# INCIDENT Weather Forecast

FORECAST NO: 8

NAME OF FIRE: Walker Fire

PREDICTION FOR: Wednesday Day SHIFT

UNIT: Plumas NF

SHIFT DATE: Sept 11, 2019

SIGNED: Mike Smith *Mike Smith*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Sept 10, 2019

**WEATHER DISCUSSION:** The low pressure system that brought the showers to the fire Tuesday has now moved east of the region. Today will be a transition day and skies should be mainly clear as high pressure begins to build over the west coast. Cold overnight temperatures and surface moisture will likely bring areas of morning fog or low clouds, however. Significant warming and drying can be expected later today and winds will be from the less common northerly direction over the ridges. Warm dry conditions continue on Thursday as high pressure builds over the state with a return to the more normal southwest ridge winds in the afternoon. Conditions level off by the end of the week preceding the possible approach of a stronger weather system expected to move through the region early next week. Strong southwest winds are indicated this Sunday.

## WEATHER FORECAST:

**WEATHER:** Areas of morning fog and low clouds, otherwise mostly sunny.

**TEMPERATURES:** Warmer with highs 70-76.

**HUMIDITY:** Min RH 20-26%.

### **20 FT WINDS:**

**RIDGETOP -** Variable to 4 mph through about noon becoming northwest to northeast 3-8 mph gusts to 15 mph in the afternoon.

**SLOPE/VALLEY -** Downslope to 4 mph becoming upslope/upcanyon 4-8 gusts to 12 mph in the afternoon.

**HAINES INDEX:** 2

**STABILITY/INVERSION:** Inversions breaking by around noon under stable conditions.

**OUTLOOK FOR Wednesday Night:** Fair skies. Minimum temperatures upper 30s canyons to upper 40s ridgetops. Max RH recovery 60-70%. Ridge winds switching to southeast 3 to 8 mph. Slope winds becoming downslope to 4 mph after about 2000.

**Extended forecast for Thursday:** Fair Skies. Highs 75 to 81. Minimum RH 15 to 21%. Ridge winds southeast to south 3-8 mph in the morning becoming southwest in the afternoon with gusts to 15-20 mph. Slope winds downslope 1-5 mph in the morning becoming upslope mainly southwest to northwest 4-8 mph gusts to 12 mph in the afternoon.

**Extended forecast for Friday:** Fair Skies. Highs 75 to 82. Min RH 14-20%. Ridge winds becoming southwest 7-12 gusts to 20-25 mph. Slope winds mainly southwest to northwest 4-8 gust to 15 mph.

## INPUTS

### WEATHER SUMMARY

\*\*See Fire Weather Forecast\*\*

**Weather:** Partly cloudy in the morning, clearing by mid-day..

**Day Temps:** Warmer, 70 – 76 degrees

**Day RH:** Min RH 20-26%

**20 FOOT WINDS:** **Ridges:** Variable to 4 mph through about noon becoming northwest to northeast 3-8 mph gusts to 15 mph in the afternoon.

**Slope/valley:** Downslope to 4 mph becoming upslope/upcanyon 4-8 gusts to 12 mph in the afternoon.

## FIRE BEHAVIOR

### INPUTS:

- **Fuels:** Showers yesterday have increased fuel and soil moisture. Fuel availability will be reduced until drying occurs.
- **Topography:** Locations on the north end of the fire, especially in the Wheeler Fire 2007, received more precipitation than southern areas, no recent fire history. Sheltered timber areas on the East and South sides will see movement today with lower humidity values.

**FIRE BEHAVIOR:** Expect an increase in fire behavior today. Humidity levels will reach levels capable of supporting torching and spotting. Timbered locations will see the greatest fire behavior as moisture impacts were reduced by canopy cover.

**Probability of Ignition:** 70%

**DIV A/C/E:** Burn operations in the Wheeler scar will be hampered by increased fuel moisture. Areas on Wheeler Mtn. with heavier timber could see movement by end of shift. Burn through on snags is approaching the 72 to 96 hour time frame, and snag fall will represent hazard.

**DIV F/G:** Less precipitation and heavier canopies around Mt. Ingalls will contribute to favorable surface fire conditions. Light north wind component will move embers across lines but fire behavior should be within suppression capability.

**DIV I/K:** Reduced moisture on the southeast side of the fire, Clover, Railroad and Beaver Dips coupled with continuous stringers of moderate timber fuels will create moderate burning conditions. Fire will move through surface fuel with possible torching later in the day. Clover Creek does present a possible wind/drainage alignment scenario.

**DIV M/Q:** Conditions on Round Mtn., 'The Horn' will be favorable for direct suppression and mop-up. Snag fall remains a hazard. Burning opportunities in the Wheeler scar may not present themselves today.

**DIV V/X:** Fire movement will be minimal today except in pockets of heavy down material. Burning opportunities in the Wheeler scar may not present themselves today. Any direct suppression efforts should account for snag fall in a risk assessment.

## AIR OPERATIONS

Light winds from the north should allow for air operation after fog burns off in the morning.

## SAFETY

\*\* Fire killed trees impacted by fire are exhibiting a 72 to 96 hour burn through.  
Account for fire weakened snags in risk analysis\*\*

# Walker Fire– Safety Message

INCIDENT #CA-PNF-001324

DATE: 09/11/2019 TIME: 0600-1800 Day Shift

## **Situational Awareness**

In the wildland fire environment, "SA" is requirement!

- Driving: Maintain safe driving practices
- Trees: Gravity always wins. Look up, down and around
- Steep Terrain: Look for rolling material
- Fatigue: Monitor your health and that of those around you
- Concentrate: Stay focused on the task at hand
- Communications: Be clear, be concise, be accurate

## **Any Firefighter knows how Every firefighter should know why**

### **Points to Ponder**

- Vehicle accidents are a common cause of firefighter injuries – **Drive Smart**
- Wildland FF's are injured or killed more annually from falling trees – **Look Up**
- Ash pits and stump holes are the most common cause of burn injuries – **Look Down**
- FF's can be the cause of, or recipient of rolling debris – **Look Around**
- Heat, long hours, and repetition can lead to complacency and injuries – **Pace yourself**
- Multiple Resources of multiple typing doing multiple jobs = Multiple potential for injury – **Stay Focused**
- Communicate clearly and get confirmation that your message is understood – **Communicate Clearly**

### **Statistics**

- NFPA estimates 65,880 FF injuries occurred in the line of duty in 2017
- An estimated 45% of those injuries occurred during fire-ground operations
- The leading injuries during fire-ground operations involved injuries such as sprains, strains, and muscular pain attributed to fatigue
- An estimated 19% of those injuries involved loss of work
- Injuries are more prevalent between the hours of 2:00 and 5:00 PM

## STANDARD OPERATING PROCEDURES—FINANCE SECTION

---

### **WORK REST CYCLE**

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

### **OPERATIONAL SHIFTS**

Pay status for assigned overhead and crews on the fire-line will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

### **DUTY STATUS**

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

### **PERSONNEL/EQUIPMENT TIME REPORTING**

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (ie. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

### **MEAL AND OTHER WORK BREAKS**

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fire-line **MAY BE** compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fire-line personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.**

HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

### **MEAL AND OTHER WORK BREAKS**

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fire-line **MAY BE** compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fire-line personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.**
