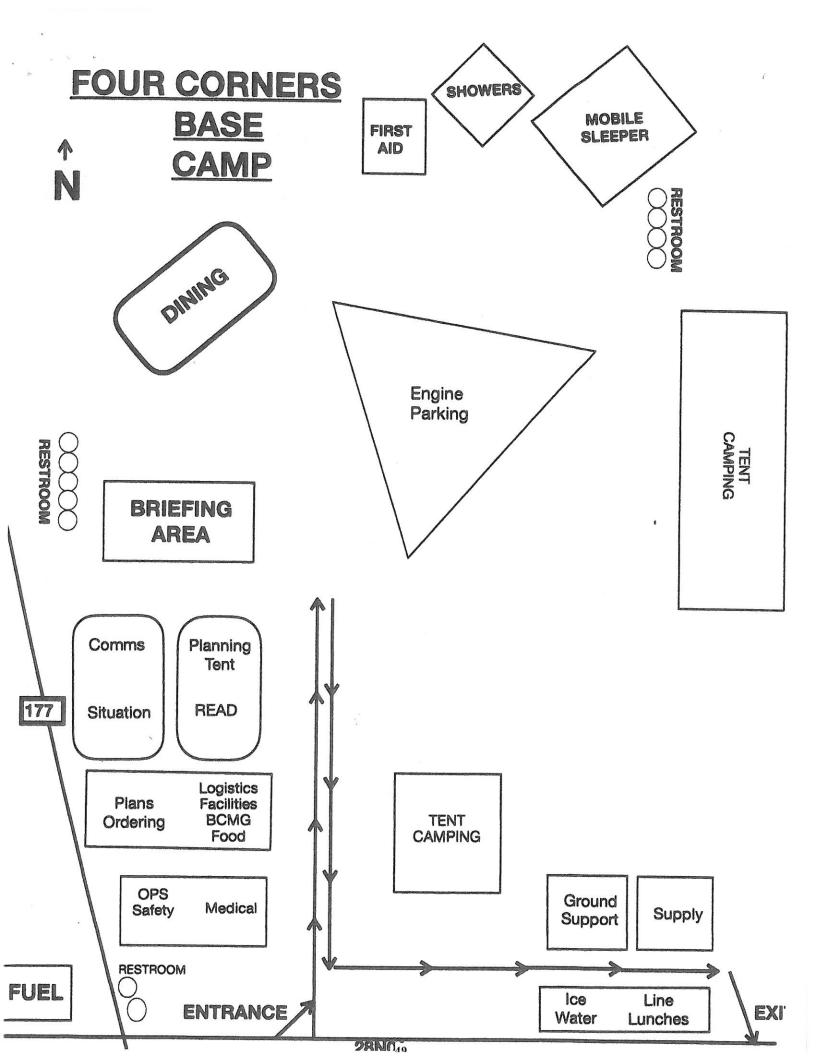

Incident Commander

ROCKY W. OPLIGER
Deputy Incident Commander

THANK YOU FOR YOUR COOPERATION AND GOOD WORK!!
